AIR SERVICE MAKES PICTURE MAP OF U. S.

Largest Aerial Photographing Ever Attempted.

Washington.—The largest aerial photographic mapping project attempted by any country is now under way in Texas and it is expected that when the work has been completed there will have been photographed 10,000 square miles. The time required in which to take the photographs, develop and fit them together into one huge map is estimated at three months. This work is being done by the photographic section of the air service of the army.

Maj. Gen. Mason M. Patrick, chief of the air service, believes the making of maps is the most important peace-time work in which that service can be engaged, and says that these pictures are projects on which also the corps of engineers and United States geological survey are working. The importance of the enterprise may be grasped when one considers the element of time and the great cost to the country of the work. By aerial photography the saving in time is estimated at 75 per cent and 50 per cent in the cost of the survey.

Many Requests Received.

The office of the chief of air service is receiving many requests from governors and other officials of state, including counties, asking that the services of the photographic section of the air service be utilized in state and county survey work.

Projects on which the army is now engaged include a map of Indiana and of Chicago and vicinity, 1,500 square miles. This work is being done by the army photographic section stationed at Chanute field, Ill.

The men at Scott field, Mo., are making a 500-mile map of a section of Missouri, co-operating with the United States geological survey and the corps of engineers. Approximately 1,000 square miles of the Missouri river is being taken from Kansas City to St. Louis. Air section photographers from Fort Riley, Kans., are mapping 500 square miles in the vicinity of St. Joseph, Mo., working with the United States geological survey.

The air photographers also are cooperating with the corps of engineers and United States geological survey in Arizona, California, Hawaii and the Philippines.

The crew of the planes doing this work consists of a pilot and an observer, the latter expert in making map pictures. The officers are selected from those who have completed courses in experimental work conducted at the air station in Dayton, Ohio.

Work for This Year.

General Patrick expects to photograph 30,000 square miles during the current fiscal year. It is the plan to make a picture map of the whole United States and it has been estimated it will take from five to eight years to complete it.

The photographic sections of the air service are at fulltime through out the country as follows: Fort Bliss, Texas; Langley field, Va.; Rockwell field, N. Y.; Maxwell field, Montgomery, Ala.; Chanute field, Chanute, Ill.; Wilbur Wright field, Dayton, Ohio; Mitchel field, Long Island; Fort Riley, Kansas; Crissy field, Calif.; Scott field, St. Louis, Mo.; Kelly field, Texas; Post field, Fort Sill, Okla.; Lake Charles, La.; Langley field, Panama Canal zone and the Philippine islands.

Old Should Not Shed Teeth

In a lecture at the British Dentists' hospital in London, Dr. Harry Campbell said that shedding the teeth in old age was not a normal senile change, for healthy teeth in healthy sockets become firmly fixed with age.

School Meeting to be Held Friday in the Auditorium.

A call has been issued by the Board of Education of School district No. 1, city and township of Charlevoix, over the signature of its president, Mrs. Arthur Bergeon, for a meeting of the taxpayers of the district to be held in the auditorium of the high school, on next Friday evening, Nov. 7, at eight o'clock, for the purpose of considering purchase of the material of the former skating rink and the erection therefrom of a suitable building for athletic purposes. All voters and taxpayers are requested to be present.

PIONEER WOMAN PASSED AWAY

Mrs. Elizabeth Newman 79 Resident for Sixty Years.

Mrs. Elizabeth Newman, 79 years of age, passed away last Saturday at 3 o'clock a.m., following a gradual decline that has been persistent for several years, due to advanced age.

Mrs. Newman was a pioneer of this region, a resident here for nearly sixty years. She was the widow of the late Henry Newman who passed away about four years ago. She was a kind, charitable citizen, a good neighbor and friend and was highly regarded by acquaintances.

She is survived by one daughter, Mrs. Bert Crandall of Ellsworth, and two sons, George H. of Long Beach, California, and Ralph Newman who remained with his mother at the family home on Sheridan street, from which the funeral service was held Monday afternoon, Rev. C. W. Long officiating.

MALE QUARTET HERE MONDAY

Concerning the National Male Quartet, the notable company which will appear here on the Lyceum course Monday evening, Thurlow Lieurance, well-known composer of "By the Waters of Minnetonka," recently wrote:

"I can frankly say that this undoubtedly is one of America's best quartets, if not the best. They sing the best classics written for male voices. Besides being a fine singing organization, composed of fine fellows, they are excellent entertainers."

The National Male Quartet is composed of four genuine artists and the company has taken a high place in the hearts of music lovers.

The entertainment feature of the program given by the Nationals make this company one which will appeal to everyone in the audience.

Steamer Griffin Held Up by Gale

Heavy weather held the S.S. Griffin, Captain James H. Gallagher, in this port several hours last week. Thursday night the wind was blowing a regular gale from the southeast and later veered to the southwest. Encountering heavy seas near Fox Island the ship put into this harbor for shelter, remaining until the wind subsided to a point when the ship could be navigated with safety, after which the Griffin continued its trip to Escanaba.

COOLIDGE-DAWES ARE BIG WINNERS

Millions to Spare for the Republicans Landslide Over Nation

Radio fans tuned in last Tuesday night with the expectation of hearing news pertaining to the results of the general election. In this they were not disappointed as news from broadcasting stations came in early, continuing throughout the night, first from the eastern states and later from the middle and western sections with but little interference or disruption of the service.

From the first report President Coolidge took the lead and at no time did he show evidence of taking anything but first place, maintaining his first position gradually increasing his lead, continuing to pile up electoral votes until he reached a point where electoral votes were of value in so-far as increasing his majority was concerned and at midnight the Republican electors numbered 350 or 84 more than was necessary to insure the election of the Republican nominees, with other republican and doubtful states unreported.

LaFollette made a "wonderful" showing. He carried part of his home state, Wisconsin, but received a sufficient number of votes to warrant his claiming the electors thirteen in number. Aside from his home state he made a miserable showing, receiving a few scattering votes throughout the nation, in some localities not a single vote for the LaFollette Electors.

Davis proved a disappointment to his friends and party, but succeeded in carrying most southern states, but in the west, middle west, north and east ran far below expectations.

COUNTY VOTE, RETURNS NOT ALL IN

The following is the vote in Charlevoix County last Tuesday according to unofficial returns with two precincts unreported.

Electors:
- Republican ... 3072
- Democratic ... 361
- Progressive ... 347

Governor:
- Alexander J. Groesbeck ... 2593
- Edward Frensdorf ... 619

Lieutenant Governor:
- George W. Welsh ... 2500
- Michel J. Doyle ... 369

Secretary of State:
- Charles J. Deland ... 2482
- Frank C. Jarvis ... 290

State Treasurer:
- Frank D. McKay ... 2490
- Frank W. Merrick ... 307

Auditor General:
- Oramel B. Fuller ... 2392

Attorney General:
- Andrew B. Dougherty ... 2416
- Howard W. Cavanaugh ... 257

United States Senator (full term):
- James Couzens ... 3050
- Mortimer E. Cooley ... 492

United States Senator (Vacancy):
- James Couzens ... 1965
- Mortimer E. Cooley ... 141

Representative in Congress:
- Frank D. Scott ... 3146
- Prentiss M. Brown ... 324

State Senator:
- William J. Pearson ... 2604

State Representative:
- John M. Harris ... 3228

Judge of Probate:
- Servetus A. Correll ... 2656

Sheriff:
- Charles Novak ... 2578

County Clerk:
- Charles H. Emrey ... 2565

County Treasurer:
- Joseph Wm. Flanders ... 2127
- Mary A. Cooper ... 1632

Register of Deeds:
- Frank E. Bird ... 2389

Prosecuting Attorney:
- Arthur L. Fitch ... 2547

Circuit Court Commissioner:
- Lisle Shanahan ... 2452

Drain Commissioner:
- Archie Alcox ... 2506

Coroner:
- E. F. McMillan ... 2142
- Robert B. Armstrong ... 2122

Surveyor:
- Ernest A. Robinson ... 2151

County Road Commissioner:
- Samuel E. Rogers ... 2077

CALVIN COOLIDGE

Elected by overwhelming vote last Tuesday, President of the United States. People turned out en masse throughout the nation to honor candidate with votes. 266 electoral votes necessary to elect exceeded by approximately 100. With the largest number of votes cast at the election than at any time in history. In every respect predictions made by party leaders were completely verified in returns made, even to predictions that appeared to be greatly exaggerated. Reports indicated that Republicans have increased their majority in both the upper and lower houses of Congress.

VETERAN LIVES AT GRANT'S FIRST CAMP

Sole Survivor of General's Original Command.

Springfield, Ill.—Eight miles west of Springfield, on the public highway to Jacksonville, Israel F. Pearce, patriarch, veteran of Grant's army and participant in Sherman's march to the sea, lives in solitude on the land where General Grant watched camp on his first campaign against the Civil war.

Pearce, the only man now living out of the entire regiment which went into encampment on this spot of ground the night of July 3, 1861, maintains a guard over the old camp ground and over "General Grant's tree," a large, peculiarly shaped black walnut tree under which Grant wrote his orders.

Raises His Flag Daily.

Every morning at sunrise the tattered old flag belonging to Pearce is raised from a 70-foot flagpole near his house and every evening at sundown the flag is lowered.

Pearce acts as a guardian for this historic spot and is glad to relate its history to passing tourists, although the historic connection is known to few people and no marks, save the veteran's face, are to be seen on the land.

General Grant's tree," some three feet in diameter, stands near the house. Here scarce feels tourists, he saw Grant ... ing astride a pony and ... the ground, writing out the ... day's orders. Grant's ... a new leaf from the ... addressed his ... ment from ... ot in air where the tall ... grass ... stands.

... march of the regiment ... only first Illinois infantry ... Iowa Camp Yates ... Ill., and the first ... reached about 5 o'clock ... Pearce ...

"The ... was halted in columns of ... ies in the woods, arms were stacked and when wagons came into ... up each company unloaded its ... on, arranged the tents by spreading them on the ground, and ... sound of the drum the tents were raised; at two sounds ... reached, and at the third ... es were driven and the regiment ... under canvas in its first ... camp.

Many Stragglers in March.

"The first day's march was attended with hardships and there were stragglers and ... gives. The punishment given was ... a guard duty, both for officers and ... men. The men made camp fires and ... ed their first meal in camp at the ... time.

"During the first evening, officers call was sounded and Grant, then Colonel Grant, talked to the men, emphasizing the absolute necessity of enforcing respect for the inhabitants of the country through which the regiment was passing. The 'captains of the companies were made personally responsible for the acts of the men."

Pearce was quartered both at Fort Henry and Fort Donelson, and on July 4, 1863, marched into Vicksburg with Grant and his army; just two years after the regiment left its first camp near the walnut tree. From Vicksburg, Pearce went with Sherman on his march to the sea, through the Carolinas and on to Washington. He participated in the grand review up Pennsylvania avenue at the close of the war.

Stray Bits of Wisdom.

Fear, like spare diet, starves the fevers of lust and quenches the flames of hell.—O. W. Holmes.

J. W. FLANDERS WINS ON SLIPS

Election results in this county, other than for County Treasurer has at no time since the primary election been in doubt. Naturally everyone looked for a big Republican majority, nor in this were they disappointed. The county Republican ticket was unopposed by other party tickets, and the only contest in county affairs was between Mrs. Mary Cooper, nominated for County Treasurer at the primary election, and Joseph Wm. Flanders, of Eveline township, the latter defeated primary candidate.

At the urgent solicitation of friends Mr. Flanders waged a fight for election against the regular nominee, solicited the support of electors, provided slips upon which his name appeared for the use of voters, made his fight against heavy odds and won the coveted election at the polls, defeating the regular nominee by several hundred votes, establishing a precedent, heretofore considered both impracticable and impossible, yet wholly confirming the phrase "it couldn't be done, but he did it."

THE NATIONAL MALE QUARTET

Appear Here Monday Evening in Lyceum Course.

The National Male Quartet, which will appear at the Palace theatre Monday evening on the Lyceum course, is a notable organization. The members of this quartet are, first of all, singers of rare ability and they present the highest type of quartet music. But in addition to their musicianship they are entertainers par excellence.

Charles Cox, basso, is director of the quartet. His voice has a phenomenal range, reaching from F above to pedal C below. He is also a capital character comedian, and his sketches form an unusually entertaining feature of the program. Mr. Cox was captain in charge of an entertainment division in the A. E. F. during the Great War serving immediately under General Pershing.

Charles Nicholson is first tenor. As a soloist he is known for his renditions of sacred numbers from leading oratorios.

Stanley Graham is second tenor and pianist. His piano solos from such composers as Grieg, MacDowell and Debussy are a never failing source of pleasure to the audience.

Cliff Cline, baritone, features with solo numbers. His is a big glorious voice, and his repertoire, includes the best selections written for men singers.

Those who hear the National Male Quartet are assured a splendid musical entertainment treat.

Hunting Party Go North for Big Game

Harold Meggison and Forest Fowler will spend their vacation in camp at some point north of Newberry, and as they carry with them a license for taking big game it is undoubtedly their intention to bring back with them tangible evidence of their skill as hunters of big game. They make their trip by automobile and will be accompanied by Ira A. Adams to Newberry, who will continue his trip to a point further west where he will join a party of friends in camp at Lake Gogebic. Thomas B. Meggison of Central Lake, will join the Meggison Fowler camp later in the season.

EXTENSIVE IMPROVEMENT

To be Made at Sears Fox Ranch—Complete this Fall.

The Sears Silver Black Fox Ranch on the South Arm of Pine Lake is undergoing extensive improvements to be completed before winter sets in. A maternity house is under construction and nearly completed. This building is to be 20x60 feet in size, composed of inside pens 8x10 feet, and outside pens of 10x30 feet, separated by shoots, which will close automatically, and will be equipped with little nests for mothers and a heating plant will be installed.

This arrangement will be a decided improvement over present conditions, providing comfort for the animals, and thus greatly diminishing the mortality due to exposure to the cold winds, rain and snow in spring, just when the young are at the most tender age.

There will also be a concrete floor with drains, and an electric lighting plant which will supply service for the residence, barn and fox-house.

DIED IN SOUTH OF BRIGHT'S DISEASE

Son-in-Law of Mr. and Mrs. H. S. Harsha, Gadsden, Alabama

Mack Gilliland Owen, son-in-law of Mr. and Mrs. H. S. Harsha, of this city, died at the home of his father, Mr. A. J. Owen, at Gadsden, Alabama, on the 21st of October, after a protracted illness of Bright's disease. Mr. Owen was born and reared in Gadsden, for many years had been construction engineer for the Smallman-Brice company at Birmingham, where he and his wife resided.

He was forty years old at the time of his death; a member of the Methodist church, a Mason and Knight Templar, which organizations conducted the funeral ceremony. He was buried in the Owen private cemetery at Gadsden.

His widow was formerly Miss Amy Harsha, who, until the time of her marriage, nearly twelve years ago, lived with her parents in Charlevoix.

SUMMER VISITOR CALLED

Mr. V. E. Shwab at Family Home Sunday Night.

A telegram from Mr. George Shwab to Dr. Robert B. Armstrong, that was received here Monday forenoon, contained the information that Mr. V. E. Shwab passed away at his family home in Nashville, Tennessee, Sunday evening.

Mr. Shwab has with his family been a regular summer citizen of this city, occupying his cottage on the grounds of the Charlevoix Summer Home Association for a long term of years, being one of the regular summer people making it a point to arrive here early each season and remaining well along toward the last.

During his years here he made many close personal friends throughout this region and had perhaps a more extensive acquaintance in Northern Michigan than any other visitor in this section of the state.

For the past two years his health was not what his friends desired. He has failed gradually for some months, the final dissolution coming Sunday evening at 9 o'clock.

Mr. Shwab is survived by his wife three daughters, Mrs. Paul Davis of Nashville, Mrs. Otto Lindenberg, Columbus, and Mrs. Ben Tate of Cincinnati; and three sons, George A., Felix and Hugh Shwab, of Nashville, Tenn.

"UNCLE GEORGE" PROPHET OF ROAD

Following Taken from "Chicago Commerce" of October 18

George H. VanPelt in seasonal transit between north and south is now turning away from Michigan and again toward Florida. He is a visitor these days at Association headquarters. This year he has extended his youth by an excursion as far north as Nova Scotia. He has recently been lending his counsel to the Michigan Tourist and Resort association meeting in Grand Rapids. It was his advice that Michigan could learn much from Florida in the entertainment of tourists.

As a good roads prophet he believes the maximum load of sixteen tons for traffic on concrete, this now being the requirement in Illinois and Michigan, will be made a national requirement in the near future. He pleads that roads built to carry sixteen tons should not be expected to carry twenty and that a heavy penalty be imposed upon anyone carrying an excess.

Again to all concerned he reaffirms his own cardinal doctrines for a happier country, namely, good concrete roads and better hotels. Interested Association members will not forget that a VanPelt membership battalion—old guard workers—was organized in 1924, and it is proposed to produce an important membership increment before this year wanes.

The Oldest Bank in Charlevoix County
40th Year in Business

1884 1924

Advice and Information---

on business and investing is part of this institution's conception of service to its customers. It makes no charge for either. And in addition we have many reliable channels for drawing upon the advice of others. Few depositors value a whole month's service of the general sort as much as they do a half hour's attention of the special sort. This bank gives both!

$1.00 OPENS A BANK ACCOUNT $1.00

CHARLEVOIX COUNTY BANK

NICHOLLS, BUTTARS & BRIDGE

"The Bank on the Corner."

HONEST J. ATKINS' POLICY

By PEARCE THORNE

THE old woman behind the cigar counter in the lobby of the bank building was flustered by the rush of customers. This may have been the reason she gave John Atkins too much change. She gave him three one-dollar bills, and instead of a fourth one, gave him a five-dollar bill. So that instead of four dollars change he got eight.

A queer little thrill ran through John Atkins when at the street door he made sure of it. It was a thrill especially strange in that it ran through the bosom of a bank president whose salary was fifteen thousand a year plus a hat ambitions came to it in the form of stock business from successful borrowers.

John Atkins was surprised at himself. He was surprised that he continued down the steps and strolled up the street, determining to settle this matter of unexpected thrills before he retraced his way and returned the five-dollar bill. The trembling old woman at the cigar counter. The day was balmy, his cigar was mildly stimulating, and after giving down to assure himself that his gray vest, black shoes and gray spats were immaculate, he belatedly crossed the street, unhurriedly thanking heaven that he was still young enough to be interested in himself.

He saw at once that the incident—regardless of the sum involved—struck a chord which vibrated throughout the whole being of moral Atkins. For this reason it was not only interesting, it was vital—because his reaction to the incident was the individualistic test of his character. It disclosed his character, and at the same time did not even remotely impinge his reputation. That, he knew, like Caesar's wife, was above suspicion. He was one of the few men in "Wall Street" whose presence as chairman of an organization committee insured that a fair distribution would be made of the milk in the coconuts. He had used prudence between temporarily affiliated "crowds" who had obligations to "get even" and introduced an element of friendliness and fairness into the most business-like meeting. Somehow had called him "Honest John Atkins." This name had fitted him like an old hat and had stuck to him like a good relation. Ever since, he had been "Honest John Atkins," and to preserve that title for himself had become something as near as he ever got to a religion.

So much for reputation, he thought, shifting his cigar to the other side of his close-cropped gray moustache and turning the corner at Wall street on his way to the post office. So for the ultimate morality inherent in a five-dollar bill.

Consideration one: Did he need the money? Answer: He did not. Consideration two: Did the old woman need the money? He remembered that the humiliation of the little shop had been under the supervision of a hatchfaced, flashily dressed, oily-going man who had ordered the old woman about like a slave, making her more treasonous than ever. The flashy oil-going man seemed the power behind the throne, and the loss therefore would fall upon him. The old woman consequently might be dismissed. The question became: Did the young man need the money? Apparently he did not. Therefore the matter of human needs—the sustained phase of the subject—had been disposed of, and the problem now pivoted upon the purely moral and intellectual question: Shall I return this five-dollar bill; and if so, why?

John Atkins was rather pleased with his analysis of the matter so far. With an amiable smile on his ruddy face, he patted the small package of bonds in his pocket. He had told a customer in the bond room he would address, register and mail this package to Little Rock, Ark. And he always kept his word. It was such little personal touches that showed John Atkins a master of detail.

"And if so, why?" John Atkins would think of no reason why he should return the five-dollar bill. Of course, it would be the conventionally "honest" thing to do. But rules—reflected—are made for people unable to guide themselves. A man of his caliber could afford to figure things out on their merits. A man of his caliber was really superior to ordinary laws. He felt a sudden rush of pleasure at thinking of himself as being that sort of man. He threw away his cigar and entered the post office.

"I want to register this package," he said at the registry window, and he slid the five-dollar bill across the glass counter with a package of bonds.

The man behind the window turned and called to someone in the rear of the room.

"Heres another one, Jim," he shouted.

In a moment the second man had come over to the window. He read in the five-dollar bill, stretched it out and looked carefully at one of its corners. Then he glanced with quick suspicion at John Atkins. But his square face with its pug nose and blue chin scrubbed into a smile as he recognized the banker.

"It's the love of Pat, Mr. Atkins" he chuckled. "I was just about to pinch you."

"This globe's phony. They've been a lot of 'em loose around here lately, and we're on the trail. I want her now. Kin you remember when you got this little bee-bricker?"

John Atkins felt himself grow warm as someone had had the audacity to hand him a counterfeit five-dollar bill to put into a banker. In the position of effecting suspicion curiously.

"I most certainly can, Casey. You were with me and we can get there before they close."

When the old woman looked up and saw Mr. Judge Casey was disclosing the closed her eyes and would have fallen had he not caught her by the arm.

"There, there," said Casey soothingly. "You mustn't take on so. It's just a talk we'll have, and then you'll be home in time for supper."

The old creature drew her greenish black shawl more closely about her head. Suddenly her knees gave way, and Judge Casey's arm she sunk to the floor.

"She moaned, "I was afeered! Charley said it was all right . . . and he believed him . . . but all the time I was afeered. . . ."

"Where is Charley now?" asked Hon Judge Atkins.

A dim radiance came in her glazed eyes, like a lamp lighted behind black curtains.

"Ain't you got him?" she cried. "Ain't you got my boy?"

"No, yet," said Casey.

She held out her trembling arms to get Charlie and all his gang rushed through the grand jury so that they could be tried at this term of court if he couldn't be found out we didn't ketch 'em." Casey cleared his throat. "That is, we didn't ketch nobody but the old woman, and I came to see you—to see if you didn't want to drop the case against her. She's technically guilty, all right; and we can convict her in twenty minutes. She knew Charlie printed the bills. But she says she didn't know it was wrong. She didn't think her boy would do wrong. Of course, ignorance of the law is no excuse. But I thought—well, I just thought I'd come by and talk to you about it."

Honest John Atkins leaned back in his chair and with his fingers clasped on each chair arm, put the tips of his long, blunt fingers together. The counterfeiting gang had invaded the sacred precincts of his own personality. He himself had passed one of the bills. A feeling of indignation pervaded him.

"Mr. Casey," said he, "we must consider first of all our duty to society. If we permit dishonest persons to escape we shall never succeed in stamping out dishonesty. You may say to the United States attorney that my institution insists upon a prosecution."

Casey got reluctantly to his feet. At the door he paused and looked back; but as if realizing the futility of discussion, jabbed his derby over one eye and went scowling down the corridor.

For Buffalo Bill Monument

There is a flat cemetery slab over Colonel Cody—Buffalo Bill—on top of Lookout mountain, Colorado. This is turned over to visitors with ordinary chicken wire and on the concrete are hundreds of pennies, coins, nickels, dimes and even larger ones, which the visitors have thrown there. The chicken wire is to prevent the souvenir getting into the money with a stick. The object of the collection is to build a real monument over the last resting place of Buffalo Bill.

Teacher-Gravediggers

According to an old record the duties of an English schoolmaster of 1661 were as follows: Serve as court messenger; to serve summonses conduct certain ecclesiastical services of the church, to lead the Sunday choir, to ring the bell for public worship, to dig graves, to perform other occasional duties."

Store Well Protected

Fifty miles of wire are used in the burglar alarm system of a store in London.

Air and Sunshine Only Deepened Tyrian Purple

Purple and mauve are, in our vari able climate, the most unlikely colors which can be worn, as they quickly fade, observes a writer in John o' London's Weekly. This was not so with the famous Tyrian purple, which in place of fading, was deepened by exposure to the air.

Its manufacture was a great source of wealth to the merchants in the ancient city of Tyre, which had a world-wide celebrity for its dyeing and weaving establishments.

The coloring matter was procured from the shellfish, murex trunculus which was found in the Mediterranean and chiefly on the coasts of Asia Minor and Phoenicia. The quantity in each shell was very small, hence great quantities were required. The murex are noted for their bright colors and for their fantastic shapes.

Fabric to be dyed was sometimes prepared with sea water. The natural dye, as found in the shell, was thick brushed over it two or three times, after which it was exposed to the air and sunshine. At first a faint yellow, it turned to green, then finally to deep purple, and the color was "fast." During the process a disagreeable odor was used, and clung slightly to the fabric for some time after.

Poetical Burmese Belief

This is a belief of people of Burma. Dorothy Bix says that the Burmese believe that the soul, in the form of a butterfly, leaves the body while we sleep. They will never waken a sleeper for fear his butterfly may not be able to get back quickly enough to its habitation, the soul having gone wandering during the person's sleep.

Causes Climatic Changes

A famous scientist says that with in the earth is a large wave that moves around the planet once every 8,800 years. The wave slightly moves the position of the earth's axis and poles, resulting in climatic changes

THE KITCHEN CABINET

(C), 1931, Western Newspaper Union.)

WEEKLY MENU SUGGESTIONS

SUNDAY—Breakfast: Sliced watermelon, scrambled eggs, coffee cake. Dinner: Crown roast of lamb, green peas, raspberry ice cream. Supper: Popcorn and cream, cookies, tea.

MONDAY—Muskmelon, frizzled beef. Dinner: Fried chicken, buttered beans, Supper: Egg toast, iced buttermilk.

TUESDAY—Breakfast: Ripe pears, oatmeal, cream, toast. Dinner: Fried green apples and onions. Supper: Omelet, sponge cake.

WEDNESDAY—Breakfast: Harvest apples, bran flakes, cream, griddle cakes. Dinner: Minced lamb on toast, head lettuce salad, lemon pie. Supper: Eggs in tomatoes, baked.

THURSDAY—Breakfast: Plums, whole wheat, top milk, bacon, toast. Dinner: Baked ham, mashed potatoes, Supper: Omelet, parker house rolls, iced tea.

FRIDAY—Breakfast: Watermelon, muffins, coffee. Dinner: Broiled fish, tartar sauce, sliced cucumbers, raisin pie. Supper: Lyonnaise potatoes, sardines, buttermilk.

SATURDAY—Breakfast: Fruit, sliced hash, coffee. Dinner: Barbecued chicken with onions, sour string beans, Supper: Graham gems, blueberries, cake. Raisin Pie.

Chop one cupful of raisins, add one cupful of sugar, juice of one lemon, one cupful of boiling water, bring to the boiling point and add five tablespoonfuls of flour mixed with a little cold water. Boil until the starch is well cooked, add a tablespoonful of butter and a pinch of salt and nutmeg. Bake in two crusts.

Sour Beans.

Cook string beans until tender, after slicing them. Pour two slices of bacon and fry until brown, add the beans, stir until well mixed, then add a tablespoonful of boiling hot vinegar, salt and pepper to taste. Some like a little sugar. Cook until heated through and serve hot.

In the school of experience everybody pays his own tuition and nobody ever graduates.

CHOICE DISHES

A dainty dessert now and then is relished by the best of men.

Date Tart With Cream.—Beat four eggs, add one cupful of sugar and beat again, stir in six tablespoonfuls of fine bread crumbs with a teaspoonful of baking powder, then add one-half pound of dates stoned and cut fine, one cupful of walnut meats coarsely chopped. Pour into a well-greased pan and bake one hour in a moderate oven. Cut into squares and serve topped with whipped cream, garnish with a cherry.

Orange Charlotte.—Soak one and one-half tablespoonfuls of granulated gelatin in one cupful of cold water; when soft add one cupful of boiling water, two cupfuls of canned crushed pineapple, one-half cupful of sugar and stir until well dissolved. While the mixture is cooling beat vigorously now and then until very stiff two cupfuls of cream and as soon as the mixture becomes stiff fold in the whites of two eggs; beat again until cold, then add, carefully folded in, one cupful of whipped cream. Serve in sherbet glasses with or without lady fingers. Serve very cold.

Frozen Fruit Salad.—Mix together one cupful of crushed pineapple drained from its juice and cut into small pieces, one cupful of loyal Anne cherries freed from pits, into fourth pound of marshmallows quartered, one-fourth pound of blanched almonds, cut into halves and set away to chill. For the dressing take four egg yolks, four tablespoonfuls of sugar and four tablespoonfuls of tarragon vinegar. Heat to a cream, then cook gently over hot water until thick. Chill and fold in a pint of stiffly beaten cream. Serve some of the dressing for serving over each slice of the fruit and nuts and pack in an ice cream mold. Bury in ice and salt for three hours. Serve after one hour in sherbet cups.

Croydon Chicken Pies.—Make small pastry shells of rich crust, fill with seasoned chicken, top with a potato and carrot ball or two, with a bit of onion, then cover with a small circle of the baked pastry and the pie is ready to serve.

Schnitz and Knep.—Soak a pint or more of sun-dried apples over night; cook in the same water in the morning; place a ham bone on which there is some meat in cold water to cover and simmer for an hour; then add the soaked, drained apples and cook until they are very tender. Sprinkle with a little brown sugar to make slightly sweet and continue to simmer another two hours or more. Now the knep, which are very nice dumplings are prepared thus: Beat two eggs well, one cupful of sweet milk, a pinch of salt, a tablespoonful of melted butter and a teaspoonful of baking powder sifted with enough flour to make a stiff batter. Drop by teaspoonfuls into the boiling water and cover closely, cooking ten minutes without removing the cover. Serve in a deep dish with the apples and liquor over the dumplings.

Two "Pipes of Pan"

The Pipe of Pan was called the Syrinx, the legend being that the water nymph Syrinx was changed into a reed to escape from Pan, who loved her. He took the reed, cut it into seven pieces of graduated length, joined them together and fashioned the instrument which he called by her name.

BRUSHED WOOL KNIT COATS; ADORNING EVENING TOILETTE

LUXURY of luxuries! A soft, downy brushed wool coat colorfully presented to the point of fascination! Of irresistible appeal to women of fashion are these supremely smart and distinguished wool imports proving. Visualize, for instance, a three-quarter length coat of sand-colored brushed wool, featured with a large overplaid of red and blue. Does the description not tempt one to wend one's steps toward the nearest knitted apparel department or specialty shop? For further details of color, fashion, and finishings in general refer, if you please, to the picture herewith. This is the type of brushed wool coat which is the idol of every well-dressed and sportswoman whose delight is in keeping in step with the mode.

When it comes to novelty topcoats for the sports wear realm one thought out all fashionable this season, knitted stylists are glorifying the idea through the medium of the knit. A recent cast of models of most unique and interesting variety. These are often trimmed with collars and cuffs of knitted suede, which is also used in the making of the coat. That breezy young reporter, with a keen nose for news and a tongue ready with the latest slang and smart journalese, was a boon friend of the book store proprietor. And after he met Jessica, it did not seem to bother him if, when he dropped in for a chat, he found the proprietor's daughter there. Jessica was a pert young miss and a pretty one, too, and the two got along famously. Their friendship ripened into love, and they were married.

Time changed, but not for grandmother. And Jessica, for whom there was no intervening generation, was frequently hard put to it for her good times and innocent girlish desires. Both Jessica's parents had been killed in a steamer collision, and her father's mother had taken the early-headed little girl and brought her up according to the standards of forty years ago.

"Oh, Gram, please let me have my dress three inches shorter, at least?" she begged at the time of her high school holl. "Gram" yielded an inch, but no more, and did that with her usual old-fashioned admonition. "Look out, my dear. Girls that go coneasy to their elders always get their come-uppance?"

"Come-uppance?" How Jessica came to hate that homely word! And yet love for her grandmother and a very real appreciation of all she had been to her through the motherless years often checked on her lips the quick remonstrance.

And a little extra money all her own would mean so much. Yet she could forgive the lassie with her grandmother which such a suggestion would entail.

Yet, in the end, Jessica had her own way. Something happened to one of the counselors with which their profitable investments were placed and their income was temporarily curtailed. Even her grandmother could see that any salary Jessica might bring in, however small, would help the gap, and that she could not ask the healthy, eager girl to pinch and do without—as she had. "The very least we can do to satisfy the old lady is to become engaged," whispered Jessica, while visiting a friend in the late summer. The queen of England wore a white cape for the day of cliquet. Queen Mary, of course, looked regal. But ostrich has made its greatest success in fringers, in cliped hands, used like fur hand-ing, for trimming and in hat trimmings.

Coat of Brushed Wool.

Adorned With Ostrich Fringe.

knitted along strikingly original lines. Bordered also are those tailor-knit coats in keeping with the call of the moment. These hoodsers, cuffs, collars and trimmings blend in effects of surpassing majesty. Take for example, a long, slenderized knitted coat done in jacquard patterning, trimmed with deep band, border, collar and cuffs of "mad fur" clipped and colored to simulate tiger pelt.

Again, let imagination play on the subject of a coat knitted from head to foot in bouclé yarn which suggests baby lamb fur—only "seeing is believing." for it is nothing less than marvelous that knitted genius has succeeded in producing such remarkable types.

In the matter of the popular knitted wool coats, such as the picture depicts, color is exquisitely blended through the brush of the surface, lending a peculiarly artistic charm to large plaid and check designs. That the autumn and winter landscape will be brightened with these colorful brushed wool coats is a foregone conclusion.

Admiration for beautiful plumage is one of those touches of nature that make the whole world kin.

Huge ostrich fans, made of plumes dyed in tones of the dominant color in the dress, lend a touch of splendor to the evening toilette. Very large pompoms or pin wheels of ostrich fibre, used in the hair, are worn on evening frocks, posed at the shoulder and at one side of a low waistline. Bands of clipped ostrich take the place of fur in bandings on dresses and, like fur are now dyed in all colors.

Many a loyal subject of the English monarchy is helping along the vogue of ostrich feathers. Queen Mary has done an ella doing her bit, by wearing beautiful gowns and hats employing ostrich in their trimming. It is a safe bet that no royal lady in England will be found parading in the streets without ostrich in her trimming.

"They'll Hang Onto Me."

Frocks for Autumn

Tailored frocks for autumn are made in corded materials. These may be either silk or wool fabric is smart, but more fashionable when combined with white or blue.

To Insure Flat Seams

To prevent seams from puckering fine pin and tack them, laying the material flat on the table. On skirts they should be sewed always from the waist down.

Still in Season

It is by no means too late in the season for the launching of a new sports frock. This has the tunic effect, of course, and in place of any girdle it has two pointed ruffles slightly below the normal waistline.

New "Ritz Bags" of Suede

They call them "Ritz bags," these pretty little bags of suede that close pull up on suede cords. The edges are bound with tiny nickel bands.

Jessica's Come-Uppance

By H. LOUIS RAYBOLD

(Copyright.)

JESSICA HASTINGS' grandmother was a very precise old lady, who sat all day in her geranium filled window and lived in the past. The busy world might go rushing by without, but it did not interest her in the least.

Times changed, but not for grandmother. And Jessica, for whom there was no intervening generation, was frequently hard put to it for her good times and innocent girlish desires. Both Jessica's parents had been killed in a steamer collision, and her father's mother had taken the early-headed little girl and brought her up according to the standards of forty years ago.

"Oh, Gram, please let me have my dress three inches shorter, at least?" she begged at the time of her high school holl. "Gram" yielded an inch, but no more, and did that with her usual old-fashioned admonition. "Look out, my dear. Girls that go coneasy to their elders always get their come-uppance?"

"Come-uppance?" How Jessica came to hate that homely word! And yet love for her grandmother and a very real appreciation of all she had been to her through the motherless years often checked on her lips the quick remonstrance.

And a little extra money all her own would mean so much. Yet she could forgive the lassie with her grandmother which such a suggestion would entail.

Yet, in the end, Jessica had her own way. Something happened to one of the counselors with which their profitable investments were placed and their income was temporarily curtailed. Even her grandmother could see that any salary Jessica might bring in, however small, would help the gap, and that she could not ask the healthy, eager girl to pinch and do without—as she had. DADDY'S EVENING FAIRY TALE

by Mary Graham Bonner

AUTHOR OF "MOTHER MACHREE," ETC.

MOTHER DEER MOUSE

"When night comes," said Mother Deer Mouse, "I don't tell my children to go to bed.

"I don't say a word about sleeping or having pleasant dreams, or any of those things.

"Instead, I tell them it is time to get up, for we like to sleep during the daytime and to travel and see the sights and do our marketing at night.

"My children are so beautiful. They do look like little deer children—and they are dear children, too.

"Their coats will grow lovelier all the time—such beautiful coats of light tan color—and their tails will be such a handsome shade of gray and they will have touches of white for decoration and trimming.

"Their eyes are so bright and their ears so, pretty—they do have some of the looks of the deer family.

"They hang on to me when they are little, and I take them about with me this way. If one of them falls off I give them a safe place to stand on back for the one that has fallen.

"Then I carry him to where he belongs.

"My children are learning the good climbing lessons all deer mice should know.

"They are bright at their lessons. They like to run and they like to jump. I does sing a little—such pretty little songs.

"They are fond of nuts, and they know that no market baskets are so much to their liking as those which are carrying home the goodies.

"In the springtime my baby darlings were without fur. But that was all right. It was warm then and I kept them warm, too. But now they have lovely coats.

"They were such helpless feeble little darlings that they couldn't see a thing.

"But Mother Deer Mouse looked after them. She was afraid of nothing where the safety of her babies was concerned.

"They have such nice little teeth, and they eat well grain and corn as well as nuts.

"I am speaking, of course, of my youngest children. They have still younger sisters and brothers born later in the summer. It makes it so hard for the older ones to have younger sisters and brothers and for the youngest ones to have older sisters and brothers who help to teach them Deer Mice ways.

"Some animals go to sleep in the winter time, and many of them now are thinking of the long, winter's sleep.

"But not the members of the Deer Mouse family. We're too wide awake for that.

"We even travel about over the snow then, and have more fun than ever.

"We are nervous little creatures, but still we don't mind the winter's coming in warmth and safety all the winter.

"We like adventures too much for that.

"But we must be gathering together plenty of nuts for the wintertime now, for the winter days are so severe and we must be ready for that time."

So Mother Deer Mouse, who had been talking to her children, lay down to rest, awakened them and then slept, awakened them and slept.

"Come, my darlings, we must get food for supper. We must begin now.

"Wake up, my darlings! Open your sleepy eyes!"

And the little deer mice opened their eyes, stretched and went with Mother Deer Mouse to hunt for food. The cool air made them feel like hurrying and they worked hard and fast.

They tried to keep safely out of the sight of men, as Mr. Owl had long been a family enemy, and there was no sign that he was thinking of ever becoming friendly.

Oh, such a scampering and such a chattering as there was in Deer Mice circle.

Such a preparation for the cold, long days and nights of winter.

But they were all very gay and very happy, for they were a big, happy family, and they all loved each other.

And why not? Were they not as pretty and appealing a little family of cunning deer mice as ever you'd hope to see?

Taking His Time

Mother—Have you said your prayers, Bobby?

Bobby—Yes, mother.

Mother—And did you ask God to make you a good boy?

Bobby—Yes, mother—but not yet.—Sydney Bulletin.

Seemingly Logical

At a small country school the schoolars were having a lesson on animals. The teacher had asked a number of questions which were easily answered. At length, she said:

"Why does a dog hang out his tongue when running?"

A lad who had not answered before held up his hand.

"Yes, Tommy, why does it?" she inquired.

"To balance his tail," was the reply. —Dublin Telegraph.

TALES FROM BIG CITIES

Figures on Denver's Divorce Business

DENVER—Approximately $500,000 has been spent on divorces in Denver during the last 21 months, conservative estimates from figures furnished by local attorneys show. In 1923 the cost of approximately 1,000 divorces granted in the Denver district and county courts passed the $118,000 mark. During the first nine months of 1924, the cost of severing the marital bonds of approximately 1,000 couples in Denver was more than $78,000. This means that every five years the expense of marriage dissolution in Denver amounts to approximately $500,000.

During the 21 months ending September 30 approximately 6,000 marriage licenses were issued at $2.50 each, or a total of $15,000.

The cost of getting divorces in Denver is considered "moderate." The average expense of uncontested suits, or the cost of obtaining a preliminary decree in actions that are not contested, as near as can be arrived at, is about $105.50.

This amount includes a filing fee of $7.50, collected by the clerk of the court in which the suit is brought; $75 for the attorney representing the plaintiff (the one bringing the suit), and $15 for the opposing attorney, or for representing the defendant, and usually appointed by the court.

Contested suits involve an average expense of $350.50, it is estimated.

The average fee for attorneys in contested divorce actions is estimated conservatively at $150 for both the defendant's and the plaintiff's lawyers. The filing fee of the suit is the same as is noncontested cases, and again the service of summons is estimated at $8. An additional expense of about $15 pays the jurors for their services. Contested cases are usually sent to a jury.

In the average divorce case in the local courts, a preliminary decree is entered less than 60 days after the suit is filed, if it is entered at all. Trial of the average noncontested case lasts from 15 to 20 minutes, and the final decree of divorce may be obtained six months after the preliminary decree is granted.

Not Painted Ships on a Painted Ocean

HIGHLAND LIGHT, MASS.—The anemometer box on the window sill showed a scant three miles, which is no wind at all for the tip end of Cape Cod—not even a breeze to blow the windows rose the quadrupled street frames of the giant aerials by which Uncle Sam talks around the world to ships waiting to and from upon the seas. Just beyond them—over your neck a bit to see—was the round, white tower of Highland light, whose flashes light the clouds at night for 40 miles. Grassy land a few feet beyond the aerials, then a jumping-off place, 160 feet deep, so sheer that in places the top of the sandy cliff overhangs the beach below. And under the sea?

Indoors, in a little box of an office, partitioned off from the corner of a country store, Lucy Williams sat at her desk meditatively tap-taping at a telegraph key. She was telling a towboat company in Boston about a freighter which had just passed, headed north, describing it in detail, because she hadn't been able to read the name.

Very little of a nautical nature escapes the bright eyes of Miss Williams, who has had for twenty years a job such as few women have ever enjoyed. Day in and day out, holidays and Sundays and all, she watches the sea from the little window, notifies them and telegraphs the information to the offices of various boat companies or their owners in New York or Boston and Baltimore.

"Last winter we got sixty miles of wind," she remarked; "we telephone to the weather bureau in Boston [pronounces and frown are states where it is estimated that somewhat more than half of the farm buildings are protected by roofing.

Condition of Silo and Silage Very Important

The care used in packing the corn or sorghum that was grown this summer in the silo will determine the food value of the silage next winter, J. P. Lea Master, chief of the dairy division at Clemson college.

Before starting to fill the silo it is very important to see that all the doors are in place, all bad joints or cracks have been sealed, and also that the doors fit smoothly and tight. In order to insure a perfect fit of the doors it is necessary to have a roll of strong roofing paper to be run up on the inside and staples driven through this insure the doors being air-tight.

The next important step to destroy all the air possible in packing the silage crop. The total amount of dry matter that will result from the silage crop increases until the time of ensilage crop. Therefore, it is important not to cut the crop when green, thus losing considerable food value and also to prevent the silage which is left unpalatable. The stage of maturity at which corn is ready for the silo is when the grain has glazed and dented and the bottom leaves have turned brown. There is then usually some brown on the shucks of the corn also.

Silage Should Be Used in Liberal Quantities

Present indications point to high grain and forage this fall and winter. Corn and sorghum will make a heavy crop in many sections, we can look for high-priced forage. This means it will be necessary to practice economy in feeding. The live stock keeper, as a rule, loses or gains according to his knowledge and method of feeding.

Silage is the best substitute for both hay and pasture and it should be used to the limit. The cheapest forage crop that a combination of corn and a bulky ration it should be grown on the farm and supplied in liberal quantities.

Silage will lower the cost of the ration, make sure a profit from the live stock and greatly increase the value of the crops. Silage will pay for itself the first year. What other farm investment will pay 100 per cent? Information now demands economical feeding.

Young Ducks Go Lame

One of the chief troubles which affect young ducks is lameness. The d-cks may grow worse until a considerable number of them die. This trouble may be due to lack of animal matter or mineral matter in the ration, or again it may be due to digestive disorders caused by poor rations, by poor housing or by failure on the part of the owner to gather up feed not eater by the ducklings. Now leaving it to scur. If the pens are allowed to become damp and sloppy this also may cause lameness.

Sweet Clover Popular

Sweet clover is rapidly growing in favor as a pasture crop. It has one great advantage over alfalfa in that it can be pastured by all kinds of stock. While it probably does not equal alfalfa as a hog feed, it makes excellent pasture for cattle, horses and sheep. It can be grown on about any quality of soil in any section of the state, and it is not difficult to get started. With proper care it will reseed itself from year to year.

Eggs Two-Thirds Water

An egg is two-thirds water and if the stock continues to lay well it must have a constant and liberal supply of fresh water. This is just as important for pullets as it is for laying hens. In view of the fact that growing stock needs much more water now than it did a month ago because of its larger size.

Why Not, if One Just Adores Fossils?

SIOUX FALLS, S. D.—Fossils from the fossil bed district in the northwestern South Dakota and minerals of all kinds from the Black Hills are to be displayed in a subterranean grotto of a new Chamberlain hotel. The grotto is constructed under the briny waters of the Pacific ocean on the shores of Long Beach, Cal. The grotto was completed by Samuel A. Selover, a wealthy Californian, who has been in western South Dakota several days gathering fossils and minerals for the grotto.

Mr. Selover and his family plan to entertain their friends amid surroundings that would be matched in novelty anywhere. Hearing that the Black Hills and the Lands of Sioux Dakota contained many fossils and vast-colored quartz that would add in making the grotto unique, he became interested.

He has made arrangements for the shipment of a carload of fossils from the Red Lands and minerals from the Black hills to Long Beach to decorate his grotto. He obtained a large collection of little nuts of various colors, which shine and glitters under artificial light. He purchased a quantity of gold-bearing crystals, rose quartz and nice scales in the color scheme as in coal, and minerals carrying it out were obtained. Ninety six feet of petrified logs were arranged for, he set up and used for chairs and to decorate the fireplace.

The Hintzberts, chimpanzees three good horses, tapirs and other animals that roamed the South Dakota plains and seven with Mother Deer Mouse to hunt for food. The cool air made them feel like hurrying and they worked hard and fast.

They tried to keep safely out of the sight of men, as Mr. Owl had long been a family enemy, and there was no sign that he was thinking of ever becoming friendly.

Oh, such a scampering and such a chattering as there was in Deer Mice circle.

Such a preparation for the cold, long days and nights of winter.

But they were all very gay and very happy, for they were a big, happy family, and they all loved each other.

Why Men Leave Home and Family Behind

NEW YORK.—Owner of seven leading houses in Brockton, Mass., reported to be one of the wealthiest citizens of that city, a member of various civic organizations there and regarded as a brilliant business man in "Main street," Edward W. Washburn told the police at headquarters that he had "tired of it all," had left "Brockton for good," and was now going to start all over again in the world at the age of fifty-seven years.

"I have arranged my business," he declared, "in a way that will give my three sons, my daughter and wife a steady income from the rents, etc., although I will not desire any income from my business myself, unless illness should make it necessary for me to do so. I'll paddle my own canoe. I am a success of business in Brockton and, too when considerably younger, and I see no reason why I should not repeat this success in New York. In fact, I'm going to try."

Thus it is that a Brockton grocer has the Massachusetts ice dealer on his pay roll, doing general work around the store, and in return will pay him $15 a week and board.

"Yes, I'm going," declared Mr. Washburn. "It's a job; it's work, and I always have worked. The future is in my own hands, and my wife is loyal and board, and with my work I should be happy. In any event, it is a step from the rut of commonplace."

For several days the police of Brockton sent that the swamps around the town for Mr. Washburn's body. He showed a clipping from the Brockton paper to verify his assertion about himself

Mr. Washburn said he had no intention of taking his life, unless—that he found work quickly. What he desired was to vanish from the memory of all except his son Harold. He has two older sons, Leroy, thirty-five, and Alfred, thirty-four, and a daughter, Anne, who has been an invalid at home for ten years, and his wife. They could no more with him. He says his two older sons, his daughter, and his wife made his life miserable.

Chicago Wants Lakes-Gulf Waterway

CHICAGO.—The Windy City, the Middle West and the Gulf states have gone to work with renewed vigor to try to secure, by court fight and otherwise, the construction of a deep waterway between the Great Lakes and the Mississippi. At the same time, legal battle is being carried on to preserve intact Chicago's water flow of 10,000 cubic feet per second.

Enthusiasm of the waterway fans had been stimulated by a rally held last August in Chicago and presided over by former Mayor William Hale Thompson, with delegates representative of the project cheered the ex-mayor. Congressman William E. Hull of Peoria, Congressman Henry T. Rainey of Carrollton, W. L. Sackett, state superintendent of waterways, and the other speakers.

Delegations were present from New Orleans, Memphis, Louis, Joliet, Morris, Herrin, Dunlight, Waukegan, Alton, Ill.; Paducah, Ky., and other places. The New Orleans delegation was headed by United States Senator Joseph Randall of Louisiana. Others at the speakers' table were: Capt. Waldo Evans, United States navy; Chief Justice Harry Olson, Col. William Boyce, Congressman O'Connor of New Orleans Chamber of Commerce.

Lightning Rods Gain in Favor

Weather Bureau Has Been Earnest Advocate of Protection of Buildings.

(Prepared by the United States Department of Agriculture.)

For more than thirty years the weather bureau of the United States Department of Agriculture has been an earnest advocate of the protection of buildings and other property against lightning by suitable roofing. The bureau is frequently called upon to advise inquirers concerning the proper methods and materials to be employed. Occasionally plans are drawn up in detail for the protection of government structures. In 1910 the White House was roofed after plans and specifications prepared by Professor Marvin.

Study of Losses.

To determine the relative liability of farm buildings to fire damage by lightning, a study of lightning fire losses was made recently by the weather bureau of the United States Department of Agriculture. The average annual loss for the whole United States is little over $12,000,000 which is probably a conservative figure. Illinois has the unenviable first place, with an average annual loss of over a million dollars, part of which may be attributed to industrial sections. Texas is next in order because of its large area and the presence of highly combustible oil-storage tanks. New York is third, for reasons similar to those affecting Illinois.

In the highly developed agricultural states of the North heavy losses are experienced, especially through destructive cyclonic thunderstorms. If the figures indicate anything relative liability of farm buildings to damage is small in one state when compared with another, but actually destructive and frequent thunderstorms it is quite probable that protection against lightning is more general in the former state. Michigan, Wisconsin, Minnesota and Iowa are states where it is estimated that somewhat more than half of the farm buildings are protected by roofing.

I. O. O. F. HONORS MICHIGAN MAN

HERBERT A. THOMPSON, GRAND SIRE, FORMER PUBLISHER OF COUNTRY WEEKLY.

ADMISSION AGE NOW 18 YEARS

Great Strides Made in Odd Fellowship —Relief Work for Past Year Nearly $6,000,000.

At the recent session of the Sovereign Grand Lodge of the Independent Order of Odd Fellows, held in Jacksonville, Fla., Michigan was made the hub of Odd Fellowship, so to speak, when Herbert A. Thompson, editor and publisher of The American Odd Fellow at Williamston, was unanimously elected as Grand Sire, the highest rank and office in the world of Odd Fellowship.

As a mark of appreciation on behalf of the Order in Michigan, a banquet was tendered to the entire body and their ladies in attendance at the

HERBERT A. THOMPSON

session in Jacksonville. It was the finale of a dynamic drive that had been started in 1914, when Mr. Thompson first entered the Sovereign Grand Lodge as a representative of the Grand Lodge of Michigan, which he had served a year previously as Grand Master, making a record that stands out as a year of wonderful attainments.

Possibly there never was a session of the Sovereign Grand Lodge that so completely gave itself over to one grand jurisdiction as did the 1924 session to Michigan. In fact the dynamic force that had so completely won the Sovereign Grand Lodge over to the candidacy of Mr. Thompson for deputy Grand Sire at Detroit in 1922, was still felt on all sides at Jacksonville, Michigan was simply bubbling over with joy for the honors that had come to it, the first in the history of the Order, and the committee in charge of the affair "stepped on the gas" and set a pace that will be difficult for any future session to equal, which brought forth favorable comment in the press throughout the entire civilized world where Odd Fellowship exists.

In his now office Mr. Thompson has jurisdiction not only in the United States and Canada, but in Europe and all other countries where the Order has been established. He is the executive head of an organization numbering nearly 4,000,000.

As a fitting expression to its Commander-in-Chief, over ten thousand Odd Fellows and Rebekahs from Michigan and Ontario gathered in the City of Detroit, Oct. 4. Among the events was a complimentary banquet at the Hotel Statler at which more than five hundred sat down to a banquet to its honored fellow member. A monster parade was held in the evening, followed by a mass meeting at which Grand Master, John A. Wilde; Grand Patriarch, W. H. Brunertz; Governor Alex Groesbeck and others made addresses of welcome, which were responded to by Grand Sire Thompson in a very eloquent and masterly manner. At the session of the Grand Lodge held at Alpena, Oct. 20 to 24, the new Grand Sire was received in a manner befitting the occasion of honoring one whose authority extends to the furthermost parts of the earth. The reception was in every way expressive of the keen appreciation Michigan Odd Fellowship felt.

Mr. Thompson is the self-made type of man. He was born on a farm at Stockbridge, Ingham County, Michigan, on July 26, 1872. He was educated in the public schools and colleges of Michigan, and was actively engaged in educational work for six years. He then purchased The Williamston Enterprise at Williamston, Michigan, and later The American Odd-Fellow, a fraternal magazine of national reputation, and has continued as the editor and publisher until the present time, his son, Theodore A. Thompson, being in active charge of the plant. During that time he became and is now actively affiliated with several financial and insurance companies, as well as other business interests. He has always taken an active part in public matters, and as a public speaker is known all over the state where his friends are legion. In politics he is a republican, and has served on the state central committee for a number of years. He served as chairman of his congressional committee and his home county committee. He has been honored with the presidency of the international I. O. O. F. Press Association, president of the Michigan Press Association and membership in the University Press Club. He comes to his duties as Grand Sire with splendid training for a big job. He is now living in Detroit, where he has recently built a home.

Mr. Thompson has been an Odd Fellow for over 25 years, and an active worker in all its branches. After serving his subordinate lodge in the several stations, he entered the Grand Lodge where he served on important committees including the committee on laws. In 1915 he entered the Sovereign Grand Lodge as the "permanent" representative from the Michigan Grand Lodge, his associates in the Grand Lodge believing that the time was ripe for Michigan to make its bid for a Grand Sire. The Michigan Grand Lodge had confidence in his ability to make good and bring this honor to the state. He has attended each session since 1915, serving on such important committees as legislation and on several important special committees. During 1923, he was delegated as the representative of the Sovereign Grand Lodge to make a complimentary of the Order in Cuba, and upon his findings a Grand Lodge charter was granted to Cuba at the recent session in Jacksonville. In the ten years he served in the Sovereign Grand Lodge his friends became universal. Possessed of a genial personality, democratic manner, yet dignified as becomes one in his position, and having the faculty for remembering names and faces, he soon was able to greet the membership without constant introductions, which soon found friends from all quarters of the world of Odd Fellowship and who soon learned to know him, just as his brothers in Michigan know him, by his first name, "Herb."

One of the big problems that has been before the Sovereign Grand Lodge and which was solved at its recent session, was the much discussed question whether the Order should establish a juvenile branch or reduce the age of admission. After viewing both questions from all sides, the Sovereign Grand Lodge decided on reducing the age of admission to 18 years. The new law goes into effect January 1st next, and it is hoped will add thousands of young men to the splendid fraternal society.

Odd Fellowship in Michigan has made wonderful advancement in recent years, until now the membership numbers 92,660 in 556 subordinate lodges. In addition to this it has the Rebekah branch, with a membership of 64,000 in 485 lodges. Further boasting by reason of the fact that they make an intensive drive to increase the membership to 100,000. With the new field of young men to draw from it is proposed to make a special effort by designating a certain third day which to initiate classes of young men between the ages of 18 and 21.

Odd Fellowship is purely a fraternal society. While it pays to the sick and injured members certain financial benefits by no means its predominant feature. It seeks to be a helpful factor in the civic life of every community, building up a better citizenship and rendering all service most needful. Its social activities are leading factors in the life of a community. It has expended magnificent sums in lodge building since the opening years of the past year reached the splendid sum of $158,570. That is Michigan's record along. Any worthy work of this nature not only does credit to itself but relieves the community in which it exists from performing a duty that would naturally fall upon it.

Several years ago, the Grand Lodge recognized the necessity of making provision for those of its members who, because of adverse circumstances would become the objects of charity; therefore an Odd Fellows' Home was established at Jackson, Michigan that now has a main administration building, an orphanage and other buildings, with 198 acres of farm lands of a value of $250,000. There are 128 residents at the Home, and an annual appropriation of $50,000 is made for its maintenance. An endowment fund was established a few years ago into which is paid all voluntary contributions made to the Home, and on several occasions prominent members of the Order have made provision in their wills for certain sums of money or property to go to this fund, which to-day it has reached the sum of $100,000.

Going into the broader field of its activities we find that $2,666,813.47 was spent during the past year for relief work by the Order at large, but the great field of Odd Fellowship is pure fraternity, where men get to contact with one another that these kindly offices of friendliness and helpfulness offers the broadest field for working out many of the problems of the day, where the man or the woman can get the broader touch and wider field of activity through organized effort.

When one looks back to the foundation of Odd Fellowship in America and finds that its invention was the efforts of but five men, he is reminded that there surely must have been something more than the ordinary that built up a membership of such stupendous numbers. When we review its splendid activities during the years that are past, we recognize that it has an abiding place in the life of every community to make it worthy of the best thought of every citizen who desires to play a part in the elevating of human character and the building up of a higher and better citizenship. In almost every community in Michigan, may be found one or more Odd Fellow and Rebekah Lodges. These organizations are among the great influences that make for a stable citizenship. Where an Odd Fellow Lodge exists there lie religion and order is the watchword of its citizenship.

World's Greatest Airport

London.—The cabinet's decision to establish an imperial airship station and to select Cardington, in Bedfordshire, as the home of airship research and experiment will make Cardington the world's greatest airport. It was here that the ill-fated R-38, which broke her back at Hull, was built, and her sister ship, R-37, now stands half completed in the shed. This colossal shed is capable of accommodating two such airships. It has up-to-date works nearby a gas manufactory and palatial offices.

STINGIEST POLITICIAN

"Buck" Hayden, of the San Antonio, Tex., Light, says the stingiest office seeker he ever heard of was a chap who lived between Missouri and Arkansas, and who returned this account of his campaign expenses:

Stamp for letter announcing candidacy	$0.02
Postcards and ice cream	0.25
Refreshments (for myself)	2.00
Automobiles (I walked)	0.00
Dances (I don't dance)	0.00
Flowers for women voters	0.50
Cigars (box of them)	1.50
Raw hot cakes (for eye)	0.50
Doctor bill	3.00
Total	$7.22

Why Change?

An exchange says that "every cynical bachelor ought to have his nose pulled by a simpered lately," but the chances are that his leg is being pulled by a dimpled, pinkied doll of about nineteen.—Allenton a Record

ENTERTAINED AT PETOSKEY

The following Charlevoix ladies were entertained by Mesdames Golden and Allen at Petoskey yesterday afternoon. Mrs. Golden entertaining with a dinner at 1 o'clock p. m. and Mrs. Allen with a dinner at 7 o'clock p. m., and with a 500 party in the K. of C. hall during afternoon and evening: Mesdames James J. Gaskin, Joseph Howard, Joseph Foster, Louis Orlowski, Fred Cartier, Alton Smith, Earl Miller. They were accompanied by Mrs. Leo LaLonde and Mrs. Kenney of East Jordan, all reporting a most enjoyable trip and splendid time with their entertainers.

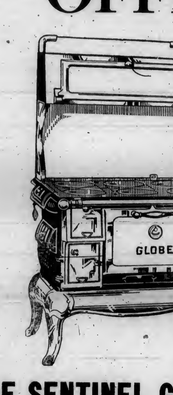
The Pilgrim Circle of the Congregational L. A. S. will meet at the church next Wednesday afternoon, for election of officers and other business, which will be followed by a picnic supper for the members and their families.

YOU READ the Other Fellow's Ad

You are reading this one. That should convince you that advertising in these columns is a profitable proposition; that it will bring business to your store. The fact that the other fellow advertises is probably the reason he is getting more business than is falling to you. Would it not be well to give the other fellow a chance

To Read Your Ad in These Columns?

EXTRAORDINARY
INTRODUCTORY
OFFER



THE SENTINEL GLOBE RANGE

An unusual value in an all cast iron rust proof construction range. We have cut the cost by cutting the size—not the quality. The Sentinel Globe cooks perfectly, bakes quickly and evenly, heats well, is economical in the consumption of fuel and is easily cleaned.

The Sentinel Globe cuts your fuel bill by getting all available heat from every pound of fuel. The fire-box, with full slotted linings, insures perfect combustion. Soot, smoke and gasses do not go out the chimney as black smoke, but are turned to heat in the fire-box. Ashes accumulate slowly and clinkers do not form.

Made in a variety of styles and finishes: Blue Enamel, Gray Enamel, and the Nickel finish can be furnished either with white enamel, or plain high closet.

$20.00 Worth of Aluminum Ware FREE with Every Stove Sold

To quickly introduce this stove to the people, of Charlevoix we will give FREE with every stove sold, $20.00 worth of Aluminum Ware, as shown in above illustration. This offer will be available for a short time only. Our guarantee stands back of every stove sold. A sample is now on display in our store window. Look it over. Come in and we will explain its good qualities to you. And as stated above, to introduce this stove to Charlevoix housewives, we make the following astounding offer. The Stove as advertised, including the $20.00 worth of Free Aluminum, for

Only $110.00

Charlevoix Hardware Co.
Hardware and Electrical Goods

PALACE THEATRE

Saturday and Sunday—

Wm. Fox presents David Belasco's stage success, "The Governor's Lady. A Harry Millarde production. Does a woman rule the political roost. The governor's lady encouraged the lowly miner while he was mining in the ground. Success turned his head, but a woman's love brought him from the depths of despair to the heights of glory. Also a two-reel Educational comedy, "One Night it Rained."

Tuesday, Nov. 11—

Wm. Fox presents Wm. Russell in "Times Has Changed." This is one of Wm. Russell's best pictures. Also another one of the Go-Getters in "And Never the Train Shall Meet." Starring George O'Hara and Alberta Vaughan. Don't miss the Go-Getters stories of gripping interest, romance, speed, thrills—not to mention more laughs than Ringling's circus.

Wednesday, Nov. 12—

Paramount presents "The Speed Jacks." A great novelty picture. Also the Go-Getters in "Never the Train Shall Meet."

——) PERSONALS (——

Mr. and Mrs. H. S. Harsha returned home Saturday from a three weeks' trip.

Doctors Ward and Bertha Ellis, of Lansing, visited Rev. and Mrs. Quant last week.

Lady Maccabees will meet with Mrs. Leo Allard, 112 Lincoln street, Friday afternoon.

Mr. Kaye Buttars and wife are now occupying the Earl Young residence on Clinton street.

Attorney Lisle Shanahan was called to Cheboygan last Thursday on professional business.

Thomas J. Brady will spend the next few weeks in the south and near Mobile on business. He left for the east yesterday.

Members of the Mary Brewster, Club will hold a sale of baked goods at the Robert Bonthron saleroom Saturday of this week.

Mr. and Mrs. Thomas D. Meggison, of Central Lake, spent the early part of the week here with their son, Harold Meggison.

The Shakespeare Study Club drove to the home of Mrs. Ralph Price, at Ironton, for their Monday afternoon meeting this week.

Mr. and Mrs. Fred Dago of Northport, spent Sunday with the former's sister, Mrs. Cora Kelderhouse and family in this city.

Robert Bridge, accompanied by J. Scott Gilbert, of the First National bank, of Detroit, went to Beaver Island Saturday returning Tuesday.

Harry Mohrmann of Lansing, spent a little time here Tuesday and Wednesday, leaving for his hunting camp in Chippewa county yesterday afternoon.

James B. Parsons, district superintendent for the Agricultural Life Insurance Company, spent some time in Cheboygan last week in the interest of his company.

N. A. Shores and William Pearl leave for some northern point today where they will make camp in the big woods for some advantageous point during the hunting season for big game.

Some twenty five from the Ironton Congregational church attended the evening service in the Charlevoix church last Sunday and led in a song service which was very much enjoyed.

Theodore Erickson formerly of this city, now of Holland, spent the week end with friends here. Later in the week accompanied by Joseph H. Cosgrove he left for some point across the straits where the two will spend a few days of the hunting season.

Messrs. Henry Block and Harry Woolley, accompanied by their wives, will start out on a hunting trip with some point north of the straits as their destination. They will make the trip by automobile and expect to make the start at an early hour Saturday morning.

The steamship Marquis Rees was in the Charlevoix harbor, her home port, several days this week. Captain John Rose informs us that his ship is charted for two more trips this season and that the ship will be placed in winter quarters here as soon as the two engagements have been completed.

Owing to heavy weather the U. S. mail boat James E. Sanford was unable to make the return trip from St. James last Saturday and was held in the St. James harbor until Tuesday. An effort was made to make the run Monday but wind and heavy seas forced the ship back into the harbor, as a matter of safety.

Ivan Holmes started out on a motor trip Wednesday with some point in Florida as his destination, where he will spend the winter season. He will be accompanied on the trip by Glen Ingalls and J. C. Marshall. The route followed will be by way of Washington, D. C., where they will spend a short time. A camping outfit is part of their equipment and will be used in place of hotels during their travels.

Mr. Sam B. Taylor of Traverse City, was a last week visitor here yesterday.

Robert Boetkeon is quite ill at his farm home just north of the city limits.

Mrs. G. M. Russell and daughter went to Grand Rapids Monday to visit Mr. Russell for a few days.

Mr. J. A. Nobis and wife have closed their house at Bay View and have returned to Charlevoix for the winter.

Mr. and Mrs. Henry Partridge are entertaining four tables of Bridge at their home on Petoskey avenue this evening.

Harrison Bedford and wife, returned this week from a two weeks' visit in Grand Rapids, and are at their home on Park Avenue.

Miss Mary Finucan returned last week from a three weeks' visit with relatives at Herkimer, N. Y. Mrs. Finucan will remain with a sister in that city for the winter.

Mr. and Mrs. Harry Horner, of Enid, Oklahoma, drove in this morning to visit the latter's brother, D. S. Paylon, who has not seen Mrs. Horner for forty-two years.

Joseph Foster celebrated a birthday anniversary the first day of this week in which he was assisted by numerous relatives and friends from Petoskey and this city.

Archie Lafreniere of Detroit, spent the early part of this week in Charlevoix, later going to St. James where he will spend a few days with his brother, Nels Lafreniere.

Darwin F. Meech left for his hunting camp, near Newberry, last Wednesday. He will spend his annual vacation in the woods with Harry Mohrmann and one or two friends from Lansing.

Mr. and Mrs. William Bogart accompanied by E. E. Allen and wife attended the hallowe'en party given by the B.P.O.E. Club at Petoskey last week. All parties reporting a most enjoyable evening.

George Myler, of Detroit, is spending a few days here before going to the north woods on a two week's hunting trip. He will leave Charlevoix Saturday and join his party from Detroit at Mackinaw City.

S. J. Ulrich and son Arden will spend their fall vacation in the woods with the expectation of getting each a deer before the close of the season. They will start some time this week for their camping place.

Mr. and Mrs. Hodkin and daughters Maxine and Joan, returned to their home, Flint, last Saturday, after spending a vacation of two weeks with Mrs. Hodkin's parents, Mr. and Mrs. Joseph R. Guild, in Marion township.

Messrs. John Hallett and Willard Olney start for the big game country Saturday and will camp in some wilderness north. They are good hunters, good shots with a rifle. Results are easy to predict and then, too, they will have an enjoyable time.

Milton Block and Milo Todd, accompanied by their wives, will make up a hunting party, leaving here Saturday for the big woods somewhere in the north where they will spend some days in quest of deer or other wild game that is in range of their camp location.

Boyne City high football players are scheduled for a game with Charlevoix high on the grounds of the local players Saturday. The teams are apparently well matched and one bout will play an interesting, possibly exciting game. Football fans are speculating on the outcome of this game.

L. C. Hannah is establishing a hunting camp in the west part of Marion township where he will put in considerable portion of his time during the fall months. In the main this far he has been ably supported by Mr. C. W. Long, who at frequent periods will enjoy the comforts of camp life with Mr. Hannah.

L. A. Moon with a party of friends will spend the two weeks following the opening of the hunting season, in camp near Porcupine Mountain, Ontonagon County. As the entire party is made up of real hunter sportsmen a good account of their activities will be made when they return from camp. They start from Petoskey Saturday afternoon, making the trip in a private coach

Fire, in Mancelona, destroyed two buildings last Tuesday night, one a blacksmith shop where the fire originated and the other a garage owned by Harry Williams who carried $3000 insurance on building and $3500 on stock. The garage had capacity for forty cars. Mr. Williams represented the Dodge agency in that territory and his loss besides building and stock included four automobiles.

Three persons were badly injured last Sunday when an automobile in which they were riding collided with a passenger train of the Pennsylvania road near Pellston. The injured, Ralph Angervine of Petoskey, Alice Gulp and Frank Gulp of Brutus, were rushed to the Petoskey hospital for treatment, where it was found that the two men were badly cut up and bruised, the woman escaping with less injuries than her companions.

Golden Rule Dinner

The Woman's Christian Temperance Union has been asked to propagate the Golden Rule Dinner idea in Charlevoix. Friday, Nov. 14, is the date set by the Union for a complimentary Golden Rule tea or luncheon, to which the women of the town will be invited and the object and plans discussed.

Make Your Old Home NEW!

—Costs No More Than Two Seasons' Paint Bills

Compare the two homes above. See how vastly they differ. Yet the only difference between them is a covering of Elastica Stucco. And the only cost incurred is not much more than two seasons' paint bills.

Here are the advantages you gain by covering your home with Elastica: Your home becomes new and beautiful instead of old and unattractive. It becomes absolutely fireproof; your insurance rate is reduced. Painting at the expense of painting are eliminated for all time. The interior temperature of your home becomes cool in summer and warm in winter; you buy less fuel. And most important of all, these advantages are permanent advantages, made permanent by the fact that Elastica is thoroughly and permanently waterproofed.

The high quality of Elastica Stucco is known all over America. Hundreds of thousands of homes have been built with it. Its value is established. Its cost is surprisingly low. Find out now without obligation how economically you can modernize your home with Elastica. Write, 'phone or call on us for particulars today.

SUMMER COLORS NOW ARE WORN BY OCEANS

Preference for Blue With Foamy White Ruffles.

Washington, D. C.—"The much-traveled Atlantic is putting on its usual color show for the summer tourist. It is exhibiting a declined preference for blue, with soft foamy white ruffles. Sometimes it is wearing sage greens, deep indigo, or royal purple.

"Globe trotters will find the Mediterranean and the Caribbean tricked out in sapphire blue, the Red sea in varying shades of henna, the Yellow sea in beige and tan, the Antarctic in olive green and the shallows of the Gulf of Mexico in a soft turquoise," according to a bulletin issued from the Washington (D. C.) headquarters of the National Geographic society.

"In order to put on such a pleasing display of shade and hue, the seas have summoned to their aid many and varied hosts, notable among which are warmth and cold, sunlight and shadow, sand, silt, and possible volcanic dust, salt, lime, and various and sundry kinds of diatoms and algae.

"Absolutely pure water is a clear blue color because the blue rays of sunlight are not absorbed by the water as the red rays are. Thus the open ocean seems intensely blue. Distilled water has a greenish cast due to the impurities which still remain after the distillation. This makes it clear why the shallow water in bays and estuaries is green or yellowish green. One explanation of the olive-green of the ocean in the vicinity of the South pole is that it contains enormous quantities of diatoms in suspension.

When a Gray Gown Is Worn.

"Sometimes the ocean wears a gray gown, but that usually happens when the clouds shut out the sunlight and then in respect for the grim aspect of the frowning skies it subdues the tones of its garment.

"Two factors contribute largely to the blueness of the Mediterranean; there are few large rivers, which ordinarily bring enormous quantities of impurities, flowing into it, and there is a constant stream of salty water pouring into it from the Atlantic ocean through the Strait of Gibraltar. It is said by some oceanographers that the blue of sea water varies in direct ratio to its saltiness. As an example of this the band of turquoise water extending about thirty degrees on each side of the equator, where there is tremendous evaporation under a blazing sun, is cited. It is true that these waters are very salty and are exquisite azure in color. On the other hand, the Arctic and Antarctic waters, which are cold and less salty, are vivid green.

"The Yellow sea derives its golden tints from the sediment brought to it by the Yellow river and several other streams rising near the desert areas in western China. Scientists also believe that the billions of minute living organisms found in the waters help to give it its name.

A Yellow River in the Atlantic.

"In January, 1909, a peculiar phenomenon was observed in the Atlantic ocean. Dr. Dinsley Bumstead with the warm clear blue waters of the Gulf stream from Cape Florida to Cape Hatteras, there was a yellow river three miles wide. It lasted for a few weeks and then faded away into the surrounding ocean. Some cataclysm on the face of the deep, probably of volcanic origin, had evidently set this yellow stream in motion.

"The dull reddish tint of the Red sea is imparted to it by millions of microscopic algae. A host of the minute living organisms found in sea sweeten the ocean for miles.

"Relatively blue of the waters surrounding the coral islands of the South seas, which have long been famous in song and story, is said to be due to the calcium carbonate which is held in solution.

The degree of penetration of light into water is a contributing factor in the color of various bodies of water. The Saguenay river, a tributary of the St. Lawrence from the north, is another very impressive example of waters seems almost black. It winds through high hills which shut out the light and its bed is 600 feet deeper than that of the river into which it flows.

"In 1910, the sea off the California coast turned almost black, the waters of Santa Cruz bay bounding that similarly inky, but no satisfactory explanation has ever been offered of its occurrence."

CHURCHES

Methodist Church.

Harry R. E. Quant, Pastor.

Sunday, November 9th.

As the natural sun does not shine for a few trees and flowers, but for the whole world, so the sun of Righteousness shines not for a favored few, but for the world of human hearts. As the lonely pine on the mountain side looks up to the sun and cries, "Thou art my sun," and the little meadow violet looks up and whispers, "Thou art my sun," and each field of grass and grain upon a thousand hills looks up and softly breathes, "Thou art my sun," so the high and low, the rich and poor, the Caucasian and African can look up to the Sun of Righteousness and say: "Thou art my Father."—Record of Christian Work.

At 10:30 a. m. Thank Offering service Women's Home Missionary Society —Rev. Robert S. Miller, of Boyne City, will give the address.

12 m. Sunday School. Lesson, "The Feeding of Five Thousand"—good lesson. Teachers are requesting of parents that scholars be regular in attendance. We would enjoy seeing more parents in Sunday School work.

At 3 p. m. Junior League. Mrs. Poole would like to see many attending this service.

At 6 p. m. Epworth League. Mrs. Rena Edwards, leader. Lots of singing, efficient leadership and effectual prayer make these gatherings worth while.

At p. m. Evening Worship. We give the evangelistic emphasis to these services. Topic for discussion, "The Man Who Obeyed."

Prayer Meeting this Thursday at 7:30 p. m., Bible reading, Acts 17.

Ladies Literary and Sewing Club will have a baked goods sale this Saturday at the Charlevoix Hardware Company's Store.

Good reports at the monthly official meeting last Monday. October's work was very gratifying. Heads of departments are to be congratulated on their splendid services.

At Greensky Hill church next Sunday at 2:30 p. m. Sacrament of the Lord's Supper. Whites and Indians all cordially invited.

Congregational Church

Clarence W. Long, Minister.

9:45 Sunday Church School, A. F. Bridge, Supt.

11:00 a. m. Call to Worship. Special music and sermon by Rev. Clarence W. Long.

6:00 p. m. Y.P.S.C.E. The attendance is increasing—if you are not one of the number, come!

7:00 p. m. the hour for Evening Worship. We had a most enjoyable service last Sunday evening with the good delegation from Ironton, and believe me they can sing—c-o-m-e again. The friends of the church are urged to come this Sunday evening and we will have a song festal.

7:30 p.m. Wednesday mid-week meeting, subject, "The Secret of Success" Col. 3:1-4.

7:15 p.m. Thursday the chorus choir will rehearse—it is desired that all members be present.

Note the change in time for S. S. and preaching Sunday morning will not be changed until December 7th.

Baptist Church

Rev. Herman Burns, D. D., Pastor

Sunday, November 9th.

Preaching service 10:30. Sermon by pastor, theme, "Victory Out of Defeat." Pulpit editorial given last Sunday morning on "Duty of Voting." Come and hear next Sunday's editorial on "Result of Election."

Sunday School following at 11:45, subject, "The Feeding of the Five Thousand."

The B.Y.P.U. met at Boyne City last Sunday evening. There was a large delegation from Charlevoix. We will meet at Boyne City again next Sunday at 5:30. Topic, "My Work in Life."

Mid-week prayer service Wednesday evening at 7:30.

The pastor, Dr. Herman Burns, will attend a conference held at Lansing, November 11th to 14th.

DETROIT WOMAN RECOVERS

Health Much Better After Taking Lydia E. Pinkham's Vegetable Compound

Detroit, Michigan. —"Your little book left at my door was my best doctor. I

was all run down, tired and nervous, and my feminine disorder, bearing down pains, backache and kidneys didn't set often enough. Definitely rid me of the trouble." — Mrs. HARDING, 3708 35th Street, Detroit, Michigan.

In newspapers and booklets we are constantly publishing letters from women, who think how they were helped by taking Lydia E. Pinkham's Vegetable Compound.

These letters should guide you, if you are troubled with pains and nervousness, or any feminine disorder, bearing in mind that Lydia E. Pinkham's Compound has helped other women and should help you. For sale by druggists everywhere.

BABIES LOVE
MRS. WINSLOW'S SYRUP
The Infant and Children's Regulator
Pleasant to give—pleasant to take. Guarantees purity—established and absolutely harmless. Relieves constipation, flatulency and other like disorders. Try it—you'll find it a favorite. Recommended by all Medical Druggists

Telephone in Tibet

For centuries everything in the nature of an invention or up-to-date idea has been barred from Lhasa, the Indian capital. In fact there are very few instances of outsiders who have penetrated into the city, but there are evidences of an awakening manifest in the expression of a certain sense of the conveniences of the occidental world. The telephone forced its way only a short time ago and at the present time natives are engaged, under the supervision of new world engineers, in extending the system so that in a short time there will be communication with what is known as the "Roof of the World."

Nothing needs a lie—except a lie.

Help That Achy Back!

Are you dragging around, day after day, with a dull, unceasing backache? Are you low in the morning, bothered with headaches, dizziness and urinary disorders? Feel tired, irritable and discouraged? Then there's surely something wrong, and likely it's kidney weakness. Don't neglect it! Get back your health while you can. *Doan's Pills*, a stimulant diuretic to the kidneys. *Doan's* have helped thousands, and should help you. *Ask your neighbor!*

An Illinois Case

Mrs. Fay Bradley, 322 E. Campbell Ave., Decatur, Ill., says: "I had a dull ache across my back when I stooped and when I stepped a sharp catch made it hard to straighten. Many days my back was so lame I felt tired. I was dizzy, too, and my kidneys didn't act often enough. Doan's relieved me of the trouble."

The Highgrader

by Wm. MacLeod Raine

COPYRIGHT BY G.W. DILLINGHAM CO.

CHAPTER XVII—Continued —5—

Alone with the westerner, Joyce felt her blood begin to quicken.

"Are you quite . . . recovered?" she asked.

Their eyes met. In his there was a faint cynical smile of amusement.

"Quite."

She understood the double meaning in his words. Her lashes fell to the soft cheeks, then lifted again. "I thought perhaps there might be . . . that you might still be . . ."

He shook his head vigorously. "It was only a dream. I can laugh at it now—and at myself for taking it seriously."

Joyce bit her lip in vexation. There was something not quite decent in so prompt a recovery from her chimera. He did not appear to fold even any resentment.

Nor did he. Kilmeny had been brought too near the grim realities to hold any petty pique. He found this young woman still charming, but his admiration was tinctured with amazement. No longer did his imagination play upon her personality. He focused it upon the girl who had fondled for his life against the ridicule and the suspicions of her friends. It startled him while for him to escape the allure of her fine sweet courage so gallantly expressed in every look and motion.

But Moya let him severely alone. Her pride was suffering because she had shown to all her little world too keen an interest in him. In her anxiety to repudiate any claim he might think she felt she had upon him the girl was accordingly indifferent to his advances. Almost rudely she rejected his gratitude.

"The man does not owe me anything. Can't he see that honors are easy?" she said impatiently to Lady Farquhar.

Jack Kilmeny was no quibbler. He set that less store of his and would for accept reputies. In four days now the Farquhar party was going to leave Goldbanks and he made the most of his time.

Moya never saw him coming toward her without having her pulses stirred, but her look met his always quietly and steadily. Not once did she give him a chance to see her alone. Even Lady Farquhar, who had been a severe critic of her vagaries, commended now her discretion. Jack rebelled against the restraint, but could find a chance

Kilmeny did not lose a minute. "Why don't you let me see you alone? Why do you run away from me?" he demanded.

Little patches of color burned beneath the shadows of her eyes. A sound as of a distant surf began to beat in her ears.

"What nonsense! Why should I run from you?" she asked, meeting with difficulty the attack of his masterful gaze.

"Because you're afraid to let me tell you that I love you," he charged.

"Thought it was Joyce you fancied," she retorted quietly, her pulse hammering.

"So it was. I fancied her. I love you. I'm asking you to marry me."

"You don't have to ask me to marry you because you exaggerate the service I did you."

"I ask you because I love you."

"Thank you very much for the compliment. Sorry I must decline." She did not dare look at him. Her eyes were fixed on the mill far below.

"Why must you—since you love me?"

She telltale pink stained her cheeks. "You take that for granted, do you?"

"It's true, I believe. How can I make love to you as other men do? Lady Farquhar won't let me see you alone—even if you were willing to give me a chance. In two days you are going—out—of my life. I must spend the truth . . . bluntly. I love you. It has been that way with me ever since you came into my life again. You think it's all been play with me? It's been hell . . . hell . . . till I was alone in the mine with death."

"I . . . am sorry."

"That's not enough. I'm going to have the truth. You saved my life. What for? It is yours . . . if you will take it."

She looked straight at him. "I can't marry you."

"Why can't you? Can you say that you don't love me?"

In the full-charged silence that followed a stifling emotion raced through her blood. The excitement in her set a pulse beating in her throat. Woman-like, she evaded the issue.

"The cable has stopped. What has happened?"

"Nothing has happened. It has stopped because I arranged with the engineer at the hoist to have it stop. When I give the signal it will start again."

But

He brushed aside her futile protest. "I'm going to have this out with you. Dare you tell me that you don't love me, Moya?"

He forced her to meet his eyes, and in that moment she felt weak and faint. The pulses of passion must simultaneously against her will.

"Please . . . be generous. What will they think? Let us start," she begged.

"They will think something is wrong with the machinery. But it doesn't matter in the least what they think. It's my last chance, and I'll not give it up. You've got to answer me."

Yes, I love you," she whispered.

Lady Farquhar protested and was overruled by a chorus of votes. The miner assured her that it was entirely safe. Reluctantly she gave permission for her flock to make the trip if they desired.

They rode on horseback to the mill. Jack paired with India, making so attempt to ride beside Moya, who brought up the rear with the captain. The westerner, answering the questions of his cousin, was his debonair best. Occasionally there drifted back to the couple in the rear fragmentary snatches of his talk. He was telling some one how he had been a mule skinner in New Mexico, of how he had ridden mail near Deming, and of freighting days at Tombstone. Casual anecdotes were sprinkled through his explanations to liven them. He spoke in the starring drawl of the South-west, which went so well with the brown face beneath the broad hat pushed in for the well-packed vigor of the man.

"And what is bucking a sample?" India wanted to know after one of his stories.

"You just pound some rock up and mix it to get a sample. Once when I was drug-driver of a herd in a round-up—"

Moya heard no more. She turned her attention resolutely to her companion and tried to detach her mind from the man in front. She thought she would have tried to keep her heart from beating.

After they had arrived at the mill Jack quietly took charge of the disposition of the party. Neither Moya nor Joyce were sent up in the first bucket. When this was halfway up to the mine the cable stopped to let another couple enter a bucket. Joyce, fifty feet up in the air, waved her hand to those below.

"You next, India," ordered her cousin.

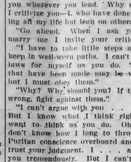
The young woman stepped into the bucket. "I'm frait," she announced promptly.

"No need to be. Captain, you turn."

The eyes of the two men met. Neil Kilmeny guessed instantly that the other had arranged this so as to get a few minutes alone with Moya. He took a place beside his sister immediately.

The cable did not stop again until the second pair of passengers had reached the mine.

Moya, followed by Jack, stepped into the bucket, which began to rise steadily as it moved across the valley.



"I've Mushed in Alaska and Fought Against Castro in Venezuela."

other start. I wouldn't let you give me the cold shoulder for the second time. Not after you've betrayed the secret she was fighting to keep from him. The long lashes fell to the lot cheeks in momentary confusion.

His hand found hers. "My little bride will come, all sweetness and shyness," he murmured.

Above the tumult of her heart she heard her voice say, as if it were that of a stranger, "It's no use . . . I cannot . . . marry you."

"Because I'm a highgrader?"

She nodded.

"Do you think I'm worse than other men? Down in the bottom of your heart do you believe that?"

She smiled wanly. "Other men are not . . . making love to me."

"Am I nothing but a thief to you?"

"I have told you that you are the man I . . . love. Isn't that a good start?"

The desire of her, pure as a flame, swept through him. "It's the greatest thing that ever came into my life. Do you think I'm going to let it end there? I'm going to fight for our happiness. I'm going to beat down the things that come between us."

"You can't. It's too late," she cried wistfully.

"It's never too late for love so long as were both alive."

"Not for love, but . . ."

"You've got to see this as I see it, sweetheart. I'm a man—primitive, if you like. I've done wild and evil things—plenty of them. What of that? I slough them off and trouble them no more. The heart of me is clean, isn't it?"

"Yes."

To look at him was enough to clear away all doubt. He had the faults that go with full-blooded elemental life, but at bottom this virile American was sound.

"Well! Isn't that enough?"

The little movement of her hands toward him seemed to beg for pity. "Jack! I can't help it. Maybe I'm a little girl, but . . . wasn't we

guilde our lives by principle and not by impulse?"

"Do I guide mine by impulse?"

"Don't you?" She hurried on to contradict, or at least to modify, her reluctant charge. "Oh, I know you are a great influence here. You're known all over the state. Men follow you wherever you lead. Why should I criticize you—I, who have done nothing all my life but lean on others?"

"Go ahead. When I ask you to marry me I invite your criticism."

"I have to take little steps and to keep in well-worn paths. I can't make laws for myself as you do. Those that have been made may be wrong, but I must obey them."

"Whip? Why, should you? If they're wrong, fight against them."

"I can't argue with you, dear. But I know what I think right. I want to think as you do. Oh, you don't know how I long to throw my Puritan conscience overboard and just trust your judgment. I . . . admire you tremendously. But I can't give in . . . I can't."

The muscles stood out on his lean cheeks as he set his teeth. "You've got to, Moya. Our love has been foreordained. Do you think it is for nothing that we met again after all these years? You're mine—the one woman in the world I want and am going to have."

She shook her head sadly. "No . . . no!"

"Is it the money I have made highgrading? Is that what stands between us? If I were able to come to you without a dollar but with clean hands—would you marry me then?"

He leaned toward her, eager, ardent, passionate, the color in his cheeks burning to a dull brick tint beneath the tan. Body and soul she swayed toward him. All her vital love of life, of things beautiful and good and true, fused in a generous rush of emotion.

"My dear . . . my dear, I'm only a girl—and I love you." Somehow her hands were buried in the strong grip of his. "But . . . I can't live on the profits of what I think is wrong. If it weren't for that . . . Jack, I'd marry you if you were a pauper—and thank God for the chance."

He faced her doggedly. "I'm not a pauper. I've fought for my share of the spoils. You've been brought up in a hothouse. Out in the world a man wins because he's strong. Do you think it's all been play with me? By G—d, no! I've ridden night herd in a blizzard when the temperature was below zero. I've done my shift on the twelfth level of the Never Quit mine a month. I've mushed in Alaska and fought against Castro in Venezuela. Do you think I'm going to give up my stake now I've won it at last?"

She looked at him tremulously. "I don't ask you to give it up. You'll have to decide that for yourself."

"Don't you see I can't give it up? If I do, I lose you. How can I take care of you without money?"

"I'll do my best, Jack."

You don't understand. It would be—for years—until I had made an

CHAPTER XVIII

Homing Hearts

Jack Kilmeny had not been brought up in the dry sunbaked West for nothing. The winds of the Rockies had entered into his character as well as into his physique. He was a willful man, with a good deal of granite in his make-up. A fighter from his youth, he did not find it easy to yield the point upon which he differed from Moya. It was her way to her as much of impulsive generosity that he had expected to overpower her scruples. But she stood like a rock planted in the soil.

It came to him as he walked home after a long fight with her that in his heart he did not want her to yield. Since she was the Moya Dwight he loved because she would not compromise with her conviction. Yet, though he wanted her to stand firm, he hated the thought of giving way himself. It galled his pride that he must come to her with out a penny, knowing that she had the means to keep them both modestly. Nor could he, without a pang, think of surrendering the twenty-eight thousand dollars he had fought for and won. He was no visionary. The value of money he understood perfectly. It stood for power, place, honor, the things that were worth having. Given what he had, Jack knew he could double it in Goldbanks within the year. There were legitimate opportunities for investment that were bound to make rich returns. But without a dollar he would be like Samson shorn of his locks.

All through the night he was joined in battle with himself, but when at early dawn he stood on the top of Sentinel-Gun and faced a silly finicky pink with the warning of a coming sun his decision had been made.

On his way back he met Moya and Miss Seldon. Joyce pounced upon him with a grievance.

"You haven't told me yet how much you're going to give for the new hospital, Mr. Kilmeny. You know we're leaving tomorrow, and you'll have to decide at once. Is it a thousand, please. You said yourself it was a good cause."

He nodded agreement. "The most worthy charity I know. I've often wondered why some Andrew Carnegie didn't set the fashion of endowing hospitals by wholesale. They ought to be free to all poor folks out of work. When a man is losing his wages and his family is scrimping he might not be able to pay a thirty-dollar a-week hospital charge. Yes, I'm for the new hospital, Miss Seldon."

"How strong are you for it?" Joyce asked, laughing at her newly acquired American slang. "Mr. Vertinler has promised to give me two dollars for every one I can raise among my other friends. So don't be a—"

"A tightwad," supplied Moya with a smile. She could do a little in the matter of slang herself.

Jack went into his pocket for a checkbook and a fountain pen, and wrote for a few seconds, tore the check from the stub, and handed it to Joyce.

That young woman gasped.

"Why—you don't really mean—it's for ninety-eight dollars! One hundred and fourteen cents. Please don't forget that," he added.

"But—what on earth do you mean?" Moya, who was in her as much of impulsive generosity that he had expected to overpower her scruples. But she stood like a rock planted in the soil.

"Because you were rescued from the mine, I suppose. Still . . ."

"I'm a highgrader and ought to be married to the best woman in the world," he corrected.

Joyce whirled upon Moya with in-

Simply Meant He Was Guest at Two Dinners

Burlington looked up from his desk, ton said: "I thought you had another upon wearing a cheery "Hello!" and found himself looking into the face of Davidson, college chum whom he had not seen for several years, says a writer in the Kansas City Star.

"Jack! Old fellow!" Burlington exclaimed. "Where in the world did you come from and what are you doing here?"

Then the two launched into explanations and reminiscences of college days. After an hour or more, Davidson declared that he must be on his way.

"How long are you going to be in town?" Burlington agreed.

"Oh, you; but you'll see me next Sunday, too," Davidson told him.

"I don't quite get you," Burling

engagement for next Sunday."

"Sure, I have," Davidson repeated, "but it is also at your house. I called up your wife this morning and said, 'Hello to her and she invited me out for Sunday'!"

Smelling Salts

Painting indicates that the action of the heart has for some months become disturbed, with the result that the brain no longer properly and regularly pumped up the brain. The essential feature of "smelling salts" is found to be irritate and stimulate a special group of nerve cells called the "respiratory centers," situated at the base of the brain. This center, feeling irritated, immediately sends out a message to the lungs, telling them to take in more air to counteract the effects of the ammonia. So we are forced to breathe more deeply, and the oxygen that we thereby take in enriches the blood, restarts the proper circulation to the brain, and so restores full consciousness.

Surely an Antique

Mrs. Newriche—This table isn't very antique. I don't see many worm holes in it.

Salesman—What do you think of this one, then?

Mrs. Newriche—Why it's nothing but a lot of sawdust.

Salesman—That's just it, madam. It's antique! Termites have eaten it all.

Mrs. Newriche—Wonderful! I'll take it.

Stop the Pain.
The hurt of a burn or a cut stops when Cole's Carbolic Salve is applied. It heals quickly without scar. 25c and 75c at all druggists, or send 30c to The J. W. Cole Co., Rockford, Ill.—Advertisement.

Staid Affair

"What is this?"

"A lecture on gravity."

"Seems to be plenty of it present."

Roots and Herbs Best for Kidneys
Daniel G. Carey, M.D.
BACKACHE
said Dr. Carey is a pretty sure sign that all is not well with your kidneys.
Delay may be dangerous—thousands of people die every year from kidney troubles and many could be saved if the right medicine was taken in time.

Dr. Carey knew how to mix roots and herbs and for over 40 years the famous Marshpoot Prescription 777 helped thousands of despairing people. It's the one remedy for backache troubles. Don't take substitutes—ask your druggist for it by name—liquid or tablet form—equally good, 75c. If your local druggist hasn't it he can get it from the Carey Medical Laboratories at Elkhorn, Wi.

"Meanest Man" Again

"The hardest spell I ever got into," said a World war veteran, "was on shipboard returning from the war. There is where I met the meanest man in the world. I had a cigarette, but no match, and came upon the meanest man as he was lighting his pipe.

"Save the match," I called to him. He slowly puffed his pipe into a glow, then throwing the match overboard, exclaimed: 'Get your own matches.'"

Oh, These Girls!

Edgh—Jack has spoken at last.
Ardo—And was his answer "Yes"?
—Sinny Stories.

True pleasure and perfect freedom are nowhere to be found but in the practice of virtue.

How vain is learning unless intelligence go with it.

How quickly that rash disappeared!
THOUSANDS of users have wondered at the quickness of the action of Resinol Ointment and Resinol Soap. The reason is that it is not a surface treatment only—that reaches the depths of the pores and attacks the source of the disorder, starting the healing right.
The first touch relieves the itching, burning and soreness and a few days persistent use rarely fails to clear away the trouble.
When the skin is once restored to its normal condition, the daily use of Resinol Soap is generally sufficient to keep it healthy. Ideal for the complexion—unsurpassed for the bath and shampoo. Ask your druggist what he knows about the Resinol products.
RESINOL

Writer Master of the Vituperative Art

The use of vituperative language is almost an art in itself. Many of the old-time politicians excelled in biting descriptions of an opponent or an opponent's policies. But today politicians are less abusive, generally preferring arguments to adjectives.

It is seldom, too, that one runs across a newspaper editorial which may be said to burn up the language in a recent issue of the London Daily Mail, however, D. B. Wyndham Lewis, who is given the title of humorist by his literary critics, let himself go.

He was writing about what he found good to read when it rains in the country, but his description of what he does not read seems to culminate the strongest array of adjectives and real vituperation noticed for some time. Here is the paragraph:

"As for pulsing, sickly, neurotic, frendian, mushy-pushy, effete, dirty, enfeebling, complex-ridden, overdrawn, decomposing, debasing, pasty, thin-blooded, jejune, lymphatic, wishy-washy, pimply-mangy stuff they print nowadays, I would not look at a Higher Thoughtist, let alone lift it to a Christian."

World's Oldest Umbrella

The oldest umbrella in the world is still in the same condition as when it was first made. It belongs to Mah Fooghi, including the cover, is in the possession of a resident of Hobart in Tasmania. The umbrella was bought in 1770 by a man named William Cleverly in the county of Dorset, England, who emigrated to Tasmania, and it has been handed down from generation to generation and still belongs to a descendant of the first owner.

Destiny Called

Herder and Schiller both in their youth inflicted a study as surgeons; but Destiny said, "No, there are deeper wounds than those of the body—I heal the deeper!" And they were—

Hats Off!

Along the street there comes
A blare of bugles, a ruffle of drums,
A flash of color beneath the sky;
Hats off!
The Flag is passing by.

Blue and white and crimson it shines
Over the steel-tipped, ordered lines.
Hats off!
The Colors before us fly;
But more than the Flag is passing by.

Sea-fights and land-fights, grim and great,
Fought to make and keep the State;
Weary marches and sunless days,
Days of plenty and years of peace;
March of a strong land's power and might,
Equal justice, right and law,
Stately honor and reverent awe;
Sign of a nation, great and strong,
To ward her people from foreign wrong;
Pride and glory and honor—all
Live in the Colors to stand or fall.

Hats off!
Along the street there comes
A gleam of white through the gloom and dust.
Stars and Stripes forever!
Hats off!
Let the Flag go by!

Destroyer Named for Sampson

The destroyer Sampson, launched at the Bethlehem Shipbuilding corporation's Squantum yard, was named for Admiral William T. Sampson, commander of the North Atlantic fleet during the Spanish-American war. Miss Anna Sampson, granddaughter of the admiral, broke the bottle of champagne over the bow of the vessel as it slid down the ways.

Justice to President Harding's Memory

By E. MONT REILLY, former Governor of Porto Rico.

It seems to me that the criticism of President Harding and the administration of President Coolidge for the appointment of Albert B. Fall to the cabinet is most unjust, uncalled for and very far from being fair. I have not seen where any editor, writer or speaker has given the political or official record of Secretary Fall, which in my mind completely justified President Harding in placing him in his cabinet. As I have said many times, it is easy to criticise, and does not require any brains, but it does require brains to execute. The most irresponsible person, thoughtless individual, or unscrupulous newspaper can condemn any great President or leader of the people. This is the penalty we Americans pay for our unbridled freedom and license in this country of ours.

Albert A. Fall was born in the Southern state of Kentucky, and had been all of his earlier life an active Democrat, and was by that party honored on many occasions. He left Kentucky as a young man, went to New Mexico, there became one of the leaders of the Democratic party, and the Democrats made him a member of the legislature, a member of the constitutional convention, then twice attorney-general and then associate justice of the supreme court. President Cleveland, the greatest Democratic President then appointed him a United States judge. It was said of Grover Cleveland and has been admitted often by Republicans, that he made fewer mistakes in his appointments than most any other President. Mr. Fall, in 1912 became a progressive, following Colonel Roosevelt and was elected by the legislature of New Mexico as a progressive Republican United States senator for a short term. He was then elected for a full term by the legislature and then later for a full term by the people of the state as a Republican. In 1916 at the personal request of Colonel Roosevelt, Senator Fall nominated Colonel Roosevelt for President in the Republican national convention, at Chicago, Colonel Roosevelt having every confidence in him. At the time President-elect Harding appointed him Secretary of the Interior he had been honored by the Democrats with all of these offices mentioned, and had the absolute confidence of two great Presidents, Grover Cleveland and Theodore Roosevelt. In the senate of the United States Senator Fall had made a good record, as he had made in all former offices held by him. When President Harding appointed Senator Fall in his Cabinet, he merely sanctioned the action of the people of New Mexico for various high positions, and followed up the confidence placed in him by both Presidents, Cleveland and Roosevelt. So, all things considered, pertaining to the official life of Secretary Fall, isn't it most unfair to criticise President Harding for and devilcitions on his part, when we understand Senator Fall's honored and history in New Mexico and his record in the national Senate?

United States Senator Bursum, of New Mexico, the leader of the Republican party in that state and not a friend of ex-Senator Fall, told me recently that he had never heard anything against the personal or official integrity of Secretary Fall until the "charges in the oil lease matter" and that he had always considered him honest, although differing from him radically on many things.

If President Harding made a mistake in the appointment of Secretary Fall, then every great leader of the world's history has made his mistakes. General Washington called around him ten generals in the Revolutionary war, two, Benedict Arnold and General Charles Lee became traitors to him and his country, yet who today criticises Washington for the mistakes of those two men?

Abraham Lincoln selected five generals from time to time, to command the Union forces during the Civil war and they all turned out to be failures, and never did he succeed until he selected the tanner of Galena, General Grant, to be the Saviour of the world chose 12 disciples to propagate his great cause and one betrayed Him, one denied him and one doubted Him. Let him who never made any mistakes, "Cast the first stone."

SINNERS in HEAVEN

by CLIVE ARDEN

COPYRIGHT by THE BOBBS-MERRILL COMPANY

Without doubt this story is the work of a master. The characters are real human beings. They were faced with a thrilling situation involving a problem too trying for the average sinner and probably too great for a saint to handle; nevertheless there were smug individuals ready to condemn them.

If you regard black as always black and white as always white, you may decide that the first word of the title is most appropriate; but if you can see varying shades of gray between black and white, you will be able to observe the peculiar fitness of the last word of the title. Any way you view it, it is a great story.

The Charlevoix Sentinel

ROAD BUILDING

HIGHWAY BUILDERS OF ANCIENT TIMES

Improving the highways is not a new idea. Highway engineering dates back to the earliest days of history. When it first became necessary to insure the transportation of supplies for tribal armies.

Julius Cæsar was among the foremost highway builders. Many other United States Senators Interested themselves in this work. The Appian Way, a long, straight boulevard leading to ancient Rome, is among the examples of early highway construction. So finely was this roadbed laid in thousand years ago that it is still one of Italy's finest avenues.

A nice example of fine road building is the Boulevard des Anglais, which skirts the Mediterranean at Nice, France. It is said to have been constructed by British soldiers, prisoners under Napoleon Bonaparte. A wide, smooth avenue which is underlaid with a deep stone foundation, it is apparently unaffected by time or weather conditions, has endured for a hundred years and bids fair to last many years more.

A considerable impetus was given to good-road building by John L. McAdam of Scotland. He utilized crushed stone top dressing on a convex roadbed. It is named macadam, for its inventor, but with a slight difference in the spelling of the name.

Macadam road surface was quickly copied in America, and proved an improvement over dirt roads. It did not easily acquire ruts, and was particularly unaffected by rain. On the east coast, where clam shells were plentiful, they were used by many municipalities for macadamization. The shells when finely ground under the wheels of traffic, proved efficient as top dressing, though hard on rubber tires while wearing in.

Then came the automobile, requiring, for utmost comfort, smoother road surface than had previously been necessary. Bumps that a slow-moving vehicle encountered with comfort, were disturbing to occupants of motorcars, traveling at speeds of from 20 to 40 miles per hour.

Highway engineers turned to tarred roads, asphalt and concrete for a solution of the problem, and found it. The materials which made such satisfactory sidewalks were as useful for road paving. Cobblestones are disappearing, replaced by smooth brick pavement, asphalt, tar or concrete.

The nation's intercity highways are paved.

County roads, not heavily traveled, are supported by a minimum of taxpayers. They are still a problem, but one that is eased by better maintenance than formerly. Nearly all farmers own cars. Hence they are willing to spend their time and money for road improvement. This is in the form of road dragging each spring, and oil sprinkling, which makes the dust impervious to rain.

The automobile has rapidly advanced highway improvement in the United States and Canada, where, due to the great distances to be traversed, road betterment had been slow in coming. Large sums obtained from the license fees paid by motorists are now annually devoted to road construction and maintenance.

Improved Highways Save Expense of Automobiles

Good roads are said to have been the biggest single factor in the 1925 reduction of automobile expenses of Minnesota county agents. Reports from the county agents show a decrease in the average mile cost to less than 7? per cent of the 1920 cost. George A. Pond, cost accountant, made a statement to that effect in further comment on the division bulletin on the subject. Other things which helped to bring down the auto costs, he said, were the long, dry season, making for greater mileages, the lower prices of gasoline and tires, and the smaller fixed costs, all held interesting to car owners, present and prospective.

Concrete Curing Means Highways at Less Cost

To save labor and speed up the work, a method of concrete curing has been invented. The chemical preparation used is a light-dust substance and is applied by sifting it from a hopper on the rear of a truck on which a supply of the material is carried. It absorbs moisture from the air and prevents drying out of the cement. One can treat a long stretch of road in one day. One or two treatments with the material each season are said to be effective in laying the dust by binding together the particles that may have accumulated on gravel or macadamized roads.

Odd London Names.

The square mile of the city of London is divided into 27 wards, with each quaint name as the Portsoken, Vintry, Cheapside and Candlewick wards.

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by Charles T. Lodisell and Minnie Lodisell husband and wife, of Marion township, Charlevoix county, Michigan, unto Eliza Dixon of the City of Charlevoix, Michigan, dated November 25th, 1918, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on the 25th day of November, 1918, in Liber 51 of Mortgages on page 140, which mortgage was afterwards sold, assigned and transferred by the mortgagee unto Thomas T. Dixon of the City of Charlevoix, Michigan, by assignment of mortgage dated August 25th, 1924, and recorded in the office of the Register of Deeds, for the County of Charlevoix, in Liber 65 of Mortgages on page 140, which assignment of mortgage was afterwards sold, assigned and transferred by the mortgagee unto Thomas T. Dixon of the City of Charlevoix, Michigan, by assignment of mortgage dated August 25th, 1924, and recorded in the office of the Register of Deeds

FORCED TO TELL THE TRUTH

By MARY B. WOODSEN.

(©, Dyasbrough, Page & Co.)

THIS story has no moral. It is the true story of Hilda Habcock is the heroine. She was born lovely. Since this is a true story that is a fact. From the peak of her high and sleeping forehead to the toes of her large and substantial feet she possessed not a point that could charitably be called passable. But people always said kindly she was such a sweet girl, so sensible.

At the age of thirteen and three-quarters, Hilda graduated from the fourteen high school and her parents tactfully suggested that she get out and hustle for herself as there were seven younger Hancocks to be graduated by degrees. The old folks realized it was useless to keep Hilda around the house as institutional bait. So Hilda sold her pet cow—beef was high that year—packed her hairpins, chase pin, tears, extra stockings and some other things and embarked for the city. She promptly enrolled in a business factory where in due course of time she learned to make patbooks in a notebook as fast as a man can talk, and to hit the right keys on a typewriter seven times out of ten. She also learned to add a column of figures on her fingers and to strike a balance sheet in a fit of boredom that would make a wire-walker seasick. When the factory loss had no more knowledge to give her, he gave her his blessing, instead of the address of a man heading a stenographers, and advised her to go gunning for experience.

Hilda's chase of this shy bird led her into many and various offices. In rapid succession she worked for a doctor, a lawyer, a detective chief, a rich man, a poor man, a beggar man and a trust magnate. Her longest record for holding down a job was two weeks when she compiled a list of investments for the beggar man and made out his income tax blanks. She picked up a few shekels in this way and much wisdom about both. She knew her work was as good as the average and that there must be other reasons why she couldn't make permanent connection with a job. This began to dawn on her after she had been handed her weekly stipend by her eighteenth employer with the request that she needn't come back Monday. It was she clinched when a beautiful blond doll, wearing a distinctly striped sweater and bobs a half yard across asked her in the absence of her ex-sleuthmen employer's office.

So that evening, in the solitude of her room Hilda took a careful inventory of her personal disadvantages. She summed up the net result which was disheartening, but by no means daring, in her frank, bucolic way.

"Say, sister," she confided to her mirror, "you could use your parents for the ugly duckling they're from—you don't get away from it—its glued on. So you might as well throw a disguise."

The telegram she sent her father next day startled him so he couldn't enjoy his after-dinner nap. But he sent the telegram on Monday and borrowed the money which he remitted with a paternally expressed wish that her mother's butter and egg money. So Hilda was financed for her experiment.

When the beauty doctors saw her coming they thought he was an easy victim, but Hilda was on to their game. She told them in the beginning she was a desperate case and wanted something done, quickly, to give her a general family resemblance to other girls. So the beauty doctors pitched in. They massaged and cold-creamed. They steamed and they shampooed and singed. They plucked her eyebrows and darkened her eyelashes. They sunkured and polished. And occasionally they reined Hilda to the door and fell on each other's necks in despair only to come grimly back with another kind of "treatment" and another way to fix her hair so her chin would stick out more and her nose less. When they turned her loose at last, with an armload of flats and bottles, she looked like a French doll that had gotten mashed in packing. With the few dollars left, Hilda bought a dress of a color combination she couldn't wear and a hat that shouldn't have gone with the dress. Her last four dollars went for French silk hose, made in New Jersey, and three-heel heels. With her heart and pocketbook light she left the wave.

But at the first place she applied for work next day, the manager seemed to suffer a violent stroke of blood to the head, followed by a severe coughing spell. He finally said they had decided they didn't need any more help, though his ad was in the morning paper. And after the fourth separate and distinct rebuff, she found it none too polite. Hilda began to lose faith in her beauty and have an uncomfortable feeling in the pit of her stomach when she thought of the money "Paw" had borrowed and she had spent.

The last place on her list was the general office of a large corporation. She was obliged to wait a few minutes before seeing the manager and realized with dismay that she had never seen such an array of feminine beauty as was concentrated in that one office. Such peachy cheeks and creamy throats, such silky hair, pearly teeth, fascinating gloss—horrid humming typewriters, peris sharpening long pencils, nymphs taking notes! They seemed to smile from desk to desk in native admiration of their own beauty—or something.

"Well," thought Hilda, as her heart bit the note of left sleeve, "this is no place for little me. I don't hanker to be the fly in the ointment."

But before she could escape, the manager, an old-young man with horrid eyes, spoke to her. His gaze seemed to hold faint interest.

"Can you spell?" he asked wearily.

"Oh, yes, sir." Almost unconsciously Hilda answered in her professional silly willing manner and her teeth flashed at him—her third those large, straightforward teeth.

"You're hired," he said.

And astounding as it may seem she remained hired. Though the beauties came and went and the publicity-promising average of the office force remained greater than that of a musical comedy, Hilda held her job. As the days slipped by she gained more confidence, more self-reliance and was "raised" with gratifying regularity. She was too dog tired after a long day at the office to bother with the beauty doctor dope and just resigned herself. And strangely, a second change of clothes she was doing the old-young manager's work exclusively at a profit while salary. Then he hold her one day he was going West to open a new branch for the company and wanted her to go along as his private secretary. Hilda was as surprised as anybody.

"I'll go, if you'll answer me one question," she said with a frown.

He seemed warily willing.

"I'm pretty, honestly, ain't I?" asked Hilda.

He looked so uncomfortable that she hastened to relieve his mind.

"Oh, I'm used to it now," she said. "And I've too long to make silly mash. But I've always wondered why the dickens you ever hired me—Sis—to be a sleuth on the landscape, and never mind asking around——"

Still cautiously, the old-young man hesitated.

"You won't get mad and quit if I tell you?" he said.

"No."

"Well, you're valuable because you're so darn homely, you—rested my eyes."

Isn't It Strange?

When the animals came out of the ark, Noah had forgotten their names, and so he and his family gave them new ones. When an enormous thing with a long nose came out, Shem said, "Let's call it an elephant."

"Very good," said Noah; and they wrote it down.

Then out came an animal with a very long neck.

"Let's call it a giraffe," said Ham.

"Very good," said Noah; and they wrote it down. Then they went through the stripes, and the wools, and the furs, and the short legs, and the long legs, and named them all in turn.

But right at the end, out came a small thing that did not jump.

"Let's call it a frog," said Ham.

"But why call it a frog?" asked Noah.

"Well," replied Ham, "what else could you call it? It looks like a frog, doesn't it?"—De Molay Councilor.

"Presidents" of States

Under the first constitutions of New Hampshire, Delaware and South Carolina the chief executive of the state was called the president. South Carolina changed the title to governor in 1778 and New Hampshire and Delaware in 1792. From 1776 to 1784 the highest executive authority of Pennsylvania was vested in an executive council, the chairman of which was called the president. However, after the Constitution was adopted by the 13 original states Pennsylvania as an independent republic with a president at its head to be admitted into the Union as a state.—Exchange.

Two Styles in One House

To teach Japanese the advantages of electricity, a two-story house, half one-half the rooms furnished according to Japanese methods and the other half in accordance with present-day western style, has been built near Tokyo for exhibition purposes.

Penny Deposits Mount High

Depositors in the Yorkshire Penny bank, England have to open cards more than a hundred million dollars, according to the statement issued recently. The name of the bank tells its purpose—that of getting people to save the pennies.

GLOWING MIDWINTER HATS; PARIS STYLES IN COATS

IF THERE were fewer women who love the luxury of furs, there would be a greater number of large hats. As it is, the universal fur collar, or fur neckpiece or fur coat, augers the arena of fashion, bringing with it a small, or at most, a medium-sized hat, usually rich in color and materials and often handsomely embellished. The large fur collar and the small hat make a better ensemble, because the

GROUP OF MIDWINTER HATS

large hat and the large collar together prove overwhelming—they obliterate their wearers.

The group of smart mid-winter hats shown here includes types that are nevertheless achieves distinction. Compared to many of they rivals in millinery, these hats may be classed as plain, for the small hat admits much brilliant and ornate decoration and silvers and for provides a comfortable collar which may be fastened up about the throat. One may-be very sure that the simple type button on the girdle is fine enough to accent the close of the coat. Such a coat, well interlined, made in one of the fur shades, will prove more than dependable.

The handsome affair at the left is a more formal type and therefore more attention has been given to its decora-

TWO OF THE PARIS OFFERINGS

the left is embroidered with silver and is a favorite shape. Just below that is velvet turban hat, with tall soaring crown, contrives a little sparkle by means of metal-edged ribbon in a tiny flower, and an upper brim covering of metal cloth. Gold cord outlines the brim-edge of the odd and effective hat at the right. It has as its favorite lining for all coats, including those of fur, and nothing withstands constant wear better than this beautiful fabric.

They Were So Careful.

dresses and coats and tam-o'-shanters with moth balls.

"As you know moth balls aren't for us to put with our things, but we know that we're not wanted. And

THE KITCHEN CABINET

(©, 1924, Western Newspaper Union.)

WEEKLY MENU SUGGESTIONS

French vegetables from one's own garden may be enjoyed by even the city dweller with a few yards of ground on which to plant.

SUNDAY.—Breakfast: Sliced peaches, shredded wheat biscuit, cream, Dinner: Pigeon pie, Supper: Rarebit with toasted crackers.

MONDAY.—Breakfast: Iced watermelon, Dinner: Broiled steak with mushrooms, Supper: Parker house rolls.

TUESDAY.—Breakfast: Stewed prunes, cream of wheat, cream. Dinner: Lamb chops, buttered carrots. Supper: English bath buns.

WEDNESDAY.—Breakfast: Apricots, buttered toast, bacon. Dinner: Beef stew. Supper: Macaroni with eggs.

THURSDAY.—Breakfast: Iced cantaloupe, bran, top milk. Dinner: Round steak with fried onions, boiled potato, soup, lettuce salad.

FRIDAY.—Breakfast: Bacon and eggs. Dinner: Molded salmon with peas. Supper: Popovers, sardines.

SATURDAY.—Breakfast: Frizzled beef with toast. Dinner: Shepherd's pie. Supper: Sandwiches, iced tea, sponge cake.

Pigeon Pie.

Cut lengthwise three young tender pigeons. Put the liver and heart through the meat grinder and mix with a pint of cream, two well beaten eggs, a salt, a dash of pepper and two tablespoonfuls of parsley, chopped celery, and chopped sweet pickles to season. Add one well seasoned pint of breadcrumbs full of nutlet butter, one teaspoonful of salt and a generous cupful of cream to mix to a soft dough. Lay the pigeons breast down in a baking dish lined with a good rich paste, put small pellets of the birds with the stuffing. Cover over with a paste, dot over with one cupful of black currants and pour over two cupfuls of stock. Cover with pastry and bake two and one-half hours in a moderate oven. Reduce heat after the first hour.

Cake.

Take one cupful each of butter and thin cream, one cake of yeast softened in a little warm water, the rind of one lemon. To four cupfuls of flour add one-half a pound of sugar and a tablespoonful of sugar and a teaspoonful of salt. Mix to a soft dough and add gradually a pound and a half pounds of mixed citron. Let rise, then form into twelve round buns, brush with beaten egg, dust with sugar, sprinkle with nuts and bake twenty minutes or longer in a moderate oven, till light.

(©, 1924, Western Newspaper Union.)

A little neglect may breed great mischief. For want of a nail the shoe was lost, for want of a shoe the horse was lost, being overtaken and stain by the enemy. All for want of a little care about a horseshoe nail.—Ben Franklin.

GOOD THINGS.

A dainty cake is always an addition to any table. With a foundation of

one-half cupful of butter, add one cupful of sugar gradually; add egg yolks well-beaten, one-half cupful of milk, one-half three-fourths cupfuls of flour sifted with two teaspoonfuls baking powder mixed well, and the stiffly beaten egg whites folded in at the last. Bake in a dripping pan and cut into cakes with a small round cutter. Put together with:

Hazel Nut Filling.—Cream three tablespoonfuls of butter, add one egg yolk well-beaten, one-half cupful of milk, one-half three-fourths cupfuls of flour sifted with two teaspoonfuls baking powder mixed well, and the stiffly beaten egg whites folded in at the last. Office, 112 Bridge St. Phone No. 479.

SUBSCRIPTIONS.

Three Months	$ .50
Six Months	1.00
One Year	2.00

Entered at the Charlevoix, Mich., postoffice as second class matter.

Notice to the Public!

Cars parking on the side streets at night must have lights—driving cars on the streets without lights after dark must also cease. All violators will be brought before the courts.

By order of Police Department.

ANNIVERSARY OF CEMENT OBSERVED

The World This Year Pays Honor to Unsung Stonemason of Leeds.

Washington.—To Joseph Aspdin, an unsung stonemason of Leeds, the world pays homage, this year for his discovery, which literally cements the foundation stones of civilization.

The one hundredth anniversary of Joseph Aspdin's experiment producing artificial rock, yellow like the rock from the quarries of Portland, is marked by the erection in Leeds by the American Portland Cement Manufacturers of a memorial tablet to one "who made the whole world his debtor."

"Greater tribute to the vision of Joseph Aspdin are endless white ribbons of concrete highways, the annual increase of which in the United States alone would build three continuous Lincoln highways from New York to San Francisco," says a bulletin of the National Geographic society from its headquarters in Washington.

"Cheops' great pyramid at Gizeh, covering 13 acres and towering 481 feet, is still considered the world's most colossal man-made structure, yet the little lump of stone made by Joseph Aspdin in 1824 has grown so great that the United States is estimated to have poured in a year sufficient concrete to erect 30 pyramids like Cheops'. The 300,000,000 cubic feet of the pyramid represent only three-fifths of the concrete in the Panama canal.

"Aspdin must agree with imperial Rome part humor for giving the world liquid stone. Rome used hydraulic cement in her famous aqueducts, and it was in search of Roman secret, lost for ten centuries, that Aspdin and others worked out the way toward modern concrete. Roman masons found that by mixing lime with volcanic ash from Pozzuoli near Naples a mortar impervious to water resulted. On this discovery rested much of Rome's glory; for the magnificence and extent of the city was practically impossible without a water system. Unconsciously Aspdin imitated Nature; the volcano was nature's kiln. The stonemason, by baking his materials in a heat which approximated the ordinary heat, created the principle found in Pozzuoli ash, a substance which hardens on contact with water.

Lehigh is Cement Valley.

"Although portland cement is produced in 27 states, the Lehigh valley of Pennsylvania is the Pozzuoli of the United States. Silica, calcium and alumina are the necessary cement ingredients which are contained in rock formations 'made to order' in this valley. 'Crushers in the Lehigh valley take blasted rocks as large as five feet wide, three feet thick and ten feet long and munch them readily into bits. Other teeth grind the stone to powder, which is mixed with water to form a sloppy slurry. Under all pressure this is blown into the immense volcano, a cement kiln, the largest of which is half as long as an average city block and has a diameter of ten feet. This tube is lined with firebrick to withstand the terrific heat resulting from the burning of coal dust blown into the kiln from the other end. In the throat of this volcano a reaction occurs, transforming a third of the stone into the active principle of cement. An endless belt brings cumbersome nodules out of the kiln to more grinders, which crush them to the fineness of flour. Six hundred pounds of raw materials and fuel are required for every 376-pound barrel of cement.

"Cement has itself created a separate industry which has important bearing on the prosperity of the southern states. Annually it requires thirty million new cement sacks of finely woven cotton. To make these, 50,000 acres of cotton must be grown and 1,000 looms operated every day of the year. Woven in one piece, 30 inches wide, the cloth that goes into these sacks would unroll for 17,000 miles.

"Much as the Roman aqueducts were the necessity that numbered the invention of the first hydraulic cement, canals have produced modern cement. Aspdin's portland cement was first used extensively in the Thames tunnel. Sixty American cement factories can be traced by early American canals, roughly the Erie canal, which soon earned the name of 'the mother ditch' in the United States.

"Aside from its irreplaceable value for a thousand uses, portland cement is saving millions of dollars to every taxpayer by cutting down the requirements for power. Scientific tests show that it requires nearly three times more power to move a ton over a gravel road, and two times more over a macadam road, compared with the 27.6 pounds necessary on a level stretch of concrete.

Marking Steel and Cement.

"A French gardener's flowerpot with imbedded metal parts was the simple origin of reinforced concrete, whose vast possibilities are founded largely more than the mysteries of the bouse. Steel and cement, experts find, are happily mated. As in all good families, the qualities one lacks the other has. Concrete is noted for resisting compression and does not easily break down under butterings of weather. Steel protected by cement will not rust away, and its ductility makes possible an ideal union of material, strong, light, permanent, inexpensive and yet not brittle.

"The highest monument to concrete's value is a great chimney in Japan, three feet higher than the Washington monument. It withstands frequent earthquakes. Lorado Taft's towering statue to 'Black Hawk' above Oregon, Ill., is a true monument to concrete. The material is used for levees on the Mississippi. It is shot from guns for lined surfaces. Ships and barges have been made with it. Skyscrapers find it a stout foundation. Farms alone use nearly one-fourth of the United States' cement for innumerable purposes."

Marie Corelli's Appeal

It cannot be said that a flight of figurative wrest out with the pinions of Marie Corelli, but it will be impossible for the historian who essays to describe the literary taste of her generation to ignore the author of "The Romance of Two Worlds." Her appeal was not to the intellectual elite, and yet she was one of the favorite novelists of Queen Victoria, was found fascinating by the exquisite Elizabeth of Austria, was read by the elegant Alexandra of England. This royal favor denotes nothing as to the artistry of her work, but it signifies the remarkable catholicity of her appeal.—Boston Herald.

WANT COLUMN

FOR SALE—Ford truck. Warford 6 speed transmission, over size tires. Half days work hauling milk. If wanted see W. C. Howe, Loon Farms 10 s. m. 34-2t

FOR SALE—Six room house and lot 112x50 at 208 E. Lincoln St. Inquire of E. E. Allen. Phone 186. 34-4t

WANTED—You to call phone 224 and get your sewing machine made like new by Elmer Keel, at the Star Restaurant, for about two weeks. I'll use you right.

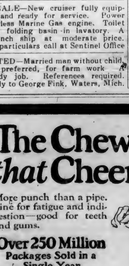
FOR SALE—House and lot, 403 Petoskey avenue. For particulars see I. S. Ranney. tf

FOR SALE—New cruiser fully equipped and ready for service. Power Peerless Marine Gas engine, Toilet with folding basin in lavatory. A Staunch ship at moderate price. For particulars call at Sentinel Office

WANTED—Married man without children preferred, for farm work—steady job. References required. Apply to George Fink, Waters, Mich.

The Chew that Cheers

More punch than a pipe. Fine for fatigue and indigestion—good for teeth and gums.



Over 250 Million Packages Sold in a Single Year

Unvaryingly blended—flavored with the purest ingredients, all stems and fragments removed. 10c is flattered every time it meets a package.

P. Lorillard Company

Minister Wants People to Find Divine Presence There

Reverend Geo. Duncan, D. D., Church of St. Andrew and St. Paul, Presbyterian, Montreal, Quebec.

Take the Church—which used to stand for so much in the lives of us all. What do we hold has it on you? Do you belong to the Church, or does it now belong to you?

The Church of God remains. But do not modern notions tend to creep in, and change our attitude to the Church? Do we view it as an institution in the world divinely founded, to which we all owe something? Or have not commercial views crept in, even thinking and speaking of congregations as so many religious shops run by ministers and managers?

Garish advertisements, sensational subjects, concert-hall entertainments, Sunday teas and suppers on the spot, are these for the glory of God or for the pull of the mob? The sensation of a crowd is evidently more today than the devotion of a soul. People crowd the "auditorium" as it is being called, confronted by a speaker on a platform over-topping the Communion Table, which, if it could be seen as conspicuously as he can, would remind all of the Divine Presence, causing us to do all for the glory of God. Why, in the Catholic Church, the clergy but introduce as it were, the Divine Presence, and then stand aside. The modern preacher introduces himself, in order to make an impression on the public! You can guess which represents the more abiding element for truly religious souls. It is not religion that is wrong in our day; it is our public notion of religion, which is being perverted. People who throng to some "meeting place" will tell you without a blush that they have come to hear some man; they are often taken aback when you say you have come to worship God; they seldom think of listening to God in the silence of their souls; they have not the quiet, or the atmosphere in which to commune with the Eternal; they are listening to a man preach more or less intelligently; they are listening to a man utter prayers which are too novel for them to join in even in thought; and that man never gets out of their sight, unless to let them gaze at the garish pipes of the grand organ which have little more of the spiritual and the divine to suggest to a man's soul than a coil of heating pipes. Even the "movies" keep those organ pipes out of sight so as not to detract attention from the main matter of interest—which, in church, should be the unseen Presence of the Divine.

The man in the modern "platform-pulpit" may not be altogether to blame; he may be led to pander to the demand of the pew. But it is just worship; it is not the Church as the place where the Divine should be the central, dominating and silencing reality. That, with the modern commercializing of the churches, is not religion. Commercialism religion, and you have the latter. Ignore religion and you lower it, debase it, empty it of the divine. This, then feel today—they can not explain how—and many of the best of them will not be bothered about what they feel is a husk. For many the main for truly religious souls. It is not church is a man-run thing, they say, and they won't belong to it. But deep down, like Jacob, they are in reality a real ladder connecting the earth of the kerchief intelligible wealth of the bride's parents.

In Siav weddings the bridegroom fetches the bride from the home of her parents, a custom emblematic of the practice of his forebears who carried their wives away from the tribe. In Indian weddings it is correct for the bride to weep and show great reluctance in leaving home. The bridegroom must present his betrothed with an embroidered sash for he married, another hour how pay he.

Of all ordered Japanese ceremonies, those of Japan in the month when the cherry trees are in full blossom are the most beautiful. After seeing the momentous decision to accept, each must "for better, for worse," the young couple consult the soothsayers to determine on what day they should wed in luxury good fortune throughout their married life. The ceremony is usually performed in the afternoon, and at once the bride enters her "naga," or carrying hammock, and sets out for her new home. She is followed by gift-bearers who display the wedding presents to spectators along the streets.

The ceremony of the bath" is a quaint feature of the Egyptian wedding. On her wedding morning the young bride-to-be, accompanied by her girl friends and several musicians, sets out for the public bath, riding on a mule, if she can afford it, a canopy of bright-colored silk, topped with bunches of palm leaves, after the bride and her friends have bathed together, they are entertained by flute players, singers and story tellers.

Tit-Bits

A cinema director who had been turning a Riviera film was praising at the Lambs' club the food of southern France.

"You even found the French snails good, eh?" said a fine Impress. "But I wonder how some of the delicacies I have seen in China would strike you—delicacies such as waterlily roots, birds' nests, ducks' gizzards, bean macaroni, eggs that have been ripened for years like cheese, stinted earthworms, marmalade made from roses, dog steaks, dried and preserved oysters."

"All I can say," replied the cinema director, "is that if I ever go to China to turn a film you may be sure I'll never try the tinned earthworms or the dog beefsteaks."

The Long Bow

"Some of the ridiculous and transparent inventions circulated by publicity agents about their celebrated or wealthy celebrated employers," said Mayor Kendrick of Philadelphia, "overshoot the mark. Like the two Texans who were bragging about their brothers.

"'My brother,' said the first Texan, 'once went to a billiard saloon, picked up a ball in his right hand and another in his left, and the result was pool-der.'

"'Well, that's nothing,' said the second Texan. 'My brother once went to a ball fight, and he took a ball in the left hand and another in the right; he squeezed them; result—bottle of meat extract.'"

Scientific Photos

From a seat suspended 50 feet above the ground, an osteologist of the American Museum of Natural History recently took photographs of a trotting horse speeding below. In this way he obtained accurate records of the motion of the spine and muscles in action. These records are being used in mounting the bones of Lee Axworthy, the champion trotting stallion of the world, so as to show him in the gait with which he made his record of 1:58¼. Trotting was bred in the farms of Lee Axworthy down on a Kentucky stock farm, and now his bones will add to his fame by completing the most scientific exhibit of horses' bones ever mounted.

Corn Silage Hints Made by Experts

Prepare When the Moisture Content is 65 per Cent.

(Prepared by the United States Department of Agriculture.)

Corn silage is best prepared when the corn is cut at a stage containing about 65 or 70 per cent moisture, say specialists of the United States Department of Agriculture. This may be told when the lower leaves on the stalk next the earing brown, about 30 per cent of the kernels are dented, and 75 per cent are so hardened that no moisture can be squeezed out.

The length to which the silage is cut should be from one-half to one inch. Silage cut this short will pack better and the silo will hold its maximum tonnage. Also the chances for the silage to spoil are considerably reduced.

In filling the silo packing is essential. The common practice is to keep the silage slightly higher than the center and to tramp the whole surface thoroughly.

If the silage is too dry to pack well, water should be added. This is best done by directing a hose in the blower. Well-packed and moistened silage is less likely to mold.

When the silo is filled the silage should be covered to prevent spoilage. A layer of cut corn or sorghum stalks from which the ears or grain have been removed does this effectively.

Unproductive Idle Land Made to Yield Profits

Idle land like idle labor is a derelment to any county. Taxes must be paid on all land. Why not grow a crop of timber on worn-out, sandy, broken, or wet lands not needed for agriculture? This pertinent question for farmers is answered by W. R. Mattoon, extension forester, with the United States Department of Agriculture, who reminds us that there are several million acres of such land which should be producing timber because it is the most profitable crop that can be grown on such lands.

Timberland that has been cut heavily and burned over usually has on few seedbearing trees that it does not get well set in young growth. All sorts of "weed trees" come in, like sweet gums, sassafras, persimmon, and others, often preventing the more valuable trees from coming in.

Pines are easily propagated, and denuded lands can be made to grow a full crop of pine with a little effort. Experiments show that slash pine seed can be successfully sown on wet lands, such as savannah or crawfish lands. About two pounds of seed per acre should be used. Sowings on land with one year's grass have given better results than on freshly burned-over land.

Jobred Wheat Is Again Ready for Distribution

Jobred wheat is again ready for distribution in lots of sufficient size to seed one acre in comparison with some home-grown variety. This wheat is being distributed by the Iowa Agricultural Experiment association this year for a charge of $2.00 for 1½ bushels.

Reports received from a number of those receiving this wheat last fall indicate that it came through the winter in fine shape in all parts of the state. Its record at the experiment station during the past several years would indicate that it is an unusually hardy strain as well as a good yielder.

Jobred is a variety which can quite readily be distinguished from other varieties as it has a very plump berry and also a very distinct bronze-colored chaff which makes it rather distinct from the average variety of winter wheat.

Those interested in securing enough of this seed to try one acre of it should write to the Iowa Agricultural Experiment association, Ames, Iowa, sending $2.00 to cover cost of seed before the limited supply is exhausted. It is now ready for distribution.

"ALL FOR HEALTH, HEALTH FOR ALL"

THAT'S THIS CRUSADER'S WAR CRY AS SHE PLEADS FOR BETTER HEALTH.

Here's Mary Elizabeth, all ready to wage war against dirty hands, fave sets, beauty, summer and winter Health. She's a Modern Health Crusader of the Michigan Tuberculosis Association.

which fights disease of all kinds. She stores at least ten hours every night with her windows open, she likes milk and she eats only those foods that healthy, happy children should have.

Healthy children can't succumb to tuberculosis. Making frail children strong is one of the duties of the Christmas Tuberculosis Seals. Buy Christmas Seals and help Mary Elizabeth and other Crusaders fight tuberculosis, which strikes where least expected.

Gave Logical Reasons

Medium—I hear the voice of your departed husband, madam.

Widow—What does he want?

Medium—He said he wants to talk to you because he didn't have a chance when he was alive.—London Answers.

Her Precise Wish

Lawyer (quickly-patiently)—I'm sorry, but I'm afraid I can't be a good deal of publicity connected with your divorce.

The actress (crisply)—Huh! There'd better be!—London Answers.

WAYS OF TELLING LOVE'S OLD STORY

Different Nations Cling to Time-Honored Customs.

Love's old story repeats itself in every clime, and weddings in other parts of the world differ from the American ceremony only in details of costumes and legal customs. The tender emotions that fill the heart of a bride when she stands before the altar or in the home, whether she expects to be celebrated in China or Chicago, and Easter is a popular time for weddings the world around, the same as June.

In rural parts of Germany, instead of the conventional engraved wedding invitation, a professional messenger is employed to invite guests to the wedding. As his tall figure passes through the streets, there is an air of eager expectancy among the villagers, for it is not known to whom the magic words of invitation may come, says the San Antonio Express. The messenger announces his mission in loud, sonorous tones, then proceeds to the next house on his list.

When a young man in Austria feels matrimonially inclined, he presents the girl of his choice a bunch of flowers as she comes from church on Sunday morning. If she accepts the floral tribute she is his wife-to-be from that time forward, and the budding romance proceeds in its customary culmination.

In Saxony the groom, his best man and the ushers wear, instead of the conventional black suit, a long blouse-like garment trimmed with lace and ruffles, with bunches of flowers on shoulders of their broad-brimmed hats. The bride carries a linen handkerchief which is supposed to serve as a small tablecloth. The size of the kerchief intelligible wealth of the bride's parents.

In Siav weddings the bridegroom fetches the bride from the home of her parents, a custom emblematic of the practice of his forebears who carried their wives away from the tribe. In Indian weddings it is correct for the bride to weep and show great reluctance in leaving home. The bridegroom must present his betrothed with an embroidered sash for he married, another hour how pay he.

Of all ordered Japanese ceremonies, those of Japan in the month when the cherry trees are in full blossom are the most beautiful. After seeing the momentous decision to accept, each must "for better, for worse," the young couple consult the soothsayers to determine on what day they should wed in luxury good fortune throughout their married life. The ceremony is usually performed in the afternoon, and at once the bride enters her "naga," or carrying hammock, and sets out for her new home. She is followed by gift-bearers who display the wedding presents to spectators along the streets.

The ceremony of the bath" is a quaint feature of the Egyptian wedding. On her wedding morning the young bride-to-be, accompanied by her girl friends and several musicians, sets out for the public bath, riding on a mule, if she can afford it, a canopy of bright-colored silk, topped with bunches of palm leaves. After the bride and her friends have bathed together, they are entertained by flute players, singers and story tellers.

"Black Magic"

Black magic is as old as the black race and, if there were not some gold in it, it would hardly have survived. Belief in it is universal throughout savage Africa. Even in the minds of our educated American negroes dim echoes of magic times still reverberate. Uneducated negroes are still believers. If you wish to test the truth of this statement, shout "Voodoo!" at a negro in the dark. His rabbit's foot is a token of magic.

Black magic has never been scientifically studied. If it were thoroughly investigated, Captain Hasselden, who spent two years in Central Africa before coming to California to take charge of Henry Huntington's medieval manuscripts, thinks that amid a mass of superstitions a few fundamental truths would be discovered, which might prove beneficial to humanity as a whole.—Runsome Sutton, in San Francisco Chronicle.

Advocates Old Habits

Twentieth-century man would be healthier and happier if he would sleep with a nightcap on like head and a warming pan at his feet, according to Sir James Cantlie, one of England's best-known physicians. Sir James is seventy-three and claims he can dance as nimbly as he could at seventeen.

"Don't think because you live in an age of airplanes you know all about hygiene," he declared. "Your grandmothers were no fools."

Bald heads were much scarcer, Sir James asserted, in the days when men were nightcaps. In a damp climate like England, he said, a nightcap is as useful as clothes. Warming pans, likewise, aid the health of the sleeper by drying out the sheets before bedtime.

Finds Loafing Irksome

A man from Lynn, Mass., has presented a somewhat unusual request to the state department of labor to Portland (Me.) Chamber of Commerce, says the Boston Globe. He seeks employment for which he can take as payment only board and room. He has a certain fixed theory, which is given him solely on condition that he does not take employment for wages. Lack of work has become irksome, hence his unique request.

ADDITIONS TO MICHIGAN'S PLANT

President Frans C. Kuhn of the Michigan Bell Co., announces that his company will expend more than $85,000,000 between now and the end of 1929, for additions to Michigan's telephone plant. That sum is more than twice the value of the property worth of the plant with which the company serves Michigan up to more than one hundred and fifty million dollars.

President Kuhn, briefly outlining the Telephone company's plans for the next five years, indicates that additions to plant serving mobt of Michigan's largest cities are contemplated.

During the year 1925, alone, the Michigan Bell company will expand its plant to the extent of $16,782,000.

—PERSONALS—

E. N. Davy is spending two weeks in Chicago.

Lisle Shanahan made a trip to Petoskey on professional business Tuesday.

Mrs. George Eheln, of Chicago, visited Mrs. Julia Reynolds last week.

Henry Hartwig and wife went to Grand Rapids Tuesday for the winter.

W. D. Gallagher, of St. James, is in the city on business for a few days this week.

Frank A. Kenyon was in the city for a short time Sunday, on his way home to Mackinac Island from Detroit.

Those desiring cut flowers call Mrs. W. B. Shields, phone 336. We also have a fine stock of straw flowers on hand.

Robert Bonthron underwent an operation for appendicitis at the Charlevoix hospital Friday evening, and is well on the road to recovery.

George Bacon has taken a position with the Western Union Telegraph Co., at Sault Ste. Marie, where he will remain until the last of March.

Mr. and Mrs. J. A. Noble and Miss Delia Compton left yesterday for an automobile trip around Lake Michigan, which will take about ten days,

Arthur J. Zipp and wife, who have been in Traverse City several months, returned to their home on Belvedere Ave., last week.

Miss Olive M. Allen, manager of the local Western Union Telegraph office is taking a vacation in Grand Rapids, where she is visiting relatives for two weeks.

Fred S. Myers was elected to fill the position on the board of Education, made vacant by the resignation of R. L. Lewis, at the last regular meeting of the Board.

The ladies' of the Methodist church will give their annual Chicken Pie Supper, Wednesday, November 19th, from 5:30 o'clock until all are served. The price will be 50c.

Mrs. Arthur McGeagh, of Lansing, Miss Edith Lamoreaux and Miss Lillian Malone, of Boyne City, motored to this city last Monday evening. After taking dinner with Miss Nettie Correll, they returned to Boyne City.

Mr. and Mrs. Ernest Nordstrum and young son, are at the R. A. Ramsdell home on Clinton St., for a few weeks. Mr. Nordstrum is managing the Western Union during the absence of the resident manager.

Mrs. Clara Todd returned Saturday from a two weeks' visit with friends near Cheboygan.

Mr. and Mrs. A. L. Fitch and Mrs. R. W. Paddock returned Saturday from a two weeks' trip to southern Michigan cities.

The local Rebekah Lodge will be the guests of the Boyne City Lodge at a six o'clock dinner and entertainment on Friday evening.

Albert Holmes, wife and sister, Almeda Holmes, left Tuesday for Port Orange, Fla., where they will spend the winter.

Mr. and Mrs. Ernest G. Loeb, Mrs. Albert Loeb and son Thomas, arrived Thursday from Chicago, and are at their home at Loeb Farms.

Mr. and Mrs. T. F. Leonard, of Chicago, drove in from Chicago Sunday and took the boat for St. James Monday to visit at the home of Father Hayes.

A series of revival meetings will be held at the Church of God beginning Sunday evening, Nov. 16th, and every night for two weeks.? All are invited to attend.

The Shakespeare Study Club are again this year sponsoring the Music Memory Contest which is to be held in connection with the co-operation of Miss Van der hagen, of the music and art department.

Mr. and Mrs. George W. Priest have returned from a month's vacation in southern Michigan. They were accompanied on their return by Mrs. Max Ward, of Mt. Clemens, who is spending the week as their guest.

The body of Miss Annie McCauley, who died in Chicago recently, arrived in Charlevoix Friday and was taken to Beaver Island Saturday. Deceased was a daughter of the late James McCauley, of Beaver Island, and is survived by one sister, Kate McCauley. The funeral was held at Holy Cross Catholic church Monday.

Mr. and Mrs. Harry Horner, of Enid, Oklahoma, who visited at the D. S. Payton home a few days last week, left on their return trip Sunday. They will visit their son in Lansing, who is professor of economics at the M. A. C., for a few days, also attend the Stock Show at Chicago, and spend a few days with relatives in Kentucky en route.

Mrs. Charlotte Bonthron, and sons John and wife, and Frank Bonthron, of Chicago, another of the brothers, respectively of Robert Bonthron, of this city, were called here last Saturday by the serious illness of Mr. Bonthron. All but Mrs. Charlotte Bonthron, who will remain here during her son's convalescence, returned to Chicago yesterday.

Mrs. Sarah Emrey sold her cottage at Pine Point this week to outside parties.

Charley Lamphear and family moved into their home on Antrim street this week.

Mrs. Anna McLaren went to Chicago Wednesday, where she will spend the winter with a sister.

Mrs. Grover Geneit underwent an operation of a minor nature at the Charlevoix hospital Monday.

Eugene Crandall and wife are leaving Monday for Sarasota, Fla. for the winter. They will drive through.

Mr. and Mrs. Charles E. See leave this week to drive to Port Orange, Fla., where they will remain until spring.

Mrs. Brenner and daughter, Mrs. Carey, went to Detroit yesterday, where they will remain during the winter.

Mr. and Mrs. Roy Cockling, of Petoskey, motored to Charlevoix this morning and spent the day with Mr. and Mrs. Charles Marshall.

Mr. and Mrs. H. F. Hansen leave next Tuesday for Manistee, where they will visit relatives for a week before going to Grand Rapids for the winter.

A card received from the motor party consisting of Mr. C. Taylor and wife and Mrs. Anna K. Wood, states that they were leaving on the 11th for Florida after a three days' visit in Washington, D. C.

The rough weather for the past two weeks has been a great handicap to the Beaver Island fishermen, in the gathering of trout spawn for the government. Nets were set about two weeks ago and the fishermen have been unable to lift on account of storms. This means a great financial loss, as the fish have been in the nets so long as to render them unmarketable.

Mesdames Jos. Foster, Jos. Howard, Jas. Gaskin, Earl Miller, Alden Smith, Louis Orlowski, F. E. Cartier, J. J. Hallett, Fred Stafford, of Charlevoix, and Mrs. Lee Lalonde, of East Jordan, were hostesses at a bridge luncheon at the home of Mrs. Jos. Foster, Wednesday afternoon, at which about twenty ladies from Petoskey were guests.

St. Mary's Catholic Church.

SUNDAY SERVICES.

Low Mass 8:00 a. m.
High Mass 10:00 a. m.
Saturday and Monday 7:00 a. m.

Rev. Fr. Wegemer, Pastor.

First Church of Christ, Scientist

Sunday service, 10:45 a.m., Subject, "Mortals and Immortals."

Wednesday evening service, 7:45.

Reading room open Tuesday, Thursday and Saturday, 3 to 5 p. m. The public is cordially invited to visit our reading room and attend our church services.

Psychology Simplified for Police by Boy, 10

New York.—A group of thirty men was gathered in a lecture room at Bellevue hospital recently listening to Dr. Menas S. Gregory, director of the psychopathic and alcoholic service, lecture on psychology.

They were members of the New York police department's training school for detectives, and their expressions indicated that they were not absolutely sure whether psychology was something in the police regulations or not. But before they had left the room a ten-year-old boy had given them a demonstration of applied psychology which had more force than reams of theoretical reasoning.

Doctor Gregory had noticed that the men were not completely grasping the meaning of his talk, so he sent word to have a boy who was being held as an incorrigible brought to the lecture room. Then he called for a member of the class to step to the front. The boy was told:

"Suppose that this policeman had just arrested you and you had no money to get away. What would you do?" Then the boy was cursorily told by the policeman. He scratched, bit, kicked and struggled until he wriggled loose and ran between the policeman's legs and upset him on the platform amidst his brother officers' guffaws. Doctor Gregory questioned the boy, saying:

"Now tell us just why you did the things you did. Why did you scratch the policeman?"

"Aw, that's easy," replied the boy. "When a cop's got me I'm gonna fight to get away. When I scratch his face he puts his hands on to cover his eyes and when he does I'm gone."

Men Bigger and Better Liars Than Women

Berlin.—Never believe a man, ladies. Lueffar, the father of lies, was a male and so was Ananias, legendary champion of untruthfulness. Not only are men much bigger liars than women, but they are better liars.

All persons, without exception, tell more or less frequently. A man lies either from habit or to further his interests. A woman lies to extricate herself from an embarrassing position. Men are more original in their lies, because they have had more practice, and "practice makes perfect."

These conclusions come from Professor Ehlers, a well known Danish physician, being masculine, he ought to know all about lying.

The professor was among the contributors to a symposium with which a Danish newspaper tried to answer the question whether men or women were better liars. Most of the contributors, mostly men, agreed that everybody lies. The observations of Professor Ehlers, however, caused the most comment. He says that women usually fall back on the same threadbare lies which bear the stamp of lies on their face.

Professors Turn Light on Hidden Girl Genius

Boston, Mass.—A young woman declared by a committee of industrial leaders and Harvard professors to be a genius whose light was being hidden under the routine of school teaching and factory work was identified as Miss Muriel Black, employed temporarily by the Plymouth Cordage company in Plymouth.

Those who saw her after a report of the committee of the Associated Industries became public said the committee might well have added "extremely attractive" to its summary of qualities of the twenty-four-year-old girl—"poise, outlook, a fine physique, excellent practical judgment and great ambition."

Miss Black, in discussing the committee's choice, said:

"I want to study medicine and specialize in children's diseases. That has been my ambition since I was a little girl of ten years in Michigan."

The committee has indicated that the education will be forthcoming as a result of its findings and the confirmation by the Harvard professors.

Girl Usher Left $50,000

Los Angeles, Cal.—Miss Genevieve Waddell, pretty seventeen-year-old usherette at a local theater, has just received word that she has been left $50,000 by her uncle, Walter Waddell, a banker of Everett, Wash. She will receive the money on her next birthday, February 18, 1925.

Council Proceedings

Council Chambers, Nov. 10, 1924.

The Common Council of the City of Charlevoix met on the above date with Mayor Bergeon presiding.

Aldermen present—Bridge, Eckinger, Livingston, Madill, Parmelee.

Minutes of meeting held on Oct. 27th were read and approved.

The Finance committee submitted the following report, having examined the following bills against the City and found them correct and recommend they be allowed, to the Honorable: Nov. 10, 1924.

The Mayor and Common Council of the City Of Charlevoix:

Gentlemen:

Your Finance committee, having examined the following bills report the same correct and recommend they be allowed and the clerk authorized to issue orders for the same:

Contingent Fund	
Arthur Bergeon, salary	$31 25
Elma H Cook, salary	25 00
John Cook, salary	27 50
H. D Payton, salary	70 85
Mary Hamilton, services	8 00
Election Inspectors	
Josephine Madill	9 00
Minnie Cross	9 00
Sadie Supernaw	9 00
Kaye Butters	9 00
J. J. Hallett	9 00
L. S. Penny	9 00
Jennie Alcox, gate keeper	3 00
Alfred Smith, cleaning office	3 00
Postmaster, envelopes	22 85
Sentinel Printing Co., printing	14 10
Bridge Fund	$258 56
Elmer Johnson, salary	70 80
Harve O'Brien, salary	50 00
Charlevoix Hardware Co., supplies	4 90
Argo Milling Co., coal	1 75
Charlevoix Lumber Co., lumber	3 56
Police Fund	140 27
W J Weikel, salary	45 00
Peter D. Anes, services	3 00
Chas. Hyers, services	3 00
Will O'Neill, services	3 00
H. D. Marshall, services	3 00
Clair Webster, services	3 00
Clair Webster, car	4 00
Charlevoix Hardware Co., supplies	7 17
Health Fund	71 17
J C Luce, labor	10 00

Chas. Hyers, labor	44 00
Wood Bros., supplies	2 25
Charlevoix Hardware Co., supplies	3 90
Traverse City Iron Works, pipe and sleeves	106 86

BEFORE TWINS WERE BORN

Was Very Miserable. Felt Lots Better After Taking Lydia E. Pinkham's Vegetable Compound

Wyoena, Wisconsin. —"I took Lydia E. Pinkham's Vegetable Compound before my twins were born because my sister used it and recommended it to me. I was so I could scarcely go about my daily work. I was in such misery. But after I began taking the second bottle I was feeling lots better. I took three bottles and a half before I was confined and finished the bottle while I was in bed. I got up feeling fine and have taken care of the twins alone ever since. I recommend the Vegetable Compound highly and will sing its praises in the future." —Mrs. Ubsdell, Wyoena, Wis.

It is remarkable how many cases have been reported similar to this one. Many mothers are left in a weakened and run-down condition after child-birth, and for such mothers the care of the baby is well-nigh impossible. Not only is it hard for the mother, but the child itself will indirectly suffer.

Lydia E. Pinkham's Vegetable Compound is an excellent tonic for the mother both before and after child-birth. It is prepared from medicinal roots and herbs, and does not contain any harmful drugs. It can be taken in safety by nursing mothers.

Good Kidneys Mean Long Life

Keep Them Clean and Free from Poisonous Waste with Dr. Carey's Marshroot Prescription No. 777.

6 Ounce Bottle, 75c

No Drugs — Just Roots and Herbs — And Money Back If It Don't Help You Wonderfully.

When back aches and puffiness shows under the eyes, it means that your kidneys need cleaning—need to be built up.

It may mean much more if quick action isn't taken—your very life and health depend on what you do today.

Dr. Carey's Marshroot Prescription 777 is for kidney and bladder troubles and for that purpose has been used with what might be called phenomenal success for 40 years. It has helped thousands and has saved many lives.

It is rigidly guaranteed—if it doesn't help you in one week's time, money back. In tablet and liquid form at all good druggists or send for free booklet. If your local druggist hasn't it, he can get it from the Carey Medical Laboratories at Elmira, N. Y.

Sunflower Growers Happy

Fourteen million pounds of sunflower seed, worth more than $750,000, represents this year's crop inside three states of Minnesota, California and Illinois. The seed is used largely in poultry feed mixtures.

DEMAND "BAYER" ASPIRIN

Aspirin Marked With "Bayer Cross" Has Been Proved Safe by Millions.

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 28 years. Say "Bayer" when you buy Aspirin. Imitations may prove dangerous.—Adv.

Small things become great when a great soul sees them.

When you give, give with joy and smiling.—Joubert.

The Highgrader

By Wm MacLeod Raine

COPYRIGHT BY G.W. DILLINGHAM CO.

"We Must Go Down and Tell Her at Once, Jack."

CHAPTER XVIII—Continued

—16—

Later they came to earth and behind the nonsense that is the highest wisdom of lovers. They built air-castles and lived in them, scaling life through a poetic sunlight as a long summer day in which they should ride and work and play together.

At last she remembered Lady Farquhar and began to laugh.

"We must go down and tell her at once, Jack."

He agreed. "Yes, let's go back and have it out. If you like you'll may go to your room and I'll tackle her alone."

"I'd rather go with you."

He delighted in her answer.

Farquhar was taking an early morning stroll, arm in arm with Lady Jim, when he caught sight of them.

"Look, Di!"

Both of the lovers knew how to walk. Lady Farquhar, watching them, thought she had never seen in the gait of untamed human beings in his step was the fine free swing of the hillman, and the young woman breasted the slope lightly as a faun.

The Englishman chuckled. "You're beaten, Di. The highwayman wins."

"Nonsense," she retorted sharply, but with anxiety manifest in her frown.

"Fact, just the same. He's coming to tell us he means to take our little girl to his robber den."

"I believe you'd actually let him," she said scornfully.

"Even you can't stop him. It's written in the books. Not sure I'd interfere if I could. For a middle-aged pharisee with the gout I'm incurably romantic. It's the child's one great chance for happiness. But I wish to the deuce he wasn't a highgrader."

"She shan't sacrifice herself if I can prevent it," Lady Farquhar insisted stanchly.

"I remember a girl who sacrificed herself for a fine fellow [illegible] him Lord Farquhar later, but she married the common scoundrel."

"I've always been glad I did." She squeezed his arm fondly. "But this is different, Jimmy."

Kilmeny and Moya stopped. The young man doffed his gray felt hat and bowed.

"Mornin', Lady Farquhar—Lord Farquhar. We've come to ask your permission for our marriage."

"Mornin', rebels. Fancy I have to refuse it," cut back Farquhar, eyes twinkling. For this bold directness pleased and amused him.

"That would distress us extremely," answered Kilmeny with a genial smile.

"But would not affect your plans," understand you to mean."

"You catch the idea exactly, sir."

Lady Farquhar entered the conversation. "Are you planning to go to prison with him, Moya, when he is convicted of highgrading?" she asked pleasantly.

Moya told in three sentences of what her lover had done. The Englishman, leaning Kilmeny's hand fondly.

"By Jove, you reform thoroughly when you go about it. Don't think I'd have enjoyed sitting that check for Miss Joyce. Leaves you strapped, does it?"

"Dead broke," came the very cheerful reply.

"But of course Moya has some money," said Lady Farquhar quietly.

Kilmeny winced. "With me she hadn't. It's the only thing I have to forgive her."

Farquhar lifted his eyebrows. "Di," he remonstrated.

His wife came to time with a frank apology. "That was ow-airight nasty of me, Mr. Kilmeny. I withdraw it. None the less, I think Moya would be throwing herself away. Do you realize what you are proposing? She's been used to the best ever since she was born. Have you the means to supply her needs? Or are you considering a Phyllida and Corydon idyll in a cottage?"

"It will have to be something of that sort at first. I've told herall this too, Lady Farquhar."

"What does that matter if we love each other?" Moya asked.

"You'll find it matters a good deal," said Lady Jim dryly. "When poverty comes in love is likely to wink out any day. Of course I realize that yours is of a quality quite unusual. It always is, my dear. Every lover has thought that since time began."

"We'll have to take our flighting chance of that," Jack replied.

Moya, her eyes shining, nodded agreement. No great pain can be won without risk. She knew there was a chance that she might not find happiness in her love. But where it called her she must follow—to a larger life certainly, to joy and to sorrow, to the fuller experiences that must come to every woman who fulfills her destiny.

* * *

The memories of both Moya and Lord Farquhar went back, as it were, in a bound, to a certain night some months before, when Farquhar, as Moya's guardian, had talked to the girl seriously on the subject of her apparently growing regard for the romantic highwayman, Jack Kilmeny.

It was a still night, save only for the rushing waters of the river. The lamps of the sky had all been lit and were gleaming coldly millions of miles away. The shadowed moonlight in the trees offered a stage set to lowered lights.

The thoughts of the girl had drifted to speculation about the transplanted countryman of hers whose personality had come to interest her so greatly. He had challenged her trust in him and she had responded with a pledge. He had not explained a single one of the suspicious circumstances against him. He had not taken her into his confidence, nor had he in so many words declared his innocence. She was glad he had told her nothing, had demanded her faith as a matter of course. It was part of her pride in him that she could believe without evidence. All the world would know he was not guilty after he had shown his pluck. It would be no test of friendship to stand by him then.

A step sounded on the gravel behind her and an arm opened to let her hand slip round the elbow.

"May I stroll out this dance with you, Miss Dwight?" Lord Farquhar asked formally, dropping into step with her.

Moya and her guardian were kindred spirits. They never needed to explain themselves to each other. Both knew how to make belief.

"If you've not afraid of a scandal at being alone with me so far from a chaperon," the girl answered lightly.

He burlesqued a sigh. "I'm only afraid there won't be any. It's the penalty of age, my dear. I can claim all sorts of privileges without making Yeridge jealous."

"Oh, Verlander," she scoffed.

"Should I have said Kilmeny?" he asked.

"I'll tell you a secret, guardy," whispered Moya gayly. "You're a hundred years younger than either of them."

"I wish my glass told me so."

"Fiddlesticks! Youth is in the heart. Mr. Verinder has never been young and Captain Kilmeny has forgotten how to be."

"I fancy Ned would be willing to leave here again if he had the proper teacher."

She gave his arm a little squeeze. "You dear old matchmaker."

"Oh, I see—your in-loco-parentis duty."

"Exactly. So it isn't going to be Ned?"

She looked across the turbid moonlit river before she answered. "I don't think so."

"Nor Verinder?"

"Goodness, no!" A little ripple of laughter flowed from her lips before she added: "He's changed his mind. It's Joyce he wants now."

Farquhar selected a cigar from the case. "Him? Sure you didn't change it for him?"

A dimple flashed into her cheek. "I may have helped a little, but not half as much as Joyce."

"That young woman is a born flirt," Lord Farquhar announced, his beard and the lower part of his face in the ardent glow of the lighted match. "Upon my word, I saw her making eyes at your highwayman the night we met him here."

There was a moment's silence before she answered. "Anybody could see that he was interested in her."

It doesn't matter to me who interests him, but I can't have any of my wards being romantic over a Dick Turpin," he replied lightly.

She was standing in the shadow, so that he could not see the dye sweep over her cheeks.

"I'm afraid he is going to disappoint you. He's not a highwayman at all."

"Did he tell you so?"

"No. But I know it."

"Looks to me as if he might make a good one. The fellow is cool as a cucumber and afraid of nothing at two legs or four."

"You forget he is India's cousin."

"No. I'm remembering that. His father had a devil of a temper and his mother was as wild as an unbroken colt when I met her."

"They weren't thieves, were they?" she flashed.

He gave her his frank smile. "You like this young man, Moya?"

"Yes. Why shouldn't I?"

"Why not—if you don't like him too much."

"So that's why you came out here—sent by Lady Farquhar to avoid me, and I thought you had come because you like to be with me."

"Come; let us resume together," he invited cheerfully. "We'll sit on the end of the wharf and dangle our legs while your guardian finishes his cigar and does his duty by you."

Lord Farquhar seemed in no hurry to begin, nor did Moya attempt to hasten him. His cigar glowed and ashed and glowed again before he spoke.

"Odd how things work out, my dear. There across the river are two men who would like to marry you. Both are good matches. One is by way of being a bit of a bounder perhaps, but the other is as fine a fellow as any girl could look for—no brilliant, but no fool either, and as steady as a clock."

A breath of wind lifted the edge of her white skirt. She followed the woman's instinct to tuck it safely under her before making evasive answer. "Captain Kilmeny is his own certificate of merit. Any praise is superfluous."

He shrugged. "That's the perversity of it. You see all his merits and they don't touch you."

With a vivacious little turn that was wholly charming she turned merrily upon him. "Are you by any chance proposing for him, Lord Farquhar?"

"Hasn't he proposed for himself?" her guardian asked bluntly.

"I believe he has."

"And you—didn't see it?"

"I couldn't."

"Sorry." He looked at the tip of his cigar and brushed away the ash. "Because he's a no end good sort."

"You don't know that any better than I do. Don't think I can't see all the advantages of it. I do. I want to say 'Yes,' but—well, I can't. That's all."

"On account of the other man?" he questioned gently.

"I haven't mentioned any other man," she cried, her face in a flame.

"No, I mentioned him. Devilish impudent of me, if you want to take it in that way, Moya. But, then, as you've said, I'm in loco. Got to grub around and find out how you feel."

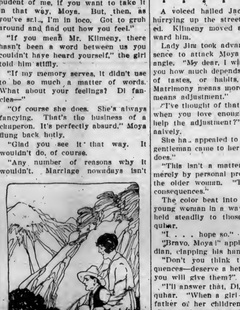
"If you mean Mr. Kilmeny, there hasn't been a word between us you couldn't have heard yourself," the girl told him stiffly.

"If my memory serves, it didn't use to be so much a matter of words. What about your feelings? Di fancies—"

"Of course she does. She's always fancying. That's the business of a chaperon. It's perfectly absurd." Moya flung back hotly.

"Glad you see it that way. It wouldn't do, of course.

"Any number of reasons why it wouldn't. Marriage nowadays isn't



desire for the best life has to offer. What he was proposing for her was a tame second best. But, it was safe, and the first rule of the modern marriage mart is to play the game safe. Yet he had a lovable errant impulse to tell her to cut loose and win happiness if she could. What restrained him, in addition to what he owed Lady Jim in the matter, was his doubt as to this young man's character.

"Well, I daresay I've exaggerated the whole matter, my dear. I was just to give you a hint—no more."

"You've done it, then."

"Rirkes me that I've done my duty in the matter."

"You have—admirably," she scoffed.

An easy-going man, he did not cross bridges till he came to them. His wife had persuaded him that Moya needed a talking to, but he was glad to be through with it.

"Using the scamp, anyhow!" he laughed. "Maybe he'll break his neck on one of those outlaw broncbos he's so fond of riding. Maybe they'll put him safely away in prison, where there is neither marrying nor giving in marriage."

"It's even possible," she added with a murmur of half-embarrassed laughter, "that if he honored one with an offer—which it has never entered his head to do—one might regretfully decline with thanks."

"Amen! In the meantime God lead you," [illegible] the hand as old Bacon says." He brought his heels together, bowed over her fingers, and kissed them with exaggerated old-fashioned gallantry.

"Who's being romantic now?" she wanted to know gayly.

* * * * *

A voiced hailed Jack. Colter was hurrying up the street, plainly excited. Kilmeny moved a few steps toward him.

Lady Jim took advantage of his absence to attack Moya from another angle. "My dear, I wish I could show you how much depends on a similarity of tastes, or habits, of standards. Matrimony means more than love. It means adjustment."

"I've thought of that too. But . . . when you love enough that doesn't help the adjustment?" asked the girl naively.

She has appealed to Farquhar. That gentleman came to her assistance. "It does."

"This isn't a matter to be decided merely by personal preference," urged the older woman. "There may be consequences."

The color beat into the face of the young woman in a wave, but they held steadily to those of Lady Farquhar.

"I . . . hope so."

"Bravo, Moya!" applauded her guardian, clapping his hands softly.

"Don't you think they—the consequences—deserve a better chance than you will give them?"

"I'll answer that, Di," spoke up Farquhar. "When a girl chooses her father or her children a man who is clean and strong and virile, and on top of that her lover, she is giving them the best possible chance in life."

Kilmeny came back to the group. He had left. "The gods are favoring pieces of quartz annexed. Colter took these to the man we employ. He's just learned that it is a high-grade stuff."

"You've made a strike?"

"Looks like it. Colter wasn't taking any chances, anyhow. He hiked north around the corners of the mine and signed up a five-year lease in his name and mine."

Farquhar shook hands with him cordially. "Hope you make a fortune, Kilmeny."

Moya's chaperon, facing the inevitable, capitulated as gracefully as she could. After all, the girl might have done worse. The sun she had chosen was well born and looked promising, and makes his own laws, and youre are made for you."

"Have you something one for me now aren't you?" she demanded rebelliously. "Why shouldn't I listen to him? You tell me he doesn't have the same little conventions as we do. Thank heaven he hasn't. His mind is free. If that condemns him—"

She broke off from sheer passionate impotency. Can you imagine—

"Those conventions are a part of your little code, girl. Can you imagine yourself sitting opposite him at breakfast for the rest of your natural days?"

"You mean because he is a working man, I suppose."

"If you like. You would miss all the things to which you were used. Love in a cottage isn't practicable for young women brought up as you have been."

"Then I've been brought up wrong. If I were fond enough of the man—enough to marry him—I'd take the penalty of age, my dear. I can claim all sorts of privileges without making Yeridge jealous."

"Oh, Verlander," she scoffed.

"Should I have said Kilmeny?" he asked.

"I'll tell you a secret, guardy," whispered Moya gayly. "You're a hundred years younger than either of them."

"I wish my glass told me so."

"Fiddlesticks! Youth is in the heart. Mr. Verinder has never been young and Captain Kilmeny has forgotten how to be."

"I fancy Ned would be willing to leave here again if he had the proper teacher."

She gave his arm a little squeeze. "You dear old matchmaker."

"Oh, I see—your in-loco-parentis duty."

"Exactly. So it isn't going to be Ned?"

She looked across the turbid moonlit river before she answered. "I don't think so."

"Nor Verinder?"

"Goodness, no!" A little ripple of laughter flowed from her lips before she added: "He's changed his mind. It's Joyce he wants now."

Farquhar selected a cigar from the case. "Him? Sure you didn't change it for him?"

A dimple flashed into her cheek. "I may have helped a little, but not half as much as Joyce."

"That young woman is a born flirt," Lord Farquhar announced, his beard and the lower part of his face in the ardent glow of the lighted match. "Upon my word, I saw her making eyes at your highwayman the night we met him here."

There was a moment's silence before she answered. "Anybody could see that he was interested in her."

"It doesn't matter to me who interests him, but I can't have any of my wards being romantic over a Dick Turpin," he replied lightly.

She was standing in the shadow, so that he could not see the dye sweep over her cheeks.

"I'm afraid he is going to disappoint you. He's not a highwayman at all."

"Did he tell you so?"

"No. But I know it."

"Looks to me as if he might make a good one. The fellow is cool as a cucumber and afraid of nothing at two legs or four."

"You forget he is India's cousin."

"No. I'm remembering that. His father had a devil of a temper and his mother was as wild as an unbroken colt when I met her."

"They weren't thieves, were they?" she flashed.

He gave her his frank smile. "You like this young man, Moya?"

"Yes. Why shouldn't I?"

"Why not—if you don't like him too much."

"So that's why you came out here—sent by Lady Farquhar to avoid me, and I thought you had come because you like to be with me."

"Come; let us resume together," he invited cheerfully. "We'll sit on the end of the wharf and dangle our legs while your guardian finishes his cigar and does his duty by you."

Lord Farquhar seemed in no hurry to begin, nor did Moya attempt to

English Writer Extols the Monkey as a Pet

In the Eighteenth century monkeys were fashionable pets, and I predict that they soon will be revived, says a London Daily Graphic writer.

I have kept a monkey as a pet for four months now. He is on excellent terms with the dog, and the cat, and he is quite as well behaved as either. He is sentimental—not, indeed, with the pure domestic affection of the dog, for he is selfish and vainglorious.

He is the only animal that understands, and practices humbug. He will look at you from inside his cage with soulful eyes, and if you let him out on your return late at night, confident that it is pure affection for you that makes him look like that, he will lead you a dance and force you to rouse the house in order to get him back into his cage.

Most monkeys substitute pets come from near the equator, and have to be kept warm on winter nights and a good fire made up for them. They should be nicely tucked in on a shelf in the cage, and, in a journalist's house, at any rate, they will thus sleep conveniently late in the morning.

Poet at Eight

Mrs. Felicia Hemans, the English poetess, who died in 1835, wrote poetry of some worth when she was only eight years old. At the age of four teen she wrote a book of juvenile poems.

FARM JOURNAL SAYS:

—Why not whittle out?

—

Love makes the heart light but the parlor dark.

—

One way to help people is to refrain from giving them advice.

—

Nothing costs more than the things we try to get for nothing.

—

Job never put up any stoves. It would have ruined his reputation if he had.

—

Well bet George and Mary are sorry they never taught the little prince of Wales to bounce.

—

It is now that the gabby lawyer makes his speech at the agricultural fair and tells farmers how to farm.

—

Following inforsement of bobbed hair by the barbers, the lumbermen have come out in favor of home building. Nothing selfish about those birds.

—

Uncle Levi Zink says that his brother Bill is always bragging that he sleeps like a baby. He stayed overnight a few times last summer, but Bill certainly didn't sleep like any baby he ever heard.

HAPPY THOUGHTS

The eye is the pulse of the soul; as physicians judge the heart by the pulse, so we by the eye.—T. Adams.

Lovers are angry, reconciled, entreat, think, appoint, and finally speak all things by their eyes.—Montaigne.

I know the Bible is inspired because it finds me at greater depths of my being than any other book.—Coleridge.

The highest earthly enjoyments are but a shadow of the joy I find in reading God's word.—Lady Jane Grey.

The bulls of night are so formed, that one man's eyes are spectacles to another, to read his heart with.—Johnson.

—

Men are born with two eyes, but only one tongue, in order that they should see twice as much as they say. —Colton.

ODDITIES

The switch tender is paid for flinging at his work.

Baseball players are not partial to rough diamonds.

The mattress maker can't afford to lie down on his job.

The auctioneer is a man who likes to have you talk back.

Although the miller bolts his meals he doesn't get dyspepsia.

It doesn't require a botanist to pick out a society wallflower.

Soothing sirup manufacturers are not averse to taking hush money.

The composer receives no inspiration from the tone his wife keeps harping on.—Boston Transcript.

PICAYUNES

If at first you don't succeed, put yourself in second.

After we get well up on some things we get down on them.

There are two sides to every question—your own and the wrong side.

Some people won't even pay a debt of gratitude on the easy payment plan.

It is easy to denounce something that doesn't happen to be in your neighborhood.

The reason some men fail to embrace opportunities is because they be hugging debtors.

The most valuable key in the petition-situation is the one that opens the front door of the White House.—New Orleans Times-Picayune.

WE'RE ALL TOO APT—

To judge men solely by their faults.

To talk first and think afterwards.

To condemn an idea because it is new.

To vote for the man who talks the most.

To suspicion the man who disagrees with us.

To be irritable at home and courteous abroad.

To begrudge our taxes and excuse our extravagances.—Chicago Tribune.

IN BRIEF

The earth's sensible atmosphere extends more than 100 miles in height.

Light travels from the sun to the earth in eight minutes and nine seconds.

—

The sun's apparent yearly path among the stars is known as the ecliptic.

—

In tropical latitudes the direction of prevailing winds is from east to west.

—

January 8, anniversary of the battle of New Orleans, is a public holiday in that city.

—

Rapid movements and changes in sun spots are closely related to electrical storms.

—

The frequency of sun spots is periodical, the maximum number occurring at intervals of about eleven years.

ROAD BUILDING

ROAD CONSTRUCTION IN UNITED STATES

The chief of the United States bureau of public roads, Thomas H. MacDonald, is in consultant touch with the road-building programs of the states and is ever watchful for the interests of the federal-aid appropriations before congress each year.

"The estimate of $211,000,000 to be put under contract the current fiscal year," said Chief MacDonald, "it is believed will be received, with the probability of an increase for 1925 to $240,000,000. This latter figure is contingent upon conditions in fields of other construction, rail transportation and labor. Public road work is regarded when there is a large construction program of a private character and prevented when the new construction work decreases. The general tendency of the federal-aid road work at this time is upward.

"If the estimate of $240,000,000 to go under construction for 1925 is not reached, but is reduced by $5,000,000 or even $10,000,000, the balance available for new construction would still be sufficient to carry out a reasonable program for 1926, and that was the reason for the liberal appropriation made by congress at this session.

"One of the fundamental principles of the federal budget plan is eliminating waste and inefficiency in the expenditure of public funds. There is probably no other field of public expenditure in which public money saving savings are possible through efficient administration. Efficient construction and organization demand positively first, a continuing road program and, second, forehand knowledge of the dimensions of the future annual program."

In discussing the road-building achievements since the passage of the federal-aid act, Chief MacDonald said:

"Up to March 1 of this year the federal aid highways which have been completed since 1921 totaled 7,000 miles, and 12,801 miles were under construction and reported as 50 per cent complete. The total number completed and under construction amounted, therefore, to 40,236 miles, and the milleage reported as completed on February 29, 1924, 6,976 miles had been completing during the current fiscal year. All but a very small percentage of this mileage is on the federal-aid highway system as now established.

"In addition to the roads of the system thus built with federal aid, part of it have been improved without federal assistance. A careful study is being made of the improvement status of the system, and an approximate estimate based upon these studies and studies is that at the end of the year there were about 40,000 miles of surfaced roads and 8,700 miles graded, which leaves nearly 110,000 miles of the federal system yet to be surfaced.

"To bring this system up to serviceable standards, therefore, within the full decade ahead, would mean a surfacing program of about 11,000 miles for each of the ten years—this in addition to the additions to the system, the separation of grade-crossings, reconstruction and much other necessary work."

That road construction is progressing throughout the country without federal aid as well as with it is demonstrated by statistics available to the bureau of roads, which show that total expenditures in 1921, a banner road year, for all rural highways and city streets for all places with a population of 2,500 and over, including all street and alley surface construction, upkeep, maintenance, street cleaning and street lighting, was $1,410,500,853.

Better Highways Wanted

The continued high importation of motor vehicles into the Argentine republic is causing considerable thought to be devoted to the need of good roads, the present lack of which has prevented automobile importations from reaching even higher figures. The Argentine statistical bureau reports that up to the present time 110,940 passenger cars and trucks have entered the country, of this number, about 85,000 are in operation.

Abundant Proof That Animals Exercise Wits

That animals think before they act is the conviction expressed by Dhan Gopal Mukerji, Indian lecturer and author.

Mr. Mukerji asserts that all real doing was the result of active contemplation and thinking, and that deeds unpremeditated were short-lived, and cites examples from his experiences with animals in India.

"Once," said Mr. Mukerji, "I was with a party of men who were traveling in India on elephants. One morning we saw the purplish color in the high grass which indicates that a tiger is lying there. Before any of us could raise a rifle the male, for there were two of them, had leaped to the back of one of the elephants and remained there face to face with the helpless rider. Meanwhile his mate, the tigress, stunk away into some deep underbrush and safety. She uttered one little cry and her mate leaped from the back of the elephant and followed her. He was shot down.

"The whole act was not one of aggression, but of protection. The tiger did not want to attack our man, but to prevent us from attacking his mate. He did not instinctively save his own life, but, after thought, however brief, determined to sacrifice his own to save hers. He knew that she who coddle bear cubs and bring them up was of more value than he, and that it was his duty to save her.

"In another instance the elephant was left with a little Indian baby in a basket while the parent of the babe went away for several hours. The elephant was tied so that he could not reach the basket. When the parent came back (I was with him) we saw that a huge poisonous snake had coiled itself around the basket. It did not know what to do for fear that the snake would strike the baby if we made any move.

"The elephant all the while was straining the rope which held him and trying to attract the snake's attention by swinging his trunk. He was clearly trying to get the snake to attack him and leave the baby. The parent carried a club. Suddenly the elephant saw it and with one swoop of his trunk wrenched it away from the man. He moved the club back and forth over the ground until the snake saw it. The snake uncoiled itself and moved over and coiled itself around the stick. With one rapid stroke the elephant raised and lowered his trunk, killing the snake.

"The elephant had thought out the whole ruse and the snake had been outwitted. The elephant's actions throughout had been intelligently calculated to save the baby even though it were necessary to be bitten himself."—Philadelphia Inquirer.

"Auntie" Felt Better

"Auntie" is a venerable colored woman who succeeds in making a scanty living by taking in washing and who is a typical old-time Southern negro, having been a slave in her younger days. She is always cheerful under all conditions, and manages to see the bright side of life, even though at the close to eighty years of age. When asked how she is, she always replies, "Oh, I'se just tolerable." The other day, however, when spring was in the air and every one felt a little better than usual, she was asked:

"Well, Auntie, how are you today?"

Her wrinkled face broke into a wide smile,

"Oh, I'm exceptionally tolerable to day."—Exchange.

A Criticism

Paul Duppy, the French senator and newspaper owner, said at the end of his American tour:

"Your newspapers are extraordinary, but your hotels are too large for really perfect cooking. A hotel with 2,000 rooms and 2,000 baths is all very well in its way, but when you want a perfect chaud-froid or a perfect soufle—" He kissed his fingertips. "Then," he went on:

"A bed-waiter in one of these 2,000-room monstrosities was overheard saying to a waiter the other day:

"'The party at the large window table has ordered fresh-made coffee. Be sure and keep them waiting 20 minutes.'"—Detroit Free Press.

Canada's Mineral Output

A preliminary report on Canadian mineral output for 1923 shows an advance in the value of this output over 1922 and a record production for several items, such as coal, lead, zinc, copper, nickel, cement and the list of minerals produced in 1923 totaled $244,048,852, compared with $183,297,242 in 1922, and approach the record value of $227,859,695 established in 1918. Copper produced amounted to approximately 85,000,000 pounds, more than double the tonnage mined in 1922. Nickel totaled 62,450,000 pounds, as compared with 17,500,000 pounds in 1922. Gold and silver, which were produced in lesser quantities than in the previous year, were valued at $36,800,000.

His Guess

"Now, Arthur," asked the Sunday school teacher, "why did Adam bite the apple?"

"Maybe they didn't have knives in those days," answered the youthful philosopher.

So It Seems

Country Doctor—Well, Mr. Sayers, how's the wife?

Mr. Sayers—I thought that was comin'. Anyone 'ould think I never had such things as rum and frost and blight to concern me!—Judge.

Satisfying to the Heart and Pleasing to the Mind

Sinners IN Heaven

By CLIVE ARDEN.

A couple of human beings found an earthly paradise in which storm necessity prevented their adopting all the conventions laid down by social codes. The experience did not render them less fit for the more glorious heaven that is to come, however much prudish minds may affect to be shocked by their story. No one but will agree that the judges did not err when they awarded it the prize in competition with the work of some of the best of modern novelists.

The Sentinel.

Many Birds Named From Their Songs

Some birds, as the whippoorwill, the phoebe and the bobolink get their names from their songs, which are supposed to resemble the words, says the Kansas City Star.

The name of the grackle comes from its cry, "Gra, gra," by way of a Latin word. Pigeon comes from the Latin pipire, to peep or chirp.

Robin is supposed to be an abbreviation of Robert, which name is from the old High German language and means "bright in fame."

Petrel is a diminutive of Peter. The petrel skims the surface of lakes and the sea, near which it makes its home. The name is believed to have reference to St. Peter's walking on the water. The stormy petrel, supposed to foretell storms, is the bird known as "Mother Carey's chicken."

The missel-bird, largest of the European thrush family, is so named on account of its partiality for a diet of mistletoe berry. The word comes from the, German, mistel, meaning mistletoe. The missel-bird sings loudest just before a storm and is sometimes called the storm cock.

Oriole comes by way of the French from the Latin aureolus, diminutive of autumn, gold, so called because of its bright plumage.

Finch is an old Anglo-Saxon word and means brisk, smart or gay, words which well describe the birds which bear that cognomen. The grosshenks, which are allied to the finches, are so called because their bills are gross, that is, thick.

The kingbird is a king among fighting birds, and so is called after the masterly way in which it obtains its prey.

Snipe comes from the German and means a bill, or beak, in reference to the long bill of the bird.

Dove is from the Anglo-Saxon and means to dive. Duck comes from the fowl's habit of ducking under water. The gadwell duck gets about easily. It "gads" well.

The pheasant derives its name from Phasis, a river in Asia Minor. The guinea fowls of the farmyard get their name from Guinea, in Africa, whence they originally came. Turkeys, natives of America, were erroneously supposed to have come from Turkey, and were so called.

Proof Positive

Police Commissioner Enright, returning from Bermuda on the Port St. George, talked about Hollywood.

"They tell us that Hollywood is a hundred miles slow here," he said, "but the proof that the opposite is the case keeps cropping up all the time.

"Strong proof it is, too," it's like the story they tell in Bermuda.

"'Is it true,' they have you that Jones is married?' a Hamilton man asked.

"'Well,' said another Hamilton man, 'I saw him pushing a baby coach on Sunday morning, and there was a young woman on one side of him and an old woman on the other, and as I passed the young woman said, "You've been like that eight times this month, you cur!" and then the old dame softly whispered to him, "Tsk, for goodness sake, Maggie, make him put another thousand on his life before his liver's gone completely."'"—Detroit Free Press.

Wisdom of Tower

"You can't overestimate the intelligence of a dog," declared Col. Spotswood Telfair, gazing at his favorite hound engaged in snapping freely at the flies.

"When Tower was in his prime he had an uncanny way of knowing in advance the sort of game I was going to hunt. For instance, if I left the house carrying a rifle, Tower would dash for the woods and trail nothing but squirrels. If I started out with a shotgun, Tower would trail nothing but rabbits.

"One day I decided to puzzle the old rascal, so I took down my fishing pole and started to the river. It may sound preposterous, gentlemen, but when I got to the edge of the yard I found the derned dog scratching up fishing worms for me?"—Judge.

Highway Hints

The total highway mileage of the United States equals 2,940,000, of which 439,000 miles are surfaced highways.

• • •

The longest motorless route in France is operated by the Paris-Lyon-Mediterranean railroad, and runs from Belfort to Nice through the Alpine district. With its branches it totals 376 miles in length.

• • •

The Custer Battlefield highway was traversed last year by over 30,000 automobiles.

• • •

It is estimated by experts that the extent of surfaced roads in the United States will have reached at least 450,000 miles by the end of 1924.

• • •

The state highway commission of New Jersey has announced that its road-and-bridge program for 1924 will involve an expenditure of $7,000,000. The year's work will include 81 miles of reinforced concrete construction.

It will be in Charlevoix every Tuesday forenoon until further notice. Those wishing to see me may notify me at 4144 Mitchell St. Petoskey; Mich. —Lt. Dr. G. W. Green, Optospath.

MORTGAGE SALE.

Default having been made in the conditions of a certain mortgage executed by William T. Louisell and Minnie Louisell, husband and wife of Marion township, Charlevoix county, Michigan, unto Elizabeth Sturdevant of Detroit, Michigan, dated November 25th, 1918, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on the 25th day of November, 1918, in Liber 55 of Mortgages on page 440, which mortgage there is claimed to be due at the date of this notice the sum of $4,978.46, including the principal sum due with interest and taxes paid by the mortgagee, together with an attorney fee of fifty dollars as provided for by the said mortgage, and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas, the taxes required by the statutes to be paid on said mortgage were duly paid prior to the recording thereof;

Now Therefore, Notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided said mortgage will be sold at the front door of the Court House in the City of Charlevoix, Charlevoix county, Michigan, (that being the place where the Circuit Court for the County of Charlevoix is held), on Tuesday, the 16th day of December, 1924 at 10 o'clock in the forenoon on that date.

The premises described in said mortgage being the lands, premises and property situate in the Township of Marion, County of Charlevoix and State of Michigan, described as follows, to-wit: The South one-half of the Northwest quarter of Section twenty-six in township thirty-three, North of Range Eight west, as per the United States Survey thereof and containing eighty acres of land more or less; also twenty acres off the north end of all that part of the east one-half of the southwest quarter of Section twenty-six in Township thirty-three, North of Range Eight west lying by the west side of the Pere Marquette Railroad Right of Way.

Dated September 6th, 1924.

MORTGAGE SALE.

Default having been made in the conditions of a certain mortgage executed by Elizabeth Struthers of Hayes Township, Charlevoix county, Michigan, unto John Kopf of Hayes Township, Charlevoix county, Michigan, dated June 27, 1918, and recorded in the office of the Register of Deeds for the County of Charlevoix, Michigan, on the 27th day of June, 1918, in Liber 46 of Mortgages on page 246, which said mortgage was afterward sold, assigned and transferred by the mortgagee unto Ursula McStruthers of Hayes township, Charlevoix county, Michigan, by assignment of mortgage, dated April 26th, 1922, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on the 27th day of April, 1922 in Liber 55 of Mortgages on page 43, which said mortgage was afterward sold, assigned and transferred by Ursula B. Struthers, mortgagee unto Andrew J. Struthers, assignee, on the 1st day of December 29th, 1922, and recorded in the office of the Register of Deeds for the County of Charlevoix, Michigan, December 7th, 1922 in Liber 55 of Mortgages on page 63, on which mortgage there is claimed to be due the sum of $1623.50, including the principal sum due with interest, together with an attorney fee of twenty five dollars as provided for by said mortgage, and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas the taxes required by the statutes to be paid on said mortgage were duly paid prior to the recording thereof;

Now Therefore, Notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided by the said mortgage, at public auction, to the highest bidder therefor, at the front door of the Court House in the City of Charlevoix, Charlevoix county, Michigan, (that being the place where the Circuit Court for the County of Charlevoix is held), on Tuesday, the 23rd day of December, 1924 at 10 o'clock in the forenoon on that date.

The premises described in said mortgage being the lands, premises and property situate in the Township of Marion, County of Charlevoix and State of Michigan, described as follows, to-wit: The South

SOLVING THE FIRE MYSTERY

By JACOB DEMPSTER

© 1924, Western Newspaper Union.

CATESBY was disgusted with life, for two reasons. The first was that, just as he had planned to spend two days in Rochester with Miss Lillian Beebe, his firm had telegraphed him to go out to Algonquin and investigate a $250,000 fire insurance claim. The second reason was that he could not afford to marry the said Miss Burke unless his salary were raised from $2,250 to $2,500, and the fire insurance company resolutely refused to do so.

"You make good on a few big claims and we'll see what we can do for you," was all the comfort that Catesby could get out of Johnny Roche, the general manager.

The telegram, which was a long one, hinted at fraud, and investigation through a blinding snowstorm to inter, view the town agent, who confirmed the suspicion.

"It's Peter A. Hanson's department store, and that's enough," the agent explained. "I wouldn't have written him myself, from what I know of him. Jennings did it before I took over the agency. Hanson was in a cold way to collect, I guess, lapsed another three months; but everything was reduced to a pledge, and there's no showing what he had in stock when he went bust."

"Unprotected Sunday, didn't it?"

"Yes, at three in the afternoon. Not a soul in the place, and fifteen below zero. The mains were frozen and the engines wouldn't work. You might as well have tried to put out the sun."

"No idea how it started?"

"Defective insulation in Hanson's theory, I'm good theory, because it doesn't let you out. But he's a sharp customer and knows more than he lets on. He was in Rochester when it happened."

The sweet Rochester made Catesby mad. "I'll fix Mr. Peter A. Hanson," he said grimly, and set out through the storm to interview him.

Mr. Hanson bemoaned his loss. He declared that the goods alone were worth the entire amount of the insurance. "Come, make me an offer." "One-quarter_million," said Hanson. "Your lowest offer?"

"You bet I do. What d'you take me for?"

"All right. I've heard yours, and now you can hear mine. Not one penny, but we won't prosecute if you drop your claim, because in a deliberate commodity to keep, even when it's destroyed. You see, we couldn't very well bring it into court."

"Eh?" stammered Hanson, being quick-witted.

"Come here!" said Catesby, and led Hanson and the agent to the "coal snowdrift. He bent down, scraped away the snow, and pulled up a huge lump of coal. "Now look at it!"

Looking closer, Catesby saw that somebody had gone not only up the wall but upon the sloping roof, for there were footprints in the frozen snow. And there were no nail-marks in them. It was evidently a ruffled, gentlemanly loot that had trodden them.

Catesby ascended the ladder and got upon the roof. Then he saw something that made his heart beat faster. It was a lump of clear ice in the snow—frozen in, so that it was not readily discernible from below, but unmistakably clear ice. Catesby squinted at the west, which was still red with the sunset clouds. Then he looked across the lane toward the back door of the store. There was a roof pulled out the icy with his hands, and, taking the precaution not to melt it by too careful fingering, he climbed down the ladder again. He placed the ice in a cool spot underneath, where it was unlikely to be noticed, and went home.

It was ten o'clock the next morning before he walked out of his hotel and went to the insurance agent.

"Got him," said Catesby.

"What?" shouted the agent. "Why, everything's burned out. What was it? Kerosene?"

"Guess again," answered Catesby.

"I don't know, unless it was a ton of dynamite."

"Let's call it a Rochester burner," said Catesby, and the line appeared to him as a humorous one. "Want to come and see the fun?"

"Uh, sure," said the agent.

Mr. Hanson was chatting and fretting upon the ruins of his store when the two new pot in an appearance. He welcomed them with a cordial hoarsely agog.

"Now, I'll get down to business," he began. "You advertised to settle all claims promptly, and you've had the night to think it over in. And there ain't no 50 per cent coinsurance in my policy, either. That. So it comes to this: When do I get my check?"

"You wouldn't think of arbitrating now, would you?" inquired Catesby.

"No, sir. I want to get my money and get my people to work again as quickly as I can. It's quite a loss to this town, and I wouldn't relish being held up. And, what's more, if there's any talk of arbitration or compromise I put the case into my lawyer's hands today."

"Oh, pshaw! Maybe you'll be only too glad to compromise," suggested Catesby. "Come, make me an offer." "One-quarter_million," said Hanson. "Your lowest offer?"

"You bet I do. What d'you take me for?"

"All right. I've heard yours, and now you can hear mine. Not one penny, but we won't prosecute if you drop your claim, because in a deliberate commodity to keep, even when it's destroyed. You see, we couldn't very well bring it into court."

"Eh?" stammered Hanson, being quick-witted.

"Come here!" said Catesby, and led Hanson and the agent to the coal snowdrift. He bent down, scraped away the snow, and pulled up a huge lump of coal. "Now look at it!"

Hanson looked, and the agent looked, and then they looked at each other.

"Now, I'll tell you what I'll do," said Catesby, relenting. "I'll take it all off," he asked.

"I guess so," murmured Mr. Hanson.

"You'll write a confession to details in the matter of insurance?"

"Yes, if I've got to."

"All right. We'll have it right away. Say, Mr. Brown, have you a time-table? I want to find when the next train leaves for Rochester."

Working the Dollar

You must learn not to overwork a dollar any more than you would a horse. Three per cent is a small load for it to draw, 6 a safe one. When it pulls 10 or 12 you'll think it's time to quit West, and you've got to watch to see that it doesn't balk. When it makes 20 you own a blame good critter or a mighty foolish one, and you want to make head and whistle, but if it draws 100 it's playing the races or something just as hard on horses and dollars, and the first thing you know you won't even have a carcass to haul to the glue factory.—George Horace Lorimer, in Baltimore & Ohio Magazine.

Range of the Rockies

The Laramie mountains are a range of the Rocky mountains in southeastern Wyoming. It begins on the south bank of the North Platte river in Natrona county, somewhat southeast of the center of the state, and extends in a southeasterly direction across Albany and Laramie counties, being cut by the Laramie river. The range is are the headlands of lace or dotted net like the one shown in the picture. For those horsehair laces and metallic laces are very much liked. It takes so little material to make these bits of becoming finery and they add so much daintiness to the appearance, that they are to be recommended among the gifts that any needlewoman can make for her friends.

Many short jackets of crepe de chine in pretty colors are shown, most of them are straight, with set-in sleeves. but some are cut kimon-style as shown in the picture. On the straight jackets, bands of lace, ostrich in fringe or bands, or marabou bandings are new.

Costume interest centers around the tunic. Long before the end was broadcast to the world at large designers of knitted outerwear had "caught the vision." Forthwith and immediately appeared flash the fashion stage a galaxy of tunics knitted in alluring color, stitch and design. It is superfluous to say that a glimpse at these new knitted tunics becomes an urge to acquire one or more at earliest moment.

It surely is a happy day for those who appreciate the art of good dressing, which sobers in the vogue of the knitted tunic. Consider, for instance, the charming model in the picture. From either the practical or the esthetic viewpoint this knitted tunic has everything to commend it. The convenience of a slipover tunic like this one is self-evident. Then, too, the delicates or smart vogue have not been overlooked. In that its exquisitely slenderized straight-line effect is quite as it should be. Its color scheme is adorable. Fancy, if you please, rose and sand fiber interknit in artistic jacquard patterning, with a trimming of white brushed wool. Such is the sheer glory of the tunic which milady is wearing in the picture. This is only one of any number of equally as fascinating color combinations interpreted in the newer knit tunics.

While many types of the knitted tunics are developed in conservative street colorings, there is, without doubt, a decided trend toward elaborate conceptions wherein novelty plays an important part, bordering the knitted tunic with "new fur," both striped and loop variety, is one of the interesting phases—an invasion of the wide-spread vogue for lavish fur trims this season.

The knitted tunic is equally as effective posed over a pleated costume slip of silk or satin, or, as many are wearing them, over a plain knit skirt in solid color.

To Renovate Velvet

Shabby velvet can be improved as follows: First brush thoroughly so as to remove all dust, then spread a damp cloth on a hot iron and over this draw the wrong side of the velvet. As soon as the steam from the velvet ceases it must be removed or it will scorch.

Edgings and Bindings

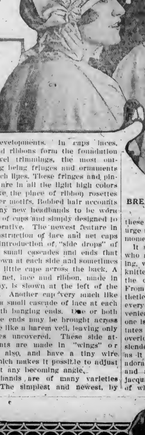
Bias tapes, edgings and braids make a large and dainty display at the "small-wares" counters. Colored rick-rack braid forms an ideal edging for burnou scarves, runners and curtains in the bedroom. Cretonne aprons are doubly effective when finished with a colored edge, and towels are given a touch of color when colored tatting is added. Luncheon sets and collar and cuff sets are beautified with a touch of colored braid, and colored organdie bindings are just the thing for finishing children's clothes.

A scarf of black satin is embroidered at the ends with Indian designs in red, blue and green, and has long fringe.

Pretty Things that are made at Home

ALREADY there is a hint of the coming holidays discernible in the shops—especially in those departments that flourish most in the six weeks preceding Christmas. In ribbons and laces, in accessories of dress and in all articles that custom has made popular for gifts, the beginning of the Christmas rush is on and novelties are displaying the premonition not to melt it by too careful fingering, he climbed down the ladder again. He placed the ice in a cool spot underneath, where it was unlikely to be noticed, and went home.

Breakfast cups, morning jackets, lingerie and necklaces are on display in



BREAKFAST CAP AND MORNING JACKET

which the shingle bobbed girl-feminizes her boyish bair cut, are made of narrow satin ribbon which fastens about the head with snap fasteners. Two lengths of ribbon are used, and at one end a pert pompom is made, usually consisting of a flat rosette of lace which makes a background for a gay scarlet plaything or other fancy, or a group of bright ribbon flowers. Even more popular than these simple affairs are the headbands of lace or dotted net like the one shown in the picture. For those horsehair laces and metallic laces are very much liked. It takes so little material to make these bits of becoming finery and they add so much daintiness to the appearance, that they are to be recommended among the gifts that any needlewoman can make for her friends.

Many short jackets of crepe de chine in pretty colors are shown, most of them are straight, with set-in sleeves. but some are cut kimon-style as shown in the picture. On the straight jackets, bands of lace, ostrich in fringe or bands, or marabou bandings are new.

THE KITCHEN CABINET

(©, 1924, Western Newspaper Union.)

WEEKLY MENU SUGGESTIONS

At this season foods and more elaborate dishes may be attempted.

SUNDAY—Breakfast: Grapefruit, cream of wheat with dates, doughnuts, coffee. Dinner: Roast turkey stuffed with chestnuts, cranberry jelly. Supper: Milk toast, layer cake, tea.

MONDAY—Breakfast: Grapes, griddle cakes, maple syrup. Dinner: meat or casserole, with vegetables, cornstarch pudding. Supper: Stuffed eggs, toast, lettuce salad.

TUESDAY—Breakfast: Slice of pineapple, poached egg on toast. Dinner: Hot potato salad with frankforts, onion salad. Supper: Turkey soup, potato rolls, canned fruit, tea.

WEDNESDAY—Breakfast: Puffy omelet, bacon, rolls. Dinner: Children's plum pudding. Supper: Creamed lima beans, lettuce salad.

THURSDAY—Breakfast: Baked apples, French toast. Dinner: Spareribs with sauer kraut, apple pie. Supper: Cream of potato soup, bread sticks.

FRIDAY—Breakfast: Prunes with oatmeal, waffles. Dinner: Fish chowder, dill pickles, steamed pudding. Supper: Fried oysters, cabbage salad.

SATURDAY—Breakfast: Fruit, bran with cream, bacon, oatmeal, cookies. Dinner: Shepherd's pie, minced lamb with mashed potatoes, pumpkin pie. Supper: Baked hash, cress salad.

Meat en Casserole.

Brown servig-sized pieces of mutton in a little fat, dredge with seasoned flour, and cover with boiling water. Cook for a few minutes in the frying pan, then put into the hot casserole, adding diced carrot, one cupful to a pound of meat, the same amount of potato and if liked a bit of finely minced onion. Cover and cook in a moderate oven for two or three hours.

Children's Plum Pudding.

Melt one-half cupful of butter, add one cupful of molasses, one cupful of milk, two eggs, three cupfuls of entire wheat flour, one teaspoonful each of soda and salt. Add two cupfuls of seeded raisins, 1arn into a buttered mold and steam three hours. Serve with a hard sauce.

A creature not too bright or good For human nature's daily food; For transient sorrows, simple wile, Praise, blame, love, kisses, tears and smile. —Wordsworth.

SOME CHOICE RECIPES

Here is something good for those who love the juicy tomato:

Creole Tomatoes.—Wipe six medium sized tomatoes, cut a thin slice from the top of each, scoop out the inside and sprinkle the inside with salt. Invert to drain and stand one hour. Melt one teaspoonful of butter, add one-half cupful of bread crumbs with one-half teaspoonful of salt, a few grains of pepper, and when well blended, pour on gradually, stirring constantly, one-half cupful of cream. Bring to the boiling point, remove from the fire, add one egg, one-half tablespoonful each of minced parsley and red pepper. Fill the tomatoes, cover with buttered crumbs and bake until the tomatoes are done.

Tomatoes en Brie.—This is an old recipe which has been published before. Peel ripe, ripe, smooth tomatoes uniform in size; add a cupful of salt to a gallon of water and when the salt has dissolved put in a few of the tomatoes at a time. Let them remain until well-cooked through, but not broken, then pack carefully in jars while hot. The juice of the tomatoes will be sufficient to cover them. See that they are put into sterile jars and well sealed. Tomatoes will often spoil because the jars have not been sterilized. Put them in a cool, dry cellar which is often not well-cooked, is not recommended.

Mary Todd Lincoln Cake.—Cream one cupful of butter with two cupfuls of sugar. Sift four cupfuls of flour with one teaspoonful of baking powder and one-half teaspoonful of soda; beat six eggs, separating the yolks and whites. Add the yolks, well beaten, to the butter and sugar, then add gradually one cupful of orange juice and the reserving a little to add to dredge over the fruit and nuts. Beat well and add three-fourths pounds of seeded raisins cut into pieces, one pound, not chopped; one pound of seeded raisins cut into pieces with scissors, and one-half of a grated nutmeg. Fold in the stiffly beaten whites of the eggs. Pour into a well-greased flower pan and bake in a moderate oven three to four hours.

Chestnut Sauce.—Fry one-half an onion, six slices of carrot cut into small pieces, in two tablespoonfuls of butter, five minutes; add three tablespoonfuls of flour and stir until well browned, then add one and one-half cupfuls of brown stock, a sprig of parsley, a bit of a bay leaf, eight peppercorns and one teaspoonful of salt; simmer twenty minutes, strain, then add three tablespoonfuls of currant jelly, one cupful of boiled French chestnuts and one tablespoonful of butter.

Nellie Maxwell

Edelweiss Not Uncommon

The error that edelweiss grows only in the haunts of the chamois among the alps is a common one, says the London Times, but it grows in hidden nooks in Brompton churchyard, and other places.

To Remove Paint Stains

Paint stains that are dry and old may be removed from cotton or woolen goods with chloroform, first covering the spot with olive oil or butter.

Miss Dorinda Dodd

By CLARISSA MACKIE

(Copyright.)

"DEAR Captain," read the letter, "I now take my pen in hand to tell you that I am going to California to keep house for my brother, so that I cannot work for you any longer. He needs me, so I cannot wait until you come home from this trip. Dorinda Dodd will take my place as your housekeeper, and you can change if neither one of you pleases the other. Yours respectfully, Ellen Smith."

"Dorinda Dodd! Sufferin' fish!" groaned stooping Captain Clark, as he put the letter away and banged against the rail of his fine schooner Breeze, a large three-masted vessel that raced through down seas. "Think of going home and not seeing Ellen Smith at the helm, is Dorinda Dodd the only woman without a job in Fairport?"

He asked himself this question many times as the Breeze neared New York. They touched at the big city and took a Fairport man home with them. Jabez Case offended the captain before the ship had left the East river.

"I hear Dorinda Dodd's going to keep house for you," gossiped Jabez lazily.

"Until I can turn around and find somone else," said the captain, a frown on his handsome bronzed face.

"Find someone else! What's the matter with Dorinda Dodd?" Jabez fairly squeaked his surprise. "She makes the best apple pies in Fairport."

The captain hesitated. "That may be, and apple pie is my favorite, but I couldn't stand being talked to death by Dorinda."

"Talked to death?" repented the stupified Jabez.

"I said it."

Jabez became silent. He watched the captain's gloomy face as he stood by the wheel. They were entering the sound and the navigation through Hell Gate required the captain's close attention. Once Jabez slapped his knee just as though he had made a delightful discovery.

"Folks are gossiping streadily, Bill—you know old Dorinda Dodd always wanted to get married—"

"Don't be a fool, Jabez," snapped Capt. Bill Clark.

"The Breeze is in port." the word flew around the village of Fairport, but no one had an opportunity to have a word with the captain, who went ashore at once and took a short cut across the bluffs to his little white home on the hill. He had been born and raised there, and it pleased him to live on in the house that was so eloquent of his mother and father, dead these five years past. There were many houses whose dogs opened gladly to receive him, but Dorinda Dodd, master of the Breeze, and many a fair damsel set her cap for him, but he was a shy gentleman where the fair sex is concerned, and he had escaped matrimony so far. Now he had escaped home for him. The very notion of that disagreeable Dorinda Dodd keeping house for him and being hands always around, depressed him. He was a big, hearty and florid—and jolly. "Oh, confound the women," he groaned as he entered the little front gate. The sun was shining and birds were all blowing in the wind.

"Why, Bill, what's the matter?" he grudgingly admitted. He entered the front door and stood in the familiar room, with hand on hip. It was a fitting tribute that he always paid to life dear ones. Then he hung his hat on Bill Clark's antlers, and looked into the parlor. Everything was in its accustomed place, and immediately then. The small front windows were open and the scent of cinnamon roses filled the room. His sharp sightseeing memory seemed so insistent. He almost expected to see his mother's work-er. He left hastily, passed through the quaint dining room, and sought the kitchen—Dorinda Dodd.

There was a delicious fragrance of fruit and spice, and a table was piled all the evidences of molasses cookies to come, but no Dorinda Dodd.

"Oh, Miss Dorinda!" he said hastily, cheered for the moment by the comfort of his home, and then he words scarcely uttered out of the pantry stepped a woman.

"It must be Captain Clark," she extended a plump capable hand. "Welcome home."

"Thank you, ma'am. I was expecting to see Miss Dorinda Dodd here, so I just sang out." he explained.

"Oh—why, I am Dorinda Dodd!"

He stared at her doubtfully, "I mean Miss Dorinda Dodd," he said, disconcerted, for the moment by the comfort of his home, and then he words scarcely uttered out of the pantry stepped a woman.

"It was Miss Ellen Smith," she extended a plump capable hand. "Welcome home."

"Thank you, ma'am. I was expecting to see Miss Dorinda Dodd here, so I just sang out." he explained.

"Oh—why, I am Dorinda Dodd!"

He stared at her doubtfully, "I mean Miss Dorinda Dodd," he said, disconcerted

The Common Sense of The American People

For four years the United States will be sane and safe under the competent administrative direction of Calvin Coolidge. No other result of the election was to be expected by intelligent observers. In a crisis the common sense of the American people can always be depended upon. And the country has faced an undoubted crisis, brought about by one of the most dangerous demagogues that the Nation has ever had to deal with—Robert M. LaFollette.

This man, appealing to class hatreds and striving to gather under his banner every element of unrest and discontent, has gone down to disastrous defeat and dragged with him not only his own Destructionist Party, but the Democratic Party as well. Just as in England the great conservative strength of the people rose against Socialism, so has the great conservative strength of the United States turned to Coolidge and driven home a most impressive lesson. The Constitution shall not be wrecked. American institutions shall be preserved. That is what the Coolidge victory means.

It means that and more. For Calvin Coolidge represents an ideal of sturdy, courageous citizenship that places public welfare above all personal cosiderations. His Americanism is of the kind that real American delight to honor. It stretches far back through his ancestry. It has governed him throughout his career, private and public. It stood him in good stead when he was suddenly elevated to the Presidency. Up to that time ignored by political leaders, he commanded their immediate attention. Boldly and squarely he looked in the face of every issue that arose and acted from conscientious motives. He used the veto when Senators and Representatives, knowing that he was right, dared not follow him, in fearful were they of the effect on their own political fortunes. He led a fight for a scientific tax reduction measure and was betrayed. He refused to indorse demagogic schemes for the relief of Western farmers that were wholly illusory, but calculated to deceive.

Here was real courage. The people liked it. They had faith in him. They swept the country for him at the primaries. They insisted upon nominating him for the Presidency. Even a La Follette ought to have been able to perceive that they intended to elect him. Republican candidates for Congress soon discovered that to win favor for themselves they must support the cool, clear-headed, clean-minded man in the White House.

Cool, clear-headed, clean-minded—that tells the whole story. That and an Americanism founded upon the Constitution that refused to yield so much as the fraction of an inch to agitators. Against such a character the mud bombs of a Davis and the mad mouthings and frothings of a La Follette were hurled in vain. They fell harmlessly. Calvin Coolidge was accepted as the foe of all corruption. He was accepted as a leader that would fearlessly do his duty as his conscience—not the politicians—dictated. He was accepted as an administrator of public affairs who could be trusted to keep the ship of State in the channel of prosperity.

The career of Magnus Johnson in Washington was brief. Elected as a dirt farmer with a personal acquaintance with the needs of our agricultural regions, Mr. Johnson was expected to propose and fight for legislation that would fill the farmers' wants. But his constituents were disappointed. His record in the Senate is virtually a blank. So Minnesota has turned from the glittering generalities of Farmer-Laborism and gone back into the list of Republican States. The state may be expected to retire her other so-called Farmer-Labor Senator in 1928. In the meantime his radical influence in the Senate will be negligible.

11 TONS OF ROSES FOR POUND OF ATTAR

Huge Quantities of Flowers Used in Perfume.

New York.—While the chemist today is able, by analyzing odor-giving elements in flowers, to produce artificial perfume, this process has not and, it is predicted, never will replace perfume-making from fresh flowers, an industry dating back almost before the dawn of history. For centuries, ceaseless experiments have developed two chief ways of obtaining sweet perfume from flowers.

The process of greatest general use in unlocking the fragrant cells of flowers to take their perfume is called enfleurage. A housewife, who understands how butter or lard left in the icebox will sometimes absorb odors, can readily see how this process is used to extract odor from flowers. The blossoms from which the odorless parts are removed are mixed slowly in large vats of neutral beef or pork suet. More and more blossoms are mixed in until the fat has the odor of the required strength, and then the fat is thoroughly washed with alcohol. Then a very strange thing happens. The fragrance has passed from the flowers into the fat and now shows a remarkable affinity for the alcohol, in this way the essence or attar is created.

Use Absorption.

The other system adopted after centuries of experiment is by absorption. The flower blossoms are sprinkled face down in air-tight chambers, in which glass walls are covered with fat. Twice a day the flower supply is renewed. This process is repeated twice daily for many months until the fat absorbs the odor in sufficient strength. The fat is then melted in glass and the essence is obtained from it by washing with alcohol.

Some idea of the enormous amount of flowers required for perfume making may be gained by realizing that to make one pound of attar of roses requires eleven tons of roses, or about three million blossoms. The principal perfume center of the world lies between the Bay of Cannes and the mountains beyond Grasse in southern France, though flowers for perfume do come from every country and climate. The flower farms in Alpine villages are the mecca of lovers of perfume. From December until March fragrance is extracted from rosewood, sandalwood and other herbs, and in March work begins on fresh flowers, including the violet, and then the jonquil, orange blossom, rose, mignonette, jasmine, tuberose and cassia buds.

A curious fact is that the flowers are picked in the fields at the hour when their scent is known to be strongest. The rose is gathered as soon as it is open. The carnation must have three hours' exposure to the sun before it is picked. The late carnation of all the Russias is said to have preferred toilet water made of violets picked at twilight near Grasse.

Veiled in Mystery.

From earliest days the making of perfume has been veiled with the great shroud of secrecy, because the perfumers did not want their trade secret known. Around the making of perfumes were woven fearful tales by the Sicilians of Sheba, who said that cinnamon was gathered from the nest of the phenix and that it was collected by that bird in some strange manner unknown to them. They also told stories about how they found the perfume attar guarded by ferocious winged serpents that dwelt in marshes. Another queer yarn was that bats flew at the eyes of all who tried to gather canna. As time passed, though, men learned how to gather flowers to make perfumes. On through the Middle ages the process became more widely known throughout the world, though the Romans, in their love of luxury, are thought to have known facts about perfume making that even today men of science do not know.

Elephant Sale Fails

Little Rock, Ark.—Probably the first real elephant market in the United States was established here when two trained beasts of a defunct circus were put on the block and offered to a number of municipalities that were seeking additions to their zoos. The reserve offered the elephants at $2,000, with no takers.

New York Preserves Types of Other Times

New York.—The facade of the old United States Assay Office building, which formerly stood at 15 Wall street, has been reassembled stone by stone as the front of the new American wing of the Metropolitan Museum of Art in Central park.

The new wing will be devoted entirely to American art of the colonial, revolutionary and republican periods, and will be formally thrown open to the public November 10.

This building will be unique in that its 18 rooms for the most part will be constructed of the actual woodwork that formed the walls and ceilings of historic and characteristic early rooms.

Collections of objects of American furniture, silverware, glass and pottery of the Seventeenth, Eighteenth and early Nineteenth centuries will be shown in the appropriate rooms.

Certainly Was Dumb

In Lancashire the victim of nearly every funny story is the "tackler," an onlooker in a mill. He is invariably made out to be an extremely stupid fellow. The following is a typical example as told by Whit Cunliffe:

"Two tacklers, dressed in their Sunday best, met in the street, and one remarked to the other:

"'Why, Bill, how nice your suit looks. You only had it new the same time as mine and look how mine has gone out of shape.'

"'Well,' remarked Bill, 'you should do the same as I do; get one of them coat hangers.'

"His friend's face brightened and he departed full of glee. They met again some time later.

"'Well,' said Bill, 'did you get that coat hanger I told you about?'

"'Yes,' replied the other, 'but the blooming thing made my shoulders sore.'"

The Wonderful Baby

"Now, then, ladies and gents," shouted the rosy-faced showman, "walk up an' see the most wonderful baby on earth! The charge for admission is only sixpence. Walk up! Walk up!"

A good many people responded to the invitation, and when the place was full the showman brought forward a very ordinary baby indeed in all respects.

"What is there wonderful about it?" asked one of the disgusted sufferers of the showman. "I've seen thousands of babies like it."

"Well," said the showman, getting near an aperture in the booth, "all I can say is that its mother says it's the most wonderful baby on earth, an' if she doesn't know who does? You'll have to take the lady's word for it!" he yelled as he dodged an empty bottle and disappeared from view.—London Tit-Bits.

Valuable Timber Trees Destroyed

Practically All of Blight-Infected Areas of Chestnut Has Been Killed.

(Prepared by the United States Department of Agriculture.)

That the natural replacement of blight-killed chestnut by other valuable species is assured, is the opinion of C. F. Korstian, associate silviculturist at the Appalachian forest experiment station, United States Department of Agriculture, Asheville, N. C. Mr. Korstian has just returned from an extended investigation of blight-infected areas of southern New England, New Jersey and Pennsylvania, where practically all of the valuable chestnut timber has already been killed.

The unsightly gaps in the green cover of the forest that has become so conspicuous in chestnut regions as a result of the ravages of the blight are not a permanent feature of the forest than the marring of woodland scenery, according to Mr. Korstian. They represent an economic loss of forest productivity, which is especially serious on account of the present timber scarcity which is confronting the nation.

Of Nation-Wide Importance.

"What nature is doing to restock these gaps with valuable trees in the forest cover of the surrounding old chestnut is a matter of more than local importance," said Mr. Korstian. "In southern Connecticut all of the mature chestnut is dead and the second generation of sprouts is now dying. Here detailed studies of reproduction and growth in the openings in the original stand, some of which records are available as far back as 1904, in the same year that the blight was first discovered in Bronx park, New York, in the study of the fate of each of the smaller blanks left in the forest through the death of the chestnut and fortunately being filled by the extension of the crowns of adjacent trees, principally oaks. Those trees have shown an increased growth nearly twice as great as for the same period of time before the death of the chestnut.

"The larger openings are for the most part being filled by seedlings and sprouts of valuable species, such as the oaks, white ash, and hickory. In northern New Jersey pine also is coming in naturally in the larger openings. Of all the species replacing the chestnut, the tulip poplar is one of the most abundant and widely distributed from Connecticut to North Carolina.

Salvage Losses in Connecticut.

"In Connecticut the greater part of the chestnut timber has been salvaged at a satisfactory profit. In many cases the salvaging of the chestnut has been accompanied by an improvement cutting, applied to the remaining hardwoods. By cutting at the same time some of the defective trees are lacking in vigor and thus removing many of this from the standpoint of growth and future development of the forest, a number of trees of the species left to fill from which to recruit the area. The utilization of this timber has also made it easier for the owner to sell the chestnut. In some of the more inaccessible parts of New Jersey and Pennsylvania timberland owners are not allowing the dead chestnut to stand.

"The chestnut blight is now found throughout the entire southern Appalachian region as far south as northern Georgia, and is spreading much more rapidly than originally predicted by forest pathologists," said Mr. Korstian. "Within the next ten years large numbers of chestnuts will be killed in the lower elevations of chestnut timberlands will therefore sell their timber as rapidly as suitable markets can be found for it."

Lack of $25 a Year Ends English Custom

London.—Another ancient English custom of the Dorset countryside has passed away, the "Hundford Bell," which has rung every night for centuries, will be heard there no more.

Blandford, a tiny village in the heart of Thomas Hardy country, is rich in ancient traditions, and one of the oldest customs was the daily ringing of the Dane bell in the church tower at one o'clock in the day and again in the evening.

The custom goes back to a period when clocks were unknown to the humble natives. An unmarried lady in the sun's course on were apprised of the hour by the ringing of a public bell.

A month ago a new rector came to the village. He had no objection to the ancient custom, but church funds are not what they used to be, and the bell ringer gets £25 a year. The rector argued that if the town wanted to continue the practice the cost should come out of public funds. The town council debated the question long and anxiously recently, and in a majority of one decided that Blandford fell small not ring if the ratepayer has to foot the bill.

The Doughboy Booster

The young duke of Sutherland said at a reception in New York during his American visit:

"It is no wonder you Americans are so successful—you are such enthusiasts, such boosters.

"One day during the war the life of an English military attache was saved by a brave American doughboy in the Argonne.

"The doughboy accepted the attache's warm thanks and compliments with a modest, shrinking air.

"'Where are you from?' the Englishman finally asked.

"His shrinking air vanished at this question. His eyes flashed, he stood very erect, puffed out his chest and said in a loud voice:

"'I am from Marion, Ohio, the world's greatest steam shovel producing center.'"

Efforts Being Made to Organize a Boys' and Girls' Calf Club in Charlevoix County.

(B. C. Mellencamp, County Agriculture Agent)

I am endeavoring to organize a Boys' and Girls' Calf Club in Charlevoix County this fall and am sending out this circular letter as a means of securing names of prospective members.

You no doubt have heard of the Boy's and Girl's Pig Club which has been in operation for over a year and have noted the results accomplished by the twenty-six boys and girls who started their project with a purebred pig selected from Loeb's Farms.

From a conservative estimate those twenty-six pigs have increased in number until today there are over one hundred purebred pigs scattered in all sections of the county and have stimulated interest developed by both the parents and the Club member. The farmers of tomorrow are the young boys of today; anything that you can do to keep your boy or girl interested in the farm and its management and operation in every form is to your benefit; to the boy's future success, and to the community welfare.

Following are the suggested plans for the organization of the proposed Club:

1. To have it open to grade animals backed by cow testing association records as well as to the purebred. I believe the majority of us are not yet ready to tackle purebreds for various reasons.

2. To have all the major dairy breeds represented in the project, if possible evenly divided.

3. To allow each member his choice of a calf or a bred heifer upon which to start his work.

4. To keep feed and cost records of his animal for a period of four months unless the heifer has freshened, then records on the weights, etc.

5. To have each boy take a note on one of the banks, indorsed by his father and carrying legal rate of interest for a year's time.

6. To have each member of the Club care for his calf or heifer as far as possible and as much as conditions would permit.

7. To have the territory around each city in the county an equal member of Club members if possible.

8. To have the members choosing one particular group of together, the better for community work.

9. To have each member exhibit his or her animal at the County Fall Fair.

Realizing the mutual benefits to both you and your son, are you sufficiently interested to answer this so I may visit you and talk the proposition over?

Horses Work Cheaper on Alfalfa Hay and Corn

Eight teams of horses, each animal weighing from 1,500 to 2,000 pounds, did roughing in age from three to fifteen years, were used in a feeding test recently at the Michigan Agricultural college. In this test, under the direction of H. S. Hudson, one horse in each of these teams was fed corn and alfalfa hay, and the second one was given the usual feed of corn, oats and timothy.

Keeping accurate tab on the feed and weighing the horses each two weeks, Hudson found that the alfalfa-fed animals ate much more than the others, without many things which are considered necessaries of life."—Kansas City Times.

Cleveland on the Cow

Grover Cleveland's opposition on the cow, written when he was a small boy in school, follows:

"The cow is very useful. If it were not for the cow we could not have so much milk to put in our coffee and tea.

"Every part of the cow is useful. The skin is tanned into leather and boots are made of it. The flesh is good for food and is called beef. Kidneys are made into buttons. Of milk butter and cheese is made. There is a story connected with the tail which is made into glue—indeed if it were not for the cow we could not get along without many things which are considered necessaries of life."—Kansas City Times.

SINNERS IN HEAVEN

By CLIVE ARDEN

Copyright by The Bobbs-Merrill Co.

WRECKED

SYNOPSIS—Living in the small English village of Ivybury, old-fashioned and sedate place, Barbara Brierley, daughter of a widowed mother, is soon to celebrate her nineteen to Hugh Reedale, rich and well connected. Barbara is adventurous, and has planned, with an aunt, an airplane trip to Australia. Major Alan Croft, famous as an aviator, is to be the pilot. At her first meeting with Croft Barbara is attracted by his manner and conversation, different from the cut-and-dried conventions of her small town.

PART ONE—Continued.

She knit puzzled brows, trying to follow his meaning. What keynote could there be to all the jumble of separate entities that make up life?

"What brings the world goes, I suppose, what you want to discover?" he asked.

"Do I? Is that it?" Exactly she leaned toward him. "Oh, I wonder—What do you think it is?"

He blew out a cloud of smoke; then smiled. "Goodness knows. Perhaps there isn't one. When private ones do we all meet. Don't you often wonder, when you meet a number of new people—"

"I never do meet them! It is quite an event to meet a stranger," she asserted flatly.

"Well, you shall soon meet plenty—of all nationalities. Even natives, in the Philippines."

Barbara came back to practical realities with a start. "Natives! Are there really? I should be terrified to death!"

"Oh, no; surely not. I like them immensely."

She looked at him incredulously. "But why the Philippines?"

"I have to go to Borneo and the Philippines on the flight." He plunged into details of the journey, and she listened, fascinated. To flash like a meteor over France, Italy, Egypt, India, with a few days at each landing place, and then the descent to the Pacific, exceeded all she had ever dreamed. The world—at last!

Abruptly he broke off.

"But I have not yet discovered, in this wonderful world I have found what is wrong with the world! I hope you succeed in your heart's desire." It's a tall order."

A subtle change in his manner gave her the impression that, inwardly, he laughed at her.

"Anyway, it is a wonderful change, I'm grateful to you for giving it to me," she replied, with stilted politeness.

"To me?" he echoed; then gave a short laugh. "Oh—not at all. I am merely the means."

Barbara shook her head vigorously. "No! I feel a little depressed over leaving Hugh; that's all. It seems as though something—I don't know what—were ending. I suppose that's natural upon going away for the first time? Is it?" she added anxiously.

Mrs. Field knew when to keep her thoughts to herself.

"Quite natural," she replied cheerfully. "And—Bub," she went on, hesitating a little, "if you need Alan's friendship for any reason, I think you would find it worth having."

"Oh," the girl said hastily. "I don't think he—we—I shall never quite understand him."

Feeling that to be likely, Mrs. Field said no more. She had sown the seed, if ever it were needed. . . .

Then the last night at home— She had looked around her familiar little room with mixed feelings. When next she slept here, what would she have learned of the things beyond that lifelong barrier of hills visible from her window?

With a warm rush of tenderness, she remembered that, upon her return, her new life as Hugh's wife would begin.

Taking the large photograph of him from the wall, she placed it carefully within her packed trunk.

* * *

And now the moment of departure had come. Croft appeared, looking big and alert in his flying kit, with an air of confidence about him which communicated itself, in some subtle way, to Barbara. Having been destined over a matter of form in the office, he hurried their affairs.

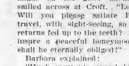
Hugh followed Barbara into the cabin, where she turned and clung to him. He drew her into his arms and kissed her with more passion than usual.

"We shall be married directly you return, Bub, darling," he said hastily, feeling a suspicious lump in his throat. "I—I'll meet you, when you come back. I won't be long."

Hugh knew that his Barbara's warm, hurried impulses occasionally resulted in moments of embarrassment. Gently loosening the clinging arms, he looked past Baby Brierley. Then he turned to the cabin door, hesitated, came back, kissed Barbara's wet cheek passionately again, and ran down the steps.

Croft leaned down and waved farewell as the car drove off. Slowly, the machine glided away.

But with quick transition, the movement changed into the swift run of a bird seeking cover. Faster and yet faster, it became a wild roaring race



Barbara Watching. Stood Close Beside Him.

across the grass, which soon, the little wheels failed to touch, as, at an incredibly short distance, the airplane rose lightly into the clear air.

Thrice she circled, high above the heads of those who watched. Then, sure of her capabilities, she turned, with a final upward curve, and settled down to her work.

PLAN TO MAKE SEA DAY LIKE LAND DAY

Marine Revolution Makes Old Shellbacks Gasp.

New York—If ever there was a sphere of existence whose tradition rules, it is on the sea. Suggest to a shipmaster a change in the customary routine if you wish to have a perfect illustration of that classic "Let well enough alone." All of which is apropos of the recent government order that time on board ship shall be calculated as time is calculated on land—that is, from midnight until the following midnight, instead of from noon to noon, as has been the custom for centuries.

This is one of those questions which reduce simply of two sides; there is neither time nor space for any other quantities. One finds one side, and then one finds the other, and there is nothing else—no middle ground, to "murder." Six of one and half a dozen of the other are good figures to represent the two camps.

Different Worlds.

First of all, men who go down to the sea in ships feel that theirs is a different world from that of the landlubbers. Undoubtedly there is something to be said on that score. There is not, once he is dry in more ways than one; they tell time by bells, while we look at a clock; they go topside, and below when we go up and down stairs; they steer by starboard and port (everywhere except in the navy), whereas right and left tells direction to us; they go on watch and not to work; to know what is going on aboard ship. And chief among these differences of life at sea and life on land has been the reckoning of a day.

Now at sea, where there are no street signs or the "side" to guide one, the way you tell where you are is to say a sun is authoritative, looking the while to see if the sun is creeping the meridian, as it should do at 12 noon. Obviously, to the old-fashioned world the sun is a pretty handy thing to rely on; except for Joshua, nobody has been able to influence it materially.

So after the navigators have made sure that the sun is running on schedule they run figure where they are and what time it ought to be—may be. Compared with the references that can be made at midnight, this is much more logical. Consult any memory and all other wandering may disturb stars, so it is better to rely on the sun. But you can't see the sun at midnight—so there's the rub. For all these centuries, since the Phoenician astronomers first gained influence over the customs and policys of sailors, time, day has begun at noon on board ship, not at midnight. And now certain governments have ordered the change to go into effect this coming January.

Means Much Work.

"It will mean a great deal of work and a lot of changing of tables and mathematical calculations," said Captain Hartley of the Leviathan. "All the men will have learned their navigation by the old rule will have to unlearn that and learn the new." He laughed a sengoing laugh and added: "Some fellow will figure that he has the log just off Chicago.

"As for making the time conform to land time, that would require a lot of changes. We have Eastern standard time, daylight saving time, Greenwich time and various others. It would be great if all the times were made to conform—as they ought to, by the way."

England is conceded to be the country which sets the pace in things maritime. She, together with France, Germany, Spain and Italy, decided that the change would be a good thing. Then the United States followed suit and changed the nautical almanac, despite protests from some of the old shellbacks to whom the change was objectionable. Many of the captains, however, are not disturbed by the new order.

"Errors in dates have been made in the past because of the old methods, and it's reasonable to assume that after we become accustomed to the new, such errors will not occur," said one.

City Swallows Up Rural Mill of 99 Years Ago

Pittsburg.—One year less than a century ago an iron mill was built on the outskirts of Pittsburgh. It was a small affair, constructed on the banks of the Allegheny river by the firm of Mittenberger & Brown. For 80 years it grew and played an important part in the city's industrial life, but now, instead of being on the outskirts of Pittsburgh, it stands within a few blocks of the very heart of the city's shopping and office center.

And this is the chief reason the oldest independent iron and steel mill in Pittsburgh is being torn down. The firm of Brown & Co., Inc., the present owners, is going out of business because there is too much business.

The site of the mill occupies about three acres, and if it continued operation it would be necessary to expand. And there is no room for expansion. On three sides are tall buildings and on the other is the river.

J. Stuart Brown, grandson of the founder, said he did not wish to assume the responsibility of erecting a new plant elsewhere, and he felt he deserved a rest. Consequently the business will be discontinued.

Decision to stop work in the mill was reached last June, and not a wheel of its machinery has turned since. When running at full capacity the plant employed between 400 and 600 men. Most of the old employees have found work elsewhere.

Anne and Airplane

Four-year-old Anne has only seen an airplane when it has been high in the air. A few days ago she was passively watching one as it soared far above her, when she remarked: "I wish God would come down and take me for a ride."

Critical Study of Potato Seed

Use of Whole or Cut Sets Has Served as Subject of Investigation for Years.

(Prepared by the United States Department of Agriculture.)

The use of whole or of cut sets for seed in potato production has served as a subject of investigation for at least a century and a half and is still a most question. A critical study of the literature on the subject leaves the impression that much of the data presented is inconclusive, according to United States Department of Agriculture. It also serves to convince the reader that much depends upon the manner in which the experiment was planned and executed whether whole or cut sets gave the most profitable yield.

Most Profitable Size.

The successful determination of the most profitable size of set to use and whether it should be planted whole or cut primarily involves a careful study of the proper spacing to give to each size of set in order to obtain the maximum yield.

Departmental studies covering several years show rather conflicting results, so far as the yield of primes, or marketable potatoes, is concerned. The data, which is now published in a new bulletin just issued by the department as Department Bulletin 1068, clearly show that seasonal conditions have a very definite influence upon yield, particularly with respect to the size of the tubers. Abundance of moisture and plant food throughout the growing season produces a maximum crop from whole and large-sized cut sets; whereas lack of these two essentials favors medium-sized cut sets, because few tubers are produced, and in consequence they have a better chance to reach marketable size.

There is a definite relation between the size of the set used and the number of stems and tubers produced to the set.

Stem Frequency.

A study of stem-frequency correlation shows that as the weight of whole seed increases from two to six ounces the stem-frequency shifts from three stems in the case of two-ounce sets to seven stems in the case of six-ounce sets. Halved seed shifts from two stems to four stems. Quartered sets on the other hand, whether from three, four, five or six-ounce tubers, show that the greatest stem frequency falls in the two-stem column in the Presque Isle (Me.) data. In the Virginia data whole sets shift from three to five stems, halved sets from two to three stems, and quartered sets from one to two stems.

Six Different Ways to Use Immature Corn Crop

There are six good ways of using soft corn. With all indications pointing to a reduced crop of the corn belt's favorite grain, it will pay farmers where the crop is late, or was held back by rain, replanting, etc., to look up information about them. Where a dairy has live stock the situation will not be quite so serious as where a grain farmer tries to market or dry his entire crop. Here are ways you can do it:

1. Put it into a silo.
2. Shock it in the field or barnyard.
3. Crib corn up to 25 per cent water content.
4. Shredding.
5. Marketing.
6. Feeding.

Permanent Quarters Needed for Pullets

Moving Birds About Cuts Down Egg Production.

The price of eggs will most likely be high again in the winter and we should have our pullets producing those high-priced eggs to best advantage, says H. H. Hill, extension poultry husbandman at Clemson college. In order for growers to get the growing pullets in permanent quarters.

If pullets have been handled and cared for properly, they will mature about October 1 and then start laying. After they start laying they should not be disturbed because often they are moved from one house to another it always sets them back in laying. If they have already begun to lay, moving will cut down production and in some cases will cause a molt, which will mean no eggs.

Another important factor in handling poultry, Mr. Hill adds, is that they must not be frightened. Whenever they are frightened by children, dogs, cats, etc., it will surely retard egg production. Sometimes the poultryman himself will forget his usual caution and walk into the poultry house quickly, giving his hens a bad scare. Even this excitement tells in egg production. It is best always to attract the attention of the pullets in some way before entering the house.

Motion Picture Films Loaned for Exhibition

A catalogue of the 182 motion picture films made by the United States Department of Agriculture on a wide range of agricultural subjects has just been issued as Miscellaneous Circular 27. The films are lent for exhibition to responsible persons, the only charge being for transportation both ways.

The films are designed to aid in the work of the extension and field workers of the department and co-operating state institutions. Their primary use is by or under the supervision of such workers. The number of copies of the films which the department is able to supply is at present inadequate to meet all requests from other sources. However, farmers' organizations, schools, colleges, churches, theaters, and other agencies or persons desiring to borrow films may make application for them through county demonstration agents, other department field workers, directors of extension work of state agriculture colleges, or other officially operating agencies, and the films will be supplied if not in use. Applications should be made to the Office of Motion Pictures, Extension Service, United States Department of Agriculture, Washington, D. C. Copies of the catalogue, Miscellaneous Circular 27, may be had by writing to the department at Washington, D. C.

Expensive Machines Are Entitled to Best Care

It is time for several of the machines of the farm to be put up for the year. The binder has completed its work for the year and the mower is through with its job: These two pieces of machinery represent a more or less complicated design and are expensive. They should receive good care in order that they may be in good working order for another year.

All dirty bearings should be well cleaned and polished and then given a heavy coat of oil or grease so that they will not rust. The sickles should be removed and stored in a dry place after having been given a good overhauling and a coat of oil. The sunshine should be well inspected and any repairs should be ordered now. It is much easier for a man to recall needed repairs after a few days than it is to recall them after several months. If repairs are made now, the machine will be in working order next year.

FARM FACTS

Two bushels of oats and 20 pounds of vetch per acre make a good seed mix.

Good crops and fair prices are the foundation of every sort of business prosperity.

The removal of big weeds in the corn will save lots of moisture needed by the corn at maturing time.

Are you using dairy products from cattle that have been tuberculin tested and found free of tuberculosis?

Because chickens seem to drink only an occasional teaspoonful of water is no reason for thinking that they don't need any water.

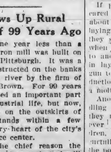
Apples have a medicinal value, are refreshing and cooling, help to eliminate waste, stimulate appetite and aid digestion. Eat apples.

Record keeping is the business end of poultry. We need more business in handling our poultry and only when we keep good records will we be able to handle our poultry for bigger and better profits.

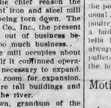
In order to produce eggs of uniform size and color it is necessary to have good poultry of a standard variety and the flock must be well housed, fed and cared for, if quantity production is expected.

GETTING THE JUMP ON TUBERCULOSIS

FREE CHEST CLINICS KEEP TUBERCULOSIS INFECTION UNDER CONTROL.



Baby Betty Is just one of the many hundred children who each year are brought to the Free Chest Clinics of

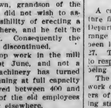


Betty Awaits The Doctor's Verdict.

the Michigan Tuberculosis Association. Her parents are wise. They know that 65 per cent of all children in the United States between five and fifteen are infected with the germ of tuberculosis.

It is but a step from tuberculosis infection to the disease itself. Herein lies the wisdom and necessity of frequent chest examinations by competent physicians.

Tuberculosis Christmas Seals support Free Chest Clinics, all over Michigan. Such clinics are "a stitch in time" against the most insidious of scourges: the plague which in the last ten years killed 31,195 men, women and children of Michigan.



Christmas Seals fight tuberculosis. Buy them. Give Health.

I will be in Charlevoix every Tuesday forenoon until further notice. Those wishing to see me may notify me at 4144 Mitchell St. Petoskey, Mich. —Dr. G. W. Green, Osteopath.

Old Should Not Shed Teeth.

In a lecture at the British Dentists' hospital in London, Dr. Harry Campbell said that sending the teeth the old age was not a normal senile change, for healthy teeth in healthy sockets become firmly fixed with age.

Order for Publication—Final Administration Account.

STATE OF MICHIGAN.—The Probate Court for the County of Charlevoix.

At a session of said court, held at the probate office, in the city of Charlevoix, in said county, on the 3rd day of Nov. A. D. 1924.

Present: Hon Servetus A. Correll, Probate Judge.

In the matter of the estate of Lawrence J. McCann, deceased.

Anna W. McCann having filed in said court her first administration account, and her petition praying for the allowance thereof,

It is Ordered, that the 24th day of November, A.D. 1924, at ten o'clock in the forenoon, at said probate office, be and is hereby appointed for examining and allowing said account and hearing said petition;

It is further ordered, that public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Charlevoix Sentinel, a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
34-3t Judge of Probate.

Order for Publication—Determination of Heirs.

STATE OF MICHIGAN—The Probate Court for the County of Charlevoix.

At a session of said court, held at the Probate Office in the City of Charlevoix in said County, on the 23d day of October A.D. 1924.

Present: Hon. Servetus A. Correll, Judge of Probate.

In the Matter of the Estate of Adelia Porter, deceased.

Harry Porter having filed in said court his petition praying that said court adjudicate and determine who were at the time of their death the legal heirs of said deceased and entitled to inherit the real estate of which said deceased died seized,

It is Ordered, That the 24th day of November A.D. 1924, at 10 o'clock in the forenoon, at said probate office, be and is hereby appointed for hearing said petition.

It is Further Ordered, That public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing in the Charlevoix Sentinel, a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
33-3t Judge of Probate.

MORTGAGE SALE.

Default having been made in the conditions of a certain mortgage executed by William T. Louisell and Minnie Louisell, husband and wife, of Marion township, Charlevoix county, Michigan, unto Elbert Dixon of the City of Detroit, Michigan, dated November 20th, 1918, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on the 25th day of November, 1918, in Liber 51 of Mortgages on page 110, and which said mortgage was assigned, assigned and transferred unto McPhail and Richardson, a co-partnership, of Ellsworth, Michigan, by assignment of mortgage dated March 9th, 1923, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, September 29th, 1923, in Liber 65 of Mortgages on page 137, on which mortgage there is claimed to be due at the date of this notice the sum of $789.16, including the principal sum due with interest and taxes paid by the mortgagee, together with an attorney fee of fifty dollars as provided for by the said mortgage, and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas, the taxes required by the statutes to be paid on said mortgage were duly paid prior to the recording thereof;

Now Therefore, Notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided for in said mortgage, at public auction, to the highest bidder therefor, at the front door of the Court House in the City of Charlevoix, Charlevoix county, Michigan, that being the place where the Circuit Court for the County of Charlevoix is held), on Tuesday, the 16th day of December, A.D. 1924 at 10 o'clock in the forenoon on that date.

The premises described in said mortgage being the lands, premises and property situate in the Township of Marion county of Charlevoix and State of Michigan, described as follows, to-wit: Lot one of Section twenty-nine (29) Township Thirty-three, North of Range eight (8) West, as per the United States Survey thereof and containing eighty acres of land.

Dated September 6th, 1924.

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by Elizabeth Struthers of Hayes Township, Charlevoix county, Michigan, unto John Kopf of Hayes Township, Charlevoix County, Michigan, on the 27th day of June, 1918, and recorded in the office of the Register of Deeds for the County of Charlevoix, Michigan, on the 27th day of June, 1918, in Liber 48 of Mortgages on page 246, which said mortgage was afterward sold, assigned and transferred by the said mortgagee unto Andrew J. Struthers of Charlevoix county, Michigan, by assignment of mortgage dated December 11th, 1920 and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, December 27th, 1920 in Liber 55 of Mortgages on page 63; and which said mortgage was sold, assigned and transferred by the said Andrew J. Struthers, assignee, unto Albert F. Bridge by assignment of mortgage, dated November 29th, 1922 and recorded in the office of the Register of Deeds for the County of Charlevoix, Michigan December 7th, 1922 in Liber 55 of Mortgages on page 80 on which mortgage there is claimed to be due the sum of $1622.50, including the principal sum due with interest, together with an attorney fee of twenty five dollars as provided for by said mortgage, and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas all taxes required by the statute to be paid on said mortgage were duly paid prior to the recording thereof;

Now Therefore, Notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided for in said mortgage, at public auction, to the highest bidder therefor, at the front door of the Court House in the City of Charlevoix, Charlevoix county, Michigan, (that being the place where the Circuit Court for the County of Charlevoix is held), on Tuesday, the 23rd day of December, 1924 at 10 o'clock in the forenoon on that date.

The premises described in said mortgage being the lands, premises and property situate in the Township of Hayes County of Charlevoix and State of Michigan, described as follows, to-wit: Lot one of Section twenty-nine; the South half of the North-west quarter of Section Twenty-six, township Thirty-three, North of Range eight west, as per the United States Survey thereof and containing eighty acres of land.

Dated September 6th, 1924.

DID YOU EVER STOP TO THINK

by E. R. WAITE, Secretary
Shawnee, Okla., Board of Commerce

That there is much need in many cities of a spirit of community cooperation between business men.

That problems of business can be handled more efficiently if there is a mutual interest displayed. Business men must fight collectively for prosperity and success.

That business men can't be cold in their service to the public and suspicious of each other and expect to increase trade for the city.

That there should be a friendly spirit, not only between business men but between business men and the public.

That the success of a business not only depends upon quality and the effectiveness of its advertising, but upon the personality of the management as well.

That selfishness and lack of community cooperation on the part of business men has done more than any one thing to make dead cities out of live ones.

That the public has a very definite preference for those business concerns who make themselves a living part of the community.

Businss men who sit down to watch and wait with critical eye to see what will happen, are community debtors. They are the fellows who try to get something out of the community without putting anything in, and by so doing not only ruin their own business, but their neighbors as well.

TEST NEW METHOD OF RAISING SEA TREASURE

Inventors Strive to Regain Gold Cargo Which Went to the Bottom in 1799.

Terschelling, Holland.—A new process for salvaging sand-buried treasure of the gold cargo of the British frigate Lutine, which has just been put into operation here with every promise of success.

The Lutine was wrecked on a sandbank near this island during a violent gale in the night of October 9, 1799. Its crew of more than 400 perished. Its cargo consisted of several million dollars worth of gold bars and specie.

Fifty feet of sand covers the wreck and repeated efforts have resulted in the recovery of only about $500,000 and the ship's bell, now at Lloyds in London. At first divers were put to work, but later machinery was used to get at the wreck through the thick layer of sand by means of powerful pumps.

Now a new apparatus, invented by a Dutch engineer, Ing. Bos, is being tried. It does away with the pumps and substitutes hydraulic pressure. A tube is driven into the sand and huge grapplers at the bottom seize any objects beneath it. The machine can work in depths of 100 feet. It is not enough for the salvage vessel to be out.

During the days that the new apparatus worked recently no gold bars were raised, but indications are certain, according to Ing. Bos, that the right spot has been struck and hopes are entertained that one or two of the Lutine's precious cargo, estimated at between $5,000,000 and $10,000,000, soon will be wrested from Davy Jones' locker.

Rat Douses Lights

Houston, Texas.—Houston Heights and other sections of the city which depend upon the Texas Power & Light company for electricity were thrown in darkness recently when a rat walked into the principal distributing drum and caused a short circuit. It took 30 minutes for workmen to get the charred body of the rodent from the mass of burned-out wires.

Local Boy Appointed on Judging Team at the Stock Show

Richard Paddock, son of Mr. and Mrs. Robert Paddock, who is attending the M.A.C. has earned recognition from his college by being appointed on the judging team at the International Stock Show at Chicago. This appointment is based upon academic standings in the Animal Husbandry Class, and Mr. Paddock was chosen along with four others who passed the required test. There will be twenty three competing college teams, including two from Canada, who will pass upon the animals before they are passed upon by the final and expert judges, and the team whose judgement comes the nearest to that of the final judges, is the winner of the honors.

Here's hoping for the M.A.C.

Later:—The M. A. C. was 17th in line, Nebraska first, Missouri second, and Ohio third. Although somewhat low in the line, this is the highest M. A. C. has ever reached.

Home of Mrs. Etta Cooper Damaged by Fire Thursday

The home of Mrs. Etta Cooper, at 600 Mason street, was badly damaged by fire on Thanksgiving night. The fire was confined to the roof and upper floor, and had gained considerable headway when it was discovered, the family having gone out for the evening. The household effects were saved with very little damage, and the loss sustained to the building was covered by insurance.

The work of repairing began Monday by Wm. Bogart, and the house will soon be ready for occupancy. In the meantime the family will occupy the residence owned by E. J. Hiller at 405 Antrim street.

C. A. FLANAGAN DIES, A VICTIM OF PNEUMONIA

Cornelius A. Flanagin, vice president of the Rittenhouse & Embree company, lumber dealers, died last night at his home, 1000 Ardmore avenue, after a week's illness from pneumonia. Mr. Flanagin was born in Atwood, Ill., in 1890. He was married and had one son, Norris C. Flanagin. The widow, Mrs. Edna Flanagin and the son survive him. Mr. Flanagin was a prominent member of the Presbyterian church and of Englewood commandery, Knights Templar. He belonged to the Mystic Shrine. He was a member of the Chicago Athletic association, the South Shore Country club, the Hamilton club, and Olympia Fields Country club, and was connected with the Central Manufacturing District club, being interested in the industrial activities of that part of the city. The funeral services will be held from the Hyde Park Presbyterian church at 2 o'clock Monday afternoon.

The foregoing is from the Chicago Tribune of Saturday, Nov. 29th. (Local papers please copy.)

Mr. Flanagin was in the true sense a self made man. The writer remembers him as a mere boy working on his farm job, as a clerk in the general store of his uncle, Wm. Flanagin, at Atwood.

About the year 1890 Mr. Flanagin entered the employ of Rittenhouse & Embree, who were conducting a general store and lumbering business at Norwood, and he remained in this position about four years, when his superior business ability was recognized by the Rittenhouse and Embree Co., of Chicago, and soon after went with this large lumber concern, where he retained his connections up to time of his death, which comes as a shock to his friends of other days who are still living in the community where he spent his boyhood and young manhood.

Through his unusual business ability, special adaptability for the work, integrity and earnest effort, his progress was steady, and for several years previous to his demise he had been one of the principal stockholders and vice president of the Rittenhouse & Embree Co., one of the largest retail lumber concerns, if not the largest in the middle west.

Mr. Flanagin, with his wife, spent a week or so at the Belvedere Hotel, at Charlevoix two years ago, and at that time called upon many of his old friends and neighbors.

INVESTS IN CHARLEVOIX REAL ESTATE

Ayers Boal Buys the Stockman Property on Bridge St.

The property consisting of lot 4, block 5, at the southeast corner of Bridge and Clinton streets, known as the M. J. Stockman property, the buildings thereon being occupied by A. E. Mason's dept. store and L. C. Hannal's furniture store on Bridge street, and the Lakeside pavilion of Dice & Beard, on Lake and Clinton streets, was purchased last week through Archie Livingston, by Ayers Boal, of Winnetka, Illinois.

Mr. Boal is not a stranger in Charlevoix, having been a member of the Chicago Club for several seasons, and for several years past spending his summers with his family at their farm home on Pine Lake, on the Charlevoix-Bay View Road.

What Mr. Boal intends to do with his new acquisition has not been decided, but it is safe to say that whatever it is will be in the nature of an improvement and a credit to the city.

ABLE LEADERSHIP ASSURED

Washington, Dec. 2.—The selection of Senator Charles Curtis, of Kansas, as the leader of the Republicans in the senate, to succeed the late Sen. Henry Cabot Lodge, means a move that will expedite business, promote harmony and insure a wise legislative program. He is personally popular among senators regardless of party or faction, which makes it easier for him to adjust differences. He comes from the Middle West and fully understands the problems of agriculture, but is not of the radical type so numerous in that section of the country.

The selection of Curtis as senate leader was made possible by the resignation of Senator Warren, of Wyoming. Warren declined the honor, probably on account of his age, although he need not have barred him, for he is an exceedingly vigorous legislator despite his 80 years. Warren was born in Massachusetts and at the age of 18 enlisted in an infantry company for service in the Civil War. He participated in many engagements, and was awarded the Congressional Medal of Honor for gallantry on the field. Upon the restoration of peace Warren returned to Massachusetts and engaged in farming for a short time and in 1868 went to Wyoming, where he has since been known as one of the most extensive sheepowners in the world.

So great has been the confidence of the people of Wyoming in their great agricultural leader that they have kept him almost continously in some office of trust since 1873. He has been mayor, member of the state senate, state treasurer, governor, and U. S. senator. He has been a senator for 32 years. He is a quiet man, making few speeches, but always to the point. He regularly attended and paid close attention to the business before the Senate he forms one of a well known group which has long included Senator Watsh, Gallinger of New Hampshire, and Lodge of Massachusetts. The latter two have passed on, but Smoot is still one of the recognized everpresent and ever-dependable Senate members.

Senator Curtis, the new Republican leader, also has a long and highly creditable record in public life. He was born in Topeka, Kan., and spent the entire life as a resident of that city. He was elected county attorney when 24 years of age and went to congress at the age of 31. He served seven terms in the House and was elected to the Senate in 1907. Near the expiration of that term he received the popular vote for renomination but lost the nomination under a district plan of selection. When the legislature enacted a law for the nomination of candidates by direct vote, he again won and returned to the Senate as a result of the election 1914.

Like Senator Warren, Curtis is of the quiet type, making few speeches and those of the style of a business man rather than an orator. He talks only when there is something important before the senate, and then brief but directly to the point. His most effective work is in personal conferences with senators, and in planning and putting through a program of legislation. His selection as leader is a forecast of a satisfactory record in senate procedure.

Observance of Golden Rule Sunday in many homes will mean "going the second mile," and in others "giving when it hurts;" but the lives and well being of thousands of children depend upon replenishing the Near East treasury at this time—so let's do it.

The finest line of Toys and Holiday merchandise in northern Michigan now on display at Fessenden's drug store.

SHOP EARLY MAIL EARLY

Hope to Make this a Habit with the American People

Last year, through the generous cooperation of the press, the movies and other mediums, Christmas mailers have been induced to mail their packages much earlier in the month than ever before in the history of the institution of gift exchanging in the holiday season. As a result, the special rush of the last minute rush of former years, with its attendant heartbreaking labor on the part of wearied and nerve worn clerks and postal employees, was avoided.

This year Postmaster General New has determined to make an even better record and to banish for all time the suffering undergone in past years by those engaged in the sale or transportation of gifts. They hope to make "Shop Early" and "Mail Early" a habit with the American people. Mailing done not later than Dec. 15 or before but if everyone could get their holiday tokens in the mail between Dec. 10 and Dec. 20th, the postoffice could not ask more.

Particular attention this year will be paid to greeting cards. Despite the success last year it was noted that the last-minute mail consisted largely of them. Possibly many of them were returned greetings to friends, heard from on a previous mail, but overlooked until after Christmas list. Unlike parcels and letters containing money orders, cards, of course, can not well be marked "Do not open 'till Christmas." Therefore, it is possible that the many mailers hold them over last to insure delivery Christmas eve. This class of mailers this year, may find their cards undelivered until after Christmas Day.

Believing that the energies of postal employees should not be sapped to the point where they are unavailable at need, and intent upon securing for them the same Christmas privileges enjoyed by others, Postmaster General New asks the hearty cooperation of the public. The last-minute, or zero hour has been moved up so that all postal employees may eat their Christmas dinners at home. Rural carriers will deliver no mail at all on Christmas and clerks and carriers in the city offices will stop work promptly at noon.

Wreckage on St. Helena

David Corp, caretaker at the lighthouse building at St. Helena Island, wrote us last Saturday that the whole beach on the south west of the island is strewn with wreckage of the steamer Niko. Mr. Corp found the vessel's name on a life preserver. He asked us, when was the Niko seen last?—St. Ignace Republican-News, Nov. 20th.

Coming Friday, Saturday and Sunday Matinee Saturday

James Cruze's magnificent Paramount production, "The Covered Wagon," a tremendous picture of the pioneer days on the plains preceding the gold rush of 1849, is coming to the Palace theatre Friday, Saturday and Sunday, with a matinee Saturday at 2:30 p.m.

The story has to do with the love adventures of Molly Wingate and Will Banion which mature during their migration to Oregon. The picture is packed with dramatic moments, and the heart appeal is irresistible.

FORMAL OPENING NEXT SATURDAY

Invitations are out announcement made of the formal opening of "Redpath's" new store, 207 Bridge Saturday of this week. This is a matter of interest to the entire community, and particularly so to women of Charlevoix and the surrounding country, in view of the fact that the management will confine their efforts the main to supplying the wants and requirements of the up-to-date modern woman with ready-to-wear garments.

The salesroom has been entirely repainted and fully equipped with wall and floor cases of modern design, specially and conveniently arranged all making for an attractive salesroom that takes on a pleasing and attractive appearance and with the display of merchandise will prove interesting to shoppers as well as purchasers.

Saturday is set aside for the formal opening and not a sales day. The goods will be on display only and the privilege is extended to call and inspect the quality, style and textures carried by the new house of Redpath.

PROVIDE EXCELLENT LYCEUM COURSE

Promoters Ask Hearty Support of Charlevoix Citizens

We have an excellent Lyceum course this season, and we believe it should be heartily supported by all of the citizens of Charlevoix.

This Lyceum course besides being a source of entertainment and education for mature people, is of considerable value in bringing the best in the line of lectures and music to the pupils in the schools.

It takes money to procure this talent, as it has been the desire of those in charge of the course to get the best that can be secured. If the people of the city support this course, we will be able to have as good or a better course another season.

This course deserves to be well supported, and we hope that every interested citizen will do his or her part to make it a success.

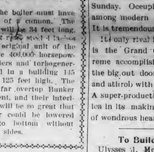
Tickets are on sale at the various drug stores, and can be had at these places.

ROY E. BENDELL HERE DEC. 10

Entertainer and Reader on Lyceum Course at Palace Theatre

An evening of rare enjoyment is in store for those who hear Roy E. Bendell, entertainer and reader, on the Lyceum Course here Wednesday evening, December 10. Mr. Bendell is a unique personality. He is one of the biggest men, physically, on the Lyceum platform today, and he is a big man as an entertainer as well. He is endowed with unusual dramatic instinct and a rich, resonant, musical voice.

As an impersonator Mr. Bendell is remarkably effective. One of the most striking impersonations is that of Abraham Lincoln. The original gait of the plains invigor 600,000 horsepower, with boilers and superheaters housed in a building 115 by 800 feet, 125 feet high. The stacks will far overtop Bunker Hill monument, and their latest or dimester will be so great that a street car could be lowered from top to bottom without touching the sides.



Build Boilers With 1,200-Pound Pressure

Boston.—The power station which an electric illuminating company of Boston is erecting at Weymouth will operate boilers working under pressure of 1,200 pounds to the square inch. This is 50 per cent more pressure than any of the most powerful locomotive and three times that ever before used in a commercial power station.

Parts of the boiler must have the strength of 2 cannon. The boiler drum will be 34 feet long, 5 feet 6 inches in diameter and will weigh 200 tons when empty. The boiler drum will be 34 feet long, 5 feet 6 inches in diameter and will weigh 200 tons when empty. The original gait of the plains invigor 600,000 horsepower, with boilers and superheaters housed in a building 115 by 800 feet, 125 feet high. The stacks will far overtop Bunker Hill monument, and their latest or dimester will be so great that a street car could be lowered from top to bottom without touching the sides.

C. H. S. Debate Friday Evening December 12th

Resolved: That the Philippine Islands be given their complete independence, will be the subject for debate at the C. H. S. auditorium Friday evening, December 12th.

C. H. S. will be represented in the debate by Henrietta Bechtold, John Dutcher and Donald Swinton on the negative side of the proposition and the Central Lake debating team will take the affirmative side of the argument.

The debate will open at 8:00 o'clock and will probably attract and hold the attention of students and local citizens.

Coax Alaska Hen to Lay With Electric Lighting

Anchorage, Alaska.—The domestic hen, the hardiest of Alaska, accustomed to take 3 1/2 months during the six months of night in winter, will have to do her steady shift at producing eggs, from all indications. Electricity is now being used in this Alaska poultry farmer. By the aid of light and heated quarters hens are being made to lay at a time when in the past they ave supply hardly has paid for feed.

It is interesting to note that Mr. Bendell in of about the same stature as President Lincoln, which fact lends materially in attaining a striking impersonation. Mr. Bendell's repertoire covers a wide range. He is remarkably successful, not only in the presentation of humorous selections, but of dramatic readings as well.

Mr. Bendell has been on the Lyceum platform for the past six seasons and has built up a splendid reputation as an entertainer. He is a man of unique personality, and a thorough artist with rare dramatic instinct.

Speaking of a Bendell entertainment an Iowa editor recently wrote as follows: "The audience was very responsive and seemed more than pleased with Mr. Bendell's choice of program—his 'Evening of Miscellaneous Selections.' Many of his selections were given in special costume; and with the aid of grease paints, wigs, and 'make-up' supplied and removed in full view of the audience. Mr. Bendell very cleverly impersonated the various characters. Now he was the English dude, somewhat blase and tired of life, 'don'chono'; now he was a friendly old soul from the Hoosier state, gleefully spinning out a yarn about his complicated love affairs; and again he was successful in the guise of a disappointed lover straight from the 'Auld Country.' "Throughout, the program was made up of selections well chosen, varied and popular, and rendered with a charming combination of ease and forcefulness that made his hearers feel the reader's own strong personality behind the work."

Dr. W. W. Mitchell, wife and son, drove to Detroit Wednesday

"TO HAVE AND TO HOLD"

By NEWTON BRETTZ

(©, 1924, Western Newspaper Union.)

"I DON'T think that I care to accept the proposition, Mr. Lisle," Rolfe Vance said this with a glance about the dingy, poor looking office and a shrug of the shoulders.

"I'll stick," annoticed David Porter, simply and clearly.

As he spoke, the earnest faced, manly appearing young man fixed his eyes on a framed portrait above the desk of his employer—the picture of his daughter, fair, loyal Beulah Lisle.

They were both young men, and both for over a year had been employees of John Lisle, who was old, effete and, just at present, more than that—worried and despondent.

In his dainty, frigid way, Vance picked his steps past the greasy machines lying around, nodded brusquely and was gone. Perhaps he, too, thought of the beautiful Beulah. Under existing circumstances, however, he realized that it would be a tedious road to the winning of that coveted prize. He was naturally indolent, self-sacrifice was painful to his refined nature, and, to express his secret phrasing, he "threw up the sponge."

"It's a hard outlook, I'll admit," spoke old Lisle when he and David found themselves alone. "That bankruptcy of Merritt & Co. has about swept our coffers clean. The worst of it is that it will take us fully a year to get a new stamping outfit and modern process outfit."

"But when you do, it's clear sailing, isn't it?" submitted David in his cheery, optimistic way.

"I hope so," said Mr. Lisle went over to his desk. He was busy for some time, writing rapidly. Finally he stopped, proffering David a written sheet.

"Sign that," he directed.

"Why, what is this?"

"A deed of co-partnership. You've shown yourself a true man in agreeing to the out n factory location. We're partners from this on, friend David," and the brassy quartet of the old workman rested tremulously, almost lovingly, on the broad shoulder of his loyal assistant. "Now, my lad, we hold share and share alike, the business, the equipment, and all in and there about."

Again David glanced at the portrait. "To have and to hold"—he smiled with a quaint conceit in mind. Ah! that fine interest represented half original, as well as the mere portrait of the girl with the wild rose face!

Mr. Lisle's eyes were fixed upon an entirely different object. It was a large, bulging, morocco-mounted valise. It stood at the top of an old-fashioned file case, where it had rested for 30 years.

His dead father, William Lisle, had made it. The business of his house for three generations had been wax—bleachers and refiners. When parents died, William Lisle had been first in the field. A proud memento of the same was that valise, fashioned by his own hand, and resting now where he had placed it to show how admirably it resisted both cold and age.

Rather mournfully John Lisle viewed the old vase. It had not fulfilled its promise. Manufacturers with more capital had outdistanced his business. A year since he had attempted an invention. Everything looked auspicious, but now the house distributing his goods had failed.

Beulah Lisle did not live at home. For two years she had acted as governess in a wealthy family. Her father's health, however, she visited her father on Saturday until Monday. Those were blissful hours for the old man. She mended his clothes; she set his three living rooms in order. And how hopefully she discussed, the little home they would jointly occupy when "the new process" was a success!

Manfully sloaring all the heaviest burdens, David set at work in the new partnership. When the Saturday came when Beulah was to make her regular visit, he postponed the pleasant Sunday when she would preside at the table and bring new sunshine into the rather dreary home.

He came into the little parlor back of the office that especial Saturday to find Beulah there, but in tears, and her father looking the picture of despair. Beulah always greeted him with a bright smile, for she knew how good and true he was. The smile was lacking now, for deep sorrow shadowed her fair face, and David fancied that her hand clasp was more fervent than ever before, and a mute gratitude in her eyes told that she appreciated his sterling fidelity in sustaining her father amid his business troubles.

"It never rains but it pours," Mr. Lisle half groaned. "We must see private of Beulah for a long time to come."

"Then Miss Lisle is going"—began David, and his heart stood still—"going to be married?" he almost blurted out.

"Going away—to another part of the country, with the Burtons," added Mr. Lisle.

"It is best, dear pups," spoke Beulah, soothingly. "My income as governess makes me independent. It relieves you of a great care until—"

"Until Lisle & Co. have made a success," supplemented David. "It shall be, Miss Lisle," and the young man felt the surging tide of a new ambition inspire his hopeful soul.

Beulah could not remain with them, as the Burtons were already packing for the removal. There was a tearful good-by between father and daughter, David trod on air as the former suggested that he see Beulah home.

All that blissful mile he sought to cheer her up, to paint her father's future in glowing colors. When they parted she asked a timid favor.

"I shall be obliged to leave a pet kitten behind," she said. "I spoke of the matter about it. He fancied the Snowball would be a comfort to him. Could you pardon yourself with the charge, Mr. Porter?"

And Snowball became thus a fixture at the Lisle place. When David returned home that day, Rolfe Vance, arrayed gorgeously, was disappointedly leaving it. He had found a new and a paying situation, knew that Beulah was expected on a visit and had appeared to show himself.

All through the long winter evenings after that the old man and David worked and planned to get enough ahead to have Beulah come home. Trade was getting better, but the delinquents were slow. One day Rolfe Vance drifted into the old office. Prosperity showed in his every word and action. He had with him a fifty dollar bulldog and wore a diamond pin. He vaunted greatly of his good luck and asked about Beulah.

"Look out!" suddenly shouted Mr. Lisle.

He was too late with his warning. The dog had discovered Snowball. The kitten made a spring and went up to a lofty flight, landing on top of the file case, jogged the old valise and there was a topple and a crash.

Vance discreetly withdrew. Mr. Lisle groaned at the wreck, and rubbed on the floor. David gathered up the fragments. Then he uttered a cry of amazement.

For among them were folders and bank notes. The secret hoard of old William Lisle was disclosed—five one thousand dollar bills!

Beulah was sent for. New capital brought new business. One day Mr. Lisle entered the parlor to see daughter and partner hand in hand, smiling happily.

"Thirty-fifty!" he exclaimed. "What's this?"

With a proud, quiet smile David Porter took from his pocket a deed of partnership. He indicated one line in the same.

"To have and to hold!"

Health Greater Than Gold

The crew of the old whaler Narwhal that sailed to the South Seas imagined all sorts of treasure did not make free voyage without reward.

Some were they did not fill the hold of the vessel with "pieces of eight." They did not discover any pirates' gold. Their naps and chants did not lead them to any cache of gold nor silver hidden away by murderous hands.

But they did find the health of body and a fine background for a gorgeous silk and velvet rose and foliage. Besheer and supple fabrics (and ribbonings that are used to weight them sometimes) soft and carefully adjusted girdles, have all proven their helpfulness. A handsome scarf is an adjunct to the evening dress that will lend it grace. Paris is making the most of the fine value for exploiting flare at the bottom of skirts in dance frocks. One of these is shown in the illustration and evidently much attention has been given to its back. The deep decolletage is filled in with a fine shirring of lace which makes it brooks the straight line of the bodice, as in the case of bright's shade, as the satin body with a very irregular curving line and falls over uneven flounces of chiffon in two colors. One can imagine this gown in many lovely color combinations with either gold or silver lace used in the flounce. The treatment of the decolletage is very clever—it is cut to appear low but filled in with a fine lace so that the hand of a dancing partner has a proper resting place.

Chiffon or georgette, embroidered with beads maintain an important position in the evening modes.

One would not expect to find wider brimmed hats gradually gaining on their popular small-hat rivals for midwinter wear, but such appears to be the case. The last word from Paris finds an echo in American style centers, and it concerns wider brims and high, peaked crowns. Further-

GROUP FEATURING WIDER BRIMS

more, besides the flowers that bloom in the spring there are others that bloom in millinery fields when midwinter approaches. Among these new varieties have made their appearance —glace flowers and carved wooden blossoms—and it is safe to predict that they will be joyously acclaimed.

In the group of hats shown here there are four models that exploit the wider-brim idea and one novel, small hat. Black lace and satin join their smart forces in the poke shape at the top of the picture, making a softly suave and flowing line about the face

—brings the sun of the tropics to dety nabdwinter. A wide scarf of this velvet veil about the crown ends in a bow at the side.

A dignified and tall-crowned hat of purple velvet has the brim covered in crown almost covered with ostrich feathers in forbids and orchid shades. Here the soft and darker lower line in a draped hat finish the group with a gem of superb but quiet millinery.

ONE OF THE PARIS DESIGNS

prove successful as dance frocks. Flouting draperies, uneven hemline, sheer and supple fabrics (and ribbonings that are used to weight them sometimes) soft and carefully adjusted girdles, have all proven their helpfulness. A handsome scarf is an adjunct to the evening dress that will lend it grace. Paris is making the most of the fine value for exploiting flare at the bottom of skirts in dance frocks. One of these is shown in the illustration and evidently much attention has been given to its back. The deep decolletage is filled in with

PARIS MAKES FLARING SKIRTS; WIDER BRIMS COUNTENANCED

DANCE frocks gally turn their backs upon an odulting world. fully conscious of the fact that those backs were designed to be looked at. Backs are, in fact, the most important consideration when the matter of evening dresses to be used for dancing comes up. Not every pretty evening dress that happens along will serve for dancing, but only those that are graceful and designed to swing into flowing and beautiful lines when their wearers dance.

Designers resort to various artifices to make evening dresses that will

Depends on Voice to Show Man's Character

The other day I was in Tommy Michael's office, "I. D." setting in the Kansas City Times, and he nodded to me to pick up the extension telephone.

"I want you to listen to what this bird has to say," said he.

Well, I did, and agreed that I knew nothing about the business he was talking. I got along all right. Finally Tommy cut the conversation off.

"I think I do not want to do business with you," said he, and hung up the receiver.

He knew nothing of the other man except from his telephone conversation, but did not like his voice. It was, he said, the voice of a cheat and a bully. He felt he could not rely on this telephone stranger, except to be unfair and untruthful and troublesome. Voices, said Tommy Michael, are worth studying. He had been fooled by fair appearances more than once, and candid eyes had proven deceitful, and the written word had been deceptive when passed on by a shyster. He'd be could always spot the voice of a rogue—

"I don't know what there is about it," he said, vaguely. "Something—something false."

Since then I have been studying voices. Of course, a rough, quarrelsome, mean, sycophantic voice may be assumed because of fear or desire to catch the voice of a thief because of some false note—

Tommy says it can always be done with practice. An honest man always has an honest voice. A thief never can.

Try it, some time. Guess on the voices you hear on the phone.

"Get Your Goat"

The origin of this phrase, which means to annoy, irritate, or make angry, is not known for certain. Modern lexicographers believe "goat" in this expression is a corruption of "gontee," the chin tuft or pointed beard. If this is correct, "to get one's goat" literally would mean "to pull one's beard, which is considered the most humiliating kind of insult.—Pathfinder Magazine.

Silk Smart for Hats

A rather small hat of brown silk stitched with black is in favor now for afternoon wear. It often has a double pompon on the edge of the brim, over one ear, the brim being narrow to the vanishing point.

Tinted Lace Scarfs

Long-fringed scarfs of tinted silk lace and huge squares of ophire crepe de chine and chiffon are among the novelties of the new season.

Gracious in Effect

The new turban is a graciously soft creation which flatters any face. In velvet folds, gently molded to the shape of the head, this hat is ideal for sports or motor wear.

Perfumes in Fashion

Fashions have taken on an almost barbaric touch in some respects. Perfumes, for example, are heavy and tantalizing, and the average woman uses a dozen different kinds in a week.

The KITCHEN CABINET

(©, 1924, Western Newspaper Union.)

WEEKLY MENU SUGGESTIONS

SUNDAY—Breakfast: Grapefruit, cream of wheat. Dinner: Roast duck with apples, orange salad, macaroons, coffee. Supper: Tomato cream soup, ginger bread, apple sauce.

MONDAY—Breakfast: Pears, oatmeal, reheated rolls, shirred eggs. Dinner: Creamed duck on toast, apple pie. Supper: Chop suey.

TUESDAY—Breakfast: Cantaloupe, puffed wheat, milk, drop doughnuts. Dinner: Broiled steak with onions, buttered beets. Supper: Cottage cheese, roll jelly cake.

WEDNESDAY—Breakfast: Grapes, cornmeal mush. Dinner: Boiled dinner. Supper: Oyster stew, cabbage salad.

THURSDAY—Breakfast: Orange, shredded wheat, toast, eggs. Dinner: Baked hash, bread pudding. Supper: Graham buns, fried calf's-heart.

FRIDAY—Breakfast: Stewed prunes, bran, top milk. Dinner: Broiled or fried base, parsley, potatoes, horseradish sauce. Supper: Parsnip fritters.

SATURDAY—Breakfast: Grapefruit, puffed rice, poached eggs on toast. Dinner: Apple dumplings. Supper: Sliced ham, potato salad.

Chop Suey.

Take a pound of round steak with plenty of suet. Cut into half inch dice and brown the steak in the hot fat tried out from the suet. Add a pint of boiling water, salt and pepper to taste and one pint of diced celery. Cover and cook slowly. Serve as a stew.

Drop Doughnuts.

Beat one egg, add one-half cupful of sugar, a little salt, a pinch of ginger and a bit of lemon rind. Add one-half cupful of milk alternately with one and one-half cupfuls of flour sifted with one teaspoon of baking powder. Drop, from a teaspoon into hot fat. This makes two dozen small cakes.

Why should we call ourselves sure, unless it be to succeed in anything everywhere? Say of anything, "This is beneath me," and feel that anything is beyond our powers. Nothing is impossible to the man who can will.—Mirabeau.

LIKABLE GOOD THINGS

Vegetables are now preferably served on the dinner plate with the

meat, as the combination with side dishes and extra service. Because of this manner of serving a change must be made in the method of cooking the vegetables, using those which keep their form and are not served with a thin sauce which would spoil the appearance of the plate.

Fish Ghowder.—Cut into small strips three or four slices of fat ham and cook with one large onion sliced thin. Peel and slice six medium-sized potatoes, remove eyes and borers from two pounds of haddock, halibut or other white fish, cut into slices and arrange in alternate layers of potatoes and fish, with the bits of ham, in a deep kettle; add all are cupfuls of water, season with salt and pepper and pour over the whole two cupfuls of milk, cover and cook slowly until the potatoes are done. Add a pint of cream, heat again and serve hot with pilot crackers.

Empress Rolls.—These may be served in place of sandwiches and are a welcome change. Take the long crusty rolls, cut into half, scoop out the soft centers and fill with the following mixture: One cucumber peeled and chopped, one teaspoonful of grated horseradish, one dessert spoonful of cream, salt to taste, and a small mayonnaise as needed to season. Press in the filling with a knife.

Green Peppers, Stuffed.—Cut the tops from six green peppers, remove the inside membrane, using only enough to cover for five minutes, cook the sliced-off tops with the pepper shells. Remove and drain peppers in a pan containing ham and fill with one and one-half cupfuls of cooked veal, one and one-half cupfuls of bread crumbs, three-fourths of a cupful of chopped cooked ham, one chopped onion of the peppers, a tablespoonful of minced parsley, one teaspoonful each of salt and onion juice, three tablespoonfuls of melted butter and enough cream or pan gravy to moisten and bind all the whole. Bake for half an hour in gentle heat, basting every ten minutes with water or stock.

Sweet Potatoes Stuffed With Prunes.—Pare and parboil sweet potatoes of oval shape; core with an apple corer, and fill the cavity of each with one or more prunes, previously stoned. Insert into the ends of the potatoes, baking the prunes, with the plugs, to keep in the juices. Bake on the grate of the oven with a pan beneath to catch the drippings. For six or eight sweet potatoes place in the pan two cupfuls of water and a little sugar and allow to remain until the potatoes are cooked. Remove the potatoes to a warming oven, boil down the strup, then pour over the potatoes for a glaze. Serve with fried chicken, broiled mackerel or roast goose.

The reason that we do not proceed from the can and cooked down until a rich dark brown makes delicious pies, with all the work of preparing and cooking fresh pumpkin eliminated.

Nellie Maxwell

Early Mystery Story

"The Castle of Otranto," a novel by Horace Walpole, later fourth earl of Oxford, was the forerunner of the modern mystery story, and its publication in 1764 started a vogue of such stories in England.

Prayer of Br'er Williams

Lord, show us de right road, an' if we don't travel it, please tell Satan to lay low an' not hit us too hard till he gits us for good an' all!—Atlanta Constitution.

Daddy's Evening Fairy Tale

By MARY GRAHAM BONNER

MOTHER OCEAN'S FRIENDS

"I'm like all great creatures," said Mother Ocean. "I have my friends and I also have many enemies."

Billie Brownie sulted to himself, and yet no one in the world could help but say that Mother Ocean was certainly great.

"You see there is a lot to me," said Mother Ocean. "Now, when there is a lot to a person it means that that person has character and brains and all that sort of thing.

"But when I say that there is a lot to me I mean not only such things. I mean there is a great deal of size to me.

"Perhaps I shouldn't say it in just that fashion. But I'm not fussy about how I speak. I am too powerful to mind.

"Why, I have had people traveling upon me and they have talked most beautifully. They have used fine words and they have talked really very grandly.

"But that didn't bother me. I let them know that I was superior to that. So I have tossed and rocked and have told the Wave children to have a rough a party as they wished and then it was more than the fine talkers could do to keep up such grand talk.

"They just didn't say anything, except:

"Oh, dear, but I feel poorly.'

"And there is nothing very brainy about that.

"Well, as I was saying, I have my friends and my enemies. My Wave children are my family, so I'm not speaking of them.

"They love me! Just think what it means to have a mother who lets you be just as rough as ever you wish. Ha, ha, that's something!

"Of course some might not think so, but I do!

"I want to tell you about my friends now, though.

"A little girl was going sailing with her brother in one of my bays. She was talking to an old, old naval gentleman.

"I hope it doesn't get too rough,' she said. 'But I also hope it doesn't get too calm.

"I don't care to be becalmed and sit out doing nothing on the water for hours at a time.'

"I suppose not,' the old naval gentleman said, 'but do you know I have lived almost all of my long life at sea and I have never been bored with the sea for a moment?

"I've always loved it better than anything else in the world—no matter how it is.

"I could sit out in a little sailboat for hours and I couldn't be unhappy as it would be the water I'd be on.'

"Now, that old gentleman, Billie Brownie,

"Then,' continued Mother Ocean, 'I must tell you of the men who arrived at a little seaport town some few days ago.

"They had been on a long, long ocean journey. They had come from the Far East.

"And they had arrived, at last, on land.

"But, Billie Brownie, how do you think they spent their holiday and rest-time?

Billie Brownie shook his head.

"They came down and watched me," Mother Ocean said. "They watched me by the hour

"I Have Never Been Bored."

as though they couldn't see too much of me.

"They walked up and down by the beach and they watched me in the early morning and at night, and every moment they could.

"They had been seeing practically nothing but the ocean for weeks, and yet when they were on land they did not know that after-noon in there that I did.

"Oh, it was most interesting to see how they loved me.

"And now, Billie Brownie, I don't think I'll tell you about any who don't like me, or any of my enemies this time.

"I feel too happy to do that. Much too happy, Billie Brownie."

And Billie Brownie understood.

So with a wave of his cap he went back to Brownieland and Fairyland to tell them about Mother Ocean's friends and great admirers.

Job's Condition at End

"Can you tell me in what condition Job was at the end of his life?" asked the Sunday school teacher.

"Dead," promptly replied the youngster at the foot of the class.

Sun Bothered Willie

Father had been telling Willie about the sun being millions of miles away from the earth.

"What I can't understand," said the boy, "is how the sun's light manages to get here so early in the morning without traveling all night."

A Difference

Placing the purse under the pillow when going to bed safeguards it, but resting on one's laurels may lose them.—Buffalo Enquirer.

The Demoniac and the Deliverer

By REV. GEORGE E. GUILLE

Extension Department, Moody Bible Institute, Chicago.

TEXT—And they went out to see what it was that was done.—Mark 5:14.

The news, spread by swineherds in Gadara, of the sudden drowning of some two thousand swine and the reason for the investigate, and this is what they found: an orderly, well dressed man in his right mind, and the whole town in a state of terror to the community sitting at the feet of Jesus, properly clad, and in quiet possession of his senses, heavy losses in the swine industry, and themselves in moral terror over this manifestation of the power of God.

Another story of God's salvation, hidden, indeed, but so near the surface as to be readily seen, this tale of a demon possessed man's deliverance.

We are told first of the habitat of the demoniac and in it we discover the dwelling place of the unsaved—"He had his dwelling among the tombs! The scene of death and corruption! And this is the sinner's abode, a home in the shadow of death, the soul upon a ruined creation. Death by sin! And this "the whole creation groaneth and travaileth in pain together until now." Deaths, funerals, graves, broken hearts, tears and groans! This is the scene to which man clings. What poor taste! O soul! Someone has come into it with deliverance and life. How can you still desire it?

"And no man could bind him; no, not with chains. . . neither could any man tame him." The apostle's statement, "Whit the law could not do, in that it was weak through the flesh," is here ringing in our ears. For the laws of God and the laws of the state are but chains binding man to restrain the outbreak of his evil nature. "For the carnal mind is not subject to the law of God, neither indeed can be," having neither the desire nor the power to respond to its holy claims. No, if man is to be tamed it is not by external force but by a supernatural change within, the miracle of new creation wrought by the Son of God.

And with the coming of the Lord Jesus into the scene, what a transformation! No more "dwelling among the tombs," but at the feet of Jesus, just a word from lips of grace and power. "Were no ten lepers cleansed? but the nine, where are they?" Here is one who has probably had most to do with the adaptation of the steam turbine engine to oceanographic purposes on a large scale, nearly 7 per cent, and the atmosphere about 60.8 per cent. Now, about 95 per cent of the surface rocks is igneous in character. The prevailing dark rocks solidified from a fused condition and are evidences that the interior of the earth when they came is in a molten condition. How deep down is this molten core? That's unknown of course, but volcanic activities in various parts suggest that it is not many miles deep and also that the rocky crust is not everywhere of the same thickness.

The newest volcanic field is the Katmai Nation al monument in southwestern Alaska. In 1912 Mount Katmai blew off its head and covered a large part of the world with ashes and dust. The explosion created the "Valley of Ten Thousand Smokes"—where the earth is hot and superheated steam issues in thousands of blasting columns. The geysers of Yellowstone National park show an older volcanic ground, partly cooled off and much eroded. Halemaumau, "Lake of Everlasting Fire" in the crater of Kilauea in the Hawaii National park, is always a source of interest. Here, always in motion like a great boiling spring, apparently a direct connection with the liquid center of the earth.

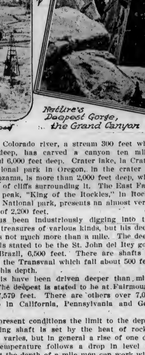
Offhand the thickness of the rocky crust of the earth would seem to vary greatly. The highest spot on the earth's surface is the summit of Mount Everest, India-China, 29,000 feet above sea level. The lowest is the Dead sea in Palestine, 1,290 feet below sea level. The corresponding points in Continental United States are Mount Whitney, California, 14,502 feet; Death Valley, California, 276 feet. The mean depth of all the oceans and seas is estimated at about two and one-half miles. The Pacific averages 12,000 feet, the Mediterranean 4,500.

The deepest natural hole in the earth's surface is the Grand Canyon National park in Arizona.

With a Wave of His Cap.

To Dig For Earth's Secrets?

British Scientist Would Sink a Shaft 12 Miles Deep



Sir Charles A. Parsons

Where Drills Go Deep

Photo © Underwood & Underwood

Rolfe's Imperial Gorge, the Grand Canyon

By JOHN DICKINSON SHERMAN

WHAT is the deepest hole ever made in the earth? How far down have men been able to penetrate the earth's crust? What for? So as to find out what's there. And why? Well, science says a systematic study of the earth's crust is one of the most pressing needs of the day. To what end? That all mankind may be benefited by research into the awful power of the elements within, who, at His word of authority, "Come out of the man, thou unclean spirit," recognize Him as "the Son of the most high God." Men may scoff at the Deity and the Saviorhood of the Lord Jesus, but the demons know Him. He is the Son of God, O soul, He who has this power over the demons is able to deliver you and earth" to deliver and save you from sin, and waits, with no conditions or questions, for your trusting with your need to His feet, when He shall speak the word that shall set you free forever.

Into the swine the demons go, and into the sea, and the swine drown! O sin, rest from its guilt and penalty, rest from its power, rest in Christ's own presence forever!

And not only sitting, but clothed. Here again is the work of salvation so constantly employed, "He hath clothed me with the garments of salvation." No more the shameful nakedness, covered by the garments Christ provides.

And finally, in his right mind. Tney who have sent at His feet are always so. And wherever men, whether presidents, of universities or naked savages, sent at the feet of Jesus, in their right mind, regarding the unsaved remains: "Having the understanding darkened, being alienated from the life of God, because of the ignorance that is in them, because of the blindness that is in their heart." Were those men of Gadara in their right mind when "they besought him to depart out of their coasts?" Are men mad who refuse Christ's great salvation with its unspeakable rest and joy!

How different the attitude of the saved soul. "He prayed Him he might be with Him." Here the grace and God holds to Himself the heart His grace has touched. The desire of every Christian is:

"Let me be with Thee
Where Thou art."

But until that day when He shall have His own with Him testimony and service for Him. So "Jesus suffered him not, but saith unto him, Go home to thy friends and tell them how great things the Lord hath done for thee, . . . and all men did marvel."

What Is My Spiritual Stature?

The old archers took the bow, put one end of it down beside the God, elevated the other end, and it was the rule that the bow should be just the size of the archer. If it were just the size then he would go into the battle with confidence. Let me say that your power to project good into the world will correspond exactly to your own spiritual stature.—Talmage.

Conscious Life

If ever we rise again to conscious life, it will be by no native power, but by the overmastering of the Spirit of God; and, unless the Spirit dwell in us, superstition only have an idol, conscience a law, philosophy a name, but the heart has no God.—F. H. Hedge.

Serving God

To attempt to serve God without love, is like rowing against the tide. But love oils the wheels and makes duty sweet.—Watson.

By the Colorado river, a stream 300 feet wide and 50 deep, has carved a canyon ten miles across and 6,000 feet deep. Crater lakes, in Crater Lake National park in Oregon, in the crater of Mount Mazama, is more than 2,000 feet deep, with 1,000 feet of cliffs surrounding it. The East Face of Longs peak, "King of the Rockies," in Rocky Mountain National park, presents an almost vertical front of 2,200 feet.

Man has been industriously digging into the earth for treasures of various kinds, but his deepest hole is not much more than a mile. The deepest shaft is mined to be the St. John del Rey gold mine in Brazil, 6,500 feet. There are shafts in India and the Transvaal which fall about 500 feet short of this depth.

Oil wells have been driven deeper than a mile. The deepest is stated to be at Fairmont, W. Va., 7,579 feet. There are others over 7,000 feet deep in California, Pennsylvania and Germany.

Under present conditions the limit to the depth of a sinking shaft is set by the heat of rocks. This heat varies, but in general a rise of one degree in temperature follows a drop in level of 60 feet. At the depth of a mile water rises with difficulty, if at all. In some of the shafts of the Comstock Lode, Virginia City, Nev., the waters at that depth are boiling.

So it appears that man has not got very far into the earth's surface. An example is the proposed 12-mile hole, and his experience to date gives hint of the difficulties he will encounter. Apparently every 100 feet below a mile is a good deal like an inch on the end of a man's nose.

These things were set forth by the modern engineer, as personified in Sir Charles. He has been advocating this 12-mile hole project for a long time. He delivered an address in 1904 to the engineering section of the British association he said, in part:

"A most important investigation needing attention is the exploration of the lower depths of the earth. At present the deepest shaft is, I believe, at the Cape, a little over a mile in depth, and this is the deepest hole that has been made in the earth's crust. Somewhere in this hole the temperature or rocky portion about ten miles thick and forming about 93 per cent of the earth's crust, and the atmosphere about 60.8 per cent. Now, about 95 per cent of the surface rocks is igneous in character. The prevailing dark rocks solidified from a fused condition and are evidences that the interior of the earth when they came is in a molten condition. How deep down is this molten core? That's unknown of course, but volcanic activities in various parts suggest that it is not many miles deep and also that the rocky crust is not everywhere of the same thickness.

"The newest volcanic field is the Katmai Nation al monument in southwestern Alaska. In 1912 Mount Katmai blew off its head and covered a large part of the world with ashes and dust. The explosion created the "Valley of Ten Thousand Smokes"—where the earth is hot and superheated steam issues in thousands of blasting columns. The geysers of Yellowstone National park show an older volcanic ground, partly cooled off and much eroded. Halemaumau, "Lake of Everlasting Fire" in the crater of Kilauea in the Hawaii National park, is always a source of interest. Here, always in motion like a great boiling spring, apparently a direct connection with the liquid center of the earth.

"Offhand the thickness of the rocky crust of the earth would seem to vary greatly. The highest spot on the earth's surface is the summit of Mount Everest, India-China, 29,000 feet above sea level. The lowest is the Dead sea in Palestine, 1,290 feet below sea level. The corresponding points in Continental United States are Mount Whitney, California, 14,502 feet; Death Valley, California, 276 feet. The mean depth of all the oceans and seas is estimated at about two and one-half miles. The Pacific averages 12,000 feet, the Mediterranean 4,500.

"The deepest natural hole in the earth's surface is the Grand Canyon National park in Arizona.

At the Mine Shaft

(Underwood & Underwood)

waves that, it is but 20 miles below the earth's surface. It would take 20,000,000 pounds sterling to finance a big company to do the work. It could be done in 50 years."

Discussing his project after the luncheon, Sir Charles said British scientists, as well as officials of the Royal observatory at Greenwich, were greatly interested in the scheme. . . .

"We don't know what is down there and we ought to; that's the point," he said. "I have been making preliminary studies for the last 20 years and I am certain that such a shaft is a practicable engineering project and that the only thing necessary to make it a reality is the money. It might be possible to go deeper than 12 miles.

"I would have the shaft 20 feet in diameter and lined with granite, which experiments have shown would not fail in. The shaft would be sunk to the greatest depth at which any mining machinery are sunk, and it would be necessary, after we got down to a sufficient depth, to have the sea pumped out. At 12 miles the temperature is probably as high as 272 degrees Fahrenheit."

Dr. Arthur Smith Brown discusses Sir Charles' project at considerable length in the New York Herald-Tribune. He says in part:

"Engineers who have worked in mines candidly admit that a deep exploration shaft properly managed would be of inestimable value to science. There should be one in every continent equipped with a full scientific staff of observers and instruments, like an observatory. But when we talk great depth as Sir Charles Parsons suggests is mentioned, do not at us. He has some amazing views. A depth of about three miles is the best we have attained. But even more astonishing is the ability of woman to endure pressure, equally with that of man so far as women, where deeps and men are concerned.

"Let us, first, face the naked facts and put sentimentality and all popular but lying fallacies aside; the inherent inferiority and gentleness of what is feebly the unfair sex on one side. Woman's greatest enemy after, she gets a husband is woman.

Men have been, and are, responsible for nearly all the wars that are, and for lots into the lives of single girls, but it is women in the main who ruin the happiness of wives. For every woman who tries to make a shining success of her married life, there are a dozen who do everything in their power to ruin it. Someone has come into it with deliverance and life. How can you still desire it?

"And no man could bind him; no, not with chains. . . neither could any man tame him." The apostle's statement, "Whit the law could not do, in that it was weak through the flesh," is here ringing in our ears. For the laws of God and the laws of the state are but chains binding man to restrain the outbreak of his evil nature. "For the carnal mind is not subject to the law of God, neither indeed can be," having neither the desire nor the power to respond to its holy claims. No, if man is to be tamed it is not by external force but by a supernatural change within, the miracle of new creation wrought by the Son of God.

And with the coming of the Lord Jesus into the scene, what a transformation! No more "dwelling among the tombs," but at the feet of Jesus, just a word from lips of grace and power. "Were no ten lepers cleansed? but the nine, where are they?" Here is one who has probably had most to do with the adaptation of the steam turbine engine to oceanographic purposes on a large scale, nearly 7 per cent, and the atmosphere about 60.8 per cent. Now, about 95 per cent of the surface rocks is igneous in character. The prevailing dark rocks solidified from a fused condition and are evidences that the interior of the earth when they came is in a molten condition. How deep down is this molten core? That's unknown of course, but volcanic activities in various parts suggest that it is not many miles deep and also that the rocky crust is not everywhere of the same thickness.

"The newest volcanic field is the Katmai Nation al monument in southwestern Alaska. In 1912 Mount Katmai blew off its head and covered a large part of the world with ashes and dust. The explosion created the "Valley of Ten Thousand Smokes"—where the earth is hot and superheated steam issues in thousands of blasting columns. The geysers of Yellowstone National park show an older volcanic ground, partly cooled off and much eroded. Halemaumau, "Lake of Everlasting Fire" in the crater of Kilauea in the Hawaii National park, is always a source of interest. Here, always in motion like a great boiling spring, apparently a direct connection with the liquid center of the earth.

"Offhand the thickness of the rocky crust of the earth would seem to vary greatly. The highest spot on the earth's surface is the summit of Mount Everest, India-China, 29,000 feet above sea level. The lowest is the Dead sea in Palestine, 1,290 feet below sea level. The corresponding points in Continental United States are Mount Whitney, California, 14,502 feet; Death Valley, California, 276 feet. The mean depth of all the oceans and seas is estimated at about two and one-half miles. The Pacific averages 12,000 feet, the Mediterranean 4,500.

"The deepest natural hole in the earth's surface is the Grand Canyon National park in Arizona.

Find the Skeleton of Iron Age Warrior

Other Matter for Scientific Study in Old Tomb.

The National Archeological Institution of Czechoslovakia has for some time past been undertaking excavations at Stresovice, a western suburb of Prague, in a graveyard of great antiquity. Some of the skeletons seem to date from the Stone and others from the Iron age. Up to the present 11 tombs have been opened, all of which have contained valuable matter for scientific study. The excavators succeeded in opening another tomb, which, owing to its remarkable state of preservation and the wealth of its contents, promises rich food for archeological thought.

In this tomb, which dates from the beginning of the Iron age, the skeleton of a warrior lies extended, helping on the right hand a long iron sword with a bronze hilt astonishingly well preserved. It is probable that this sword, which was discovered lying across the shoulder of the dead man, with the blade turned upward, was originally encircled by a wooden sheath with a leather cover, as some leather still clings to the hilt. The wood and leather would naturally disintegrate with the ages, but they would account for the remarkable preservation of the sword.

Two large axes lay near the head of the warrior, and next to these an iron bridle, two iron buckles and four small bronze plates, all apparentness, probably, of a horse's harness.

Helpful Code

Do not forget that even as "to work love is to worship," so to be cheery is to worship also; and to be happy is the first step to being pious.—Robert Louis Stevenson.

WOMEN MOST CRUEL TO FELLOW WOMEN?

Feminine Writer's Arraignment of Gentler Sex.

That women are unjust to women is an ancient cry. But there has never been any different answer to the question. "Why?" Women are unjust to women because they don't trust them, and because they fear them, and they have always had single reason for that mistrust and fear, in a statement made by Jane Dou, in the Continental Edition of the London Mail.

Even the injustices to which women in the workaday world are subject from colleagues of their own set, the cattiness of forewomen and managresses, the refined bullying of certain hospital matrons and hotel housekeepers, the slave-driving mistresses who want the arts of the chef, the manners of a duchess, the grasphne of a field marshal, and the energy of a pack mule, all told in the same domestic for a few dollars a year; the backbiting, the jealousies, the enmity and the petty rivalries and utter unfaithfulness to be found flagrishing like ugly weeds in every layer of feminine society—all these pale into utter insignificance before the stupendous cruelty of women to women, where deeds and men are concerned.

Let us, first the naked facts and put sentimentality and all popular but lying fallacies aside; the inherent inferiority and gentleness of what is feebly the unfair sex on one side. Woman's greatest enemy after, she gets a husband is woman.

Men have been, and are, responsible for nearly all the wars that are, and for lots into the lives of single girls, but it is women in the main who ruin the happiness of wives. For every woman who tries to make a shining success of her married life, there are a dozen who do everything in their power to ruin it. Someone has come into it with deliverance and life. How can you still desire it?

"And no man could bind him; no, not with chains. . . neither could any man tame him." The apostle's statement, "Whit the law could not do, in that it was weak through the flesh," is here ringing in our ears. For the laws of God and the laws of the state are but chains binding man to restrain the outbreak of his evil nature. "For the carnal mind is not subject to the law of God, neither indeed can be," having neither the desire nor the power to respond to its holy claims. No, if man is to be tamed it is not by external force but by a supernatural change within, the miracle of new creation wrought by the Son of God.

And with the coming of the Lord Jesus into the scene, what a transformation! No more "dwelling among the tombs," but at the feet of Jesus, just a word from lips of grace and power. "Were no ten lepers cleansed? but the nine, where are they?" Here is one who has probably had most to do with the adaptation of the steam turbine engine to oceanographic purposes on a large scale, nearly 7 per cent, and the atmosphere about 60.8 per cent. Now, about 95 per cent of the surface rocks is igneous in character. The prevailing dark rocks solidified from a fused condition and are evidences that the interior of the earth when they came is in a molten condition. How deep down is this molten core? That's unknown of course, but volcanic activities in various parts suggest that it is not many miles deep and also that the rocky crust is not everywhere of the same thickness.

Entered at the Charlevoix, Mich., postoffice as second class matter.

Possibly I have no business trying to write editorial comment in praise of World War veterans, but am going to anyway. I am one of them and I believe that notwithstanding that fact, they should be praised for their mental attitude towards matters political. Politics are not discussed in the American Legion meetings and the officers of the Legion dare not be candidates or holders of elective or appointive public office, though the Legion did all it could towards advancing the non-partisan idea of "getting out the vote."

Coolidge vetoed the "bonus bill," following Harding's similar act. Then, you know, the bill passed over the Coolidge veto. Did the Legion boys hold spite, and work with hook and nail against Coolidge? They did not. But if they had there would have been a vastly different result in the election. An absolutely united ex-service man's influence and vote would total at least 15,000,000 in the United States. Think that over.

The ex-service men voted for whom they thought would be the best man. There was no turning away from Coolidge just on account of his veto. Many ex-service men still believe he made a mistake, but on the other hand that he made a good product, generally speaking, and that his veto was based on what he conscientiously believed, and a good millions of the "doughboys" voted for Cal as though nothing distasteful had happened. To me that is a very healthful sign for the future of the American Legion. It is too big and its ideals too noble to be swayed by prejudice and spitework. It will be heard from in the future even more than in its glorious past.—Brookville American.

Look Through Walls and Floors With New X-Ray

Schenectady.—X-ray machines by means of which one may look through solid walls and floors as easily as a surgeon or dentist now examines subcutaneous parts of his patient's body, have been perfected. The inventors are Dr. W. D. Coolidge and his associates in the research laboratory of the General Electric company here.

The new apparatus, confined in a box 7 by 8 by 10 inches and weighing only 50 pounds, is expected to prove of great value, especially to plumbers, building contractors, electricians and jewelers. To use the device it will only be necessary to connect an ordinary extension cord to the nearest lamp socket or base plug of the household lighting system.

Hereafter, the inventors say, the man who wishes to hang a picture on the wall and doesn't know where to find a solid place to drive a nail will not have to ruin the wall before finding the right spot. The new machine may also prove a nemesis to smugglers. By shooting the rays through various things the jewelers would easily be able to determine the genuineness of any jewel.

Has Many Motors

Des Moines, Iowa.—Iowa has added to its "corn and hog" fame, but rather in reverse English, with the announcement of the state automobile department that on an average 92 counties have more automobiles than families. The department based the statement on a communication from a magazine's story of the state.

The finest line of Toys and Holiday merchandise in northern Michigan, now on display at Fessenden's drug store.

PERU AND BOLIVIA PLAN CELEBRATION

Centenary of Overthrow of Spanish Rule.

Lima, Peru.—Peru and Bolivia are preparing for what promises to be the greatest celebration the two nations have had—the centenary of the battle of Ayacucho, the conflict which marked the overthrow of the Spanish yoke and the independence of Peru. For fifteen days, from December 9 until next Christmas day, the governments of both nations will stage the celebration in Ayacucho, the literal translation of which is the "Corner of Death."

Invitations have been acknowledged by almost every European and South American nation, and the United States is to be represented at the fete. The fact that the event is staged at the most desirable period of the winter season, many Americans have already engaged quarters at the leading hotels and will take part in the festivities.

President Leguia of Peru has had a staff of officials busy since early in the year, who, aided by the Bolivian officials, have arranged a program of events which will surpass anything attempted in either nation. While the principal features of the program will be staged in Ayacucho, Lima will also be in full dress for the occasion, as will be all the other towns throughout the republics.

Anniversary of Battle.

The opening of the celebration will take place December 9, the centenary of the Battle of Ayacucho, a battle compared by historians to the Battle of Yorktown. For, as the latter conflict marked the overthrow of the British and the beginning of America's independence, the fight in Ayacucho accomplished liberty for the Peruvians, a reproduction of the famous battle will be the opening gun of the celebration and Peruvian and Bolivian forces will be "combatants." After the smoke of "battle" has cleared away a gigantic statue to Marshal Sucre will be unveiled on the battlefield. In addition there will be opened in Ayacucho a memorial pantheon and museum.

The city will be transformed into a fair, and products of the region, including gold, silver, cobalt, copper, cocoa, sugar, cotton, tobacco, grain, alfalfa, pottery, cattle and other live stock will be displayed. Just outside the city overlooking the battlefield, an airdrome has been erected where flying stunts will be staged and the sports of the nations indulged in. Special quarters, too, are being erected for the housing of army and navy delegations from other lands.

"The Corner of Death."

The city of Ayachucho is derived from the Quechaua Indian word, meaning "the corner of death." Founded by Pizarro in 1539 as a military colony in the midst of a country filled with discontented and threatening Indians, the settlement helped to maintain communications between Cuzco and Lima. It was strongly fortified.

During the civil wars which broke out among the conquerors, Vare de Castro, the king's representative, fought young Almagro, the rebel, near Ayachucho, defeating and beheading the half caste son of Pizarro's original partner in the conquest. Later Gonzalo Pizarro, brother of the conqueror pursued and defeated L. Blasco Nunez, the emperor viceroy, in Ayacucho, and in 1547 Pedro de la Gasco, Spanish high commissioner, here defeated Gonzalo and then decapitated him.

In 1823, when the independence of Peru, which apparently had been won but two years before, seemed to be lost again, Ayacucho was the scene of a decisive battle against the forces of the Spanish crown. Before the battle Marshal Sucre declared: "On our work today depends the destiny of South America." Bolivar, the Washington of South America, had been called to the sea coast and Sucre's army had been harried and pursued three days by the army of the Viceroy La Serna.

At length the two armies were drawn up on opposing heights. Although the battle opened with reverses for the patriots, it ended in defeat of the royal troops. That same afternoon the surrender was signed and Spain gave up the continent after three hundred years dominion.

Shake Gold From Coins to Pay for China War

New York.—"How is the army, impoverished warlord of China able to pay his soldiers, when his exchequer is like that of most of the present military leaders, is dilapidated?"

This question is subject to all sorts of conjecture, but it is certain that "money shaking" is again resorted to with the same vigor that accompanied the Chinese struggles of the past.

Whenever a military leader plans a private war he converts most of his spare money into American gold pieces. This done, he hires squadrons of Chinese coolies, each of whom is given a leather bag containing from $100 to $200 in gold. The coolies for many hours keep up a continuous jingling of their bag-imprisoned coins.

The bombardment of one coin against the other causes many small particles of gold to be jarred loose. These particles gather until there is a sizable pile of yellow dust accumulates. This is carefully poured out and sold. The coins themselves, although slightly worn, are never questioned for their value in the native marts.

U. S. Passport Shop Does Record-Breaking Business

Washington.—The passport business has been a flourishing one for the State Sam this summer, if the unprecedented the claim of attaches of the division of passport control of the State department that there is the one unit of the department that more than pays for itself.

During the months of May, June and July, passport applications were raged between 1,200 and 1,400 a day.

The great majority of the passports are written in Washington, only a few emergency ones being issued in the field.

The abnormal rush this year was occasioned by certain conventions abroad, and the competition among steamship lines to secure the traffic by offering lower passenger rates.

All the countries of Europe, save Belgium, Switzerland and Holland, require visas for which a charge of $10 is made, and must be obtained by the visitor before entering the country. The Irish Free State has been the latest country to fall in line and asks the customary "ten spot" from solicitous tourists in the Emerald Isle.

Uncle Sam stamped charging a $10 fee for issuing passports in July, 1920. Although no passports or visa is officially required for Americans traveling to Europe, the "Washington of South America" has been completed to pay out of the state department's share.

Famous Fort in Apache Country Now Is School

Fort Apache, Ariz.—The ruins of the adobe and the rubble of the hoofs of cavalry horses at Fort Apache, Ariz., famous outpost of frontier days, have been supplanted by soft voices of children attending a government Indian school.

The fort, with its 67 stone buildings, has been transformed into an Indian educational institution and has been opened its fall and with an enrollment of 320 Navajo and Apache pupils. It is located on the Apache reservation where school facilities were badly needed.

The fort was attacked by Indians August 31, 1881. A captain and 11 soldiers died in repelling the assault. It has been headquarters of several famous Indian fighters including General Crook and Miles. Maj. Gen. Leonard Wood was stationed at Fort Apache as a military physician early in his career.

Eskimos of Alaska Are Expert Carvers in Ivory

Nome, Alaska.—Every year since Nome can remember the entire native village of King Island makes a pilgrimage to the city, arriving about July 4 and remaining most of the summer.

The natives, a clean, industrious and healthy lot, make the trip of approximately 100 miles in boats which they build from the hides of walrus. Seven of these boats carry the entire population, including all their possessions.

The King Islanders are clever carvers. Arriving in Nome with several tons of ivory, they spend the rough tusks into crib-boards, gavels, forks, knives, spoons, umbrella handles, hatpins and numerous other things. The merchants and people of Nome patronize them liberally, so that the ready supply collects thousands of dollars during the season, and these profits they put into merchandise for their purchasing supplies for the next winter.

These Eskimos have a number of athletic contests at Nome and often develop athletics of ability. At other times they provide entertainments with their orchestra.

Old Tree Bears

Carthage, Mo.—At the home of Mrs. S. H. King in this city is an apple tree that has borne fruit for 64 years. It was planted in 1860 by G. M. Robinson, who owned the property at that time. A few years ago a part of the tree withered and died and that part was cut off. The remaining part of the tree is 40 inches around. The apple is known as the summer rambling.

Building Laying Houses

Laying houses should be finished as early as possible, as they are some what dough when first completed. It is safer to keep the pullets out until dry sunny days have taken out a lot of the moisture. When houses are built late in the fall it is difficult to do a good job if the timber is constantly being soaked by fall rains. If you build with wet lumber many cracks are apt to appear when the hot sun begins to dry the boards.

Clean Houses Essential

Clean poultry houses are essential if the comfort of the fowls and their laying capacity are to be maintained. Now is a good time to clean up. Remove all manure, then scrape the walls and floor clean with a hoe or spade. Finally give the entire interior a coat of whitewash.

NEW PALACE THEATRE
Attractions for Coming Week

FRIDAY, SATURDAY AND SUNDAY

James Cruze's Paramount Super-Special production—"THE COVERED WAGON" beautiful, romantic and soul-stirring. Here's your greatest screen adventure. Over the thrill-swept trail of 49 with the Western Pioneers, sharing their perils, living their romance. The picture the whole country is talking about—a vast thrilling spectacle. You'll see hundreds of men, women, children, horses and oxen. A two mile wagon train fleeing for their lives from a raging prairie fire. A thousand real yelling, painted Indians riding madly to attack in their famous "Circle of Death" formation. A Buffalo hunt with the world's only remaining herd of Buffalo. You'll see the great wagon train ford a turbulant mile-wide torrent. You'll see the whole spectacular heart-drama of the perilous, glorious days of '49, in the most amazing settings ever photographed, with Lois Wilson, J. Warren Kerrigan and all star cast. For the benefit of those who can not attend the evening shows we will show this picture Saturday afternoon, starting at 2:30. Admission prices, children 25c; adults 50c.

TUESDAY Wm. Fox presents John Gilbert in "The Love Chance." A mystery drama of love and politics, packed with action and thrills. A romance of the breadline and the boulevards. Also another one of the famous Go-Getters "Fire When Ready."

WEDNESDAY Second number of Lecture Course—Roy E. Bendell, popular dramatic reader.

—) PERSONALS (—

Mrs. Margaret Cook went to Detroit for the winter, Saturday.

Golden Rule Sunday is Dec. 7th. Remember the date.

Gerald Richardson was home from Ann Arbor for Thanksgiving.

Rev. H. R. E. Quant and wife returned Monday from Lansing, where they spent a week.

Mr. and Mrs. Franklin C. Sears drove to Boyne last Wednesday to spend Thanksgiving with relatives.

Mr., and Mrs. Joseph Left; of St. James, were in the city Thanksgiving Day and returned to the island.

Mr. Ayers Boal, for ten days a business visitor in this city, returned to his home Winnetka, Ill., last Sunday.

Capt. and Mrs. James Sanford had as Thanksgiving guests, Mrs. John Nugent and son Coleman, of Muskegon.

Capt. M. J. Bonner returned Monday from Sault Ste Marie, where he went as master of the Str. Bruce which left here last Friday for Duluth.

The Western Union is under the management of H. T. Cory, of Ossawy, for a few weeks, during the absence of the manager, Miss O. M. Allen.

Ira A. Adams returned Monday from the Lake Gogebic country, where he has been a three weeks' hunting trip, bringing home a fine buck.

A. E. Wilbur, of Chicago, came up to spend Thanksgiving with his parents and on his return Saturday, was accompanied by his mother, Mrs. O. E. Wilbur.

Frank B. O'Donnell for some time past a visitor at Rogers City, spent Tuesday evening with friends here returning to his home, St. James, the following day.

A card from Amos Webster says that he and his family are at Sarasota, Fla., enjoying the fine climate and fishing, but incidentally mentions that he would like a drink—of Charlevoix water.

Leland Cram and family, of Flint, arrived Wednesday night and spent Thanksgiving Day with their parents, returning Sunday morning. They were accompanied by Harold Jacobs and wife, who visited relatives here.

The finest line of Toys and Holiday merchandise in northern Michigan, now on display at Fessenden's drug store.

Mr. and Mrs. W. H. Jenkins, of Harbor Springs, are spending the winter with their daughter, Mrs. R. O. Cram.

Russell Blakeslee drove in from Ypsilanti Sunday in spite of the heavy snow fall, which preceded him by a few hours.

Mr. and Mrs. Eugene DeVincent of Rogers City, were visitors at the home of Mr. and Mrs. Albon Smith Tuesday and Wednesday.

Ernest Nordstrum, who supplied at the Western Union during Miss Allen's vacation, with Mrs. Nordstrum and son went to Cadillac Saturday.

The Charlevoix County Bank has entered upon a unique idea in the way of advertising, and the trite and timely rhymes of their muse are attractive and interesting, appearing each week in their advertising space.

Miss O. M. Allen, local manager of the Western Union telegraph office, returned last week from her vacation at Grand Rapids, and left Monday for Valparaiso, Ind., where she will attend the Western Union School of Instruction for several weeks, returning about holiday time.

Telephone-equipped barber chairs are the latest innovation in Atlanta, Ga. The Biltmore barber shop in that city has equipped each of its chairs with individual telephones for the use of patrons while the barber clips and scrapes away. There are twelve chairs in the shop with telephone connections from each to a miniature switchboard operated by the cashier.

Mrs. Cora Tomeraasen, Mrs. Sarah Emrey and Miss Isabelle Mitchell drove to southern Michigan last week—the former to Northville, and the two latter to Detroit. Miss Mitchell returned Sunday; Mrs. Emrey is visiting her daughter, and Mrs. Tomeraasen returned Sunday evening, accompanied by Mrs. R. W. Faulkner, who has been in Detroit for a month.

A card from Amos Webster says that he and his family are at Sarasota, Fla., enjoying the fine climate and fishing, but incidentally mentions that he would like a drink—of Charlevoix water.

Leland Cram and family, of Flint, arrived Wednesday night and spent Thanksgiving Day with their parents, returning Sunday morning. They were accompanied by Harold Jacobs and wife, who visited relatives here.

The finest line of Toys and Holiday merchandise in northern Michigan, now on display at Fessenden's drug store.

Captain C. T. Christiansen with a crew of seven, made this port last Monday with the C. G. 141, which they were taking to New York where it will join the fleet of rum chasers along the Atlantic coast. The ship is 75 feet long, 14 ft breadth, carries a standard rapid fire four pounder gun mounted forward capable of covering a wide range with a high degree of accuracy at long distance where necessity demands such action. Two Sterling gas engines, each of 200 horse power, that can be used as a unit or independently, furnishes the motive power for the ship, which is still in port, hauled out at Brady's dock for minor repairs, before going on.

WANTED—Horses at Sears' Fox Ranch or phone 306 Charlevoix.

WANT COLUMN

FOR SALE—House and lot, 403 Petoskey avenue. For particulars see L. S. Ranney. tf.

FOR SALE—Six room house and lot 113x52 at 208 E. Lincoln St. Inquire of E. E. Allen. Phone 186. 34-tf

WANTED—You to call phone 224 and get your sewing machine made like new by Elmer Keel, at the Star Restaurant, for about two weeks. I'll use you right.

FOR SALE—New cruiser fully equipped and ready for service. Power by two Marine Gas engine. Toilet with folding basin in lavatory. A Staunch ship at moderate price. For particulars call at Sentinel Office

Hens Will Lay The Year Around

Give a hen the right materials and she will turn out plenty of eggs and do it in fall and winter. Thousands are getting full egg baskets, keeping their hens on full time schedules the year around, making real profits, by feeding correctly. They are feeding the world's best known, highest quality egg making feed.

Blatchford's Calf Meal
"Fill the Basket"
Egg Mash

Why experiment? The Blatchford factory has done that for you. They have been making commercial feeds for over 125 years. Their Egg Mash is a guaranteed feed. Contains 17 ingredients—25 per cent of them milk and meat products. That's why it makes hens lay.

Ask us to name some others who have tried it with gratifying results. We stake our reputation on it. Take home a trial bag and watch results.

ARGO MILLING COM'Y.

YELLOW FEVER WIPED OUT IN SOUTHERN COUNTRIES

Latest Troublesome Epidemic Reported in Brazil, but Is Quickly Checked.

Washington.—Yellow fever was eradicated from Guayaquil in 1940 and from Peru in 1921. No cases have appeared in Nicaragua or Guatemala since 1921. A few cases were reported from British Honduras in 1921, but the epidemic was rapidly and easily controlled. In Mexico control operations were formally closed in November, 1923. No cases have been reported there since December, 1922, and the health authorities of the republic have announced that the disease has been stamped out. The disease has now been eliminated from the west coast of South America and from Mexico. On the southern continent there are but two known foci—one in Colombia, the other in northern Brazil—and active work is in progress in both, writes a bulletin of the Rockefeller foundation.

Early in 1923 several hundred cases were reported at Bucaramanga, the capital of the state of Santander in Colombia. On invitation from the Colombian government experts were sent, but by the time the diagnosis of yellow fever was confirmed and control measures were instituted. The Stegomyia fasciata was rapidly reduced and new cases ceased to appear; none has been reported since May, 1923. There is every reason to believe that the disease is under control. The survey of adjoining regions has been carefully and completely carried out and no new foci have been discovered.

A serious epidemic occurred in Ceara, Brazil, from 1921 to 1923, beginning with foreigners and localizing. Occasional cases have been reported from Fortaleza, the capital of the state of Pernambuco. In Bahia the disease has been epidemic, and during 1923 a total of 127 cases were reported, with 39 deaths.

A feature of the Brazilian campaign has been the presence of a large mosquito during part of the year. He realized on further research in the etiology of the fever, demonstrated the presence of Leptospira icteroides in Brazilian cases and showed again the value of the Pfeiffer reaction in diagnosis.

Citizens Donate Tract to Lafayette National Park

Washington.—A donation of approximately 130 acres on Mount Desert Island, Maine, for inclusion in the Lafayette National park was accepted by the Hancock county trustees of public reservations, Charles W. Eliot, president, will be accepted. It was announced by the Department of the Interior. The entire area of this national park, at present the only one east of the Mississippi river, has been a gift to the nation by public-spirited citizens.

Examination of the abstract and deed covering the conveyance of the lands to the United States revealed the fact that they were once a part of the Province of Acadia, and that by cession of title, a very extended one, had its origin in a grant by Louis XIV, king of France, in 1688, and in part in a concession made in 1702 by the General court of the province of Massachusetts.

Lafayette National park first became a public reservation in 1916 when over five thousand acres on Mount Desert Island were accepted by President Wilson as the Sieur de Monts National monument. In 1919 by act of congress the area was given national park status and named the Lafayette National park. The present donation is the fourth that has been made and received since the establishment of the park. The park area includes a group of granite mountains, among the oldest in the world, with magnificent forests, and includes the highest prominence along the Atlantic coast.

"Garden of Eden" Gives Up Bones of New Species

Ures, Mongolia.—Prof. Peter Kozloff, Russian explorer, has discovered near here an enormous number of skeletons of hitherto unknown animals and many human remains which lead him to believe that Mongolia may have been the birthplace of man and the point of origin of a considerable part of the animal and reptile world.

Among the fossils already unearthed by Prof. Kozloff and his assistants are those of 25 quadrupeds of undesignated species; 35 birds of varying sizes; 100 reptiles, snakes and fishes, and more than 1,000 insects of giant size.

It will be recalled that Professor Kozloff last June discovered several remarkable tombs near here belonging to the Chinese emperors and princes who ruled Mongolia at a time antedating the pharaoh Tut-Ankh-Amen of Egypt. It will also be remembered that Prof. Roy Chapman Andrews of the American Museum of Natural History, New York city, startled the scientific world last year by discovering nests of dinosaur eggs.

Geese Should Have Range

Geese require fresh air in plenty, and will not bear confinement in tight houses. A good place for them is a pen under an open shed from which they can run into the barnyard or fenced-in pasture during the day when they cannot be given free range. Geese continue to bring out an unusual brood of goslings until quite aged. An instance is known where a pair of geese produced every year for twenty years. Geese seem to be quite free from diseases, death resulting from old age, accident, or the hand of the owner.

GRACE BEFORE MEAT.

By Henry VanDyke.
(Inspired by Golden Rule Sunday)

Thanks be unto Thee, O Giver of our Daily Bread
For this communion of the Golden Rule.
May this plain food strengthen our bodies;
And the loving cup of kindness refresh our souls.
Bless the great multitude of homeless children
Thy little ones far away in the Near East,
Whom we greet in spirit at our table today
Orphaned, may we find in thee a father,
Helpless, may they feed in us good helpers.
In their hunger we would feed them.
In their nakedness we would clothe them.
In the prison of man's cruelty we would visit them.
Grant, O Father most merciful and loving,
That our hearts may hear the benediction
Of our Lord and Savior Jesus Christ:
In as much as ye have done it with the least of these,
Ye have done it unto Me.
—Amen.

CHURCHES

Methodist Church.

Harry R. E. Quant, Pastor.

10:30 worship. Pastor's theme is "Do We Need Religion?" Text, "How long halt ye between two opinions." This is an important question today and ought to demand the attention of a large audience.

12 Sunday School. The lesson on the confession of a man whom Jesus healed will merit study. Golden Text, "Whereas I was blind now I see."

3:00 p.m. Junior league. Why not have the boys and girls in a religious service at this hour?

6:00 p.m. Epworth League. What splendid questions being considered in these meetings. The league is making substantial growth and is among the young folk of our church.

7:00 p.m. Worship. The pastor's subject is "The Value of Redemption." This is a service for training of witnessing for Christ, song, prayer, bible truths and general fellowship.

Prayer meeting every Thursday at 7:30 p.m. Studies in the Acts of the Apostles. Your spiritual needs hunger for this mid-week service of prayer.

This Friday the Women's Missionary Society meets for their annual birthday party at the church. Supper at 6:30 p.m. Good program.

The Boyne City-Charlevoix-Petoskey-East Jordan basketball team of last Friday night was a huge success. Boyne City Leaguers were the first. Several cars of young people from here constituted our delegation. Each League was asked to do some stunt. Ours put on a Kiddie Kart race and won the prize.

The local Ladies Aid society will meet at the parsonage next Tuesday, Dec. 9, at 2:30 p.m. This involves all the divisions. Letters D E F G I and J have charge of the gathering. According to the system we are working under every lady of the church is a member of the L. A. S. Come and take note of the plans for future months.

Barnard L. A. S. will meet here at the parsonage next Wednesday for dinner at noon. Former residents are cordially invited.

Congregational Church

Clarence W. Long, Minister.

10:30 a.m. Sunday, Call to Worship, special music and sermon by the pastor.

12:00 m. Church School, A. F. Bridge, superintendent.

The Senior Bible Class with Judge Correll as teacher, will reconvene Sunday. Let every former member and all others that will join be present for the opening session.

Y.P.S.C.E. at 6:00 p.m. All young people are invited.

7:00 p.m. Sunday, Call to Worship, song service with sermon by pastor.

This Sunday, Golden Rule Sunday, just try living as the refugees of the Near East have to live, even for one meal, and you will be ready to give for their relief.

The Ladies Aid society meets with Mrs. George Swinton this week Wednesday, 2:30 p.m.

There are four more Sundays during the pastorate of Mr. Long. All friends are cordially invited to join these closing services.

SINNERS IN HEAVEN

BY CLIVE ARDEN

COPYRIGHT BY THE BOBBS-MERRILL COMPANY

"OH, HUGHIE!"

SYNOPSIS—Living in the small English village of Darbury, old-fashioned and self-centered, are Barbara Brockley, daughter, and widowed mother, in love to celebrate her marriage to Hugh Rochdale, rich and well connected. Barbara is adventurous, and has planned, with an aunt, an airplane trip to Australia. Major Alan Croft, famous as an aviator, is to be the pilot. At her first meeting with Croft Barbara is attracted by his manner and conversation, different from the rail-and-tired convictions of her small town. They set out, Barbara, her aunt, Croft, and a mechanician. Word is a few days comes to Darbury that the plane is missing and its occupants believed lost. Hugh, Barbara, after the wreck of the machine, is found unharmed on a practically uninhabited island in the South ocean. The other four members of the party had perished.

PART TWO—Continued. .

"Let me do that. Shall I?" she asked.

"Don't you mind blood?"

"Of course not!" she answered indignantly.

He handed her the blood-stained wet handkerchief without a word, inclining his head toward her in a few minutes he rose to his feet, all traces of blood washed away, his head bandaged adroitly with her own handkerchief twisted to bits.

"I'm going up that hill, to view the land," he said, with abrupt decision, proceeding toward it as if oblivious of her presence.

"I'm coming too!" she exclaimed, hastening after him. "I'm not going to be left alone down here! There may be alligators and things!"

He gave an impatient smile. "Come along, then; I'll help you up."

"Oh, no, thanks! I can manage quite well," she replied rather coldly, spotted by his tone and manner.

He said no more, but began to climb the rugged rock-strewn hillside with the agility of a mountain goat.

Barbara struggled after him, slipping, bruising herself, gasping for breath. The shock had left her numb and unnerved. She sank upon the ground, drawing hard sobbing breaths. Croft, without a backward glance, was disappearing among the larger boulders at the summit. Fearful of being left, she rose again and scrambled on. Her aching head throbbed within her; sudden dizziness caused everything to swim around her.

Stumbling over a half-covered rock, she fell prone upon the ground. . . . There she lay, conscious of a terrible silence. No other sentient being seemed to move within a world so full of awful loneliness that it appalled her; it was almost tangible, a present wave of fear, grief, loss, homesickness, wild—almost childish—longing for Hugh, swept her away. For the first time since the horror began, she found relief in tears. Presently she sobbed weakly. . . .

From the top of the hill Croft resumed what was visible of the land along the north, east and west coasts. This was, he concluded, an island of volcanic origin, with the exceptionally high reef more or less completing it, sometimes at a considerable distance from, and sometimes fairly near, the shore. He surveyed the view critically, a purpose forming in his mind.

The gradient inland culminated in a short, fairly steep rise to a grove of cocoa palms, near which a clearing was visible, covered with little groups of something—possibly cavos or rocks. Nearer to the shore there appear to be sign of human life.

It would be easy, he saw, to reach those possible caves by following the neck of high ground running inland from the top of his hill. Turning sideward, he shaded his eyes with his hands and scanned the horizon.

Not a suggestion of life was visible. No smoke, no mast, no sail.

He swept the small island with an utter keen critical glance. From his knowledge of the South Pacific—in which ocean, somewhere, this island must lie—he guessed it to be of little or no use for trade either in copra or other exports, in spite of its patches of luxuriant verdure. Therefore, probably, it was never visited by the outside world! Unless there were habitations in the south, it was consolingly uninhabited—possibly unknown.

For some moments he stood motionless, facing these probabilities. Then, with a grim face, he turned in search of his companion.

Barbara, her head buried in her arms, did not hear his approach. It was with a start of surprise that she found herself suddenly lifted bodily, as if she were but a featherweight. Feeling again very small and ashamed, she would have struggled free, but his grip tightened.

"Keep still! It's a rough climb." He spoke abruptly, ever his way in moments of stress. The tears of weakness rose again in her eyes. She closed them, but too late to hide what she felt he would despise. She turned her face away into his wet shoulder; and he strode along in silence.

Stray rocks lay about the ridge; small shrubs, interspersed with ferns and club mosses, made progress difficult; but he never paused until they were among the tall trees of the palm grove. Then he set the girl upon her feet.

"Where are we going?" she asked.

"Listen!" he commanded, without answering her question.

From more at hand came the noise of rushing water. He turned farther inland, amid tall avenues of bamboo toward the sound, Barbara closely following. Presently a pleased exclamation escaped his lips, and he halted.

From the high ground the river tumbled down, a sheer waterfall of dancing crystals splashing from great boulders high up among the forest trees to smaller ones on the lower level; thence hurrying and gurgling over little rocks, which encircled small pools of translucent green, into a clear, softly flowing stream some six feet deep. This after a time spread out and grew shallow, finally disappearing between rustling walls of bamboo canes toward the cove where it joined the lagoon. From the nature of this deeper stretch, of water and the comparative clearing of undergrowth on the banks, Croft judged it to be partly the work of man's hand, not entirely the result of nature. But he forebore to suggest this to the girl.

Croft led the way back to the grove, then on to the clearing beyond.

Suddenly Barbara stood still, with a little cry.

"What's that?"

He stopped, looking aside in the direction indicated. Stooping swiftly, he lifted a queer bleached object and examined it closely. She drew near, glancing fearfully at the hideous thing.

"It's a skull! Isn't it?"

"Yes," he replied, "and—of the negro type!"

She looked up, startled. Until then it had not occurred to her to wonder concerning the island. The past with its tragedy had expunged all else from her mind.

He continued to examine the skull, with puzzled brows.

"There are some curious holes which I cannot understand," he said. "They might have been caused by bullets. But it is doubtful if natives would possess bullets here."

"You think there are any here now—any natives?" . . .

He met the eyes raised in trepidation to his own. "I can't tell, yet. Not they are literally enough to white people." Throwing away the skull, he went on toward the open space.

The apparent caves proved to be moss-covered ruins of bamboo huts. Many had fallen into rough heaps upon the ground; of others, bits of all on

"Let Me Do That; Shall I?"

mained standing, guarding like sentinels the broken portions resting wearily against their base. Lying about, half-hidden in undergrowth, were oddly shaped household utensils made of wood or rough kind of pottery; also large shells, rude cups fashioned from coconut shell, broken spears.

The scene was desolate, giving the impression of Death, of the relentless hand of Time sweeping away to extinction what once had seemed strong and full of life.

"It's quite possible," he said, "that the whole colony which lived here has died out. Populations dwindle very much in the Pacific islands."

She gave a little shudder.

"It's horrible here—I don't know why! Let's go down to the shore. There seems to be a hut standing down . . . ere." She pointed toward a small, sheltered structure half-way down the lower slope, sheltered beneath the hill which they had climbed. Croft inclined in its direction.

It consisted of one small room. The bamboo walls were intact, but the thatch forming the roof showed large rents; on the ground within, sand, musty, dead leaves, were scattered utensils similar to those which they had already seen.

Croft glanced round critically, then at the girl, who had followed him, then out through the opening seaward.

"We can make this sufficiently habitable to carry on with," he observed.

His words went out into silence. They brought instantly a vivid realization of the immediate present to her mind, followed quickly by thoughts of the future. A new fear shot up, clutching her heart with a horrible, clammy hand. Barbara with sudden dread at her companion's profile; and something about his stern lips seemed to confirm the awful foreboding. The faint color revived in her cheeks by exercise ebbed away, leaving her white. She clenched her teeth and her hands; then, with an effort, put her dread to the test.

"We—shall soon be rescued? Ships are certain to—call here? It will only mean a few hours—or days?"

The moment which Croft had dreaded, yet knew to be inevitable, was at hand; and he felt the utter hopelessness of his task in dealing with delicate questions.

From his prolonged silence Barbara guessed the truth of his convictions; words were unnecessary. She clasped her hands in despair, and sank a little moaning cry like some dumb animal receiving its death-wound.

Croft looked down upon her, looked on at the quivering, girlish form meeting the frightened eyes turned to him, crying in his puzzlement and resource. And all at once he realized that, in this ghastly moment, he no longer felt lay in his hands. He leaned forward and took her clasped hands in both of his.

"Don't give up hope," he said earnestly. "It's very doubtful, I can tell you; but they may pass this way. We will do all we can."

She clung to his hands, breathing hard, seeming to find the old magnetism of his personality in these new, comforting manual as well as physical support from him at once. Her eyes fixed upon his, as if searching for help. . . .

Suddenly, like a pinchy ray of sunshine, a thought flitted into coral islands. "The tide's low enough now for, we to wade to that one nearest the cave. From that you'd get a short distance, if swimming is necessary."

"I will wade with you—"

"The devil you won't!" He suddenly wheeled round upon her. "Look here! You're never to go in the lagoon! Bathe in the river, but don't ever go in the lagoon. Swear to me!"

She gazed at him in stupefied amazement and anger.

"Why not? If—if you go in—"

"I—er—I understand these waters. There are dangers. You promise me?"

"Oh!" she interrupted impatiently. "I don't want to bathe—ever—any more! I'll do as you say—further. I was thinking of—"

"In this blazing sun? No. Indeed, you must lie down in the hut and sleep."

Vainly she remonstrated, fearing a relapse in him. Never before had he spoken she had experienced upon the hillside. "Wireless!" Radiant relief overspread her face. "Why—then—we can soon get rescued after all! I forgot about that!"

"You mustn't rely too much on it. It will be only the short range set. The long range used on board ob-

"Now, Stay Here Until I Return."

tained its electrical energy from a generator run from one of the engines, and is therefore useless now."

Her eagerness for this new hope to be tested was still mollified by fears concerning the reality of his venture. He pointed out the shallowness of the water between the outside coral islands. "The tide's low enough now for, we to wade to that one nearest the cave. From that you'd get a short distance, if swimming is necessary."

"I will wade with you—"

"The devil you won't!" He suddenly wheeled round upon her. "Look here! You're never to go in the lagoon! Bathe in the river, but don't ever go in the lagoon. Swear to me!"

She gazed at him in stupefied amazement and anger.

"Why not? If—if you go in—"

Dried Rice Is Fatal to One Household Pest

Whence do all the beetles, ants and flies come that swarm about the house, and particularly in the kitchen and larder? And what is the best way to get rid of them? These two questions are always very much in the minds of householders.

The first is not easy to answer. The intrusiveness of beetles and cockroaches is something uncanny. They are found down deep mines, and they appear in new ships the moment steam is raised. Wherever there is a moist heat there they come quickly.

The entry of ants into a house is often traceable to some opening near the ground, such as a ventilator. Moths come in through the open windows after the lamps are lighted. Windows closed or guarded by mosquito nettings after lighting up time should keep them out.

She sat in, of course. Intelligent. But ground rice, it is said, finds its weakness. Sprinkle the rice in the track, and he will eat of it greedily. Then he swells within him and kills him. But the rice must not be thrown down on a wet floor or it will swell before he eats it, and he will come to no harm.

Negative Beauty

Perhaps the most to be aimed at in domestic architecture is negative beauty, a condition of things which invites or suggests beauty to those who are capable of the sentiment, because a house, truly viewed, is but a setting, a background, and is not to be pushed to the front and made much of for its own sake. It is for shelter, for comfort, for health and hospitality, to eat and sleep in, to be born in and to die in, and it is to accord in appearance with homely everyday usages, and with natural, universal objects and scenes.—John Burroughs.

The man intends to live. The girl is hysterical. Is he strong enough for both?

(TO BE CONTINUED.)

Unpoetic Envy

He—Do you know, I envy the birds, they—So do I. They're so gay and free, can fly here and there, and—

He—And have only one bill the year round.

Not Impossible That This Is "Noah's Ark"

The recent announcement by a group of scientists that the site of the Garden of Eden had been fixed by the sovereign state of Nevada was soon followed by the report that "what might have been" Noah's ark has been likewise discovered. Its location is about 60 miles south of Winnemucca, near Mount Tobin.

Whatever this relic originally was, descriptions have invested it with a fascination which will lead to many pilgrimages during the coming season of vacations. It is apparently a magnificent specimen of petrifaction, consisting of a raft-shaped mass of timbers, which have hardened through countless ages into stone. There is no question that it is the handiwork of man, for in certain places where the structure is more fully exposed the cross timbers and the withes, or bands, are clearly revealed.

Just why it should be Noah's ark instead of somebody else's, has not yet been stated. The curious legend, coming to us from the Indians, that the North American continent was populated by an emigration from lands "beyond the western wave," has permitted to the present day. Upon it many have tried to solve the riddle of the fate of the lost tribes of Israel. While the historian should be cautious about allowing any such connection, it is now admitted that a strong resemblance would have been by no means impossible. The unusual custom which the diaries of early voyagers have set down for us of the worship by certain Indians of empty leaves whose power they could not explain beyond the fact that their ancestors had been wont to do reverence in the same way, had led some to trace a connection between this crude worship and the original Ark of the Covenant.

So all-baffling are the mysteries on the subject there is no end. But there can be no doubt of the reality of the Greek myths discovered by the early Indian mounds. How they covered the distance from Asia to Europe is a final resting place no man can yet say.

Build Impregnable Vault

The Bank of France has constructed a safety deposit vault which they believe to be absolutely impregnable to raids from land or air. It is, surrounded by a deep moat and has a bomb-proof roof. Heavy steel doors and concrete several feet in thickness, form the top, while in suspension on explosives that might be dropped from streets. Over the moat, containing 12 feet of water, a sliding floor forms an adjacent building provides access to the underground passage of the vault. When the bridge is withdrawn, a steel door closes flush with the walls, barring the opening to the deposit boxes as the portcullis protects the entrance to old castles. A clever officer's chair, suspended above the moat from an overhead track, provides a means of flight for the guard if he attacks from robbers or bombers. The vault has been designed by an American architect, and has proved so successful that it is to be used in the construction of other vaults.

Stevenson No "Daffy"

"It is well known that Robert Louis had strange tastes in dress, but according to Mr. L. L. it were better said that he had no taste at all; his dress was an accident, or, more correctly, a series of accidents. As he was consumptive, the doctors had told him—I fell to see why—that it was advisable to let his hair grow long, to the remainder of his appearance he never gave a thought. One day he was to be seen walking down Princes street in a strange colored mackintosh, and a very small straw hat with a pink ribbon, and at his heels a little crowd of jeering urchins, whose surprise was indeed great when a number of well-dressed men, having caught sight of him from the window, rushed down the steps of the Saville club and welcomed him with astonishing effusion.—By Cyril Scott.

Bass Missed Its Meal

Polk Walker, a farmer near Mountain Home, Ark., tells a new Izaak Walton story that on second thought is not so hard to believe. It is of a bass which tried to swallow an eel, but failed because the eel was too slippery. The eel's tail passed through the bass' mouth, slipping out the left gill while its head slipped into the right gill and out.

Royal Child Bride

The smallest wedding ring known was that made for Mary, oldest daughter of Henry VIII, when, at the age of two years, she was married to the dauphin of France, son of Francis I. The wee bridegroom was only eight months old. Cardinal Wolsey handed the ring and said mass at that marriage of state.—Kansas City Times.

Perfect Continuity

A continuum is a total that is continuous and integrated; that which has perfect continuity, as the continuum of space. A universal continuum appears in space where progression is uninterrupted in all directions. Time is a one dimensional continuum capable of geometrical representation by a line.

Uncle Eben

"When a man has made de same talk exactly de same way for seben times," said Uncle Eben, "I can't make up my mind whether to call it a speech or a vocal selection."—Washington Star.

Even Youngsters Know

The mother took her six-year-old boy to the movie and after the picture was seated a man appeared on the screen and began to sing, a song taken from his pocket, read it and scowled.

"I guess it's his income tax, mother," the youngster said.

To Church by Bus

A southern Ohio rural church is bringing its congregation to Sunday services by bus—and we is assured of a good attendance. Every car owner of the small congregation calls for those who have no cars.

FROM PERSONAL EXPERIENCE

Mrs. Bradford Recommends Lydia E. Pinkham's Vegetable Compound

Phoebus, Virginia.—"Having the opportunity I just cannot refrain from saying a word of praise for the Lydia E. Pinkham's Remedies. I have used them as an occasion required for twenty years, and my three sisters have also used them, and always with the most gratifying results. During the Change of Life I had the usual distressing symptoms—hot flashes, insomnia, etc.,—and I am pleased to testify to the wonderful results I obtained from the Vegetable Compound. I heartily recommend it to any woman and I will be pleased to answer any inquiries that might be sent to me through the publication of my testimonial."—Mrs. Ida B. Bradford, 109 Armstead Street, Phoebus, Virginia.

Consider carefully Mrs. Bradford's letter. Her experience ought to help you. She mentions the trials of middle age and the wonderful results she obtained from Lydia E. Pinkham's Vegetable Compound.

If you are suffering from nervous troubles, irritability, or if other annoying symptoms cause you to be blue at times, you should give the Vegetable Compound a fair trial. For sale by druggists everywhere.

SPOHN'S DISTEMPER COMPOUND

A safe, dependable and effective remedy for Coughs, Colds, Distemper, Influenza, Heaves and Worms among horses and mules. Also beneficial as a tonic for colts as it is for stallions, mares or geldings. "Spohn's" occasionally as a preventive. Sold at all drug stores.

For Croup—What Would You Do?

Here is a physician's prescription used in millions of homes for 35 years which relieves croup without vomiting in 15 minutes. Also for bronchial coughs, tonsilitis, hoarseness, whooping cough and other throat troubles. Dr. Tucker's Croup Cure. 60 cents the bottle.—Adv.

A third party may be all right in politics, but it comes to courtship that is different.

Few graduates from the school of experience ever live usefully return for a post-graduate course.

I have Resinol ready for scalds and burns

The tormenting, insistent pain of a burn or scald is quickly subdued by Resinol Ointment. Its cooling ingredients remove the inflammation, and hasten the healing. Cover the burn well with Resinol and bandage with soft gauze. In severe burns or scalds covering a large surface always se for a doctor.

Resinol products at all druggists.

FOR OVER 200 YEARS

haarlem oil has been a world-wide remedy for kidney, liver and bladder disorders, rheumatism, lumbago and uric acid conditions.

GOLD MEDAL HAARLEM OIL CAPSULES

correct internal troubles, stimulate vital organs. Three sizes. All druggists. Insist on the original genuine GOLD MEDAL.

BABIES LOVE MRS. WINSLOW'S SYRUP

The infants' and Children's Regulator Pleasant to give—pleasant to take. Unsurpassed purely vegetable preparation. It quickly overcomes colic, diarrhoea, flatulency and other like disorders. For ages, infants to adults. Sold at all druggists.

MOLASSES

Grains and hays are high. Molasses adds value to cheap roughage and other feeds. Produces milk, beef or pork at less cost. Keeps stock healthy. Sold in barrels, or less or less. Write for prices and booklet. Agents and dealers wanted.

Propaganda

The noun propaganda and the verb propagate are derived from the same Latin root and are related in meaning. They are derived from the Latin verb propagare, meaning, first, to spread, and, second, to extend the tenets or principles of a religion, philosophic, economic or political doctrine. The one who propagates such doctrines is particularly with zeal, is called a propagandist.

If You Need a Medicine You Should Have the Best—Dr. Kilmer's Swamp-Root

Have you ever stopped to reason why it is that so many products that are extensively advertised all at once drop out of sight and are soon forgotten? The reason is plain—the article, did not fulfill the promises of the manufacturer. This applies more particularly to a medicine. A medicinal preparation that has real curative value almost sells itself, as like an endless chain system the remedy is recommended by those who have been benefited to those who are in need of it.

A prominent druggist says, "Take for example Dr. Kilmer's Swamp-Root, a preparation I have sold for many years and never hesitate to recommend, for in almost every case it shows excellent results, as many of my customers testify. No other kidney remedy has so large a sale."

According to sworn statements and verified testimony of thousands who have used the preparation, the success of Dr. Kilmer's Swamp-Root is due to the fact, so many people claim, that it fulfills almost every wish in overcoming kidney, liver and bladder ailments, correcting urinary troubles and neutralizes the uric acid which causes rheumatism.

You may receive a sample bottle of Swamp-Root by parcel post. Address Dr. Kilmer & Co., Binghamton, N.-Y., and enclose ten cents; also mention this paper. Large and medium size bottles for sale at all drug stores.—Advertisement.

Frank Criticism

She was in a hurry to keep an engagement and hastened out of the house a few steps ahead of her husband. Footsteps sounded behind her, and, thinking Jim was approaching, she turned abruptly, grasped a manly coat sleeve and looked—disappointed.

He Took the Hint

Some hints are entirely too literal. For instance, the fellow who, on leaving a note room, read a card on the door—"Stop! Have you left anything?" And then went back and took the soap and towel.—Judge.

Don't think that you can overlook on your account with nature and get away with it.

Yeast Foam The favorite of good bread makers

Is your dough always light and sweet?

Be sure of a well raised dough by using a cake of Yeast Foam each time you bake.

Northwestern Yeast Co. 1730 North Ashland Ave. Chicago, Ill.

Revenge Is Sweet

McIntosh made a fine art of meanness. When traveling he would keep his family attending to him, and he kept Missouri, Iowa, Nebraska, Kansas, Oklahoma and Arkansas.

Grow in Waste Places.

It is not recommended to grow the black walnut as a major farm crop on extensive areas of good land, because it cannot compete in profits with other crops. But it is urged to plant this tree in those neglected or waste places of good soil in farm cornera, along fence-rows or streams banks, on hilly or rough places, in ravines, and in rocky outcroppings in fields and pastures where weeds or inferior species now grow. In such places the black walnut in the regions where it thrives should be a good investment.

Copies of this bulletin may be obtained free by writing to the Department of Agriculture, Washington, D.C.

Considerable Slaughter of Beef on Many Farms

In spite of the great concentration of the slaughtering and packing of meat animals by commercial concerns, there is still considerable slaughtering on the farms. Because of the demand for farm-slaughtered meat, the best methods of killing beeves and handling the meat, the United States Department of Agriculture has prepared Farmers' Bulletin 1415, Beef on the Farm—Slaughtering, Cutting, Curing.

This bulletin, prepared by W. H. Black and E. W. McComas of the Bureau of Animal Industry, is illustrated with 50 photographs, the authors believing that many of the stages in handling carcasses can be shown best by pictures.

In addition to the photographs, there is considerable text material describing the various stages from the selection of cattle for slaughter up to the shipping of farm meat in interstate commerce. There is detailed information on cutting up the carcasses, curing beef, preparing beef products, inspection of meat, and a special section on slaughtering calves.

Copies of the bulletin may be had free, as long as the supply lasts, by addressing the Department of Agriculture, Washington, D. C.

Oats, Richer Than Corn, Favored for Dairy Feed

Oats will be more largely fed this year than usual. Their abundance and the shortage of corn will induce farmers to depend more than usual upon their supply of oats to compound the dairy ration.

Oats are richer in protein content than corn. For this reason they make an excellent dairy feed. Best results are obtained when they are ground or crushed. The bulky nature of this grain, together with their richer protein content, admirably fits them for mixing with other feeds. Because of these desirable characteristics, and the fact that oat prices are on a lower parity than most other grains, farmers should not sell too closely of the grain, especially dairymen who desire to keep up a maximum flow of milk.

Boschee's Syrup

Allays irritation, soothes and heals throat and lung inflammation. The constant irritation of a cough keeps the delicate mucous membrane of the throat and lungs in a congestcy condition, which BOSCHEE'S SYRUP gently and quickly heals. For this reason it has been a favorite household remedy for colds, coughs, bronchitis and especially for lung troubles in millions of homes all over the world for the last fifty-eight years, enabling the patient to obtain a good night's rest, free from coughing with easy expectoration in the morning. You can buy BOSCHEE'S SYRUP wherever medicines are sold.—Adv.

Swift Financiering

A negro cook of middle age, who had been employed by the same family since became engaged to a sporting man of her own race.

One morning her mistress saw her gazing abstractedly out of the kitchen window and inquired: "What's the matter, Hannah?"

"Well, ma'am," she replied, "with my husband-that-is-to-be everything goes with such lightnin' speed that I'm completely upset. Yesterday we got acquainted, yesterday we got engaged, and today I find he already owes me $85."

Cuticura Soap for the Complexion.

Nothing better than Cuticura Soap daily and Ointment now and then as needed to make the complexion clear, scalp clean and hands soft and white. Add to this delicate fragrance, found Cuticura Talcum, and you have the Cuticura Toilet Trio.—Advertisement.

Dairymen Are Careless in Cooling Products

This is the season of the year when milk and cream producers become careless in the cooling of their product after milking or separation. The cool nights lead one to believe that nature will take care of the cooling operation. But milk and cream, however, cool very slowly in air or in water when not stirred. The center of the can remains warm for a number of hours, allowing opportunity for rapid bacterial development. The result is milk sours quickly and creams is second grade when delivered to the creamery.

Good Alfalfa Cultivator

The ordinary spring-tooth harrow makes a very good alfalfa cultivator. The disc harrow and spike-tooth harrow is to be preferred. When the disc is used it is set straight and then followed by the spike-tooth harrow. This loosens the ground well and stimulates the alfalfa plants. Special cultivators of course are obtainable on the market.

Black Walnut Is Quite Profitable

Tree Is Worthy of Extensive Planting in Waste Places on Any Farm.

(Prepared by the United States Department of Agriculture.)

Because of the high quality and beauty of its timber and its resistance to decay, the food value and popularity of its nuts, and the charm of the tree from an ornamental standpoint, the black walnut challenges attention as a tree worthy of extensive planting in waste places, according to Farmers' Bulletin No. 1362, just published by the United States Department of Agriculture.

Detailed information is given in this bulletin, "Black Walnut for Timber and Nuts," regarding planting and the best growing conditions, and the care of the black walnut for most satisfactory results in growing it primarily for either timber, nuts, or as an ornamental.

Trees Need More Room.

In earlier years it was deemed best to grow the black walnut in close plantations. As a consequence the increase in diameter was slow and the annual rings narrow. Today the user-demand in walnut lumber is for wider rings giving an attractive grain. That means the trees must be given room to make more rapid growth than when close together, and it also means earlier and larger crops of nuts.

Black walnut grows best in fertile, mellow, well-drained soil under average conditions of temperature and moisture and does not thrive in the extreme North or South, nor at high elevations, nor in arid, alkaline, wet or acid soils. The transplanted tree is given as parts of the Ohio, Mississippi, Tennessee, Illinois, Missouri, Iowa, Nebraska, Kansas, Oklahoma and Arkansas.

Grow in Waste Places.

It is not recommended to grow the black walnut as a major farm crop on extensive areas of good land, because it cannot compete in profits with other crops. But it is urged to plant this tree in those neglected or waste places of good soil in farm cornera, along fence-rows or streams banks, on hilly or rough places, in ravines, and in rocky outcroppings in fields and pastures where weeds or inferior species now grow. In such places the black walnut in the regions where it thrives should be a good investment.

Kill Orchard Mice With Poisoned Bait

Outline of Effectual and Inexpensive Formula.

Mice and other rodents are beginning fresh, destructive winter's work in the orchard. For this reason steps should be taken by growers to protect the fruit trees, says A. Freeman Mason, extension specialist in fruit growing at the New Jersey College of Agriculture in New Brunswick.

Clearing grass and rubbish away from the tree trunks and mounding the trunks with earth will protect the trees to a certain extent. Mechanical devices such as wire netting and tarred paper may be used, but in most cases, poisoning will prove an effectual and inexpensive method of controlling destructive rodents.

The United States Department of Agriculture recommends the following formula: Mix together, dry, ¼ ounce of powdered strychnine and ¼ ounce of baking soda. Sift the strychnine-soda mixture over 1 quart of rolled oats, stirring constantly to insure an even distribution of the poison through the grain. Heat the poisoned rolled oats in an oven until thoroughly warm. Mix 2 parts of melted beef fat with 1 part of melted paraffin, and sprinkle 6 tablespoonfuls of this mixture over the poisoned rolled oats, mixed until the oats are evenly coated. Allow the grain to cool and it is ready for use.

If large quantities of the bait are needed, use 1 ounce of strychnine, 1 ounce of soda, 8 quarts of rolled oats and 1¼ pints of the beef-fat-paraffin mixture. It is very important to have the beef-fat-paraffin mixture hot and the poisoned oats thoroughly warm, otherwise it will not be possible to obtain an even coating.

The poisoned grain portion of the poisoned oats should be put in containers inside the clearings. If mice are very abundant, a container should be used under every tree.

All gnawing baits and poison containers and utensils used in the preparation of poisoned baits should be kept plainly labeled and out of the reach of children, irresponsible persons and live stock.

It Pays to Raise Calves -and Then Feed Them Well

The first 6 months is the critical time in calves, feed them well and then well bred, the result of one generation of years," says a writer in the Iowa Homestead.

Two calves from the Aleck herd are dropped in the spring and run with their mothers during summer on good pasture. He started out with Shorthorns, but, several years ago, began using only pure bred Hereford sires and he now has grade Hereford calves and Hereford steers.

The calves are fed well on grain and gradually wean themselves. About September 1 little or nothing is added to their ration and the amount of corn and oats is increased until they are on full feed, with alfalfa hay for roughage.

The next spring they average about 500 pounds and have a finish that makes them sell at higher prices than heavies on the Omaha market. Aleck stresses the point that it pays to keep the calves in good condition from birth to time of marketing.

To Protect Fruit Trees From Mice and Rabbits

A good remedy to protect fruit trees from mice is to break down mice burrows, and follow that by spreading poison bait where. Sweet potatoes, put into large size, make good bait when sprinkled with strychnine and plaste, one ounce to one bushel of bait. The bait is first soaked in a tub of water, then the poison, usually mixed with baking powder, is added. Put in after it has soaked. A few pieces of bait are placed under each tree in wide-open burlap bottles, under boards or in open tunnels so that ch

PLAN NEW WAYS TO USE CORNCOBS

Methods Are Devised to Avoid Waste of 20,000,000 Tons Yearly.

Washington.—Science has found a way to avoid the yearly waste of 20,000,000 tons of corncobs in the corn belt of the United States, according to a report of research work prepared by Frederic H. La Forge and Gerard Mains of the bureau of chemistry, United States Department of Agriculture, and C. L. Sweeney, head of the chemical engineering department of Iowa State college, for Fuel Engineering Foundation. The Foundation, in commenting on the report, said that chemists and engineers appear to have opened a path to new industries based on waste products, which deals with the discovery of new processes for making the corncobs commercially available and reveals their value.

"One county in Missouri grows a certain kind of Indian corn because its large cobs make good tobacco pipes," says the Foundation. "Some cobs are burned as fuel on farms. A maple sugar flavor is made by boiling cobs with water. Meat smoked with cobs has a flavor said to be better than that from hickory. There are other minor uses.

"But when one can be made of the 15,000,000 or 20,000,000 tons of cobs wasted annually in the corn belt? Chemists of the Department of Agriculture, working on the subject since 1918, have discovered new uses for cobs and processes for making them commercially available.

Iowa College Investigates.

"Iowa State college is investigating production from cobs of furfural (oxalic and acetic acids, methanol (wood alcohol), charcoal, activated char, pitch, tar, oils, cellulose, levulose gum, a plastic material and fermentation products.

"When cobs are cooked for a few minutes under pressure in superheated water, adhesive materials are extracted. These compounds belong to the carbohydrate group of chemicals to which also belong starch, dextrine and sugars.

"Pentosan-adhesives can be used for pasting fiber boxes and cheap paper bags and for other purposes not demanding high-grade, strong adhesives. A special use proposed is in manufacture of briquettes from fine sizes of anthracite, of which a superabundance results in preparing that coal for market. Thus, utilization of waste cobs could enhance materially the value of near-waste coal; much experimental work has been done.

"When cobs are digested for about two hours with steam under 135 pounds pressure per square inch, with a very little sulphuric acid, a different product results, furfural.

"It can be obtained also from oat hulls, bagasse, bran and other vegetable substances. Its use has been limited because of the high cost by methods therefore employed. In 1920, possibly 50 pounds were used in the United States, only as a laboratory reagent; the price was about $20.

"In France and Germany furfural has been made a by-product in the manufacture of alcohol from wood waste. The Miner laboratories of Chicago, by independent research, developed a process for furfural from oat hulls in large quantities. Annual production is now thousands of pounds, and since 1922 the price has been reduced to 25 cents.

Processes Worked Out.

"Research workers of the Department of Agriculture, continuing their investigation at the Arlington, Farm, Virginia, have worked out practical processes and equipment for furfural from cobs in large quantities, at still lower cost. On a scale of 50 tons of cobs a day, yielding four and one-half tons, furfural could be produced for about 6 cents a pound, making no allowance for income from by-products. Furfural can now be made at much lower cost than formaldehyde, and can replace it in a number of fields.

"Attention has turned to discovery of additional uses for furfural and enlargement of its market. More than 100 patents on its production and utilization have been issued, mostly within the last five years, in the United States and other countries. During the war a shortage of acetone could easily have been met by distilling cobs.

"There is a promising field in the manufacture of resins similar to bakelite, suitable for parts of electrical instruments, for printing plates and various other molded articles. These phenol furfural resins are infusible and insoluble; they have high insulating qualities, great strength and great resistance to water and chemicals. There is a large field in radio equipment. Phonograph records may be made from them. There are innumerable uses for fiber impregnated with these resins where great toughness and resistance are of value."

Has Useful Hobby

Berlin.—It is the hobby of Dr. Laura Turnau to collect children. She is a welfare worker, and her house is constantly filled with little boys and girls for whom she finds homes.

"It is a wonderful recreation from the cares of my professional work," the doctor said, "to come home every night with two or three new children tagging at my skirts."

Largest Newspaper

In 1859 there appeared in New York the largest newspaper on record, measured by the size of the sheet. The dimensions were 9 by 6 feet. It was called the illustrated Quadruple Constellation, and consisted of eight pages. For eight weeks 40 persons were busy with its compilation. It was intended by the founders that a copy should be issued every century.

Ancient Candlestick

Unique in appearance is an iron candlestick owned by a Los Angeles girl. This was given her ancestors by Henri II of France. It was used in the doughty monarch's hunting lodge, and is made of sturdy iron spirals set upon a round base on three bent legs. The candle fits down in the spiral, and there is an ingenious iron knob or handle which, when twisted, raises the diminishing candle a spiral at a time, so that the light may be kept even as the wax melts down.

Turn to Soft Drinks

More than 4,000,000,000 bottles of soft drinks are consumed each year in the United States.

The finest line of Toys and Holiday merchandise in northern Michigan, now on display at Fessenden's drug store.

Help Your Railroads Keep Tracks Clear

With every Railroad, passenger safety must be the first consideration always. That implies that there must be a clear track.

As motor vehicles multiply, this problem becomes increasingly difficult almost from day to day for the 24 steam Railroads of Michigan. Despite the most costly and carefully planned precautions on the part of the Railroads, crossing accidents are becoming appallingly frequent.

Such accidents are due to the growing recklessness of the motorists. Yet each accident also imperils the lives of trainmen and passengers.

Separation of grades can never solve this problem, for crossings are multiplying far faster than grades can be separated. And, with each separation costing from $70,000 to $100,000, the entire wealth of Michigan could not accomplish the task.

The public demands of us speed—quick delivery—for passengers, mails, freight. To keep our tracks clear for this efficient service, and to maintain our standards of absolute safety, we must have cooperation at crossings.

Most motorists give this cooperation by heeding our request to Stop Look, Listen. For their own protection, as well as ours, those who do not heed this request should be made to do so by the mandate of Law.

Do you agree? Write us your verdict.

Michigan Railroad Association
500 Railway Exchange Bldg., Detroit, Michigan

Surplus Vegetables and Fruits Should Be Saved

Fall seems to be the season of surplus fruits and vegetables, and we should make every effort to save them for future use. Canning, drying, pickles, jams and preserves offer an infinite number of combinations and possibilities for these things. If you make more than the family can use, try and find a private market for them in town—homes, stores and hospitals. Many farm housewives have made quite an income in this way.

Cull fruits can be made into delicious jams, conserves, preserves, relishes, spiced whole fruits, pickled fruits, jellies, etc. Underripe fruits make the best spiced and pickled fruits, while overripe ones make the best jams, and conserves.

Unripe vegetables—tomatoes, etc.—make excellent chopped pickles. Cucumbers, which get ripe, may be made into special sweet pickles. Apples are good in mixed pickles. The surplus green tomatoes, cabbage, onions, cauliflower, cucumbers, and even green beans may be used up in mixed pickles for some good recipes and try them out.

Soy Beans Are Superior to Alfalfa and Clover

Many people who have worked with soy beans find that the hay will keep for long periods in the cock without spoiling. In this respect it seems to be better than such legumes as alfalfa and clover. Great care must be taken to prevent the loss of leaves, as they are the most valuable part of the hay. The good quality of soy bean hay may be harvested by letting the hay stay in the swath until it is completely cured. It is then raked up while damp with dew and after a few hours of sunshine is ready to take in. Hay made in this way may be just as palatable as that cured in the cock, but does not look so well.

Faint Heart

"Faint heart never won fair lady," said the ready-made philosopher.

"That's right," answered the bashful man. "The way the ladies dress sometimes you've got to have your nerve with you to look at one long enough to feel acquainted."

Order for Publication—Final Administration Account.

STATE OF MICHIGAN, — The Probate Court for the County of Charlevoix.

At a session of said court, held at the probate office, in the city of Charlevoix, in said county, on the 3rd day of Nov., A. D. 1924.

Present: Hon Servetus A. Correll, Probate Judge.

In the matter of the estate of Lawrence J. McCann, deceased

Anna W. McCann having filed in said court her first administration account, and her petition praying for the allowance thereof,

It is Ordered, that the 26th day of November, A.D. 1924, at ten o'clock in the forenoon, at said probate office, be and is hereby appointed for examining and allowing said account and hearing said petition;

It is further ordered, that public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Charlevoix Sentinel, a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
34-3t Judge of Probate.

Order for Publication—Determination of Heirs.

STATE OF MICHIGAN—The Probate Court for the County of Charlevoix.

At a session of said Court, held at the Probate Office, in the City of Charlevoix in said County, on the 23d day of October A. D. 1924.

Present: Hon. Servetus A. Correll, Judge of Probate.

In the Matter of the Estate of Adelia Porter, deceased.

Harry Porter having filed in said court his petition praying that said court adjudicate and determine who were at the time of her death the legal heirs of said deceased and entitled to the real estate of which said deceased died seized,

It is Ordered, That the 20th day of November A.D. 1924, at 10 o'clock in the forenoon, at said probate office, be and is hereby appointed for hearing said petition;

It is Further Ordered, That public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing in the Charlevoix Sentinel, a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
33-3t Judge of Probate.

MORTGAGE SALE.

Default having been made in the conditions of a certain mortgage executed by William Lousiel and wife of Marion township, Charlevoix county, Michigan, unto Elizabeth Dixon of the City of Detroit, Michigan, dated January 1st, 1918, and recorded in the office of the Register of Deeds for the county of Charlevoix, Michigan, on the 25th day of November, 1918, in Liber 51 of Mortgages on page 440, which mortgage was afterwards sold, assigned and transferred by the mortgagee unto Thomas T. Dixon of the City of Detroit, Michigan, by assignment of mortgage dated August 25th, 1924, and recorded in the office of the Register of Deeds for the County of Charlevoix, Michigan, on August 30th, 1924, in Liber 55 of Mortgages,' on page 110, on which mortgage there is claimed to be due at the date of this notice the sum of $4,978.46, including the principal sum due with interest, together with an attorney fee of thirty-five dollars as provided for by the said mortgage, and no suit or proceeding at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas, the taxes required by the statutes to be paid on said mortgage were duly paid prior to the recording thereof;

Now Therefore, Notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due thereon together with the costs and expenses of sale, including the attorney fee provided by the said mortgage, at public auction, to the highest bidder therefor, at the front door of the Court House in the City of Charlevoix, Charlevoix county, Michigan, (that being the place where the Circuit Court for the County of Charlevoix is held), on Tuesday, the 16th day of December, 1924 at 10 o'clock in the forenoon on that date.

The premises described in said mortgage being the lands, premises and property situate in the Township of Marion, county of Charlevoix and State of Michigan, described as follows; to-wit: The South one-half of the Northwest quarter of Section twenty-six in township thirty-three, North of Range Eight west; as per the United States Survey thereof and containing eighty acres of land more or less; also twenty acres off the north end of all that part of the east one-half of the southwest quarter of Section twenty-six in Township thirty-three, North of Range Eight west lying by the west side of the Pere Marquette Railroad Right of Way.

Dated September 6th, 1924.

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by Elizabeth Struthers of Hayes Township, Charlevoix county, Michigan, unto John Kopf of Hayes Township, Charlevoix County, Michigan, dated June 27, 1916, and recorded in the office of the Register of Deeds for the County of Charlevoix, Michigan, on the 27th day of June, 1918, in Liber 48 of Mortgages on page 246, which said mortgage was afterwards sold, assigned and transferred by the mortgagee unto Chas. A. Struthers, of Hayes Township, Charlevoix county, Michigan, by assignment of mortgage dated June 27th, 1918, and recorded in the office of the Register of Deeds for the County of Charlevoix, Michigan, on the 27th day of June, 1918, in Liber 48 of Mortgages on page 247, which said mortgage was afterwards sold, assigned and transferred by the said Chas. A. Struthers to Andrew J. Struthers of Hayes township, Charlevoix county, Michigan, by assignment of mortgage dated October 11th, 1920 and recorded in the office of the Register of Deeds for the County of Charlevoix county, Michigan, December 12th, 1920 in Liber 50 of Mortgages on page 80, and which said mortgage was sold, assigned and transferred by Andrew J. Struthers, assignee, unto Albert F. Bridge by assignment of mortgage, dated November 29th, 1922 and recorded in the office of the Register of Deeds for the County of Charlevoix, Michigan December 7th, 1922 in Liber 55 of Mortgages on page 89, on which mortgage there is claimed to be due the sum of $1623.30, including the principal sum due with interest, together with an attorney fee of twenty five dollars as provided for by said mortgage and no suit or proceedings at law having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas the taxes required by the statute to be paid on said mortgage were duly paid prior to the recording thereof;

Now Therefore, Notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided by the said mortgage, at public auction, to the highest bidder therefor; at the front door of the Court House in the City of Charlevoix, Charlevoix county, Michigan, (that being the place where the Circuit Court for the County of Charlevoix is held), on Tuesday, the 23rd day of December, 1924 at 11 o'clock in the forenoon on that date.

The premises described in said mortgage being the lands, premises and property situate in the Township of Hayes, County of Charlevoix and State of Michigan, described as follows, to-wit: Lot one of Section twenty nine; the South half of Lot number Two of Section twenty one; and the Northwest quarter of the Northwest quarter of Section twenty-eight all in Township thirty-four, North of Range Seven West, as per the United States Survey thereof.

DID YOU EVER STOP TO THINK

by E. R. WAITE, Secretary
Shawnee, Okla., Board of Commerce

That there is much need in many cities of a spirit of community cooperation between business men.

That problems of business can be handled more efficiently if there is a mutual interest displayed. Business men must fight collectively for prosperity and success.

That business men can't be cold in their service to the public and suspicious of each other and expect to increase trade for the city.

That there should be a friendly spirit, not only between business men but between business men and the public.

That the success of a business not only depends upon quality and the effectiveness of its advertising, but upon the personality of the management as well.

That selfishness and lack of community cooperation on the part of business men has done more than any one thing to make dead cities out of live ones.

That the public has a very definite preference for those business concerns who make themselves a living part of the community.

Businss men who sit down to watch and wait with critical eye to see what will happen, are community debtors. They are the fellows who try to get something out of the community without putting anything in, and by so doing not only ruin their own business, but their neighbors as well.

LIVED LONG ON HOPE AND WATER

But Entombed Miners Did Not Establish Record

Surprise has been expressed that the man rescued from the flooded pit near Falkirk, Scotland, were able to exist for nine days "on hope and water."

In point of fact, it was just because these men had fresh water and did not abandon hope that they not only survived their horrible imprisonment, but were actually able to crawl down to the shaft bottom, unaided, to join their rescuers.

For a healthy man a nine days' fast is, in itself, no very dreadful ordeal. There are indeed plenty of people who habitually fast at intervals for from three to seven days simply for health's sake, observes Henri Pickard in the Chicago Inquirer.

Not, of course, that there is any comparison between lying comfortably in bed without food and existing in the pitch darkness of a flooded coal pit, breathing bad air and always under the hideous apprehension of whether you will ever get out or not.

Even so, these miners were not so badly off as a shipwrecked crew in an open boat. The mere fact of having water all round them, to get some to drink, is literally maddening. Yet the survivors from the Medusa, wrecked in the year 1876, managed to live through 13 days on a raft, without food or water, and they, too, for much of the time, to a burning sun.

Of minor but longest entombment of which we have any record is that of the last survivor from the Courrieres mine in France, who was rescued after a period of March 6, 1906. He was, in all, 26 days below ground before being rescued. But he had food for the first week of his imprisonment.

Doctors are divided as to how long a man can exist without food. Professional starvers, such as Doctor Tanner and Succi, have abstained for 40, even 50 days on end, and there is a case reported in the Lancet of 1878 of a man of sixty-two who refused food for four months and recovered.

The period of hunting before death ensues varies with different individuals. Generally speaking, a healthy person can go without food until he or she has lost one-third of the bodily weight.

But different people do not lose weight at the same rate. Succi, for instance, lost 34 pounds 3 ounces during a 40 days' fast, but Jacques, the champion faster, lost only 26 pounds 4 ounces in the course of his record fast of 50 days.

Medical jurisprudence assumes that a fat person will live longer without food than a thin one, for, like the basking bear, a fasting man consumes his own fat.

The muscles, too, lose much weight; even the skin and hair decrease in weight during the fast. The only part of the body which loses nothing is the heart.

Explaining the Sexton

Schoolboys in a Munich suburb were instructed recently to write a composition, as a test, on the sexton in the local church, and the following effort attracted so much attention that it is being circulated in many Bavarian newspapers:

"The sexton is a useful man. He rings the bells at five o'clock in the morning so the people know they may sleep two hours longer. At eleven o'clock he rings the bells again, indicating to the farmers in the field that they should become hungry. In the evening there is more bell-ringing, which indicates to small children they will get their ears boxed if they do not run home rapidly. Sometimes the sexton is very troublesome, especially when he rings at night to announce a fire. The sexton receives our weddings, christenings and the dead. He earns the most money through death, therefore he is glad when many people die."

Fumigation Stops Grain-Moth Losses

Difficulty Was Found in Obtaining Carbon Disulphid.

(Prepared by the United States Department of Agriculture.)

Successful fumigation of over a half million bushels of stored wheat for the Angomonis grain south was accomplished by some 1,500 farmers of York county, Pennsylvania, last year, saving the heavy annual loss previously experienced from this pest. Through demonstrations which the county agricultural extension agent had conducted for several years the practice of fumigating the wheat was well known in a central measure. Difficulty was found, however, in obtaining the carbon disulphid used for the purpose. Considering a plan suggested at a community meeting early in the spring of 1923, a dealer was found who agreed to purchase the carbon disulphid in bulk, together with a quantity of screw-top mason jars, loading enough to fumigate 100 bushels of grain. On each can was pasted a label giving explicit directions for use and care of the liquid. These cans, packed in cases, were packed by wooden cases holding 24 cans each and shipped to warehouses and stores in all parts of the county. No objection was made to carrying carbon disulphid on the railroad cars, as there was no odor or loss from evaporation, and the disagreeable task of filling containers was thus avoided. Through this arrangement fumigating material in suitable containers and in small quantity could be obtained at 50 points in the county.

At Palace Theatre—"Welcome Stranger"

"Welcome Stranger," the screen version of the great Broadway play by Aaron Hoffman which will be shown at the Palace Theatre Thursday, Dec. 25th, is a vivid picture of the prejudice of a small town. The central character is Jaldore Solomon, a poor clothing salesman, who wanders into the town of Valley Falls, N. H., one New Year Eve, when the mercury is away below zero and the north wind shrieking. Cold as the weather is, he finds the people of the town far more frigid and unkind. With wonderful optimism he pursues his own course, befriends a couple of unfortunate waifs and finally rises to a position of prominence and respect.

New Duty for Old Ship

The old ship Discovery, which carried Captain Scott on the expedition which ended in his reaching the South pole, is now being fitted for an expedition into the far South to investigate means to save the whaling industry, which is being threatened by the extermination of the whales east of the Falkland Islands and South Hebrides.

Carrying Out a Policy

A—He thinks the world owes him a living.

B—I know, and I don't mind that. What I object to is the fact that he seems to think he can collect it by borrowing from his friends.—London Answers.

Baked Goods and Apron Sale Dec. 20

Ladies of St. Mary's church will hold a sale of baked goods and aprons at Buronsky's shoe store, Saturday, Dec. 20th. 39-2.

The finest line of Toys and Holiday merchandise in northern Michigan now on display at Fessenden's drug store.

Merton of the Movies" At Palace Theatre

The sobriquet, "Tarkington Boys" was given to the two players in New York in 1918 when Ben Lyon played the lead in "Seventeen" and Glenn Hunter played the title role in "Clarence," both Booth Tarkington plays, and both phenominal successes. The first ran for forty-two weeks and the second for thirty-two weeks, in New York.

Hunter continued to portray roles similar to the one in which he made his first success. He comes to the Palace in "Merton of the Movies" on December 19th.

Notice of Importance!

Parties desiring coal should make personal application before removing same from my coal shed. Some coal has recently been removed unlawfully and in the night time. Parties indulging in this practice in the future will be prosecuted to the full extent of the law.
39-3 H. W. Widdifield.

Everything in my store for sale below cost until Jan. 1st. Metcalf the Druggist.

PROVED TO BE AN UNQUALIFIED SUCCESS

Shop Early and Mail Early, You Are Relieving the Burden on the Clerks

The Shop Early, Mail Early campaign inaugurated by Postmaster General New last year proved to be an unqualified success. It was of great benefit to the people and also enabled post office employees to deliver all the Christmas mail before noon on December 25th. The department again this year asks the hearty cooperation of the public in order that the record made last year may be equalled, if not excelled.

When you shop early and mail early you are helping the clerks in the post office to eat their dinners home and you are greatly benefiting yourselves. You have a greater chance to secure a better selection of gifts from the stores, you have more time to wrap them securely and you are sure that they will arrive at their destination in time to be opened Christmas morning. You are also relieving the burden on the clerks behind the counters in the stores, and you are giving a practical demonstration of the good will that Christmas time signifies. Acting Postmaster General, John H. Bartlett requests that you refrain from using small envelopes in sending your Christmas cards as this very greatly retards the sorting and distribution of the mails. Let all of us pull together this year, do our shopping early and do our mailing early, let's make it a genuine old-fashioned Christmas celebrasion.

MATERIAL FOR NEW SHIP BOUGHT

To Replace Loss of "Idler" by Recent Fire

Recent purchases of material made by Captain Ulysses McCann at Benton Harbor and Milwaukee insures the replacement of the gas boat "Idler" that burned off Beaver Island last week. The "Idler" was owned by Captain McCann and was a familiar sight to all who frequented the waters of Lake Michigan. The material alone used will far exceed the value of the "Idler" which proved very satisfactory to the owners along lines of safety, carry capacity, economy and ease in handling, hence the duplication of the ship recently lost.

NEW OFFICERS ELECTED, R. A. M.

At the Masonic Temple Monday Night, December 15th

Officers for the ensuing year were elected last Monday night at the Masonic Temple at a regular convocation as follows:

High Priest—M. A. Levinson.
King—S. M. Rose.
Scribe—H. A. Craig.
Capt. of Host—Harley Ochs.
Prin. Sojourner—W. H. Collins.
Royal Arch Capt.—C. H. Emrey.
Master 3rd Veil—Kaye H. Buttars.
" 2nd " —Leo Carey
" 1st " —Clarence Bartlett.
Secretary—Henry Partridge.
Sentinel—Peter D. Asce.

Petoskey Harbor Light Destroyed

The government light on the breakwater near the entrance to Petoskey harbor in Little Traverse Bay, went down in the storm of last Sunday, with-tanding the stiff north-west storm about as successfully as would a house of straw.

The building was of steel construction and had weathered many a severe blow but, due probably to the weakened condition of its foundation collapse when enormous waves kept up their heavy battering for several hours during the worst December blow in this region for several years.

It is thought that a new light will replace the one destroyed before the opening of navigation for 1925.

W. C. T. U. HELD ANNUAL MEETING

Interesting Papers Were Read and Much Interest Was Shown

The Annual Meeting of the W. C. T. U. for 1924 was held at the home of Mrs. H. B. Jacobs, Friday, Dec. 12th, the president, Mrs. Lelah Simmons presiding. The Union has carried on its work through eleven departments this year, and has held eleven regular, one special and three executive board meetings with an average attendance of 22 members. All meetings are opened with scripture and prayer.

The Union has taken an active part in the political and civic life of the community; been instrumental in organizing the League of Women Voters for the county; entertained the county and district conventions; sent Mrs. Kaye Buttars to the State meeting in Detroit; was represented at the National Jubilee Convention in Chicago by Mrs. Lou Campbell; assisted our County Superintendent of Poor with a Christmas dinner for the "Mother's Pension" children; and the "Mother's Pension Member" drive which went over the top by several hundred; and the Golden Rule Tea in the interest of the New East Belief work in this vicinity.

The Treasurer's report shows a membership in March of 73.906; 80 per cent of the industries in favor of prohibition. Mrs. Buttars also brought many helpful plans, which will be taken up in this year's work.

Mrs. H. S. Harsha presented many items of interest in her paper on "The Outlook for Prohibition enforcement for 1925." One item of much importance is that ninety-four million dollars has been saved to the tax payers during the past year through prohibition.

Mrs. Jennie Alcox, honorary president of the Union, who has gained her title by twenty-one years of faithful service in city, county and district W. C. T. U. work deserves special mention for her able assistance during the year. Mrs. Alcox was chairman of the program committee for the local Union and for both county and district conventions. Mrs. Alcox, as president of the county Union, presided at the county convention in May, in a very charming manner; as vice president of the district she very ably assisted Mrs. Niles, the district president, at the convention in October. In the local Union she had entire charge of the June meeting which was held in the interest of flower mission work, portraying the beautiful life of Jennie Cassidy, the founder of this department. Mrs. Alcox also had charge of the December program, given at the home of Mrs. Jacobs, and introduced four of our high school boys, Clair Ustatail and Clayton Dutcher, who sang two very pleasing numbers, with Miss Clark at the piano. The mothers of these boys are active members of the Union.

The local Union has contributed to the Francis E. Willard and Lillian M. Stevens funds; also remembered Mr. P. J. Howard with a Christmas gift.

Had for public addresses during the year, the state secretary, Mrs. Norma E. Mudge, Mrs. Elizabeth Niles, District Pres., Miss Margaret Hilly and V. K. Beschetoor; have also voted to contribute fifteen dollars to the Child Welfare centre at Detroit.

The election of officers resulted in the following: President, Mrs. Lelah Simmons; Cor. Secy., Mrs. A. J. Usher; Rec. Sec., Mrs. Kaye Buttars; Treas., Mrs. A. J. Hamilton.

The Union is very grateful to the churches for the donation of the use of their parlors for the meetings since last May.

Mrs. E. E. Cross, Secy.

Drugs, fixtures and everything must go at Metcalf's.

The finest line of Toys and Holiday merchandise in northern Michigan, now on display at Fessenden's drug store.

IMPROVEMENTS AT POSTOFFICE

Work Room Made Larger, More Convenient For Postoffice Clerks

Changes now in progress and nearing completion at the post-office will add material space to the work room, at the expense of the lobby, which continuql considerable surplus space, which has been utilized to great advantage, a much needed improvement and substantial convenience for employees.

Those changes consist in part of a permanent closing of the former public entrance at the southeast corner, removal of platform back of the show window, extension of the postoffice cabinet and private office of the post-master toward the front of the building and the use of the door at the northeast corner as a public entrance. In addition, substantial iron gratings for the protection of the office will be placed on all windows.

The changes are all for betterment of conditions and for the present, at least, will go a long way toward relieving the congested condition that heretofore has been a serious handicap to employees, preventing in a high degree perfection in their work, which they have been carrying on under adverse conditions, particularly during the holiday and resort seasons of the year.

Bringe Sunshine to Aunt; $100,000 Is Her Reward

New York.—By the terms of the will of Virginia I. Lennan, Brooklyn, her niece, Gladys M. Stevenson, is made the principal beneficiary, receiving more than $100,000.

The bequest is made because "she is young and has not been prepared to cope with the world or to enjoy her living therein" and because she brought "sunshine and happiness" into the life of her aunt.

Miss Stevenson lived with her aunt since the death of Peter Lennan 15 years ago.

The finest line of Toys and Holiday merchandise in northern Michigan, now on display at Fessenden's drug store.

CHARLES L. MOODY CALLED BY DEATH

Charles L. Moody passed away at the home of his daughter, Mrs. Frank Geiken, at Pellston Monday night, after an illness of more than two years.

Mr. Moody was quite well known in Charlevoix, having come here from Pentwater about twenty-five years ago. For several years he conducted a general mercantile business at Bay Shore, going from there to Pellston, where he has been associated in business with his son-in-lay, Mr. Geiken, for twenty-one years.

Mr. Moody was born March 14, 1855. He a member of Pellston Lodge, F. & A. M., Oceana Chapter, No. 56 R. A. M. and Oceana Council No 21, R. & S. M., at Pentwater.

Mrs. Moody passed away several years ago, and since that time Mr. Moody has made his home with his daughter at Pellston. Beside Mrs. Geiken, the survivors are a son, William, of Pellston, and two daughters, Mrs. Mattie Bailey, of Petoskey, and Mrs. Lena Durand, of Detroit.

Funeral service was held from the home Wednesday afternoon, Interment in Greenwood cemetery at Petoskey.

JOHN ZEITLER INJURED, FRIDAY

Came in Contact With an Electric Wire, on Job at Postoffice

John Zeitler came in contact with live electric wires while doing some repair work in the postoffice building last Friday, receiving a shock that rendered him unconscious for a short time.

The accident occurred during the forenoon and was due to Mr. Zeitler taking hold of one of the electric wires in the interior of the building, which carries the current from the city plant through the building for light and power purposes.

MAN WITHOUT A NAME

By H. M. EGBERT

(©, 1931, Western Newspaper Union.)

MAN-WITHOUT-A-NAME looked up idly at the sound of voices. He was lying upon the lookout at Quava-Quava, looking out at the ocean. He knew that, one hundred and fifty miles across that expanse of blue water, was the Pacific ocean, and some day, perhaps, when he grew tired of Quava-Quava, he might go there. There he had lived on the beach at Quava-Quava for three years, and had not grown weary yet. Here one could live at ease, without working, without meeting one's kind, except under copper skins and swarthy skins of various shades of brown.

Of course, there were things that one liked to forget. There was Isabel, for instance, and her promise to wait for him "forever," as she had phrased it, when Man-Without-a-Name went West to see if he couldn't make a man of himself. But that was three years ago, and Man-Without-a-Name had grown tired of life and had given up the struggle.

Then there were compensations. Man-Without-a-Name could see without glasses from this lofty perch spot of his. Sometimes he saw islands on the sea, and white-sailed ships, and native-riding on the surf, and especially native women dancing before a temple. In fact, he lay there by the hour and watch his pictures, creatures of his brain, but real as life.

Man-Without-a-Name looked up lazily. A tall, stout man was standing before him, looking down pleasantly at him. That was not unusual, only this man happened to be white. What is more, he spoke English.

"Can you tell me the way to Schwarz's store?" he asked Man-Without-a-Name. "I went for a stroll through the jungle and got lost."

Man-Without-a-Name looked up at the strange man was. He was the permanent under-secretary at the State department in Washington, and was on his way toward the Pacific group to settle an important matter. Germany and the United States both claimed possession of certain islands in this group, and if Germany asserted her claim to Tessla island by force, it was rumored that America would occupy Quassla in compensation. All this had been in the American newspaper, which Man-Without-a-Name looked over when he was feeling in a particularly ironical mood.

"There's a store," said Man-Without-a-Name. "I will take you with pleasure."

"You speak like an American," said the under-secretary presently. "Would it be making a wrong guess if I said that you are a college man?"

"I was," answered Man-Without-a-Name. "I am of the class of 1900, Harvard."

"You and life have been rougher than in the States?" asked the under-secretary.

"It's pretty bad anywhere," said Man-Without-a-Name, and broke from the room and went back to his beach. But though they sought for him all through that afternoon they could not find him. Man-Without-a-Name hated white men more savagely than ever before.

"Well, captain," said the under-secretary that night, "I suppose we can move to Quassla and have our Ambassy of Quava-Quava until we return? Of course, I don't believe this madman's story, but still—"

"As you wish, sir," answered the captain.

That is how we came to occupy Quassla island an hour before the German gunboat arrived off the harbor. The under-secretary did not forget. When he came back to Quava-Quava he took a stroll along the beach alone and found Man-Without-a-Name dining and dashing into the sea.

"I want you to tell me how you knew," he said. And Man-Without-a-Name told him, and more besides.

"Hey, Man-Midout-a-Name," yelled Schwarz one morning, four months later, "here's a letter for you by de bond."

It was addressed simply "Man-Without-a-Name, Quava-Quava." But each of the three letters inside was addressed to Mr. James Van Hicbeck. He tore open the first and then, without reading it, glanced through the second and third. The first was from Isabel. The under-secretary had not done things by halves.

"In the future, Schwarz, you will address me as Mr. Van Hicbeck," said Man-Without-a-Name to the hotel keeper.

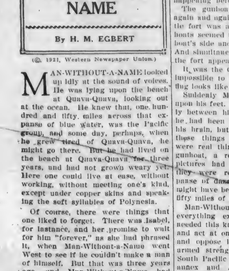
"Himmel," exploded Schwarz, "you god a name now, hey?"

"I have [illegible]," answered the other. "I've got to share it. I'm going home for six months' leave before assuming the constability at Quassla—and, you see, I'm going to be married."

NEWEST OF KNITTED TUNICS; SOME SMART ACCESSORIES

TUNIC knitted of silver and black with long silvery strands gracefully fringing the hemline. No, this is not an extract from a fairy tale, word-picturing the beauteous attire of a princess of mythical lore. It is a "really and truly" description of a very handsome knitted tunic as shown in the accompanying illustration, the same reigning vogue that very moment.

Of course, a heroine of royal fairy lineage who goes forth to meet her



A KNITTED TUNIC

noble prince, might well be proud to do so finely a garb as is this fashionable tunic dexterously knit of gleaming silver threads and black. However, the leading lady in these modern times is the style-loving American girl who delights all who behold as she suffers forth on fifth avenue or main street, clothed in the silver knit tunic of elegance and charm.

That Miss America is so fortunate as to wear a tunic of such handsome design is a picture thrown in not the least of the many compliments that have been showered upon her for the improbability of his story. If he said he had seen the bombardment, would he be believed?

"Trust me, sir, I know," said Man-Without-a-Name, and broke from the room and went back to his beach. But though they sought for him all through that afternoon they could not find him. Man-Without-a-Name hated white men more savagely than ever before.

"Well, captain," said the under-secretary that night, "I suppose we can move to Quassla and have our Ambassy of Quava-Quava until we return? Of course, I don't believe this madman's story, but still—"

"As you wish, sir," answered the captain.

That is how we came to occupy Quassla island an hour before the German gunboat arrived off the harbor. The under-secretary did not forget. When he came back to Quava-Quava he took a stroll along the beach alone and found Man-Without-a-Name dining and dashing into the sea.

"I want you to tell me how you knew," he said. And Man-Without-a-Name told him, and more besides.

"Hey, Man-Midout-a-Name," yelled Schwarz one morning, four months later, "here's a letter for you by de bond."

It was addressed simply "Man-Without-a-Name, Quava-Quava." But each of the three letters inside was addressed to Mr. James Van Hicbeck. He tore open the first and then, without reading it, glanced through the second and third. The first was from Isabel. The under-secretary had not done things by halves.

"In the future, Schwarz, you will address me as Mr. Van Hicbeck," said Man-Without-a-Name to the hotel Keeper.

"Himmel," exploded Schwarz, "you god a name now, hey?"

"I have [illegible]," answered the other. "I've got to share it. I'm going home for six months' leave before assuming the constability at Quassla—and, you see, I'm going to be married."

"Eat and Run" Habit Has Its Evil Effects

People of America have lost two inches in stature since the Civil war, according to Dr. John Harvey Kellogg, dietitian and superintendent of the Battle Creek sanatorium, says a Detroit dispatch to the Baltimore Sun.

"Stunted growth is resulting from our modern 'eat and run' habits," Doctor Kellogg said. "The American public gives little or no thought to the proper consumption of food. Our modern business activities are so hurried and intense as to allow no consideration for the most important element of healthful living, the proper selection and careful mastication of food consumed.

"The stature of the American people has dropped two inches in the last 60 years, due to the modern American custom of bolting our food like gyrfalcons.

"A height in stature of over six feet prevailed in the early '90s; today the average normal height in stature of the American people is much below six feet, a condition attributable to our modern quick-lunch counters and hurried mode of living."

Cost of Rust and Corrosion

Battling rust and corrosion costs approximately $2,500,000,000 a year, according to the superintendent of a leading construction company.

"This sum spent annually to counteract the ravages of corrosion and rust will give a fair idea of the total bill the world is paying for the slow decay of metals used in industrial work, which are not protected against them," he declared. "It is a vital matter, because the yearly waste is making the iron ore resources of the world exhaustible within a measurable distance of time."

Over and Out

One of the scientists has arrived at the conclusion that the moon was originally a part of the earth, and that it flew out into space seven thousand million years ago.

New Coat Model

There's a new coat model that is most interesting, with a belt in the back, a two-button closing in front, and a tailored collar with a mannish beaver cloker. It is infinitely more comfortable than the more capelike model, which must be held in place.

New Use for Petticoats

Nothing more charming could be chosen for a bedroom or living room than low rush-bottom chairs that have back and seat cushions made of the quilted calico petticoats of Brittany peasant women. Tiny little square and round cushions made of the same material, with big, prim little designs and lovely colors, are useful and exceedingly decorative.

Many Girdles Shown

While many of the gowns this season are beltless, there are many interesting girdles shown; narrow folds of fabric, thick gold cord, and rows of jewels, or combinations of lace and fabric are used.

The KITCHEN CABINET

A man, to be greatly good, must imagine intensely and comprehensively, he must put himself in the place of another and of many others, the more and pleasanter of the species must become his own. The best manners of mortal good is the imagination.—Percy P. Shelley.

DISHES IN SEASON

For those who cannot eat rich pastry, but enjoy the filling of a pie,

the following will be enjoyed:

Pumpkin Ramekins. — Take one and one-half cupfuls of strained strained pumpkin, add two-thirds of a cupful of brown sugar, one teaspoonful of cinnamon, one-half cupful of cream, one-half teaspoonful of salt, two eggs and one and one-half cupfuls of milk. Mix the ingredients and fill ramekins, which have been rinsed in cold water—fill two-thirds full. Bake in a moderate oven and when a golden brown cover with a meringue and brown, or serve with whipped cream.

Cranberry Jelly.—To one quart of cranberries add one pint of water. Cook until the berries swell and burst; take from the fire and rub through a sieve. Return to the pan and add two cupfuls of sugar, cook five minutes and turn into molds.

Fruit Cocktail.—Take one large grapefruit, the juice of two oranges, one cupful of sliced pineapple, one-half cupful of white grapes, one cupful of white cherries, one cupful of maraschino cherries and one cupful of sugar. Remove the pulp and of the grapefruit and oranges and scoop out the fruit with a spoon. Cut the pineapple into small pieces, remove the pits from the white cherries, cut grapes into half and remove the seeds. Pour over the sugar and let stand in an earthen dish at least twenty-four hours before serving.

Creamed Celery.—Remove the outside stalks, scrape and cut into inch lengths. Let stand in water for fifteen minutes. Drain and drop into boiling water; cook until tender; drain and add to a well-seasoned white sauce, using one cupful of sauce to one cupful of celery, and serve hot.

A little ham left from baking, or broiled ham, put through the meat chopper and added to an omelet just before it is folded to serve, makes a hearty dish for a luncheon or supper.

Do what thy manhood bids thee do, from none but self expect applause;
He noblest lives and noblest dies who makes and keeps his self-made laws.

GOOD THINGS TO EAT

It is hard for the busy mothers who has everything to do, to find time to

vary her cookery by garnishing or variety in combinations which a recipe is one of the all-important items, which it is most household-

Some time when the children are changing their clothes, try rubbing them with a baking powder biscuit dough, rich enough to[illegible] make soft and dispositive. Roll out, spread with butter and sprinkle thickly with cinnamon, brown sugar and raisins or currants. Roll up and cut into half-inch biscuit by slicing with a sharp knife. Bake in a hot oven forty minutes hot.

When making bread or rolls, the sponge used for cinnamon rolls makes a more palatable roll.

Turkish Rolls—Work one-fourth of a cupful of almond paste into one cupful of boiled custard mixture, add a tablespoonful of butter, one-half teaspoonful of salt, one cake of compressed yeast, softened in one-fourth of a cupful of lukewarm water, and add three or four cupfuls of flour, mix all together and knead to a soft dough. Let stand in a warm place to double in bulk. Then mix into balls. When light, brush over with milk and bake in a hot oven.

Cup Cakes.—Take one-third cupful of shortening, add one cupful of sugar, creaming the mixture well. Add one eggs well beaten, one and two-thirds cupfuls of pastry flour sifted with two teaspoonfuls of baking powder, alternate the flour with one-half cupful of milk, beating the mixture well. Bake in gem pans and frost with:

Seven-Minute Frosting—Put one egg white, unbeaten, seven-eighths of a cupful of sugar, three tablespoonfuls of water over rapidly boiling water. Begin to beat immediately with a Dover egg beater and beat constantly for seven minutes. Remove from the heat, add a teaspoonful of vanilla and twelve marshmallows cut into small pieces. Beat until the marshmallows are dissolved, then spread on the cakes.

Prune and Almond Salad.—Stew large prunes, remove the stones and stuff with shredded almonds. Arrange on tender lettuce and serve with a French dressing. Prunes are dates added to sections of orange and served on lettuce with French dressing is a good salad combination.

Nellie Maxwell

Saint Distaff's Day

Saint Distaff's day was a sort of "Back Monday" in old England. It was the seventh of January, the day after "little Christmas," when women returned to the distaff and their duties after the Christmas celebrations.

Br'er Williams

"When you comes ter think about it," said Br'er Williams, "dat's mighty little time in dis life fer foolin' 'round, a-raisin' of h—l an' a-doin' of nothin'."—Atlanta Constitution.

CROSS-WORD PUZZLE

(© by Western Newspaper Union.)

Horizontal.

1—Month
6—Your goat
9—Deeply engrossed
12—Public utilities person
13—Hardens
14—Expression of regret
16—Pastimes
17—A dark pall
18—Having been victorious
20—Small room
24—Flak eggs
25—Turf
27—Girl's nickname
28—Long period of time
30—One who follows up
32—Boy's first name
34—Old horse
35—To pull with force
36—Hit
37—Adversity official
42—Prevaricate
43—Become fatigued
45—Boy's name
46—Fish eggs
47—Mixture of earth and water
48—Unclosed (poetic)
49—Shoemaker's tool (pl.)
52—Yellow
54—Belonging to a person
55—To run off
56—Germany by labor
58—Impressed
59—Cash
61—Nickname of martyred President
62—A weight

Vertical.

1—God of love
2—Short sleep
3—To know (Scotch)
4—Supplement to a salutation (two words)
5—Prospecting piece of wood
6—Healer
7—Harrowing
10—Aftermaths
11—Ewe bear
15—Meadow
19—Small
21—Upward
22—Turned
23—Came to face to face with
24—Christmas carol
26—Verb meaning by means of or near
28—Author of "The Inferno"
27—Acquire
29—Belonging to an eastern university
31—Domestic animal
33—Dance
35—Portible stoves
38—Darkness
39—Grain awards
40—To melt
41—Meat stamp
44—Under side of skin friction
46—Carpenter's tool
48—Latin or French for "is"
51—Thick, slice of anything
52—To belittle
53—Girl's name
54—Upon
56—To be in debt
58—Modest

Temporarily Extinguished

At church, one Sunday morning, Joyce listened to a sermon on "Let your light so shine—"

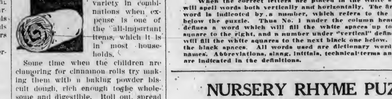
The only part she remembered was the text, but she didn't understand what it meant until her mother said: "It means being good, obedient, and cheerful."

In the afternoon there was trouble in the nursery, and Joyce excused herself for being naughty by saying: "I've blowed myself out."

Gargoyles Out of Date

Gargoyle is a name given to a projecting spout, so placed that it drains the roof gutter. The modern metal pipes have superseded the use of gargoyles to a great extent. In Gothic architecture, these long and grotesquely carved spouts have been of men, beasts or birds in preposterous combination with bodies, paws and wings of monsters. The gargoyles of the cathedral of Notre Dame are particularly famous.

NURSERY RHYME PUZZLE



HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white space this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces in the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black spaces. All words used are dictionary words, except proper nouns. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

TALES FROM BIG CITIES

Monument Honors a Deserving Pioneer

BALTIMORE, MD.—To make up for the neglect of the whole human race property to commemorate the birth of the inventor of all the people, John P. Brady has taken it upon himself to erect a monument to Adam, the First Man.

According to Mr. Brady's calendar, Adam was born October 28, in the year 400 B. C. Every year since he built the memorial in 1926 it has been the custom of Mr. Brady to journey to the monument on Adam's birthday to lay a wreath on it and to hold with such of his friends and admirers as might attend a sort of Memorial day service.

The monument is a plain stone shaft, impressive by its simplicity, surmounted by a sun dial. The inscription informs the observer in bold letters:

THIS, THE FIRST
SHAFT IN AMERICA,
IS DEDICATED
TO
ADAM
THE FIRST MAN.

In a circle around the base of the dial appear the words: "Sic Transit Gloria Mundi." Mr. Brady thus justifies his purpose in building his unique memorial to perpetuate the memory of the leading figure in the history of the world:

"Some of us may blame Adam for the misfortunes we get in this world, but few of us wish we had never been brought here. It was kind of Adam to use first. He gave the way and should be accorded the homage which we pay pioneers in all fields. I thought it was high time Adam had something to show for having been here. Adam was something of a hero after all."

The Constitution of the United States is also the object of Mr. Brady's passion for monument building. This great institution, the great charter of American institutions, is now defunct, according to Mr. Brady, stabbed to death by 18 amendments, not to mention the many constructions and amendments that have destroyed the virility of the original document. And so Mr. Brady has erected a monument with the inscription:

IN MEMORY OF THE
CONSTITUTION OF THE
UNITED STATES
GONE BUT NOT FORGOTTEN

Worse'n a Baby Show to Pick Winners

CHICAGO.—Boys with harmonicas. Boys from every part of Chicago, boys representing all nationalities, boys in pressed clothes and torn clothes, boys in clean shirts, flannel shirts, and sweaters; boys, with a fondness for music and sufficiently determined to outdo every other boy in their fondness for it.

This is what confronted the music critic of the Chicago Tribune at Eckhardt park. It was his duty to select the best team of four players. Before he left, he knew that he was in error about the edge. They are tucked in the sleeve at the wrist or held there by a small wristband of ribbon. Speaking of wrists leads one to that of gloves. Fashion continues to invite them to bring along decorative wrist finishings and cuffs in which kid in two contrasting colors, or embroidery are featured. Belts and girdles find a place in the mode and an elaborate ribbon girdle is often the most important detail of an afternoon gown.

SPIN, top, spin!
Circling out and in,
Whirling 'round before my eyes,
Like a fairy in disguise—
Who would believe a common string
Made you start to dance and sing?
Spin, top, spin!

Read four other spinners. Upper side down, in flowers; upper side down, along bank and shrubs; upper side down, along bird and shrubbery; upper side down, along bird's shrubs.

Daughter Wins Death Race From Mother

LYNBROOK, L. I.—A strange story of the death of Madeline Haverstrom, twenty-two-year-old daughter of a wealthy family of Lynbrook, L. I., who committed suicide in her private home near her home late in the afternoon, has become public. Miss Haverstrom, it was learned, won a 45-mile race for death from Northport to Lynbrook against her mother, who, in another car, was trying to reach home in time to prevent her daughter's going home to herself. Reaching home first, the daughter went to her father's room, took his revolver, and then drove two blocks away in her car, where she shot herself.

The young woman was popular in Lynbrook, and had many friends and admirers. Her father, Louis H. Haverstrom, is in business in New York and has lived in Lynbrook with his family for the past eleven years.

Miss Haverstrom drove to Stony Brook to attend a birthday party at the house of Mr. and Mrs. Julius Davis. She stopped at Northport to visit another friend, Mrs. Leopold Dohm. This friend called up Mrs. Haverstrom at Lynbrook and said: "There is something wrong with Madeline. She's acting very queerly." The mother drove at once to Northport.

Hoping to get her daughter safely home the mother started for Lynbrook immediately. Madeline drove ahead in her coupe, while her mother followed in the sedan.

The mother kept close behind her daughter's car until they reached Hempstead. It was then getting dark, and the daughter succeeded in taking advantage of a traffic jam to speed so far ahead of her mother that the latter entirely lost her track. When she arrived night had fallen. There was no trace of her daughter's car about.

Miss Haverstrom left no note nor did she make any statement to the prosecution of the all-night service from Rock Springs, Wyo., to San Francisco.

"Thus night flying would be in progress over the entire transcontinental route and there would be two daily departures from each end of the present one at all points along the line. The present service would be a "double track" airmail system between here and Chicago and would be transcontinental in every sense covering 2,720 miles, will make a total of 1,905 miles over which night flying will be continuous.

W. E. La Follette, superintendent of the Western Division of the airmail, and a field had been leased at Concord, Cal., in preparation for the extension of the all-night service from Rock Springs, Wyo., to San Francisco.

New York-Chicago Double-Track Air Mail

NEW YORK—The government has under consideration the laying of eight to nine-hour overnight airmail service between New York and Chicago, both ways, it was disclosed by Carl F. Egge, general superintendent of the Air Mail Office department's air mail division.

Boston has been added recently, terminals, way stations and emergency fields are being acquired; machines and personnel have been assigned and a study made of the best routes to be followed. Night airmail will leave the Chicago air terminal at 9 p. m., reaching New York eight hours later (6 a. m.), also for the day's first delivery. Due to prevailing winds the westward flight will be in nine hours.

Mr. Egge pointed out that the best mail train time between the two cities now is 20 hours, the service covering 2,720 miles, will make a total of 1,905 miles over which night flying will be continuous.

W. E. La Follette, superintendent of the Western Division of the airmail, and a field had been leased at Concord, Cal., in preparation for the extension of the all-night service from Rock Springs, Wyo., to San Francisco.

Ten Cents Each Rod for Fences

Cost Includes Labor for Repairs, Maintenance and Interest on Investment.

It costs ten cents a rod a year to keep up fences on the ordinary farm in the grain farming sections of Illinois, according to records kept for the last four years by ten Champaign and Piatt county farmers in cooperation with the college of agriculture, University of Illinois. This cost includes labor for maintenance, materials for repairs, interest on the investment and depreciation. The total annual bill for maintaining fences on each of the farms averaged $145, there being an average of 1,150 rods of fencing on each of them. The average size of the farms was about 225 acres.

Low in Upkeep.

This cost of ten cents a rod easily would be doubled if the losses from fences which ordinarily are overlooked were added to the cost of upkeep, according to C. A. Bottorf, a member of the farm organization and management department of the college, who summarized the records. These losses include the loss of the use of the land occupied by the fence, the loss of crops caused by turning on the growing crop, and the cost of labor for cutting weeds along fences, he said. Then, too, permanent fences often separate two fields in which the same crops are growing, thus causing a loss, because it costs more an acre to operate two small fields than it does one large field.

Use Temporary Fences.

A good way to cut fencing costs is to use temporary fences. The cost of labor for putting up and taking down such fences and the interest and depreciation of the fencing materials would be about the same a year as the cost of maintaining a permanent fence plus the loss of the use of the land occupied by it.

Using temporary fences therefore would lower the cost of fence upkeep by cutting down the total rods of fence needed for the farm, by increasing the efficiency of operation where fields were combined for one crop and by reducing the amount of labor for cutting weeds along fences.

Formaldehyde and Water Cures Smut in Seed Oats

The oat crop is usually the first thing on the spring program. Oftentimes seeding is materially delayed by delay in seeding and sometimes, in the rush, the farmer is tempted to overlook some of the precautions which seem relatively unimportant at the time. One of these is the treatment of the seed for smut. It is one of the little jobs that can be done "any time" and laid aside till planting time. Everyone knows the simple process of soaking the seed oats in a dilute a pint of formaldehyde with 5 gallons of water. Spread the seed out on a tight floor and sprinkle it with the solution, using enough to dampen it thoroughly. Then shovel it into piles and cover it with sacks. They should be treated also.

Flushing of Ewes Helps to Increase Lamb Crop

Flock owners interested in increasing the lamb crop should flush ewes before breeding season, says C. G. Hilltz, sheep specialist, Kansas state agricultural college. He says nature's way of flushing is to turn sheep into rich pasture. Those also have all given satisfaction.

Ewes not fed grain during the breeding season gained 1.7 pounds and had a 129 per cent lamb crop. Those getting feed of various kinds gained 8 pounds per head and had a 147 per cent lamb crop. In terms of 1,000 sheep this would mean 280 more lambs. The ewes got only one-half pound of grain per day at the time.

It made little difference how the ewes were fed so long as they gained. Some got extra pasture, some were fed oats, some corn and oats, and some various mixtures of corn, oats, tankage and linseed meal. In the grain fed lots as well as in the pasture lots, some were above the 147 per cent average and some below.

Poultry Feed Must Have All Required Nutrients

Feeding a balanced ration to poultry means feeding a mixture of feeds that contain proper nutrients for body maintenance and egg production. This ration should consist of as much fresh, green feeds as possible. A very good scratch feed is made by mixing equal parts of corn, oats, and wheat. Each of these grains can be grown on almost every farm.

The grain feeds primarily support the body of the fowls. The mash builds up the eggs. A high protein content in the mash is necessary. The following mash will make a good mash.

Ten pounds meat scraps.
Forty pounds cornmeal.
Twenty pounds wheat bran.
Forty pounds finely ground oats.
Twenty pounds wheat middlings.
Feed the above mash dry from hoppers and substitute two ounces of grain ration for each bird in the litter.

Average Work of Horses

Horses on Illinois farms work an average of about 80 days of 8 hours each per year, according to records kept by 14 Champaign and Piatt county farmers, in cooperation with the college of agriculture. On one farm each horse worked 127 days, or a total cost of $4.27 a crop acre. On another farm each horse worked 53 days, or $9.24 a crop acre. The difference of more than $5 an acre in the cost of horse labor can be charged to the fewer number of horses worked.

Big Value of Silo for Dairy Purposes

Plans for Feeding Vary in Different Sections

The silo has won a permanent place on the farm where good dairying is carried on and the best interest of the stock looked after. The silos in this neighborhood are mostly all built of solid concrete. The cutterbar here has a steel form that he invented himself that enables him to put up a silo in a few days, the weather permitting, says a writer in the Indiana Farmer and Guide. Those silos have all given satisfaction.

The benefits of silos are many. The winter feed can be stored away at a time when other work if not very pressing, a large amount can be stored in a comparatively small place, all the nutrient of the feed is saved in the silo, and there is no waste for control with. The cost of filling a 32-foot silo in this section has been around $15 to $20 for cutter. Field work is done by a ring, that is, five or six farmers take their teams and handle and combine and work together until they are all filled.

Corn harvesters have been found the quickest way to cut the corn for filling silos. The machines being tied together makes it easier to handle and the wagons are better loaded. The main idea is to keep the cutter running full time and not stop for the wagons to come from the field. A good three-horse team can generally keep ahead of the cutter.

Time of feeding the silage vary. The best way to get the most of the silage out of the silo in good shape will be to adhere to the following rules and not vary from them. When ready to feed, throw off all of the fodder silage off the top that has settled level all around. See to it that you remove more than take it all level over the top as you go and it will keep good all the way down.

Stable Manure Is Best Fertilizer for Garden

Common stable manure is the best fertilizer for a garden, but it is often supplemented by the use of some special commercial fertilizers for certain crops. For the leaf crops where nitrogen is most needed a light sprinkling of nitrate of soda will make growth rapidly and improve the quality as well as increase the crop. Acid phosphate will aid in making the plants set crops. It takes so little of any fertilizer to make a garden that the cost is hardly noticeable. It is also recommended that you are only supplementing that which you have in the soil to gain special results.

Some of these in the nature of an experiment of the seed for smut. It is one of the little jobs that can be done "any time" and laid aside till planting time. Everyone knows the simple process of soaking the seed oats in a dilute a pint of formaldehyde with 5 gallons of water. Spread the seed out on a tight floor and sprinkle it with the solution, using enough to dampen it thoroughly. Then shovel it into piles and cover it with sacks. They should be treated also.

Flushing of Ewes Helps to Increase Lamb Crop

Flock owners interested in increasing the lamb crop should flush ewes before breeding season, says C. G. Hilltz, sheep specialist, Kansas state agricultural college. He says nature's way of flushing is to turn sheep into rich pasture. Those also have all given satisfaction.

The difference of more than $5 an acre in the cost of horse labor can be charged to the fewer number of horses worked.

Laying Hens Need Clean Water in Clean Vessels

The modern hen eats a balanced dry mash for egg production, but it takes water to wash down the mash. So it pays to keep a galvanized pail of fresh water near the mash hopper. If the pail is placed in a small wooden straw box just a little wider than the diameter of the pail, it will not be tipped over when the hens jump up on the side.

If iron pails are used for winter drinking fountains you have a receptacle that is easy to wash and clean. A little boiling water and a few corn cobs will soon scrub the scum from the drinking pails and make the water more healthful and appetizing. Hens relish clean water and drink more of it when the fresh supply arrives. The use of clean pails is a great help in keeping down the spread of respiratory diseases.

Best Duck Breeding Stock

Commercial duck raisers usually replace the bulk of their breeding stock each year because the ducks lay the most eggs during the first year. But two-year-old ducks often produce more thrifty ducklings than pullets for breeding stock. Some duck breeders retain five breeding stock until three or four years old, but it is not the usual custom. On commercial duck farms it is usually the custom to obtain new drakes each year and avoid inbreeding as much as possible.

FARM NOTES

As competition is the life of trade so co-operation is the salvation of farm marketing.

Soils that are subject to flooding for more than a couple of days at a time are not good for alfalfa.

Alfalfa may be seeded as clover is sown on winter wheat or rye, using 10 or 12 pounds of seed per acre.

Where alfalfa is sown for the first time, the soil must be thoroughly inoculated with the proper bacteria peculiar to this plant.

Poultry droppings should be used only in limited quantities on the garden in order to prevent burning due to excessive quantities of nitrogen. It is well to mix the poultry droppings with either land plaster or rock phosphate. Do not, however, mix with lime.

Redwood Grove Memorial to Franklin K. Lane

The spirit of the late Franklin K. Lane was invoked at the dedication of the Redwood grove in his memory at Kentfuttle, in Humboldt county, California, recently. He loved the great forests of the Pacific coast and in his official capacity had occasion to turn aside his love into the channels of protection, says the New York Times. Mr. Lane was an apostle of the parks, seeking to preserve, enlarge and improve the lands set aside by state and nation for the enjoyment of future generations. To him the great stretches of wilderness were spots to be saved. But at the same time they were, as he put it, a challenge to man. "Master me! Put me to use. Make me something more than I am!" were the words in which he described the challenge of the wilderness. And in response to it he sought to show the people of the country how much could be added to the available regions by the love and thought of man. It was out of such love for his fellow men that the redwood grove was preserved. They must also be made accessible.

The redwood grove dedicated in his memory is only a small tract—165 acres. It adjoins the Humboldt state redwood park, in the heart of one of the finest remaining redwood regions and itself contains unusually splendid specimens of this giant tree. More common than its cousin, the sequoia gigantea, or "big tree," it has also been subject to greater destruction. It attains before the weight nor the age of the big trees but is often taller. Where the giant sequoia reach a diameter of 35 feet, the redwoods rarely exceed ten feet. John Muir has said, like the sequoia, one of some of the biggest specimens of sequoias at between 3,000 and 4,000 years of age, whereas few redwoods have been found over 1,400 years of age.

The worst enemy of the redwood, as of the big trees, is man, insects and other pests usually unable to attack the large specimens, and even fire more often than not leaves these unscathed, owing to the thick bark and rough nature of the wood. The greed of man, however, is manifest in the fact that the only effective protection is control by state or national bureaus. Trees like wild fire '80s and '90s destroyed the ruthless destruction of these giant forests, by lumbermen who saw in them only wasteful that often two-thirds of a tree was unfit for use.

City's Rapid Growth

Fifty-three years ago, Akron, Ohio, was scarcely on the site for the first rubber factory to be established west of the Alleghenies. At any rate, by the time it was an easy-going little city of less than 10,000 inhabitants, everybody knew, for miles around, of Akron and its rubber industry. The Akron of today is conquered with its more than 250,000 inhabitants, the Indian Rubber Review. The city now covers more than 25 square miles, it has a population in excess of 200,000. Its many rubber and dire factories employ more than 50,000 persons. More than 50 per cent of all rubber tires made in the United States are made in Akron. Akron's annual value of the output of tires and other rubber goods is approximately $400,000,000 a year. Compared to the first rubber factory of half a century ago, run by water power, Akron's modern factories of today consume more than 500,000 horsepower of steam and electrical energy every 24 hours.

Queen of the China Sea

Capt. W. H. Downan, the owner of the famous old ten-clipper Cutty Sark, which is now a museum ship at Greenwich, England, has written a book about her. Captain Downan, who is now 75 years old, was born in Scotland and went to sea when he was 14. He was in command of the Cutty Sark for 12 years. The ship was built in 1869 and was launched by Miss Willis, a daughter of the owner of the shipyard. She was named after Nannie, the witch in Burns' poem, "Tam O'Shanter," who wore a short chemise, which was called a cutty sark.

Duck Eggs Need Clean Nests

Duck eggs are more likely to be dirty than hen eggs, and the nests should be kept clean. Straw is the best material for the nests, and it should be changed frequently. Ducks like to have their nests in a dark place, and they will lay in boxes or barrels on the ground.

Keeping Cream Sweet

Cream should be kept sweet by cooling it to a temperature of 50 degrees or lower. Cream should be delivered to the creamery at least three times a week in summer.

DOES "PERFECT MAN" SHINE AS HUSBAND?

Writer Throws Out a Few Ideas on the Subject.

I have heard it said that a perfectly happy home depends more on a good husband than on a good wife, a writer in the Washington Post, who hides his identity under the initials "E. G. O.," remarks. Certainly, the man who does his best to make his wife happy in a thoroughly conscientious manner will find her much brighter and prettier in her matrimonial state than when she was a girl, and the man who knows how to keep his wife young looking has solved a promising matrimonial problem.

Of course, every woman has her own opinion about what constitutes a good husband. I know a husband who is an nearly perfect as a man can be. He never frowns at additional housekeeping expenses; he never says late at the office; he belongs to no clubs and steadfastly refuses to admit that there are other women in the world besides his wife. He is very perfectness almost drive her insane. The perfect man is seldom the perfect husband. Certain lovable qualities in a hardened sinner will keep his wife a willing slave until she dies.

Sympathy should be the string of the perfect husband. Instead of displaying a complacent indifference to her moods will wives are wisely sometimes to be interested in and to interpret them. If, for instance, she spends a little unhealthy sum she should take warning, and try tactfully to discover the reason. At a time like this many husbands throw up their shoulders and say, "Another spree; it will pass off in time," where upon their wives justly complain that their husbands fail to understand them.

The man who is really anxious for his wife's happiness will remember that if he plays hard golf all day long he is going to be tired and sleepy in the evening, and will be indifferent to her companion for her. Instead of the quiet of an evening at home being broken only by the tap of his pipe against the fender, he should talk to his wife with animation of the order and interest of engagement days. The quiet friends in an [illegible] of solitude which every home-loving man looks forward; but too much quiet soon leads to monotony and dullness, and monotony and boredom are the playing grounds of the devil.

The so-called "sum of the world" often makes a good husband, his experience in family matters making him a past master at the art of pleasing a woman. He is seldom at a loss for a ready compliment, and when his wife, wearing an atrocious new gown, asks what he thinks of her appearance, his immediate answer is, "My dear, you look charming."

Perhaps the best husband is he who has known his wife outs, and who is an old friend before he becomes a lover, as he is in company of admiring friends. If he has seen her in every conceivable mood and in all sorts of circumstances before he proposed to see his wife until after his marriage with her, and the veil was the girl's protection until they were actually wedded.

Facts About Broadcasting

Some interesting figures just been compiled regarding radio broadcasting are published in Radio Broadcast Monthly. These show that 79.5 per cent of the stations licensed in the country are operating of less than 500 watts, an amount of power generally considered inadequate. There are 93 stations with 500 watts output and 14 using more than that amount. Radio and electric companies, dry goods stores, newspapers and other private organizations operate 65 per cent of the stations. Of the remainder, 17 per cent are worked by federal, state or municipal agencies, and 18 per cent by churches.

His Uncertainty

"How are the dances out your way these days, Mr. Johnson?" asked the able editor of the Tumbleville Torch of Liberty and Tuscils of the Times.

"Well, I don't positively know whether we've improved 'em or not," replied Cap Johnson of Humpus Ridge. "But, anyhow, we've made a rule that there shan't be no lighting matches during the d

Much Profit in Well-Bred Bull

Animal Should Be Given Care and Management to Insure Good Condition.

(Prepared by the United States Department of Agriculture.)

One of the most important sins of the dairyman should be to have the services of a good, well-bred bull, says the United States Department of Agriculture, and then, having a good bull, he should be given the care and management that will insure the greatest profit from him. He should be so fed and exercised as to maintain his fertility and healthy, vigorous condition.

Grain to Feed.

The amount of grain to feed to dairy sires varies from four to ten pounds, depending on the size and condition of the animal and the kind of roughage. A grain mixture recommended by the department as having been used with success consists of three parts ground corn (by weight), two parts ground oats, two parts wheat bran, and one part linseed meal. Another mixture suggested consists of three parts ground oats, two parts wheat bran, one part ground corn or barley, and one part linseed meal.

Ground oats are considered especially valuable for bulls. Cottonseed meal is not usually regarded with favor, especially when fed in large amounts. Some breeders think it causes impotency.

On some farms the bulls are given the spoiled or musty hay or waste feed left by other animals. This is poor practice. It is just as necessary to feed the bulls properly as the cows. The legume hays—alfalfa, clover, vetch, soy bean, cowpea—are excellent roughage, and should be fed liberally if possible. If the non-leguminous roughages, such as timothy or prairie hay, corn silage, stover, or fodder are fed, a grain mixture higher in protein should be used.

Use of Silage.

Breeders differ as to the advisability of feeding silage. Some maintain that a considerable amount of silage is likely to lessen the vigor of a bull and make him sterile. Others feed silage in large quantities and report no undesirable results. So far as experimental work shows, it is probable that silage does not have any direct effect on the breeding powers. Large amounts of silage, or silage extremely high in acids, may have a tendency to disorder the paunch so that the bull becomes too heavy on his feet. From 10 to 15 pounds of silage a day with other roughages can be fed safely without impairing the usefulness of the animal.

Dairy bulls should have plenty of water. This matter is often neglected, especially when there is not a constant supply in the stall or pen and when the bull is difficult to handle. A bull should be watered at least once a day during the winter and twice a day during the summer.

Berlin Rebuilds Castles Minus Whims of Kaiser

Berlin.—There has been a reaction in Berlin against the style of city architecture which was popular in the old days with William Hohenzollern and which he was not slow to enforce. The taste of the former ruler is declared today to have been distinctly bad, and now the municipality will have no more of it.

In Potsdam the reaction shows particularly. Here are the palaces of the former royal family, and many of them are being restored to the condition they were in prior to the ascent to the throne of William II. The same policy is to be followed out in Berlin, with its many castles and palaces.

Hard-Working Burglar Forced to Draw Line

Bert met his old friend Bill the Burglar and the two got chatting about things in general.

"I lost you've left your wife," remarked Bert presently. "Why did you do that?"

"Because she was always wantin' me to do somethin'," snarled the burglar moodily.

"What do you mean?" asked his friend.

"No matter how busy or tired I was, she was always naggin' me to do somethin' for her. At last, one night, it was too much."

"How was that?" said the other, interested.

"Well, I came in about three o'clock in the morning," explained Bill, "all worn out from doing too much work. I had opened two strong boxes and finished up by forcing a couple of safes, to say nothing of a vault I cracked earlier in the evening. An' then, when I got in, what do you suppose that woman wanted me to do?"

"What?"

"As I stand here, it's true!" growled Bill the Burglar. "She wanted me to open a box of sardines for her."—London Answers.

Part Vitamins Play in Human Organism

In writing of the fate of vitamins in the body, the editor of the Journal of the American Medical Association says: It has long discovered that they are stored up in the liver. The conclusion that vitamins are highly essential to the welfare of the living organism, he says, as so many recent investigations seem to indicate beyond peradventure is based on the observation of nutritive failure and the appearance of so-called deficiency diseases when some of the food factors referred to are missing from the diet.

"It may almost be regarded as a corollary," he continues, "that, under conditions of a deficit in vitamin-bearing products, the body itself will become impoverished in these physiologically potent factors. For several types of vitamins evidence is now available that this is actually the case. It has been found by Steenbock, Sell and Nelson that the liver is an important center of fat-soluble vitamin storage, varying in its content of this substance with the ration fed. When the diet of the animal becomes poor in vitamin A, however, the liver becomes correspondingly depleted. The depletion of the same organ in vitamin B when the animal is deprived of an adequate supply of this factor has been demonstrated by Osborne and Mendel."

Vicar Shied at Sight of First Locomotive

A very small locomotive, said to be the first ever constructed, is preserved in London. It was built by the famous engineer, Murdoch, and is 14 inches high and 19 inches long. It has two driving wheels and a front steering wheel fitted with a tiller handle.

This locomotive ran trials at Hounslow in 1784. The first experiment was in Murdoch's own house, and then it was tried on the road, where, according to all accounts, it outpaced the inventor.

One night Murdoch went out with his locomotive to an avenue leading to the church about a mile from the town. The engine started off and the inventor went after it. Soon distant shouts of terror were heard. When he came up to his machine he found the vicar in great fear of the hissing, spitting little demon.

At this time Murdoch was in the employ of the firm of Boulton & Watt, and when they heard of the experiments they feared that Murdoch's engines might be distracted from the business of stationary engines. They persuaded him to drop the project and he never took up the subject again.

NEW BRIDGE MENACE TO ST. PAUL'S CATHEDRAL

Famous Historic Edifice in London Is Threatened With Disintegration.

London.—Despite heroic efforts being made to strengthen its fabric, evidence accumulates that St. Paul's cathedral, Sir Christopher Wren's masterpiece, is threatened with disintegration. This evidence has been obtained from various sources during the last 25 years.

The latest warning comes from the recently constituted due arts commission, which agrees against the erection of a new bridge over the Thames opposite St. Paul's on the ground that the great cathedral already is threatened by heavy motor traffic, which is constantly increasing, and that any further shaking may lead to a serious trouble.

The defenders of the cathedral argue two ways. Either the new bridge would carry little traffic and so would be unnecessary, or it would carry a great deal, in which case the constant vibration would endanger Wren's masterpiece, everywhere regarded as one of the finest buildings in the world.

Fears for the safety of St. Paul's first were entertained when the subways were run through the earth in close proximity to the foundations. The vibration was recognized as a menace.

This menace has been steadily augmented by the constant increase in surface motor traffic which rolls past the church, and in very close proximity to it.

Finally, the signatories of the line arts commission against a new bridge and increased traffic are supplemented by a warning from Mervyn Macartney, surveyor of the cathedral. He argues that underground work for the structures of the proposed bridge would threaten the foundations of St. Paul's by tending to drain off the water under the "pea gravel" on which the cathedral stands.

Wheat Dockage Is Heavy, Say Government Experts

When the grain comes through the thresher it should be looked over and if at all dirty or contains much foreign matter, such as weed seed, other grains, etc., which has few exceptions, it will pay to clean wheat on the farm. The United States Department of Agriculture tells us that they estimate farmers of four spring wheat states shipped 11,000,000 bushels of dockage with their wheat last year. This could have been saved and the price paid for a higher grade if the grain had been cleaned at the thresher with a portable flask cleaner. The dockage can be used for feed, or ground and used for poultry at a considerable saving.

Everything must go by January 1st regardless of cost, at Metcalf's the Druggist's.

Lightning Rods Gain in Favor

Weather Bureau Has Been Earnest Advocate of Protection of Buildings.

(Prepared by the United States Department of Agriculture.)

For more than thirty years the weather bureau of the United States Department of Agriculture has been an earnest advocate of the protection of buildings and other property against lightning by suitable rodding. The bureau is frequently called upon to advise inquirers concerning the proper methods and materials to be employed. Occasionally plans are drawn up in detail for the protection of government structures. In 1910 the White House was rodded after plans and specifications prepared by Professor Marvin.

Study of Losses.

To determine the relative liability of farm buildings to fire damage by lightning, a study of lightning fire losses was made recently by the weather bureau of the United States Department of Agriculture. The average annual loss for the whole United States is a little over $12,000,000 which is probably a conservative figure. Illinois has the unenviable first place, with an average annual loss of over a million dollars, part of which may be attributed to industrial sections. Texas is next in order because of its large area and the presence of highly inflammable oil-storage tanks. New York is third, for reasons similar to those affecting Illinois.

Losses in North.

In the highly developed agricultural states of the North heavy losses are suffered, especially through destructive cyclonic thunderstorms. If the index number showing relative liability of farm buildings to damage is small in one state when compared with another having equally destructive and frequent thunderstorms, it is quite probable that protection against lightning is more general in the former state. Michigan, Wisconsin, Minnesota and Iowa are states where it is estimated that somewhat more than half of the farm buildings are protected by rodding.

Condition of Silo and Silage Very Important

The cure used in placing the corn or sorghum that was grown this summer in the silo will now determine the final value of the silage, says J. P. Lassmaster, chief of the dairy division at the department of agriculture.

Before starting to fill the silo it is very important to see that all the hoops are in place, all bad boards or cracks have been sealed, and also that doors fit smoothly and tight. In order to insure a perfect fit of the doors it is advisable to have available a roll of strong roofing paper to be run up on the door facing on the inside and thus insure the doors being air-tight.

The next important step to determine is the stage of maturity of the corn when cut. The chief source of dry matter and food nutrient in the silage crop increases until the time of maturity. Therefore, it is important not to cut the silage crop too green, thus losing considerable food value and also producing an acid silage which is not palatable. The stage of maturity at which corn is ready for the silo is when the grains are dented and glazed and the bottom leaves have turned brown. There is then usually some brown on the shucks of the corn also.

Silage Should Be Used in Liberal Quantities

Present indications point to high grain and forage this fall and winter. Corn is mounting and with a short hay crop in many sections, we can look for high-priced forage. This means it will be necessary to practice economy in feeding. The live stock keeper, as a rule, loses or gains according to his knowledge and method of feeding.

Silage is the best substitute for both hay and pasture and it should be used to the limit. The cheapest forage is in the form of silage and as it is a bulky ration it should be grown on the farm and supplied in liberal quantities.

Silage will lower the cost of the ration, make a profit from the live stock and greatly increase the value of the crops. As a rule, a silo will pay for itself the first year. What other farm investment will pay 100 per cent? Competition now demands economical feeding.

Green Corn Bad for Hogs

Avoid feeding green corn to hogs if it gives them indigestion. Green corn when fed to hogs will lower their resistance and make them susceptible to hog cholera. Many persons believe that green corn is a direct cause of hog cholera. This is impossible since the disease is caused by a virus. The connection between green corn and hog cholera is a coincidence because hog cholera is more widespread at this time of the year, but green corn is a factor.

Eggs Two-Thirds Water

An egg is two-thirds water and if the flock continues to lay well it must have a constant and liberal supply of fresh water. This is just as important for pullets as it is for laying hens, in view of the fact that growing stock needs much more water now than it did a month ago because of its larger size.

Matter of Dy(e)ing

A professor of philology was conducting his class one morning when the word "cosmos" came up for discussion.

"This word," said the professor, according to a California exchange, "is Greek and means order. Harmony is hence beauty; the universe and cosmetics, then, have the same root, as you will see."

"Oh, professor," said a girl pupil, "in that case hennа and Gehenna ought not so very far apart."—Boston Transcript.

Sure, Santa Was Here

OUR CHRISTMAS CAROLS

In pagan days dancing was usually accompanied by singing, and later dancing and singing continued to go together, even in Christian churches. Around the year 1200, however, dancing was given up, but the singing persisted. During the fifteenth century the singing of carols became very popular, particularly in England and France. The first carol printed was the Boar's Head carol, which was printed in 1521, and is still sung every year at Oxford college, England. The French carol was given the name "noel."

CHRISTMAS CONTEST

Have a large bunch of mistletoe hung in the archway. Have the children guess the number of berries on it awarding a prize to the one guessing the nearest.

Federal Onion Grades Revised

Principal Change Is That Minimum Size Shall Be One and a Half Inches.

(Prepared by the United States Department of Agriculture.)

Revisions in the United States grades for northern-grown onions have been announced by the United States Department of Agriculture.

The principal change is the separation of size and grade with the provision that unless otherwise specified the minimum size shall be 1½ inches. If quotations are made on the basis of U. S. No. 1 without any understanding as to a minimum size, it should be assumed that the minimum size is 1½ inches.

U. S. No. 1 grade now included specifications as to firmness, maturity and shape. A limitation has also been placed upon the amount of decay in connection with the usual tolerance which is allowed to cover mistakes which happen in the course of loading and handling.

The revised grades are as follows:

U. S. No. 1.

U. S. No. 1 shall consist of onions of similar varietal characteristics which are firm, mature, well shaped, free from doubles, splits, bottlenecks, scullions, dirt, sun or other foreign matter and from damage caused by sprouting, freezing, disease, insects or mechanical or other means. See size classification.

In order to allow for variations incident to proper grading and handling, not more than 5 per cent, by weight, of any lot may be below the requirements of this grade, but not more than a total of twenty-five tolerance or 2 per cent. may be allowed for onions which are affected by decay.

U. S. No. 2 shall consist of onions which do not meet the requirements of U. S. No. 1. See size classification.

Unless otherwise specified the minimum size shall be 1½ inches in diameter.* Unless may be classified for size on the following basis:

Boilers, ¾ to 1¼ inches; small, 1¼ to 1¾ inches; medium, 1¾ to 2¼ inches; large, over 2¼ inches.

In order to provide a class for very large Spanish type onions grown in some localities, a "Very Large" class is recommended for onions over 3 inches in diameter. Onions may also be described as "Small to Medium" or "Medium to Large" in accordance with the facts.

In order to allow for variations incident to proper grading, not more than 5 per cent, by weight, may be below the specified minimum size and in addition, not more than 10 per cent, by weight, may be larger than the specified maximum size.

Definition of Terms.

As used in these grades:

"Mature" means firm, dry and well cured. Mid-season onions which are not commonly held in storage shall be considered mature when harvested in accordance with good commercial practice at a stage which will not result in the onions becoming soft or spongy.

"Well shaped" means having the shape characteristic of the variety, but slightly off-type or slightly misshapen onions shall be admitted to U. S. No. 1.

"Doubles" and "splits" are onions which have developed more than one distinct bulb. All such onions which are either distinctly misshapen or which show a splitting of the outer scales shall be excluded from U. S. No. 1.

"Bottlenecks" are onions with abnormally thick necks.

"Scullions" are onions which have thick necks and relatively small and poorly developed bulbs.

"Thickneck" means the greatest diameter at right angles to a straight line running from the stem to the root.

"Minimum size" other than 1¼ inches shall be specified in connection with the grade as "U. S. No. 1, 1¾ in. min." or "U. S. No. 1, 2 in. min."

TROPICAL VALLEY FOUND IN ALASKA

Subterranean Fires Keep District Warm.

Seward, Alaska.—Another tropical garden spot has been found in interior Alaska. Jack Lee and Henry Rissell, prospectors, stumbled into a broad valley where monument trees, beautiful flowers and wild game abound. This land is southwest of Mother Goose lake in the Kenai region and is so different from the surrounding country, due to warmth from subterranean fires, that the men at first believed they had been transported to some tropical clime.

The district west of Illiamna lake is composed chiefly of volcanoes, mountains, tundra, lakes and foot-tying hills. The country is absolutely barren of vegetation except moss and short, scrubby alders, with now and then a bunch of short grass.

Coming over a steep mountain pass, at 1,700 feet altitude, the men saw an unbroken forest beneath them. Descending into the valley they found trees three feet in diameter and vegetation far in excess of the surrounding country. Thousands of wild flowers carpeted the lush grass and every kind of game was seen. The trees in this cottonwood, spruce and hemlock. The discoverers were unable to find any indication that any other human had trod the fastnesses.

A party of hunters will soon leave for the spot to get photos and description of the unusual valley which is reported this summer. The other like above the Arctic circle in the head waters of the Porcupine river.

Dance Hall "Bouncer" at Home in Dress Suit

Minneapolis.—Society with natural leather hollow-tire haircut or with wet can start any rough stuff on one of Milwaukee's dance floors and get more than an inch with it.

Bouncers—how many of them athletes at Marquette university, have been installed as public dance halls. They are equally at home in evening clothes or in a battle royal, every man for himself, winner take all.

"It pays to have gentlemen bouncers," said the manager of one of the dance halls. "So many fellows I've handled have been college men."

There was a time when the elderly quiescence of a respectable "bouncer" were a cauliflower ear, a black eye, a high-necked red jersey and a set of brass knuckles, but times have changed.

The "bouncer" of today, who presides over the peace of a modern dance place, must have the ability to wear a dress suit in addition to a shining set of polished manners, the part of a diplomat and, of course, the ability to "bounce."

Several star athletes at Marquette university, members of the two-year undefeated football team, can be found keeping in trim as "bouncers." They include Lu Vero Dolese, all-western end and captain-elect of the 1924 team; Francis (Gus) Lane, 244-pound tackle; Dick Flaherty, 195-pound end, and W. E. O'Mara, a former Marquette squad member.

Elgin to Preserve Trees Over 1,000 Years Old

Elgin.—Cedar trees that were good sized saplings during the first crusades, according to foresters, have been turned over to the Illinois Natural Society society of Elgin by a society, and will be cared for in perpetuity by the society. Only one stately large grove of arbor vitae, or white cedars, is said to exist in the state.

Foresters estimate that many of the cedars in Elgin are more than 1,000 years old, and that very probably the present grove is a part of a large wood which was well developed in the Ninth or Tenth century. The trees belong to the same family of plants that include the famous cedars of Lebanon. Scientists say that, barring external accidents and disease, there is no reason why the trees should not live another 1,000 years.

The society, according to Clark F. Oppenheimer, president, plans to place a permanent label on every tree in the 124-acre park, and to maintain the grove as a scientific preserve and as a public show place.

Names in Ink on Back Mark Newborn Babies

Baltimore.—There will be no more of mistaken identity among the children born in the maternity ward of Johns Hopkins hospital if the new system for marking babies is a success.

At present the babies wear necklaces with their names spelled out in the beads. Under the new plan the names of the babies will be marked on their backs with ink which will wear for about three weeks.

25c to $35.00.

FESSENDEN THE DRUGGIST.

Cabbage Ranks High in Vegetable Group

Has Become One of Most Important Crops.

(Prepared by the United States Department of Agriculture.)

Cabbage, with a market output of more than 30,000 carloads a year, has become one of the three most important vegetables in the United States, ranking next to potatoes and tomatoes. About two-fifths of the market crop is early Southern cabbage mainly from Florida, Texas, South Carolina, Virginia and Alabama. Three-fifths is shipped from the North and West, mainly from New York, Wisconsin, Michigan, Colorado and California.

These facts are brought out by the United States Department of Agriculture in a new department bulletin entitled "Marketing Cabbage." Kraut manufacturers take about one-seventh of the commercial crop. It is said, the quantity varying greatly according to production and market conditions. Kraut is made from northern cabbage of the late kinds. Domestic uses and the factories are located mainly in New York, Wisconsin and Michigan.

New York, Philadelphia, Pittsburgh and Chicago are said to be the largest consuming centers, the four cities averaging one-fourth of all cars of cabbage used. Pittsburgh, Cincinnati and Kansas City lead in pounds of cabbage per capita shipped to these markets. Cabbage consumption in the leading cities is said to be about the same in quantity year after year, but there is a tendency toward increased production, especially in the early shipping sections.

Copies of Department Bulletin No. 1242 entitled "Marketing Cabbage" may be obtained free upon request to the United States Department of Agriculture, Washington, D. C.

Golden Ankle Chain Newest Fad in Paris

Paris.—The display of fashions at the Longchamps races indicated that skirts are now climbing back toward the knee, with no guarantee whatever, of course, that the knee is where they will stop.

Beauties from all parts of the world were among the huge crowd at the track, many of them introducing a novelty which will doubtless be the rage in America within a few days if it isn't in order there already.

This consisted of a thin gold chain, worn on the right ankle, outside the stocking. As far as could be learned from close scrutiny and some inquiry, this chain has no use whatsoever.

Simplicity of lines, however, was observed in most of the brilliant costumes. Coats were of seven-eighth length with belize the prevailing color. They were trimmed with furs, which in many cases represented no more than the humble rabbit skin, made up in imitation of various expensive furs

Old-Time Christmas

OUR forefathers had few of the opportunities for enjoyment we have nowadays, but what opportunities they had they made full use of. The grand time of ninth and jollity landed round about Christmas and the New Year, and for days they let themselves go with an enthusiasm that would leave this present age far behind.

In country districts all work ceased for three or four days at Yule. This meant that for a number of weeks previous flails had to be busy early and late threshing a sufficiency of straw and grain to last through the holiday time. The women folk had to be as busy inside as the men were out. The "Yeel kebbuck" had been long before well pressed and "wun," but ale had to be brewed, cakes, bread, and bannocks baked, and a supply of smoked fish bought and stored for the grand occasion.

In some districts omens were drawn from the way the wort boiled in the brewing and the way the cakes behaved in the baking. "If the wort biles I' the pot" was an old saying. There was an oatcake baked for each member of the household, and if a cake broke in the baking then death was to be the lot of its owner before the coming year had run its course.

ORIGINAL SANTA CLAUS

He is believed to have been St. Nicholas, a bishop in the year 300. He was famous for his kindness to children. It is said that one night, wishing to help a nobleman who was so poor that he had no money for his daughter's dowry, the good bishop looked in at the old man's window and saw him asleep by the fire. He then climbed upon the roof and dropped a gold piece down the chimney, thinking that it would fall upon the hearth. But it fell instead in one of the gentleman's stockings, which his daughter had hung up to dry beside the fire. This started the custom of hanging stockings over the fireplace and the belief of Santa coming down the chimney.

Financial or Otherwise?

The tongues of the gossips were busy in the suburban town, over the latest marriage. "Have you seen the bride?" asked one. "Has her husband any money?"

"I don't know about that," replied the other with some reluctance, "you know he didn't live here."

"Well," said the first speaker, "you know she said she never would marry a poor man."

"I know, my dear, but she hasn't been married a month, yet everybody is saying, 'poor man.'"

Tests Show Markton Oat Free From Covered Smut

The Markton oat, is the first variety of common oat with high-yielding ability and fairly satisfactory kernel characters which has been found to show complete immunity from covered smut, says the United States Department of Agriculture. Markton has been the highest yielding variety at Moro, Oregon, during the ten-year period from 1914 to 1923, inclusive, and at Pullman, Washington, in the four-year and five-year periods, respectively, in which it has been included in the tests.

If for any reason Markton does not prove superior for commercial purposes, it still should be a valuable variety for hybridizing with other varieties of common oats. If by this process smut-immune strains of important commercial varieties, such as Silvermine, Swedish Select, Kherson, and Green Russian, can be developed, substantial progress will have been made in reducing the loss caused to the oat crop by smuts.

The development of this new variety of oats is described in a new publication just issued by the United States Department of Agriculture as Department Circular 324. A copy may be secured upon request, as long as the supply lasts, from the Department of Agriculture at Washington, D. C.

Sweet Clover Does Best on Well Fertilized Soil

Sweet clover, like all other plants will do better on well fertilized soil than upon poor ground. However, it seems to be less dependent upon a fertile soil than is alfalfa. If the soil is sweet, and the proper inoculation is used, reasonable success can be expected from sweet clover, even on the poorer class of soils.

The best success has been usually had with seeding sweet clover with grain in the spring, using from eight to twelve pounds of seed per acre. We recommend the use of the biennial white sweet clover where it is desired to pasture this crop. In writing for seed, mention that you desire the scarified biennial white sweet clover. Sweet clover seed has a tough, resilient coat.

Famous Roman Monument

Trajan's column is a superb marble column in Trajan's forum at Rome, erected in 114 A. D., by the senate and the Roman people, to commemorate the victories of Emperor Trajan (98-117 A. D.) over the Dacians, the Kansas City Times tells us. It is 132 feet high and about 12 feet in diameter, and is constructed of 34 blocks of Carrara marble, adorned with sculptures in bas-relief. The summit, which is reached by a spiral staircase of 185 steps, was originally surmounted by a colossal gilded statue of the emperor; but this, having fallen to the ground, was replaced by Pope Sixtus V in the Sixteenth century with one of St. Peter, 11 feet high. The ashes of Trajan rest beneath this column.

NEW PALACE THEATRE

Attractions for Coming Week

Friday, Dec. 19th

Glen Hunter and Viola Dana in the Paramount picture "Merton of the Movies,"—a James Cruse production. If grade-A comedy, genuine novelty and wholesome love-interest appeal to you in a picture, this one's made to order for you. Given for the benefit of the Normal Class.

SATURDAY AND SUNDAY

"The Bedroom Window," starring May McAvoy. What happened the night Martin was killed? Who killed him—and why? We know—but mum's the word! But this much is no secret—this mystery—thriller has everything. And you'll be surprised! We will also show No. 11 of "The Telephone Girl."

TUESDAY AND WEDNESDAY—

"Tiger Love" starring Antonio Mareno and Estelle Taylor. The title of this picture suggests the type. There is good plot and acting thru-out the whole play, which holds the interest to the last. We also show No. 6 of "The Go-Getters,"—title, "A Miss In The Dark."

Christmas Afternoon, Dec. 25th

All the children of this city and surrounding territory are invited to a FREE SHOW at the Palace theatre at 2:30 p. m. Santa Claus will be there with his pack on his back. "Welcome Stranger" with an all-star cast. This picture was booked especially for Christmas Nite. A gripping story proving that all the Pep isn't in the big city. Life in a small New England town can be mighty, goshdurned exciting. Also Jimmie Adams in "Roll Along," this is a Christie comedy.

—) PERSONALS (—

H. W. Garrett, of Grand Rapids, is a business visitor here to-day.

Mrs. J. J. Hallett left Monday for New Mexico to visit relatives.

Born, Tuesday, Dec. 16th, to Mr. and Mrs. Clarence Bridge, a son.

Attorney Lisle Shanahan was in Traverse City last Friday and Saturday on business.

Mrs. Irving Hallett and children joined Mr. Hallett at French Lick, Ind. the first of this week.

Dr. Palmer, of St. James, spent the week end at the Hotel Charlevoix, returning to the Island Wednesday.

Mrs. Wm. Finucan returned Tuesday from Herkimer, New York, where she has been visiting a sister for several weeks.

John Glados, for the past six weeks a visitor in Detroit, Saginaw, Flint and other southern Michigan cities, returned home Friday.

Jack McCall has taken a position with the Hannah & Lay Mercantile Co. in Traverse City, and left for that city Friday to enter upon his new duties.

Rev. H. R. E. Quant drove to Petoskey this morning to meet his daughter, Morella, and Miss Helen Mason, who are students at Ypsilanti. They will spend the holidays here.

An indoor baseball game, played at Petoskey last Thursday night between Petoskey and East Jordan resulted in a 5-5 score with the game running twelve innings. The same teams meet again tonight at East Jordan with each team making a struggle for supremacy.

The Sunday School class of Miss Cordelia Kelderhouse, known as the "Busy Birds," have just completed and delivered to the Charlevoix Hospital two fine pictures for the beds and puzzle pictures, for the entertainment and amusement of convalescing children.

The finest line of Toys and Holiday merchandise in Northern Michigan, now on display at Fessenden's drug store.

Bert Carey was a business visitor in Traverse City one or two days last week.

Mrs. Charles A. Neubert left Saturday for Chicago where she will visit relatives.

Miss Suzanne Brisbois, for some weeks past a visitor in Toronto, returned to St. James Wednesday.

Captain O. E. Wilbur goes to Chicago Monday to spend the holidays with his family and remain for the winter.

Mr. and Mrs. John W. Kirby are in Sheboygan Wis., where they will spend the holiday season with relatives and friends.

Mrs. Emery Pierce, of Sault Ste. Marie, whom we reported last week as being very ill, is much improved and on the road to recovery.

Gerald Richardson, student at the U. of M., arrived here Wednesday and will spend the holiday vacation with his parents at 308 Clinton St.

Fred J. Coon was a passenger on the Str. Sanford for St. James last Monday. Fox hunting on Beaver Island for a few days was the reason for making the trip.

Postmaster George W. Weaver returned from southern Michigan Monday after spending ten days with his son, Dr. Franklin W. Weaver, during his recent illness. Dr. Weaver's condition was much improved when his father left, and will soon be in his usual good physical condition.

The wrecking of the oldest net room on Beaver Island, formerly belonging to the late Daniel J. Martin, has just been completed and in its place his widow, Bridget Martin, has erected the most up-to-date bungalow on the Island. The work was done by contractor Charlie E. Tilley. Mrs. Martin is certainly enjoying the comforts of her new home, these long, cold winter days on Beaver Island, her happiness marred only by the thought that Dan J. is not here to share its comforts.

The finest line of Toys and Holiday merchandise in northern Michigan, now on display at Fessenden's drug store.

Murdick's Candy

IS GOOD CANDY!

We Invite Inspection.

Murdick's Candy Kitchen
BROWN BUILDING.

Christmas Special

Friday and Saturday, Dec. 19--20.

100 lb. Sack Morton Salt,	$ .75
100 lbs. Oyster Shells,	$ 1.15
50 lb. Salt Block,	$ .45

We wish you a Merry Christmas.

Argo Milling Company.

Miss Maggie Colter left for East Jordan today, and will spend the holiday season with relatives.

W. S. Richardson was an early morning visitor in Petoskey Wednesday, driving over to meet the north-bound train on the Pennsylvania road.

Mrs. Francis Donlevy, of St. James, underwent a major stomach operation in a Chicago hospital Wednesday, and reports are favorable for her recovery.

Mrs. Adah Beaman entertained a party of eight at dinner for her son George last Saturday. The party attended the ball given by the High School "C" Club after dinner.

About twenty friends gave Mrs. Bert Alcox a pleasant surprise last Thursday, the event being carried out to assist her in celebrating her birthday anniversary. The party was served with a most delicious dinner and spent the evening playing games an various other forms of amusement. Before their departure the guests tendered their congratulations and wished for Mrs. Alcox many happy returns of the day.

The Str. Griffin, Capt. James H. Gallagher, entered the port of Charlevoix from Buffalo last Saturday night and continued up Pine Lake to Boyne City, where she went into winter quarters, having finished her work for the 1924 season. A terrific windstorm, one of the worst of the season, was raging throughout the Great Lakes region last Saturday and Sunday, the wind at times attaining a velocity upwards of sixty miles an hour and probably at its worst about the time the Griffin entered this port.

Little Mary Macsawby, daughter of Mr. and Mrs. Dan Macsawby, of Charlevoix, is now a member of the WLS Lullaby Listeners' Club and wears the badge of the Order. The meetings of the novel organization are held every evening at seven o'clock over the radio from the Sears-Roebuck Station in Chicago, with "Little" Glenn Rowell and "Big" Ford Rush in charge of the ceremonies. "Smoky" the duck, and "Statie" the parrot initiate the members and the Woodshed Theatre has been organized for the entertainment of the club members.

To-night members of Pine Lake Lodge No. 122, Knights of Pythias will entertain at their Castle hall the wives, daughters, sons, etc. with a buffet lunch, cards, dancing and games, thereby providing an evening of real enjoyment for everyone directly interested in Pythianism and the social functions for which this fraternal order is famous.

Social functions given by the local lodge are looked forward to by patrons of the order. They are pronouncedly enjoyable and in the meeting this evening there will be no lack of entertainment. In this regard the K. of P.s are well established.

Sweet Clover Silage Is ... Much Inferior to Corn

Sweet clover silage is distinctly inferior to corn silage for steers, although it does have some succulent merit. Silage can be made of it alone when it is first wilted or partly dried so as to reduce the water content to about 65 or 70 per cent. Only a fair grade of silage can be made from freshly cut green sweet clover mixed with dry oat straw or chaff or shelling in the proportion of one part stock in six parts clover. Steers have been fed this ration quite favorably for short periods, but it is less palatable than corn silage and less of it will be consumed. The best use of sweet clover is for pasture. Remarkably good results have been noted in various parts this season, but like other plants, it does more service in its proper place.

Control Grub Worms in Corn Ground by Plowing

Grub worms are controlled by fall plowing and rotation of crops. Grass crops are most susceptible to them and land that is in grasses is most liable to become infested with the worms. Therefore, when such a field is badly infested it should be followed by some crop that is not seriously injured by the grubs. They are not particularly injurious to wheat. If the soil is plowed soon and sowed to wheat the injury from grubs next spring will not be very extensive.

The finest line of Toys and Holiday merchandise in northern Michigan, now on display in Fessenden's drug store.

WANT COLUMN

FOR SALE—House and lot, 403 Petoskey avenue. For particulars see L. S. Ranney. tf

CHURCHES

Methodist Church.

Harry R. E. Quant, Pastor.

This is Christmas Sunday. We reciprocate the gift of Christ by our gifts to needy children. This is known all over the state as "White Gift Day." Here is a worth while work. You know of course, the Children's Home has a receiving home at Farmington, Mich. into this home go the children while plans are made for permanent homes. This home is licensed to care for 28 children. "But," you ask, "where do the children go when they have been examined at the central office?" Here is an example—the results of one month this year when we cared for 107 children:

Placed in pay boarding homes, 113.
Placed in free boarding homes, 5.
Placed in receiving home, 23
On trial for adoption, 7
In hospitals, 5. On visit to relatives 6

In carrying on the work of the Michigan Children's Home, we want your interest, your co-operation and your financial aid. You, happy in your own home, can see how much it means that these little children who come to our open doors, should have care and attention. And so we ask your financial aid to carry on this thrilling work—this work of planting the tender shoots of childhood in the rich soil of good surroundings. We ask you to aid us in keeping the doors open. Bring your offering Sunday benevolently, joyfully and gratuitously. The pastor will preach. Subject, "The Open Door." A class of fourteen boys will be received into church membership. Special music by the choir.

12 o'clock Sunday School. A banner is now awarded to the class or classes with largest offering and attendance. Mrs. Poole's class got both last Sunday. Secure your neighborhood those who do not go to Sunday School anywhere. Bring them in. Let's have a big school with big interest and big business. The lesson this week "Christ for the need of the world."

6 p. m. Junior League. We were delighted to see the number who attended last Sunday. What preachers, missionaries and Sunday School workers are wrapped up in the group only the almighty can tell. Isn't it a pleasant thing to have some part in shaping the lives of these lives youngsters?

6 p. m. Epworth League. Girls and boys of high school age come into these meetings in increasing numbers. They listen to the leader with intense interest. They sing the songs with lusty voices. There are some not yet coming. We wish to extend to these a most hearty welcome.

7 p. m. evening service. We will exhibit the slides of "The Passion Play of Oberammergau." Special music, window cards for advertising, fifty-six magnificent colored slides, with lecture. A story that all should see and hear. But few have the opportunity. This is a good time, Come. An offering will be taken.

Prayer meeting every Thursday at 7:30 p. m. Read the 22nd chapter of the Acts of the Apostles. Come in and pray and sing and worship.

Monday next the 22nd Epworth League social in the form of a Christmas "grab bag." Leaguers bring some gift wrapped, of 25 cent value. If everyone does one, everyone will get one. Boyne City Leaguers will be our guests unless the weather man gets in the way. Other social events" are being planned by the efficient band of young people for the winter's recreation. Come in with us. We value your suggestions.

The Christmas eve service portends to be a real event. The beginners department of the Sunday School will render the pageant "The Dream of Santa Claus." His eminence of reindeer fame will be in evidence. Two hundred boxes of candy and nuts will be distributed to the Sunday School scholars.

Congregational Church

Clarence W. Long, Minister.

Sunday 10:30 a m., Call to Worship, with a full chorus choir and sermon by the pastor.

Sunday 12 m. The Church School. A. F. Bridge, Supt.

Sunday 6 p. m. Y.P.S.C.E. The attendance and interest is good. Come!

Sunday 7 p. m. Call to Worship. The men, yes the big men, both in stature and point of service make up the choir and help mightily toward making this meeting a success. Short and timely sermon by the pastor.

The Sunday School is planning a Christmas program to be given Christmas eve in the auditorium of the church with the usual music by the children and Santa Claus party you will enjoy to hear and see, so come and join the merry company.

Keep your ear out for the adult chorus choir of the church. They will be heard Christmas eve.

Christmas day at 4 p. m. the choir will render a choral vesper service in the auditorium of the church. If you know this choir you will put yourself out of the way to be present.

The annual meeting of the Woman's Missionary Society this Friday 2:30 p. m. at the home of Mrs. Wm. Parmelee. All members be present.

Notice to Taxpayers

I will be at the Charlevoix County Bank December 27th and January 3rd to receive taxes.

Cora D. Rodger, Charlevoix Township Treasurer. 2t

The finest line of Toys and Holiday merchandise in northern Michigan, now on display at Fessenden's drug store.

Baptist Church

Rev. Herman Burns, D. D., —) Pastor (—

10:30 a. m. preaching service, "A Christmas Study," by the pastor.

12:00 m. Bible school "God's Gift to the World."—John 1:14-18.

7 p. m. Christmas exercises. It is suspected that Santa will be there or send his gifts.

The usual mid-week service will be omitted on account of the Holiday season, but will be resumed on Thursday evenings thereafter.

Nearly forty members of the BYPU held their business meeting at the Jas. Meggison home south of town last Friday evening. This was followed by a delightful social time. The hostess and her daughters served refreshments. The occasion was greatly enjoyed by all.

Mrs. M. A. McDonald was given a surprise luncheon at the Milner home on the afternoon of Dec. 10th. The President, Mrs. Bearss, in behalf of the society presented her with a silk scarf. Then followed a brief program consisting of a solo by Mrs. Correll, and recitation by Mrs. Shearer, Miss Correll and Mrs. Metcalf. A bountiful lunch was then served and a most happy social hour followed. Mrs. McDonald expects to move to Grand Rapids with her son Malcolm A. McDonald, retiring Register of Deeds. She has made a host of friends during her residence here, and will carry with her their best wishes. Her happy, cheery disposition and genial ways will doubtless soon gather about her a company of new friends who will esteem and love her as her Charlevoix friends do.

Dr. and Mrs. Burns will leave Monday to spend the holidays with their children in Detroit, and at their home in Cassopolis.

M. A. LEVINSON & CO.

SINNERS IN HEAVEN

BY CLIVE ARDEN

COPYRIGHT BY THE BOBBS-MERRILL COMPANY

A TRANSFORMATION

SYNOPSIS—Living in the small English village of Darbury, old-fashioned and sedate place, Barbara Croft, daughter of a widowed mother, is soon to exchange her maidenly life for Hugh Rochdale, rich and well connected. Barbara is adventurous, and has planned, with an aunt, an airplane trip to Australia. Major Alan Croft, famous as an aviator, is to be the pilot. At her first meeting with Croft Barbara is attracted by his manner and conversation, different from the cut-and-dried conventions of her small town. They set out, Barbara, her aunt, Croft, and a mechanician. Word is a few days' stop in Darbury that the machine is behaving and its occupants in good health. Barbara, after lunch, watch the airplane in a turfless stretch which apparently solidified the island in the Pacific ocean. The other two members of the party had perished. The two castaways build a shelter. In Croft's absence Barbara is attacked by a black boy, evidently a savage. Croft rescues her.

PART TWO—Continued.

He could see now, in the stronger light, that all were armed with long spears, two also carrying bows and arrows. The third, an old man, wore round his neck a large disc-shell disk—emblem of the rank of chief—and through his nose-cartilages a dark stone. Rings, probably of tortoise-shell, hung from his ears.

Croft wondered if this were a visit of negotiation, with a view to a compact of friendship with visitors to their island. He recognized them for members of the huge scattered family of Melanesian, or Papuans, which have some undoubted connection with the African blacks, and are to be found in numberless South Sea islands as well as in Melanesia proper. Although their dialect is more or less local, there is sufficient similarity to make it fairly intelligible to any one accustomed to the variations.

A few minutes, and Croft's illusion of a friendly contingent was dispelled. Hostility was evident. He soon realized that an attack was being organized for the following night, though he could not distinguish the plans being laid.

Emboldened by the absence of any sign of their enemy, the men remained standing for several minutes, gazing down the slope at the solitary nut wherein Barbara lay unprotected. At last, after an individual colloquy, they moved slowly forward in its direction.

For a moment Croft's heart seemed to stop beating. To expose himself, unarmed, would mean certain death, and the consequent abandonment of the girl, whose life now rested upon his, to a fate probably far worse. Inside the hut, if he could but reach it, lay the sentence containing life preserver. Should he risk all and dash from his hiding place or—? A sigh of relief escaped his lips when the men suddenly halted. For what seemed an eternity he watched them confer together, evidently debating the opinion on the wisdom of their venture. When at last they turned and made off toward the south of the island, he found his clenched hands were shaking and his brow was wet. He hurried down to the hut, where he found a white-faced girl ineffectually battending the door with suitcases.

She uttered a welcoming cry on his appearance at the window.

"How did you escape? Where were you? What can we do?"

To his own amusement perhaps as much as hers, he laughed—almost happily.

"They have gone away," he replied. "We can't do anything at present."

Six pairs of eyes in some bewilderment, knowing nothing of the reaction which had ensued that strange flight in his face, and laughed again, boyishly; then leaned further in for a closer inspection of the blue-clad figure with its cloud of hair.

"You are better?" he asked.

The paleness of her cheeks changed suddenly to red under his scrutiny.

"I—I'm all right," she muttered, turning away.

"I will go back for the water," he remarked; and his face disappeared from the aperture.

Barbara's mind was unconfusedly confused. Safe in some refuge she had seemed to be sleeping for hours. When she awoke she instinctively sought for a hand which proved not to be there. Throughout the terrified moments that ensued, vague impressions of some midnight event impressed themselves on her brain. They were intensified by Croft's apparent ease. Vainly she tried to capture the threads; to separate the real from the chaos of delirium. All was confusion, formless repetitions of accumulated horrors. She caught first at one thread; then lost it and caught at another. But ever at one point the cheeks burned. How much was true? Surely not—. The more she thought, the more convinced did she become of its incredible reality. . . . How could she face her companion? He alone could place the miraculous threads in her hands. But how to make him do so? How—

So engrossed were her thoughts that she started violently at the sound of his voice. Again at the window.

"Your nerves are awfully weak," he remarked.

"They are not!" she snapped indignantly. Was she always to feel foolish—and—above all, appear—so, with this man?

Opening the door, she took in one of the buckets, without looking up.

A genial, steaming bath could not have been more welcome than that little basin of cold water. The freshness invigorated her, reviving a girlish interest in appearances. Unpeeling a tiny traveling mirror, she proceeded to do up her hair, dressing in one of the cool washing frocks intended for Australia.

Croft was thumping on the hut, demanding breakfast, before the completion of this toilet. His quick glance took in her dainty and very civilized appearance down to the gray suede shoes; but he made no comment.

Again the contents of the old tin box proved invaluable, with the addition of bananas and cocoanut. They spread their store upon the ground outside, in the early morning sunshine.

Conversation languished. Croft seemed abstracted, deep in thought. Her riddle of the night lay unsolved. . . .

After several furtive glances at his face, she made a plunge.

"I want to know—"

"Yes? What?" Quickly, his eyes searched her own, causing her to lower them confusedly.

"I can't remember what happened—I'm afraid I—did I behave rather stupidly, last night?"

He stretched out his hand for a banana, gazing it with fascinating deliberation before replying.

"You were, naturally, slightly unhinged after all your experiences."

This guarded reply was unsatisfactory.

She felt exasperated. Looking across at him, she fancied the suspicion of a smile hovered around his lips.

"You realize, of course, that any—any I did—or said—was because—because it was not my normal state—"

"Oh, I quite realize that!" His tone caused her to look up quickly again.

"Why are you laughing?" she asked uneasily.

"Why are you so afraid?" he retorted.

Nonplussed, she took refuge in a dignified silence. Finishing her breakfast, she looked round the bay—at the jagged hill beside them, the palms and dense forest trees in the background, the sand—single and white—and then down the slope at the solitary nut wherein Barbara lay unprotected. At last, after an individual colloquy, they moved slowly forward in its direction.

For a moment Croft's heart seemed to stop beating. To expose himself, unarmed, would mean certain death, and the consequent abandonment of the girl, whose life now rested upon his, to a fate probably far worse. Inside the hut, if he could but reach it, lay the sentence containing life preserver. Should he risk all and dash from his hiding place or—? A sigh of relief escaped his lips when the men suddenly halted. For what seemed an eternity he watched them confer together, evidently debating the opinion on the wisdom of their venture. When at last they turned and made off toward the south of the island, he found his clenched hands were shaking and his brow was wet. He hurried down to the hut, where he found a white-faced girl ineffectually battending the door with suitcases.

"They Wouldn't Kill You," He said. "Do You Understand?"

She uttered a welcoming cry on his appearance at the window.

"How did you escape? Where were you? What can we do?"

To his own amusement perhaps as much as hers, he laughed—almost happily.

"They have gone away," he replied. "We can't do anything at present."

Good Stories Golfers Tell of Royal Game

In 1921 on the course at Kirkfield, Ontario, R. McGregor needed to hole seven all-square going to the home hole in the final, and when they reached the green McGregor seeded to sink a long putt to win the match. He played the ball cleverly, but it rolled round it to drop into the hole and decide the match in favor of McGregor.

Crowds and sun-guilt frequently carry off golf balls, sometimes dropping the ball actually on the green, a stroke of fortune for the player, and it is quite a common incident a cow swallowing a golf ball...

A golfer at Newark in May, 1907, drove the ball into the river. The ball struck a swan two pounds in weight and killed it.

The Montreal yarn about the squirrel that stole and bill sixty-odd golf balls against a hard Canadian winter is more than matched by a report from R. H. Dickover, American consul at Kobe, Japan, in commenting on the increasing popularity of gold in Japan, Consul Dickover tells solemnly of the crows that infest the links of the Miko club and make away with the balls, even those sticking to the fairways.—Golfers' Magazine.

Simultaneous Ideas

Darwin originated the natural selection theory of evolution, so far as he himself was concerned, but it is a curious fact that by an extraordinary coincidence Alfred Russel Wallace formulated the same theory at the very same time of its utterance by Darwin. Both men published articles presenting this theory in the same number of the Journal of the Linnsean society in 1858.

"They Wouldn't Kill You," He said "Do You Understand?"

clenched itself upon her knee; the faint color drained away, leaving her face quite white.

"Can't we go—hide somewhere—in the ferry?" she urged, turning dark eyes-of fear upon him.

He shook his head. Very thoughtfully, from every point of view, had he considered the position. Should they, by hiding, elude the natives to night, it would be but a respite. The same danger would surround them every moment they spent here; they could never know peace or safety. For some reason these natives were hostile; something must be done to overcome their hostility. Guilt and unfriendly conquest could be made; they must be forced to leave the two white people alone, through fear. All this he explained to the girl, who recommended the wisdom of it, as well as what she deemed the impossibility.

"Two! Against, possibly, hundreds! How can we make them fear us?" she asked hopelessly.

"Through their superstition," he replied promptly. "Once make them believe we deal with the supernatural, or possess magical powers, and they will make us taboo. The dread of death or disease from visitation is also with equine them to shun us like lepers."

Barbara, inexperienced in natives' ways, was only half convinced. She hesitated incredulously to the scheme he propounded, her knowledge of electricity being limited.

"I will get some sticks," he concluded, rising; "and place everything in readiness; then I shall turn in for a bit. This afternoon we'll strengthen the walls of the hut; and I'll put up a partition. Then we shall each have a room and I will can build another hut. Plenty of wood before us, if rescue doesn't come soon."

Silently, she helped to collect sticks, an extraordinary numbness pervading her mind. Croft's spirits rose. He had found food eluded death too often to fear it. His confidence in this simple ruse puzzled her.

Collecting the rubber shoes absorbed by the wireless outfit, he broke the sticks into short stakes, showing Barbara how to construct them.

This done, he proceeded to fix them firmly in the ground round the hut, then attached the aerial to the top of each; thus forming a wire circle a few inches above the ground, so far from the hut as the amount of aerial permitted. The two ends were carried through the entrance and connected to the transmitter within.

"Now," he exclaimed, "when I wave, press the key on the transmitter here, and watch the result."

He went out to the wire and, kneeling down, placed one hand about half an inch above it. Holding the other, he gave the signal.

She pressed the key as directed. Immediately, a series of bright blue sparks flashed like fireflies, from the wire to his hand, which he repeatedly jerked away; then, delighted with the success, he returned to her.

"I'm sorry to frighten you," he said quietly. "The wireless of current is always large with power. Therefore takes effect in sparking at the moment of contact. The human body is, of course, a conductor. Should any of the natives meddle with our wireless, they will get the shock of their lives—especially as they usually approach any object of attack by waddling about on their stomachs!"

He chuckled with the anticipatory enjoyment of a schoolboy over a practical joke; then suggested having some food.

Mechanically she fetched Aunt Dolly's box and drew out tin of beef and coffee, hopelessly true to shore in her confidence.

He talked on, compelling her to attend, diverting her thoughts until the actual ended, covertly watching her every expression. Then he drew her within the hut, to rest.

Mechanically again, she entered, gazing at the wireless of life hope that just ebbed, to and fro, playing with the weapon in his hands, calmed her, leaving her to a abundation of the same fearlessness.

"Show me," she said, going to him.

(TO BE CONTINUED.)

This is interesting. How will a girl of Barbara's upbringing react to these primitive conditions?

Symbolic Indian Masks

According to the Bureau of American Ethnology, tribes of Indians throughout North America wore masks at religious festivals and at some social gatherings. Sometimes the priests alone were masked, though in other cases the entire company would appear in masks. The false faces generally represented supernatural beings. The simplest form of mask was one prepared from the head of a buffalo, deer, or some other animal. The mask stood, not for the actual animal, but for the type of animal and its supernatural characteristics, and the person wearing it was for the time being endowed with the distinctive quality of the animal.

The Armor of God

By REV. LEW W. GOSNELL
Dean of the Bible School, Moody Bible Institute, Chicago.

TEXT—Put on the whole armor of God, that ye may be able to stand against the wiles of the devil.—Ephes. 6:11.

Should we still believe in a personal devil? Many have relegated this be-

Rev. L. W. Gosnell.

lief to the past, but the fact that many do not hold it today is no more a ground for giving it up than the fact that many did hold it in the past is a sufficient ground for retaining it. Jesus Christ, who certainly knew the spiritual world as no other has ever known it, spoke with burning tone, as Satan seeks to consume us with polluting thoughts, doubts, passions and other unscriptural faiths. Faith is like the great shield the soldier carried, for victory comes by looking up, rather than in. "I am thy shield," says the Lord, and faith hides in Him.

Helmet and Sword.

The "helmet of salvation" protects the head in the day of battle. He who realizes he is saved is enabled to hold up his head with confidence. We may be sure that whether it is at his work or at his play, the devil is not far away, sparking at the moment of contact. The human body is, of course, a conductor. Should any of the natives meddle with our wireless, they will get the shock of their lives—especially as they usually approach any object of attack by waddling about on their stomachs!"

He chuckled with the anticipatory enjoyment of a schoolboy over a practical joke; then suggested having some food.

Christ Will Hear

Though you may have raked in the very kennels of hell, yet if you come to Christ and ask mercy He will absolve you from all sin. His blood can wash out blasphemy, adultery, fornication, lying, slander, perjury, theft, murder, and all else!—Spurgeon.

Music

Music is God's best gift to man, the only art of heaven given to earth, the only art of earth we take to heaven.—Lauder.

On Such a Night in Spring

By RUPERT ROLLAND

(Copyright.)

NORTON, dining alone at the little restaurant on his first night in New York after five years of wandering, remembered how often Joe Stickney used to eat by himself at that very table on spring evenings and talked of romance. And now Norton had had his five years of strange countries and Joe Stickney had married a brunette with long-lashed violet eyes.

He would like to know what had happened to Joe and his Helen, so, finishing dinner, Norton sought out a telephone booth. He found the name and number, and a woman's voice answered his call. "This is Roger Norton," he said, "Jim Stickney. Joe and I used to be Damon and Pythias five years ago. I'm lonely in this big city. May I come up tonight?"

"Please do, Mr. Norton," came the answer. "I've often heard Joe speak of you."

A maid let him in at the apartment and showed him into a drawing room, pleasantly illuminated by a single rose-shaded lamp. A slim, dark-haired woman with long-lashed eyes held out her hand. "Joe isn't at home," she said, "but I'm expecting him soon. He went back to his law office right after we'd finished dinner."

"I hope he doesn't often do that," said Norton.

"He works pretty hard, poor boy. But I know he'll want to see you. Shall we sit by this open window? The air's so fresh tonight. You've been away five years? What have you been doing?"

Nothing so interesting as what Joe has," Norton answered, taking the chair she drew forward, "with both hands. I've roved five years ago that we'd capture romance. Joe found it, but I—well, it's always just over the next hill for me. Joe was the sensible fellow—a happy marriage."

"Yes?" The long lashes hid the violet eyes that were looking out at the night sky.

Norton caught the question in the low voice, and wondered. Was Joe like so many other men? Had he won this exquisite creature, only to give her bodily comforts and spend all his hours working at his career? On such a night in spring! To be shaving at his office. Quickly he appraised the situation. Money—yes, it was evident in the room, in that simple gown. But romance—fled out of the window.

"You're an idealist, aren't you?" It was the woman who was speaking.

"Yes, I am," he answered defiantly. "We both were five years ago."

"And is the reason that you are still to be found in the fact that your romance has just one day put over the hill?"

He nodded. She was looking at him, and her eyes held his fascinated.

"I don't believe it," he said. "I believe I'd still keep my ideals, keep them more than ever after I'd found—that Joe has."

"I wasn't talking of Joe," she reminded him with a little half-laugh. "I know Joe very well—even better, perhaps, than you do."

Norton he caught that little note that made him wonder, that piqued and stirred his senses. He looked down at the violet eyes that lay upon the chair-arm. "Good old Joe," he said. "I suppose a man does change. And life in New York is such a struggle."

"But you have everything before you," she said, her voice unfettered."

"Yes, that's what the bachelor says. And yet when I come back from my wanderings, like Ulysses, having avoided the pitfalls, I find myself dreadfully lonely." He caught at them tonight that was a high price to pay."

"Poor Roger Norton," she murmured. "His best friend caught by the wiles of—"

There was mockery in her voice, but something in that mockery piqued Norton. He looked at the lovely profile, now turned again to the stars of the starlit night. And suddenly he forgave himself. "I wish I'd been caught instead," he said. "I'd never have struggled loose."

She faced him for a second, her eyes startled, then shyly.

"Forgive me," he muttered. "You—the night—something has turned my head."

"Mine too, I'm afraid," she said in a whisper. And she brushed her hand across her gown as if to wipe something away.

"Shall I go now, then?" he demanded. "You're—you're not lonely, too?"

In the silence that followed his question there came the sound of a key in a distant lock, then steps in the hall. Norton rose to his feet. Still, dominant he gazed at the lovely dark head turned away from him.

Someone came into the room. "Well, by Jove!" cried the cheery voice of Joe Stickney, Jr., declare if it isn't Roger Norton, as large as life!"

Norton wheeled, his face aflame. Mechanically he took the hand that Stickney held out to him.

"My word, but I'm glad to see you," declared Stickney. "Sorry that Helen is away on a visit; but I guess my little sister-in-law has made you properly comfortable."

"Sister-in-law?" echoed Norton, glancing at the girl by the window.

The young woman stood up. "I'm afraid I have made Mr. Norton so very comfortable," she said, avoiding that man's eyes, "Something got into me tonight. I suppose it's that old spring fever."

Roger Norton smiled. "I'm glad I happened along when I did," he said. "Spring fever is so much jollier when it's shared with somebody."

Mythological

Cytherea is another name for Venus, so called from Cythera, a mountainous island of Laconia, noted for the worship of Aphrodite (Venus). The tale is that Venus and Mars, having formed an illicit affection for each other, were caught in a delicate net-made by Vulcan, and exposed to the ridicule of the court of Olympus.

WOMAN SO ILL COULD NOT WORK

Tells How Lydia E. Pinkham's Vegetable Compound Stopped Her Suffering and Restored Her Health

Momence, Illinois.—"I surely can recommend your medicine to other women who have female weakness, as it has helped me very much in every way possible. I was working in a dining room in town, and sometimes I could not do my work; had pains in the lower part of my body and had to stay in bed. One of my neighbors told me what good Lydia E. Pinkham's Vegetable Compound did for her, and it has surely done wonders for me. I hope all women who suffer will take my advice as the Vegetable Compound has done so much to bring back my vigor and strength."—Mrs. ALBERT E. DESCHAUD, Momence, Illinois.

Over 123,000 women have so far replied to our question, "Have you received benefit from taking Lydia E. Pinkham's Vegetable Compound?" 98 per cent. of these replies answer "Yes."

That is 98 out of every 100 women who take this medicine for the ailments for which it is recommended are benefited by it. For sale by druggists everywhere.

SPOHN'S DISTEMPER COMPOUND

Don't take chances of your horses or mules dying from Distemper. Give Spohn's Compound. Use Laxatrille, Reserve, Tablets or Colds. Give "SPOHN'S" to both the sick and the well soon. The standard remedy for 37 years. "SPOHN'S" for Dog Distemper. 50 cents and $1.00 a bottle. SPOHN MEDICAL CO. GOSHEN, IND.

DR. HUMPHREYS' "77" BEST FOR COLDS GRIP INFLUENZA

Although a man may feel his oats he may not have horse sense.

Are those who perform grateful enough to those who look on?

Permanent roads are a good investment—not an expense

The High Cost of Postponing Permanent Highway Building

Poor motor roads stifle industry and agriculture; waste huge sums annually in high maintenance costs, and greatly increase gasoline, tire and repair bills.

There is not a state, not a county, not a community, that isn't paying a heavy price for having too few permanent roads.

Even when all the most progressive communities are far behind the times. Lack of modern highway traffic with its 16,000,000 motor vehicles.

From the Atlantic to the Pacific, and from Canada to Mexico, we need more Concrete roads—the roads for twentieth century traffic.

Your highway officials want to be of help to you. Call on them for any road assistance they will provide more. Concrete roads and streets. Such an investment will pay you big dividends year after year.

DR. HUMPHREYS' "99" The Perfect Laxative for CONSTIPATION

Baby Tortured Day and Night by Eczema
Resinol Stopped Itching and Healed Sick Skin

Brooklyn, N. Y., May 10:—"I thought it might interest you to know how much Resinol has done for my baby. Her face was covered with scales and the itching was so severe I had to keep rocking and her hands to keep her from scratching. I had to be up at night as the bothered her so she could not sleep. Two doctors, one of them a skin specialist, told me she had eczema.

I tried several remedies, but nothing helped, so when I read in the paper about Resinol, I thought I would give it a trial. I can't praise it enough, for it has done wonders for the baby's skin and she sleeps all through the night now. I would advise anyone with a similar case to try Resinol Ointment."—(Signed) Mrs. Rose Goerndorf, 27 Furman Avenue.

All druggists sell Resinol Soap and Ointment.

SWAMP-ROOT FOR KIDNEY AILMENTS

There is only one medicine that really stands out pre-eminent as a medicine for a curable ailments of the kidneys, liver and bladder.

Dr. Kilmer's Swamp-Root stands the highest for its world-wide fame. It has proven to be just the remedy needed in thousands upon thousands of distressing cases. Swamp-Root makes friends quickly because its mild and immediate effect is soon realized in most cases. It is a gentle, healing vegetable compound.

Start treatment at once. Sold at all drug stores in bottles of two sizes, medium and large.

However, if you wish first to test this great preparation, send parcel post stamps to Dr. Kilmer & Co., Binghamton, N. Y., for a sample bottle. When writing, be sure and mention this paper.—Advertisement.

Looking pleasant can become a habit as well as anything else.

At Christmas play and make good cheer, For Christmas comes but once a year.

The one new thing about our celebration of Christmas these days is a revival of the singing of Christmas carols—or rather the beginning of it in this country. It has been a feature of the English celebration of the day from time immemorial. Now we Americans are taking it up in earnest. The carol, "What Child Is This?" outlines in its simple verses the whole story of the Christ, beginning with the humble birth and concluding with the tragedy of the crucifixion. The harmony has no musical intricacies and is especially well suited to singing in the house.

You may not need a little child, he knows not Christmas day—
The wonder of the deathless waking through fir-sweet morning gray.

While tropic forests on the pane against the window frame
The awe of faith enchantment in lifted childish eyes;

The splattered, spicy, teasing joy of kitchen-fragrance room,
The icing of frost upon his face, the snow-creak he hears in the dark;

The swish of runners, song of bells, the laughing-refood cold air;
From drifted hillsops, sparkling white; the blue sky rolling above;

The holly-berried table top, the feasting and the fun,
With Christmas ribbons strewing all until the day is done;

The hush of candle-lighting time, the hearth-flame red and bright,
The warm soft clasp of clinging hands up shadowed stairs to bed;

The crib-side talk that shocks and stills on stumbled drowsy note,
The love that stirs behind your eyes, and catches in your throat;

The hope, the fears, the tenderness the Mary-prayer you pray—
Who has not lived a little child, he knows not Christmas day.

So sings Martha Haskell Clark in Scribner's Magazine. And she is right, of course, since Christmas is in many respects pre-eminently a children's day. It certainly is certainly their Day of Days. That's why Clement Clarke Moore's poem—written for the entertainment of his own children—has been published by periodicals as far inland as Nebraska. It has probably done more than anything to keep the Christmas tradition of Santa Claus safe for American children. "Twas the Night Before Christmas" will be repeated until this earth grows cold and the end of things is come.

Yet Christmas day has its dangers for the children and Dr. Frank J. Monaghan, health commissioner of New York, gives out these timely "Don'ts" for parents:

Don't allow children to lie only partly dressed and in cold rooms on Christmas morning. Many colds can be avoided by heeding this warning.

Don't let children have an excessive amount of sleep during the festive week.

Don't overdress them with their new sweaters or furs because it is Christmas day.

Don't overtax their stomachs with too many goodies, and especially with food they are not accustomed to and that is too rich.

Don't fail to be sensible during the holidays, thus saving the children much discomfort of body and considerable mental distress to the mothers.

That Christmas, aside from its religious significance, means much to the American people, is shown by the unofficial estimate that they will spend considerably more than $5,000,000,000 in gifts, this year. This will be a gain over the expenditures of 1923. The increase in 1923 over 1922, as shown by the Treasury Department and Post Office department, was 16 per cent in amount of first-class mail handled, and an increase of 18 per cent in parcel post. The gain over 1921 was from 5 to 6 per cent in 37 widely scattered cities. Some of the increases reported were: Dallas, Texas, 20 per cent in first class and 27.5 per cent in parcel post mail; Kansas City, 5 and 19 per cent; Louisville, 10 and 18.5 per cent; Baltimore, 8.3 and 5.7 per cent; Milwaukee, 12 and 18 per cent; St.

Giant Thistle, Grown on Coast, in Demand

Among the profitable crops grown by Californians in the region of San Francisco is a giant Mediterranean species of thistle. Soil and climate there seem to be exactly suited to its needs, says the Pathfinder Magazine.

Attempts to grow it elsewhere have invariably resulted in failure. Like the thisties with which all are familiar, it has formidable spines, only they are longer and more cruel than the average. It has a large purple flower, no sweet scented that bees find it irresistible. Rarely, however, are the buds allowed to develop into flowers, for the buds are esteemed as a table delicacy, being harvested and sold as "artichokes."

A quarter apiece for the buds is not an unusual price in San Francisco and at that they take precedence over the finest oranges, raisins, apricots, etc., for the growers cruelty time their development so that they may be marketed just at the psychological moment, so to speak—that is, in midwinter, when there is little else of the same nature to compete with them. This is done by cutting back the plants in June, pruning them down to the ground. Within a short time new shoots appear. Then if plant food and water are supplied in sufficient abundance the long autumn days bring about ideal development.

The bud harvest begins in October and reaches its peak about the first of April.

CHRISTMAS

CHRISTMAS comes as a blessed day when we refresh ourselves once again with the friendships we have made.

Peace steals into our lives, and good will toward men. Those beautiful words take on a new meaning and translate themselves into little acts of kindness and consideration. Happy laughter is heard and grown men remember how to play.

A beautiful time is Christmas time—in which bitterness and envy melt into understanding and forgiveness. A gracious time—in which we renew our faith!

Draw Straws

Sublette, Kan.—In the recent county primary the race for the Republican nomination resulted in a triple tie, the three candidates receiving the same number of votes. After discussing the matter from every angle it was decided to draw straws for the coveted honor. A large crowd was present to see Oscar Yardly draw the long straw and to be proclaimed the nominee for the place.

Paper Razor Strop

Ordinary newspapers folded together in a thick strip and held between wire clips make a satisfactory substitute for a regular leather razor strop, according to a European inventor, Popular Mechanics Magazine reports. The ink on the paper is said to assist in giving a keen, non-pulling edge and consequently a smooth shave. A fresh strop can be prepared in a few moments and it is especially convenient for the traveler and camper.

Full Explanation

"So you were cause red hunted counterfeiting ten-dollar bills?" said the police magistrate. What have you to say for yourself?"

"I am not a malicious counterfeiter, and I should never have been arrested, replied the suspect. "I am a chemist whose interest is entirely scientific. I have been trying to make gold from less precious elements and I have only got as far as ten-dollar bills."

I will be in Charlevoix every Tuesday forenoon until further notice. Those wishing to see me may notify me at 1244 Mitchell St. Petoskey, Mich.

THE CHARLEVOIX SENTINEL

Volume 56 — Charlevoix, Michigan, Thursday, February 18, 1926 — Number 44

Business Section of Clarion Badly Damaged by Fire

Fire at Clarion last Saturday night practically wiped out the business section of the village. Several store buildings, hotel and residence being burned to their foundations and others narrowly escaped total destruction.

Lack of adequate fire fighting equipment was responsible for a goodly percentage of the loss sustained. A bucket brigade was quickly formed by local citizens but they could not successfully cope with the fire' lend when once it gained headway in any one of the several buildings destroyed. It is quite probable that new structures will replace some if not all of the burned buildings sometime during the early spring months.

REAL ESTATE LOOKING UP

Realtors Making Survey of Local Territory

For some days past real estate men have spent their time in this county taking a census of the resort situation, past activities and present and future prospects, at the same time they have taken an unusual interest and made a careful survey of desirable resort properties particularly such as are favored with water frontage, nor have their energies been devoted entirely to those on the water, but have taken into consideration several locations desirable that are at some distance from the water, such as command a widely extended range of view and good perspective and in this latter class there is a varied as well as extensive assortment.

Reports are in circulation of several sales of real estate and according to footing purports some of the sales are for handsome figures.

MICHILIMACKINAC STATE PARK

Tourist Business for 1925 Shows Increase for Year

Reports just issued relative to tourist traffic and patronage at Michilimackinac State Park,shows an increase of approximately 60 per cent for the year 1925 over the previous season. From the report we are advised that of the automobiles recorded carrying tourist parties there were sixty two different makes of machines, with a total of 3,357.

Of this number practically one third were Fords, with Chevrolets second, Buicks third and Dodges fourth in the list, with a moderate showing of Pierce Arrows, Locomobiles, Packards, Cadillacs, Lincolns, Marmons and on through the list of the sixty two varieties.

Tourist parties representing 32 states and two Canadian provinces took advantage of the parking privileges and facilities, remaining on an average of a few days with a total of 8478 tourists visiting the park for camping purposes during the season.

Naturally Michigan made the heavy showing of cars and tourists with cars in lesser numbers from distant points. Of the machines reported 287 were from Illinois, 229 from Ohio, 187 from Indiana, 10 from Florida, 8 from California, with other states represented with from 1 to 20 machines each.

The total number of machines given does not by any means represent the number of machines visiting the park, but those only to which parking privileges for the night receiving permits, hence the total would exceed by far the figures herein given.

PLAN TO ACCREDIT 5 MILLION CHICKS

New Poultry Association Inspects Hundreds of Flocks in the State

East Lansing, Feb. 17.—That about five million baby chicks will be certified this spring by the Michigan Poultry Improvement Association is indicated by records in the office of J. A. Hannah, secretary of the association and extension specialist in poultry at the Michigan State College.

Inspectors who work under the joint supervision of the poultry association and the poultry department at M.S.C. have been out in the state since last November.

More than 200,000 hens have been inspected in about 2,500 different flocks. It is said that 76 commercial hatcheries in the state, with a combined hatching capacity of three million eggs at one setting, have signed the certification agreements with the poultry association.

Assurance for the purchaser that he is securing baby chicks of high quality stock is said to be the chief aim of the certification plan. General encouragement of strict honesty on the part of all poultry dealers is expected to follow in the wake of the association's "Truth in Advertising" will be inaugurated upon request.

Local Store Entered and Goods Taken Sunday Night

The store of George W. Lusk was entered by some person or persons who rifled the money drawer, helped themselves to shirts, socks and other articles of wearing apparel and a goodly supply of cigarettes.

The cash stolen was of minor account being a small amount of change only, the amount probably being a source of disappointment to the perpetrators of the offense. It is quite probable that the crime was committed by local talent as appearances indicate that the guilty party or parties were fully informed as to the method of entering the building and as to the location of the wearing apparel etc., wanted and taken.

SERIOUSLY INJURED IN FALL

Mrs. Elmer L. Johnson Escapes Death by Margin

Mrs. Elmer Johnson narrowly escaped instant death last Saturday forenoon, when by accident, she fell down the cellar stairs to the basement floor, where she was found some time later unconscious and weak from excessive loss of blood, due to an ugly cut in her arm when it came in contact with a broken glass jar.

Mr. Johnson had been away from the house for some time and finding her absent upon his return concluded that Mrs. Johnson had gone to one of the neighbors homes, gave the matter but little attention. Going to the basement a short time afterwards he discovered the missing and unconscious woman.

Medical assistance was promptly in attendance and Mrs. Johnson given such restoratives and treatment as was deemed expedient and essential for the injuries received.

Examination revealed that besides the loss of blood and the bruises some from nervous shock produced by the accident.

The indications at present are that she will be as well as usual in a few days, however the shock and experience will not readily be forgotten.

THE DANGER OF BORROWING PAPER

Just Listen to a Classic Print Shop Fable with a Moral.

Once upon a time a nickel-nurser sent his kid to borrow the neighbor's paper, and the kid upset a hive of bees and soon was covered with lumps. His dad beat the kid and then used up his chin on a clothes line and sprained his back and fell and broke a twenty-five dollar window. The clothes pole fell over the car and smashed the wind shield, and mother, rushing out to see what caused all the excitement, upset a five-gallon churn of cream into a basket of kittens, drowning all of them. The electric flatiron, burned through the ironing board while she was out of the kitchen, setting fire to house, and the firemen broke all the windows and chopped a hole in the roof. The baby ate a jar of pickles and got cholera infantum, and the doctor's bill was $15. The daughter ran away with the hired man during the excitement, the dog bit a neighbor's kid and the calves ate the tails off of four shirts on the clothes line.

Moral—Subscribe to your home paper. Don't borrow it.—Dyer-Town Reporter.

Couldn't Make the Grade

Jaule had been taken to the home for feeble minded, but the doctors examination proved her merely subnormal, so she was sent back to the asylum's home. Maude to Anne in a burst of confidence, "Janie was sent away to be an idiot, but she couldn't pass and had to come back."

Health Slogans—He who eats cabbage has a good head.

Community Banquet Set for Wednesday Eve. Next

The Community banquet to be given on Wednesday evening, February 24th at the First Methodist Episcopal church, under the auspices of the Local W.C.T.U. is attracting more than ordinary attention and, no doubt, will be exceptionally well patronized.

Judge Parm C. Gilbert will appear as the speaker of the evening.

Instrumental music and community singing has been included as part of the program all of which adds to the attractiveness of the event.

The banquet will be served at 6:30. The price has been placed at 50c. A general invitation is extended to the public to participate in the event.

WELL KNOWN ENTERTAINER

Edna Means at the Palace Theatre on Friday Feb. 19th

Miss Edna Means, widely known entertainer, who has been secured from the Redpath Bureau for an appearance on the Lyceum course here, Friday evening, Feb. 19, will present a group of readings, "From the Passing Crowd," which not only entertain but carry a message of helpfulness and worthwhileness.

EDNA MEANS

"From the Passing Crowd" depicts many of the quaint and lovable characters of everyday life. Their whims, shortcomings and commendable traits are displayed in a most artistic and natural manner. Humor and seriousness find a well-balanced expression in these characterizations, which both chuckle amuse, and teach the virtues of tolerance and appreciation in daily associations.

Miss Means is possessed of a charming personality, an excellent speaking voice and a pleasing platform presence. Her program at the Lyceum numbers on the platform today, and her appearance here will be one of the outstanding features of the Lyceum course this season. Tomorrow evening, Friday, February 19, Palace theatre.

TO MICHIGAN DAIRYMEN

Extra Half Inch of Milk Adds $12,115,500 to Profits

An extra half-inch of milk in every cows milk pail at each milking would add $12,115,500 to the profits of Michigan dairymen during the next twelve months, according to the Larrowe Institute of Animal Economics. Better feeding and care of the animals is urged by the institute as the means of bringing this additional sum of money into the state this year and every year.

"The average cow in this state gives around four inches of milk at a milking," states the Institute. "At the prevailing market price of milk the extra half-inch in the pail would mean about fifteen extra dollars in the pocket of her owner. On the basis of 807,700 cows of milking age on Michigan farms, this should mean $12,115,500 that may be available to dairymen and to the family."

As an instance of what better care and feeding will do for a dairy herd, the institute cites the cow-testing association records of fifteen cows on the Valley farm of Smith & Preston at Conoton, O. Ten dollars a day above their board is what this group paid the owners each day for a year for the privilege of remaining on the farm, or at the rate of $3,650 per cow per year. The herd ate from 2338 pounds to 3739 pounds per cow of a prepared, balanced ration and produced 1447 cans of milk of a total value of $5,528.39. This was $3,941.71 above the feed cost.

An outstanding example of what good feed and treatment will do for a cow is Sabina, one of the herd. In one year's time she produced 11,599.9 pounds of milk containing 702.1 pounds of butter. The total value of her production was $509.04 or $426.87 over the costs of her feed during the twelve months.

Pasturage in Marsh

Boumey marsh in Kent, England, is protected by a seawall of great thickness and the guardianship and drainage of the swamp is in the hands of a special ancient corporation. The level lands afford pasturage for vast flocks of sheep which form the principal industry of this section.

ENJOYING THE WINTER

The Way, Get Into it and Get Used to It—Sports

Almost every morning the mail brings us a flock of postal cards from friends in the Southland, bearing the thread-bare quotation, "Wish you were here to enjoy the weather." Does the receipt of such a message strike a spot of envy in your heart? If it does you are not getting the most out of these beautiful winter days and nights in Michigan.

These winter frolics and the particular attention to winter sports are enlivening these cold months. The hardships of winter, that is of ordinary winter weather, are largely imaginary. The clear cold air of the north is bracing to those in normal health. The way to enjoy winter is to meet it more than half way. Get into it and get used to it.

Sometimes when the thermometer gets to 30 or 40 below, winter is really too uncomfortable. But those days are not existant this season. So far as Charlevoix is concerned to date we have had no days or few nights, even moderate the mercury registered the lowest three below. With but a moderate amount of snow on the ground and Lake Michigan open, and automobiles in use for both business and pleasure purposes there is no cause for complaint locally.

Into these readings Miss Means inject her magnetic personality, a rare sense of humor and an intense desire to make everyone more tolerant and sympathetic.

Her subject matter and an inimitable platform art win her audiences from the very start of her program.

Miss Means appears here under the direction of the Redpath Bureau.

Boyne Citizen—The State Highway Dept. met at Cadillac on Thursday morning to organize for the new system of maintaining the roads for 1926. Trunk line No. 11 is open from Mackinaw and No. 13 is expected to be following open by the end of the week. The following commissioners left Wednesday for Cadillac to attend the conference: Messrs. Wm. Ayers, Charlevoix; Sam Rogers, East Jordan; Frank Thompson, Boyne City and Ernest Peasley, Charlevoix, as bookkeeper.

MILLION LEFT TO WIDOW

R. D. Stuart's Total Estatels Valued at $2,000,000

An income of $5,000 a month was guaranteed Mrs. Margaret J. Stewart, 4850 Woodlawn avenue, widow of Robert D. Stuart, director of the Quaker Oats company, in the latter's will, filed yesterday before Assistant Probate Judge Frederied W. Elliott. He left an estate of $2,100,000, according to the estimate by his lawyer.

The Woodlawn avenue home and a summer home in Charlevoix, Mich., were deeded to the widow in the will. She was also granted the income from $1,000,000 in trust. After various bequests to charity and relatives had been made, the remainder of the estate was divided among three children.

Two nieces and a nejew were given $20,000 each; Robert Gordon of Hinsdale was bequeathed $10,000 "for his kindly services," and all domestics in the employ of Mr. Stuart were given $100 for each of their years of service.

Charity bequests included a gift of $10,000 to the Scottish Old People's home and one of $25,000 to the Presbyterian hospital.

Mr. Stuart was 75 years old. He was at one time president of the American Exchange National bank of Chicago, which was later absorbed by the Corn Exchange National bank.—Chicago Tribune, Feb. 10.

WELL-KNOWN DRAMATIC READER

Will Appear on Local Lyceum Course Friday Evening, February 19th

Miss Edna Means, widely-known dramatic reader, who will appear on the local Lyceum course Friday evening, February 19, stands in the front rank of American entertainers. She has had ample opportunity to study human nature during her many years of platform work. Constant traveling has brought her into contact with varied types of people, many of whom she depicts in a series of readings entitled "From the Passing Crowd."

Into these readings Miss Means inject her magnetic personality, a rare sense of humor and an intense desire to make everyone more tolerant and sympathetic.

Her subject matter and an inimitable platform art win her audiences from the very start of her program.

Miss Means appears here under the direction of the Redpath Bureau.

Boyne Citizen—The State Highway Dept. met at Cadillac on Thursday morning to organize for the new system of maintaining the roads for 1926. Trunk line No. 11 is open from Mackinaw and No. 13 is expected to be following open by the end of the week. The following commissioners left Wednesday for Cadillac to attend the conference: Messrs. Wm. Ayers, Charlevoix; Sam Rogers, East Jordan; Frank Thompson, Boyne City and Ernest Peasley, Charlevoix, as bookkeeper.

PREVENT CHILDREN'S DISEASES

Likely to be More Prevalent at this Season of Year than Any Other Time

This is the season of the year when diseases peculiar to children are likely to be more prevalent and virulent than at any other time. At this time of the year many children do not get the fresh air and exercise necessary to good health, especially in this matter of age, when doting parents think it is "just to terrible for anything" if little Willie or Susie are denied the use of the car to make the morning journey to the schoolhouse, which may be all of seven blocks away from the family home.

We should not underestimate the importance of children's diseases, particularly the whooping cough, which brings many deaths and leaves an aftermath of illness and suffering. We know nothing much about whooping cough, except that it is particularly severe with small children, that it lasts a long time and relief is hard to find and give. In such case prevention is the best policy. Every year the child escapes this disease the better the chances for a light attack and a complete recovery.

Rural Population Hope of America

I think that the rural population is the great hope of America today. It is conservative. It still stands for the old moralities. It should be remembered that morality is not a thing that changes like the fashions of your dress. It is the one permanent thing in this world. Either one has morality or he has no morality. Those people of the hills and valleys are the real backbone of our country. I have always delighted to write to them, to tell the story of the hardships that they have overcome, of the great moral victories which they win, of their love of beauty and their simple faith in God and man.—Irving Bachelder.

Petoskey News—Rev. C. E. Pollock, of Charlevoix, and Rev. Ralph Dean, of Pellston, were in Petoskey Thursday, assisting with the canvass for the endowment fund for retired ministers of the Michigan conference of the Methodist Episcopal church.

Pleasant Party at Home of James Cook in Marion

Just about an even dozen of Charlevoix citizens spent last Saturday evening at the home of James Cook in Marion township, the party making the trip primarily for the purpose of visiting Albert Cook who, though greatly improved in health, has been dangerously ill for several months.

The evening was largely spent by the entire party in card playing and dancing. Special refreshments came in for a full share of attention. The sleighride out and back fully enjoyed, making for a splendid evenings entertainment for all concerned.

FRESH VENISON WAS THEIR FOOD

Two Pine River Indians Fined for

PLAYING WHIST WITH PEDDIE

By EDWARD BOLTWOOD

(© by Short Story Pub. Co.)

A FEELING of desperation pervaded the home ranch of the Three X outfit in the Far West.

Although it was the time of the gathering of the hands for the beef roundup, which was regarded as a mere pleasure excursion up and down the Bulls Fourché in the cool days of September, the usually festal occasion seemed to be darkened by the shadow of a great grief. The boys were depressed. They sulked at meal times. They did not tell stories at night. It wasn't because they were underpaid, although this was undoubtedly true. The reason, as Shorty Garr expressed it, was that they were "looced by the Britisher."

Mr. Horace Peddie, Q. C., the managing director of the Scotch syndicate which owned the Three X, was making his first inspection of the property. Mr. Peddie had examined the company's lands in South Africa, and intended to make a clean job of it by looking over the American ranch also. His coming had been awaited by his hosts with much anticipatory pleasure, but his actual arrival had been followed by bewilderment and a stinging sense of defeat, and John Heffren, Shorty Garr and the bookkeeper talked it over one evening while they smoked their pipes on the cookhouse steps.

"As the old man said," remarked Mr. Heffren, "before this Peddie hit the ranch, 'Tain't no harm," says he, 'to make him think he's struck a hot crowd. His letters is full of yarns and advice from South Africa, and I'm sick of 'em. Bring around your buckin' bronks,' says the old man, 'and pack your guns and we'll make him think this 'ere western country,' says he, 'is a darned sight wilder than any South Afrika on the map. Make it warm for him,' says he, 'and he'll say we ought to be paid big for livin' in such a tough place.' And, I put it up to you, Tompkins, ain't we done our best?"

The bookkeeper nodded.

"Best!" inserted Garr, disconsolately; "I'll bet we have. The first turn out of the box was when I caught up Hot Biscuit for this 4-squire to ride down to the hay camp. Naw, Biscuit ain't what you'd call bad, you know—just looney. So I lands the pony around to the office, and there was Peddie dressed up in light white pants and shiny boots, like he was going to walk the black wire. He spots me looking at his rig, and he says: 'This is the way we ride in Pretory.'

"I don't know anything about Pretory, but men have been shot for less in the Bad Lands. So he gets on the horse and puts his toes in the stirrups and leans over Biscuit's neck, like he had a pain in his inside. Biscuit, she slides down a mud bank and turns hind end to, and—well, Biscuit is the make of the heft on her shoulders. 'My word!' says Peddie, wiping the gumbo out of his eyes, 'do you ride those bruiser every day?' 'Sure,' I says, thinking to get a rube of play without showing cards. 'By Jove!' he says. 'It's lucky that wasn't a South African pony. When horses over there throw a man they try to eat him up.' I went behind the corral, and I says to myself—"

"Never mind what you said," interrupted the bookkeeper judicially. "Why didn't you make a play with a forty-three?"

"Listen to me," said Heffren. "I was lookin' down the creek with this Peddie feller day before yesterday. I'd heard the boys claim nobody could get a start out of him, and I thinks, 'John, you are the man for this job, even if you have to make him smell powder.' We eases along thirsty Sandy Bottom, him and me, where the box elders is thick and the trail narrer. All of a sudden I begin to look fierce and cuss, and spy into the underbrush like I seen suthin' bad. Then I pulls the gun, and pumps six shells at the trees, swearin' and tearin' and leatherin' my horse. We run our ponies up onto the rise, and then he said: 'Let's go back and skin 'em.' 'Skin what?' says I. 'Those rabbits,' said he. 'Rabbits!' says I. 'Them was the Powder River gang, and they're on the kill.' 'Well,' says he, 'let's go back and skin them. They do that sort of thing most every day in South Africa.' And it couldn't say a dum word."

Garr resumed the mournful tale. "We gave him a meal," said Shorty, "over to the horse camp. Raw onions and bacon about lengthwise—all fat. He said that was the kind of grub they saved for sick hands in the Welt or some such place. Now, I ask you, Tompkins, how can we turn the hair of a Comanche like him?"

"Poker," said the bookkeeper.

"He says," Heffren replied, with a hopeless air of wrestling, "that the only cards he ever plays is whist, and at home he has followed that game every night for twenty years."

"Oh, that kind, is he?" said Tompkins, meditatively. "Well, we'll give him a whirl."

It appeared that Mr. Peddie was decidedly "that kind." Whist was his religion, Cavendish his Bible, and his partner his more constant devotee of the silent game.

* * * * * * *

That night four men sat about a card table in the office—Mr. Peddie, Q. C., John Heffren, Tompkins and Joe Robinson, the foreman. A pair of gaudily painted lamps illuminated the cozy board; pipes and cigars were in full blast, and a bottle and glasses were placed in hospitable proximity to the players. Everything foreshadowed an enjoyable evening, but the deliberate solemnity of the Americans would betray to anyone but a stranger the existence of a monstrous plot.

"Who'd expect," said the Englishman, "to have a quiet rubber on a cattle ranch? By Jove! It's luxurious, it's effeminate. In South Africa the wild devills are not beyond cheekers."

"Fifty-three," announced Tompkins, thumping down the last of a pack of cards. "All set. Heffren, it's you and I against 'em."

Mr. Peddie lifted his eyebrows in incredulous inquiry.

"Fifty-three?" said he. "Is that right—for whist?"

"Certainly," Tompkins replied, without blushing. "Fifty-two and the joker. It's your deal, Mr. Peddie."

"What are we playing for?" growled Robinson. "The same old thing?"

"Sure," said Heffren, laying a revolver on the table. "What did you suppose—soup?"

"Well, I wanted to know beforehand," Robinson replied, stacking an undolented bowie in his belt. "Sure, I wouldn't be caught afoot when the cattle is running."

These manifestations did not escape the Londoner, and he looked furtively at his partner. Tompkins was critically inspecting the edge of an ax, which he finally laid on the floor under his chair, and the deal was hastily finished.

"Look here, you know, there's a card left over."

"That's the trump," said Robinson. "Where did you learn this game?"

Mr. Peddie grasped and Tompkins led the king of diamonds. The foreman promptly played a spade.

"No diamonds, partner?" asked Peddie, in the most silky and approved across-the-table voice.

"Yes," Robinson answered in apparent surprise, "a few."

"But you didn't play one, you know."

"Well," interposed Tompkins, contemplating the handle of his ax, "it's his own hand. Let him play it."

"Perhaps you don't understand the great American improvements in this game," said Robinson politely. "You see you don't have to follow suit unless you want to."

"And all I see go to the kitty," volunteered Heffren, slapping down the joker and pulling in a trick.

"It makes a pretty game," Robinson added. "You'll like it."

Like it! The unhappy club man could not have been tortured better, figuratively by the rack of the Inquisition. He was like a devoted monk, forced to be present at the desecration of a cathedral by a horde of barbarians. The pitiveness of a gourmet, backed by the impressive exhibition of weapons, stilled his protests, but the chancellor of England could not have felt so outraged if he had been tied to his wood sack and compelled to witness a game of tag in the house of lords. It was not even bubble-puppy. It was like a game from "Alice in Wonderland." When Robinson claimed that "big casino" outranked the ace, Mr. Peddie writhed in silent anguish. When Heffren, at the end of a hand, proceeded to add the points on the cards "to see who had game," Mr. Peddie's horrified eyes blinked rapidly with emotion. But when Tompkins told him that it was the leader's privilege to play two cards at once in order to guard against emergencies, Mr. Peddie staggered to his feet and gesticulated violently.

"Gentlemen," he cried, "I have been in rough places before. I have been in the hardest land and among the hardest people in the world. I refer to South Africa." Heffren groaned. "But," continued Peddie, "never have I seen such barbarities as I have witnessed tonight, and, by the Lord Harry, I hope I never will again! Men who do such things will do anything, by George! This country may be all right to tanke money in, but it's not fit to live in. Mr. Robinson, by Jove, sir, you'll find my bag packed in the morning."

Far into the night the conspirators celebrated the sagacity of the bookkeeper. "Good enough to play whist with Peddie" is now the highest compliment which can be paid a cardplayer at the Three X.

First Sanskrit Book

The first book ever printed in Sanskrit was the Hitunshiora, a poem by Benjamin six succeeding Field of India. It was edited by Sir William Jones and printed in Bengali characters at Calcutta in 1792.

Easy to Trace Holly Lore for Centuries

Apart from the reputation it used to enjoy as an antidote to poison and as a charm against enchantment, the berries of the "scarlet oak," as holly was sometimes called, when set against their background of glossy dark, prickly leaves, could hardly fail to attract attention from a decorative point of view.

Although we are accustomed to associate holly with the celebration of Christmas, it was first used in this country by the ancient Britons, who decked their rude dwellings at the New Year in order to please the sylvan spirits.

The Romans also used it at that festival by sending their friends holly branches to wish them luck during the coming year.

There is considerable religious lore associated with holly. The legend that Christ's crown of thorns was made from its twigs and that the berries sprang from his sacred blood raised the tree to high esteem in the early days of European Christianity.

In Germany the tree was called "Christ's Thorn," and the peasantry used to hang it over their doorways to avert evil; while in Italy cradles were always decorated with holly to ward off the evil eye.—London Tidbits.

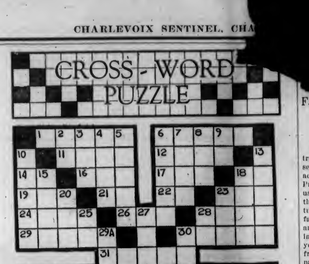
Far From Weasel

Pabnut fur is obtained from an animal of the weasel family, found in central China. It has a heavy pelt of light yellow underfur, with top hair of grayish brown. A white line runs down the back from the neck to the tail. It is improperly known under the names of Chinese stone marten and grey marmot.

Scientists Rejected Name

The planet Uranus was named Georgium Sidus, George's Star, by its discoverer, Sir William Herschel, in 1781, but astronomers refused to accept the name, and it was finally called by its present name.

CROSS-WORD PUZZLE



(Copyright, 1928.)

Horizontal.

1—Lops
4—A kind of fish
7—To labor
13—To gather in, as a harvest
14—Louisiana (abbr.)

NURSERY RHYME PUZZLE

HIS I went through the garden gate,
Who should I meet but Dolly Tate,
Down on the grass with skirts widespread,
Twining garlands, blue, yellow and red.

Find three other persons. Right side down, on petticoat. Upper left corner down, along arm. Upper side down, along arm and hat.

Primitive Flour "Mills"

The quern or handmill is probably the implement spoken of in the Book of Isaiah, 47:2, about 712 B. C. This passage in Isaiah reads: "Take the millstones, and grind meal. . . ." The mill ground grain into coarse flour by turning one flat circular stone upon another with the grain between them. Old Roman querns have been found in Yorkshire, brought there by the Romans during their occupation of England.

English Religious Sects

Banters was a term applied to a sect which arose in England in 1645, during the troubled time of the civil war. These people were somewhat similar to the Seekers, later called Quakers in the next century the name was applied to a sect that separated from the main body of the followers of John Wesley. The term, however, was never the correct name of the latter who became a large and powerful religious body.

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters are in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

Thought is deeper than all speech,
Feeling deeper than all thought;
Souls to souls can never teach
What unto themselves was taught.
—Christopher P. Cranch.

REDUCING DESSERTS

For those of us who are overweight it is wise to choose a light dessert which satisfies the craving for sweets without adding much to the food value of the menu. The following have been chosen as good reliable desserts for such:

Chilled Prunes With Lemon.—Soak prunes and boil them with slices of lemon. After they have cooked fifteen minutes put them on the back of the stove to simmer. Allow the simmering process to continue until the syrup thickens. Remove from the heat and chill. The long slow cooking brings out the sweetness and flavor of the prunes and they will need no sugar to sweeten them.

Gelatin desserts of various kinds are especially good for those who are anxious about overweight. One thing must be remembered in serving them however, that they should not be served with whipped cream or rich sauce, or the very thing which you wish to avoid will result.

Saccharine may take the place of sugar in sweetening the dishes, as it will, in very small quantities, add sufficient sweetening.

Snow Pudding.—To one-fourth of a box of gelatin add one cupful of cold water. Let stand until thoroughly soaked and add two cupfuls of boiling water, five saccharine tablets, the juice of one lemon and cinnamon to taste. When slightly set, add the stiffly beaten white of an egg and beat until the mixture is light and foamy. Serve very cold.

Gelatin Whip.—Soak one-half of a package of gelatin in one cupful of cold water. Add three grains of saccharine, one-half cupful of canned plum juice. When the mixture begins to set, whip until light with an egg beater. Chill thoroughly.

Fruit Soups.—Bury a can of any kind of fruit liked, such as pineapple, peaches or pears, in ice and salt until frozen. Dice any fresh fruit—bananas, oranges, strawberries— and fill sherbet glasses with the juice fruit, top with frozen fruit and serve at once.

Ambrosia Flower Salad.—Cut halves of canned apricots in two. Arrange on head lettuce like the petals of a flower with a ball of cream cheese for center. Sprinkle the cheese with riced, hard-cooked egg to simulate pollen and serve with mayonnaise dressing. Chopped nuts may be used instead of the egg if desired.

—Honey Dainties.

Honey is not only valuable as a food but has medicinal properties as well. As it is slightly acid, when used in batter mixtures a fourth of a teaspoonful of soda will counteract the acidity.

Graham Honey Pudding.—Mix and sift together two teaspoonfuls of baking powder, one-fourth of a teaspoonful of soda, and one teaspoonful of salt. Add three-fourths of a cupful of raisins and mix with the dry ingredients. Add one-half cupful of sour milk, one-fourth cupful of melted fat, one-half cupful of honey and one well beaten egg. Beat well and turn into a buttered dish. Steam over and steam for two and one-half hours. Serve with:

Honey Sauce.—Melt one tablespoonful of butter in a saucepan, add one tablespoonful of flour and when well blended add one cupful of boiling water, cook until thick. Then add one cupful of currant jelly, two tablespoonfuls each of lemon juice and honey. Serve hot. This is a sauce well liked with baked ham, or pork chops.

Ambrosia.—Mix one cupful of dark honey with one-half cupful of melted fat and one square of chocolate, add one-half cupful of sour milk and three well beaten eggs. Mix and sift together two and one-half cupfuls of flour, one teaspoonful of soda, two of baking powder, one-half teaspoonful of salt, one teaspoonful of cinnamon and add to the first mixture. Beat well and bake in a shallow pan. When cool cover with a caramel frosting.

Honey Cookies.—Mix three cupfuls of bran, one-fourth cupful of sugar, one-half teaspoonful of soda, and two teaspoonfuls of baking powder, add one-fourth cupful of sour milk, one-half cupful of melted fat, one-fourth teaspoonful each of salt and cinnamon, three-fourths of a cupful of honey, and one well-beaten egg. Bake twelve to fifteen minutes in a moderate oven. These are to be dropped by spoonfuls onto buttered sheets.

Honey Parfait.—Boil one cupful of honey with one-fourth cupful of water until it spins a thread. Pour the mixture over the stiffly beaten whites of two eggs. Beat until cool, then fold in a pint of cream whipped stiff. Turn into a mold and pack in ice and salt for four hours.

Nellie Maxwell

"All Dressed Up"

"Glad rags" means holiday attire—Sunday clothes. This expression grew up when "gad" still had the old meaning of bright, flashy or gay in color. "Rags" in this expression, of course, is used in the jocular sense of any clothes.—Exchange.

Topics

Children rained with great care sometimes do just as well as those who just happen to grow.—Meridan Star.

Ventilating the Potato Cellar During Winter

A warning is sounded by specialists in plant pathology at the Kansas State Agricultural college against the common practice of dumping the potato crop and ventilating it on warm winter days. This is a poor practice and will increase rather than get rid of the moisture in the cellar and on the potatoes, he says. The potatoes sweat and make conditions favorable for rot and decay to set in. Ventilate only when the outside air is near the temperature of the air in the cellar, Stockdyk advises.

Mr. Stockdyk recalls the action of the potato in the ground during the growing season. "The potatoes sweat and make conditions favorable for rot and decay to set in. Ventilate only when the outside air is near the temperature of the air in the cellar, Stockdyk advises.

Young Unbroken Horses Should Have Training

Young unbroken horses that will be expected to take a full share of farm work next spring should have some training during the winter. At this season of the year there is spare time that can well be used in getting the green young horse accustomed to what is expected of him when he takes a place in the team. It takes time and patience to train a horse to do his job with ease and willingness.

Time spent in properly breaking a young horse means more time saved when farm work is pressing. Furthermore, the young horse that does a little work during the winter will go much better able to work hard next spring because his shoulders and muscles are hardened.

Aid for Egg-Layers

During sudden "cold spells" in the winter that decrease or stop egg production, wet mash, fed warm at noon, will aid in getting the birds back into laying condition. A wet mash is often used to hasten maturity and start egg production in pullets being prepared for winter laying. If wet mash is fed, do not allow uneaten portions to sour and be eaten later, as this will cause digestive disturbances.

FARM NOTES

Do not let the work horses lose weight during idle time in winter, but avoid feeding too heavily.

* * *

Animal products are high in protein and must be fed to supplement the grains in an egg producing ration.

* * *

If combs are frozen thaw them out with snow or cold water, then apply petroleum grease once a day for several days.

* * *

Feed a ration that is adequate as to both nutrient and mineral content, and free from contamination with disease-producing germs.

* * *

Moistened mash is a good force feed for the pullets. Add just enough water to make it crumble, and feed all they will clean up. Feed it in the morning or at noon.

* * *

Every possible effort should be made to prevent birds from catching cold. Running of the nostrils is nearly a forerunner to swollen eyes, roupy condition, canker and diphtheria.

* * *

Sheep are nervous animals and often rather delicate constitutions, and suffer more from bad ventilation and overcrowding than any other animal on the farm.

200 YEARS of WASHINGTON

Commission to Arrange National Celebration in 1932 of His Birth

By JOHN DICKINSON SHERMAN.

GEORGE WASHINGTON, the "Father of His Country"—the United States of America—the richest, most powerful and most prosperous nation of earth—was born February 22, 1732. February 22, 1932, will therefore be the two hundredth anniversary of his birth. That year is to see a bicentennial celebration of his birth the like of which history has never seen in honor of a human being. Congress has created the United States Commission for the Celebration of the Two Hundredth Anniversary of the Birth of George Washington, President Calvin Coolidge is ex-officio chairman of this commission and thus briefly outlines the purpose of the celebration and suggests its scope:

"The two hundredth anniversary of General Washington's birth will be an occasion of such significance, not only to our own country but to the entire world, that it is manifestly fitting that the American nation should appropriately observe it.

"But beyond this it is felt that as the life, the career and the achievements of Washington belong not to a single nation, but to all humanity, it is proper that the nation founded under his leadership should invite all other nations and peoples to join in in the observance of this anniversary. The character and the efforts of Washington have made him secure forever in the world, so profound as to have affected the very course of history and to have founded the lives of all who today live in this world.

"We cannot doubt that the influence of Washington's example, his high standards of duty in behalf of liberal institutions and mankind's advancement have been among the great beneficitions conferred upon the race. He will always rank among the foremost of those who were providentially designated to perform great and lasting services.

"Every consideration of national pride in him as an American, of gratitude for the inheritance which he brought to us as a people, and of satisfaction in the universal recognition which has been freely rendered to his name and memory, dictates that this nation should take the lead in such a proper acknowledgment as will make the approaching bi-centennial an occasion of universal inspiration.

"As it was the fortune of America to give such a character to the world, so it is the obligation of America to honor that all men shall be invited and encouraged to consider his noble example and to benefit increasingly through a better understanding of the lofty principles which guided his life.

"For the present, it is impossible more specifically to suggest the purposes and manner of the commemoration which it be proposed to arrange. The commission will in due time take proper measures to enlist the interest of the nations in the observance of this inspiring anniversary."

The United States Commission for the Celebration of the Two Hundredth Anniversary of the Birth of George Washington was established by joint resolution of the Sixty-eighth congress (S. J. Res. 85) which provides for a membership of thirteen commissioners and for duties as follows:

The President of the United States; presiding officer of the senate and the speaker of the house of representatives, respectively, shall cause to be appointed by the President of the United states; four members by the president pro tempore of the senate; and four representatives by the speaker of the house of representatives. The commissioners shall serve without compensation and shall select a chairman from among their number.

Section 2. That there is hereby authorized to be appropriated out of any money in the treasury not otherwise appropriated the sum of $50,000 to be expended by the commission in accordance with the provisions of this resolution.

Section 3. That it shall be the duty of the commissioners, after promulgating to the American people an address relative to the reason for its creation and of its purposes, to prepare a plan or plans and a program for the celebration of the event to commemorate which they are brought into being; and to give due and proper consideration to any plan or plans which may be submitted to them; and to take such steps as may be necessary in the coordination and correlation of plans prepared by state commissions, duly appointed by the governors of the several states and territories, and by civic bodies; and if the participation of other nations in the ceremonies and festivities be deemed advisable, to communicate with the governments of such nations.

Section 4. That when the commission shall have approved of a plan of celebration, then it shall submit for their consideration and approval such plan or plans, in so far as they may relate to the fine arts, to the commission on fine arts, in relatives and friends less fortunate than himself. That famous summary of him, "First in war, first in peace, and first in the hearts of his countrymen," is no myth.

First Called Him "Father"

The Masons of Prince George's Lodge, No. 31 (Modern), Georgetown, S. C., addressed Washington thus: "At a time when all men are ensnared by approach you to express the lively sensations you inspire as the Father of Our Country * * *."

Section 5. That the commission, after selecting a chairman and a vice chairman from among their members, may employ and fix the compensation of any clerk or other assistants that may be needed for clerical work connected with the duties of the commission and may also engage the services of expert advisers and may fix their respective compensations within the amount appropriated for such purposes.

* * *

Section 6. That the commission hereby created shall expire within two years after the expiration of the celebration, December 31, 1932.

* * *

The General Federation of Women's Clubs is undoubtedly the most powerful organization in the United States, with the exception of the two major political parties. It is non-political, non-sectarian and patriotic. Its charter is by act of congress and its membership is about 3,000,000. Mrs. John Dickinson Sherman, its president, is an eighth-generation American. Her first American ancestor, John Whitney, was a Watertown, Mass., settler who came over with Gov. John Sherman, her husband's first American ancestor.

Henry Ford may have said that "history is bunk," but he probably did not mean American history, inasmuch as he is restoring the Wayside Inn at Sudbury, Mass., and trying to bring back the old-time American dances. And his own history reads like a fairy tale.

Senator Lee has been professor of history and college president. Senator Bayard's father, his grandfather, his great-grandfather and his great-uncle have all been U. S. senators from Delaware. Speaker Longworth is the son-in-law of Theodore Roosevelt and one of the most efficient and popular men in the house. Representative Tilson is majority leader of the house and a Spanish-American war veteran. Representatives Garner, Hawley and Byrns are "native sons" of their respective states. Edgar R. Piper is the National Oregonian editor. And so on.

The group photograph was taken at the White House on the occasion of the first meeting of the commission. The figures, left to right, front row: Senator Vandenberg; Senator Borah; Mrs. Anthony Wayne Cook, President Coolidge, Mrs. John Dickinson Sherman, Senator Simeon D. Fess (vice chairman); second row, Frederick H. Gillett (then speaker of the house and now senator from Massachusetts), Representative John Q. Tilson, Representative Willis C. Hawley; top row, Frank Mason (deceased), Representative Joseph W. Byrns, Senator Thomas F. Bayard, Jr., Speaker Nicholas Longworth, Senator Carter Glass and Hanford MacNider.

The parchment commission received by the members of the commission is a document that should be handed down with pride to future generations. It bears the signatures of President Calvin Coolidge and Secretary of State Charles E. Hughes and the Seal of the United States and runs as follows:

CALVIN COOLIDGE
President of the United States of America
To all who shall see these Presents, Greeting:
KNOW YE, That reposing special trust and confidence in the integrity and ability of
to be appointed
a Member of the United States Commission for the Celebration of the Two Hundredth Anniversary of the Birth of George Washington, and to authorize and empower him to execute and fulfil the duties of this commission with all the powers and privileges thereunto of right appertaining during the pleasure of the President of the United States for the time being.
IN TESTIMONY WHEREOF, I have caused the Seal of the United States to be hereunto affixed.
DONE at the City of Washington, this Thirty-first day of January, in the year of our Lord one thousand nine hundred and twenty-five, and of the Independence of the United States of America the one hundred and forty-ninth.

(SEAL)
By the President:
CHARLES E. HUGHES,
Secretary of State

The commission is at work and already many suggestions have been received from various sources. It seems practically settled already that there will be assembled a really comprehensive collection of historical data concerning Washington and his times.

Washington Always Found Time for Sport and Social Features

As a military leader, George Washington accomplished the impossible by winning a revolution against one of the strongest nations in the world, with virtually only a handful of men and meager, uncertain supplies. At His close he helped establish a new government and set it well on its feet as its first President.

These things in themselves would have taken all the living time, and certainly all the energy, of most great men; but Washington found time to be renowned as an athlete, a sportsman and a social leader. He was, likewise, an energetic and capable executive of his own estate and shouldered the responsibilities of many Daughters of the American Revolution—why, every good American knows of the "Fighting Daughters."

The General Federation of Women's Clubs is undoubtedly the most powerful organization in the United States, with the exception of the two major political parties. It is non-political, non-sectarian and patriotic. Its charter is by act of congress and its membership is about 3,000,000. PASTEL TONES LEAD FOR SPRING; WOOLENS VIE WITH WASH GOODS

TO MILADY who aspires in purchase a costume which will say with unmistakable emphasis, "I am an advance spring style," comes this timely word of advice from fashion's headquarters—buy either a dress, coat or suit of checkot or novelty cloth in light pastel coloring.

A strongly defined trend of the Southern resorts and spring fashions is the soft version of mannish mixtures. Of such is the unusual coat-dress here pictured. It is styled of a soft brown and old ivory mixture accenting brown bone buttons as its smart trimming detail.

Color runs riot in the two-piece

COAT DRESS IN MANNISH MIXTURE

checkot and tweed suits which are now the pride of every correctly dressed woman. Tan or gray shades are also commendable for the rose, lilac and orchid tints. These vary from soft "faded" shades to the bright crayon colors.

To add to the novelty, these fanciful wool mixtures carry trimmings of solid colored flannel. For instance, inverted plaits in tweed tapcoats are often finished with flannel of solid color, thus running the general tone of the tweed or checkot from which they are styled.

Spring woolens include diamond and herringbone weaves, basket cloths and basket-like effects, diagonals, checks and stylists tell us are the very newest thing for spring?

It would indeed be a pity if the adornments of the wash goods section should entice mother to pass by the springlike woolens which are quite the stylish note for immediate wear. Indeed, there is not much danger of mother missing anything, for little daughter's keen eye will at once discover the lovely pastel and gayly-colored flannels, tricks and fabric-dines piled on the counters. When she does, mother will feel a little hand stealing in hers while a coaxing voice gleefully exclaims, "Oh, mother dear, please, oh, please, make one a dress of this pretty woolen goods," or words to that effect.

It is a fact, every little girl ought to have at least one lightweight woolen dress in her spring wardrobe—and more especially this season because gay-colored woolens are the outstanding theme of the mode. Why not make a pastel-colored flannel like the one shown in the picture? A dainty little twill would be equally as practical and suitable for wear even into the summer months.

A distinctive style touch in this model is the use of the same material with another for trimming. Underneath the slashed collar is the chief topic of interest throughout all fashionable circles. Some are woven in novel effects. That is, the body of the material will be in some pale pastel shade of apricot, salmon pink, rose beige or blue, the border showing handsome interwoven patterning. Very attractive sports dresses and coats are made of these multicolored borders.

It is all enough to busy one's self during this between-winter-and-spring period with shaking up ginghams, percales and other wash-goods frocks for the children. Surely it is high time for a commendable custom to sew in advance and wisdom counsels, "Let the sewing work go on." But what of the new lightweight wooden fabrics which

Another Boom

A new needle-like button is said to save the worker's time by encouraging the needle to slide easily into the thread holes. The underside of the button is modeled in such a way that the wide-mouthed channels guide the needle towards the holes.—London Tidbits.

No Unalloyed Pleasure

There is no such thing as pure unalloyed pleasure; some bitter ever mingles with the sweet.—Ovid.

Cowboy Hats Are Smart

The newest hats of felt, called the cowboy hat, are fairly large and rakish. To be really smart they must be made on the head and adjusted to the personality of the individual wearer.

Exquisite Hat Ornaments

Hat ornaments to be really smart must be exquisite in color and detail. A most attractive one consists of two circles of jade held together with bands of onyx and diamonds.

Initials on Shoes

Gold, silver and enamel initials are now put on the side of the shoe in a small circle or lozenge. Instead of initials some women have a motto or a phrase, all done in Egyptian characters.

Turbans Are Smart

Turbans of felt made on close high lines are the creation of one of the foremost milliners of Paris. They have been taken up by the smartest women both in Paris and America.

LINCOLN'S BIRTHDAY CELEBRATED BY RADIO

The "hour of tribute to Lincoln" arranged by the National Republic, Washington periodical, in cooperation with WCAP, the Washington, D.C. broadcasting station, was one of the most interesting events in the history of radio, broadcasting. A dozen high power stations scattered from the Atlantic seaboard to Chicago carried this program, making it available to listeners-in from coast to coast.

The speaking program began at 9:30 p.m. on Friday, Feb. 12th. It was preceded by a patriotic concert beginning at 8:45, by the U. S. Army Music School band. The leader of this band has found in the Library of Congress records which enabled him to present the musical selections played by the U. S. Marine Band at the first and second inaugurals of Lincoln. Lincoln's favorite poem: "Why should the Spirit of Mortal be Proud?" has been set to music, and was sung on this occasion.

The list of speakers constituted the most distinguished array of talent ever assembled on a broadcasting occasion. Those who participated were: Speaker of the House Nicholas Longworth, Secretaries Hoover, Work, Jardine and Wilbur, of President Coolidge's cabinet, Mrs. John D. Sherman, president of the National Federation of Women's Clubs, Mrs. Anthony Wayne Cooke, president general of the National Society, Daughters of the American Revolution, John Barton Payne, national director of the American Red Cross, Senator James E. Watson, of Indiana, and Bishop James D. Freeman, Protestant Episcopal Bishop of the diocese of Washington, who pronounced the invocation.

In many localities an appropriate observance of Lincoln's birthday was planned by arranging local features with which was combined this notable program tuned into the auditorum by loud speakers.

CAMPAIGN OF 1926 WILL SOON BE ON

Now that Democrats have broken the political ice in a meeting in Washington, D.C., which they are promising to open an active fight for the Senate and House this fall, the political pot in Washington is beginning to bubble anew. Before long the primary campaigns will be on in many states and the real struggle of 1926 will be started.

The Democrats fired their opening gun, which was a very mild one, at a dinner held by Senator Walsh in Washington, at which Franklin D. Roosevelt was the guest of honor. Those who attended insist that there was no talk about replacing Clem Shaver, the present chairman of the Democratic national committee for a new man, but it cannot be denied that there is an increasing demand among Democratic statesmen in Washington for increased activity on the part of the national committee which has been very quiet since the 1924 disaster.

The leaders who attended the banquet urged greater cooperation between the Democrats of the House and Senate in shaping legislation and great activity on the part of the national, congressional and senatorial committees. It was generally agreed that the campaign issue this year will be the tariff, and that an effort will be made to wean away the western states from Republican support of the protective tariff.

The Republican leaders say that they are willing and anxious to meet the Democrats on the tariff issue and that they will be ready to battle when the gong for action sounds. All signs warrant the prediction that the battle of 1926 will be one of the biggest congressional and senatorial campaigns waged in many years.

ABOUT NEWSPAPERS

Most Americans agree with the statement of Grove Patterson, editor of the Toledo Blade, to the effect that the modern newspaper is one of mankind's four greatest institutions, the others of course, being the home, the church and the school.

Like other modern institutions, newspapers often make mistakes, and the public does not hesitate to tell the editor about these errors. But the magnitude of the task of building the modern newspaper in so short a time will easily account for the mistakes, and they are no more numerous than they would be in other lines of endeavor under similar conditions.

People like to criticise public officials, lawyers and the general run of folks, but for some reason, they like best of all to criticize newspapers. The reason may be that the mistakes of the newspaper are always before them, and cannot be denied or buried. At any rate as Mr. Patterson said:

"It is the cheap and joyous custom to criticize newspapers. Nearly all public speakers from snake charmers to preachers attack newspapers for the reason that it is the simplest and easiest way to get quick applause. Applause is the breath of life to luncheon speakers."

Yet the newspaper is always in the forefront, defending the community in which it lives, and in promoting all things that are for the community's good. It probably gives more free service and more honest service for less money than any other commercial enterprise. No man would want to live in a town without newspapers, and the newspapers themselves are usually an index of the prosperity and progressiveness of the community.

BACK TO NATURE

A Chicago dispatch states that a Northwestern University professor has become so tired of big city conditions that he will make his home from now on in the forests of northern Wisconsin, while taking the long trip to the university every week to deliver his lectures. He complains of the strain and stress of great cities. There are many persons who find themselves completely tired out after dwelling in a big city for a time. The contact with the crowd, the frictions of congested population, the noise, hurry and bustle get on their nerves. There is plenty of opportunity in this wide land of ours for these folks to find the calm which they crave in quieter surroundings. They may not earn so much money, but they would not wear out so fast if they would follow the example of the college professor.—Salem News.

AMERICA HAS A FOREIGN POLICY

The talk of the many advocates of the league implies that the United States has no foreign policy and that it has done nothing to help the world. A former American ambassador to Italy, Richard Washington Child, remarks in his recent book."A Diplomat Looks at Europe" that in terms of practical thinking the United States, single handed, had a better record as a peacemaker than the League of Nations, which had side stepped the Ruhr and backed out of the Corfu dispute.

Consider the record: The Washington limitations of armaments conference, the Dawes report, the contribution of four or five billion dollars in relief goods and relief loans, the straightening out of Cuba by Crowder, the averting of war in Central America, the making of approximately fifty international agreements since the war, the establishing of the open door policy in the near East and of liberal treatment of China in the far East. Not a European nation approaches this record.

It is a series of achievements of which every American has a right to be proud. Yet the sentimentalists say America is failing in her duty to help the world! Sense is better than sentiment.—Kansas City Times.

Hidden Riches

There is many a rich stone laid up in the bowels of the earth, many a fair pearl laid up in the bosom of the sea, that never was seen, nor never shall be.—Bishop Hall.

Some Good in It

A farmer surprised his wife by buying two tickets for a white drive. "Did you ever play white," she said. "No," replied her husband, "but I thought the drive would do us good."

Up-to-Date Builder

Underneath the foundation stone of a new building there were recently buried a newspaper, a gramophone record and a cinema film.—London Punch.

Mostly Unpleasant

If we are all paid stimulatey according to results, as many persons build, there are big umpires in store for some of us.—Charleston News.

Expect Too Much

"Some men not only makes trouble," said Uncle Ebon, "but expect to be paid for doin' it."—Washington Star.

COMMENT.

O. L. Smith, assistant attorney general, says that in the days before license in Michigan the bootleggers put a gallon of rum and a plug of tobacco into a barrel of rainwater and sold it to the natives for whiskey. Now they don't even put in the gallon of rum.

Republicans who stole the chair in which President Coolidge sat in the Essex County Republican Club in Massachusetts were disgraced, but that isn't anything to what happened to the Democrats who tried to take Cal's White House chair away from him.

A Boston friend of Col. House told the people at Geneva the other day that Uncle Sam would be a full member of the league by 1926. He must have a lot of confidence in Mr. Bok's press agents.

Six Turks were executed for failing to wear hats. If such a law were passed in America it wouldn't take long to decimate the ranks of the rah, rah boys in the colleges.

An Arkansas man writes that he does not know anything about the World Court but that any reservations Gloria Swanson has made is all right with him.

Whenever the Democrats get ready to make their campaign on the tariff issue it indicates that they haven't much left to talk about.

Women fashion experts have decreed that the bob is to stay. But of course it won't unless you keep on bobbing.

Isn't it queer how they keep on developing suburbs and building homes when nobody stays in 'em anymore?

Stoic Philosophy

Stoics were the disciples of Zeno, the Greek philosopher who taught during the Second century before the Christian era. These disciples were called Stoics because they listened to Zeno's teachings in a porch at Athens, and the Greek word for porch, expressed in Latin letters, which are the ones we use, was stoa. Zeno taught that man's supreme happiness consisted in living agreeably to nature and reason.

Eugenics Expert

Sir Francis Galton, in his passion for eugenics, gathered material for a beauty map of Great Britain, and walked the streets of many towns, carrying in his pocket an instrument that registered every woman he met as attractive, indifferent or repellent. As a result of his investigation he declared: "London ranks highest in female beauty and Aberdeen lowest."

Organ of Grecian Origin

The organ was in use in Greece at an early time, having been carried there by Greeks who obtained it in Alexandria. It began to be used in Christian churches about the year 657. In the following year it reached some of the churches of western Europe. The organ at Haarlem, Holland, is one of the largest in Europe. It has 5,000 pipes and 60 stops.

Weighing the World

The mass of the world is determined by means of the torsion balance, an instrument for measuring very minute forces. By means of this instrument the attractive force of a large metal ball is accurately measured, and by comparing this force with the earth's attraction the mass of the earth may be ascertained.

Original Juntas

The Juntas that appear in modern European history, were the provincial councils of Spain. When Napoleon sent his armies to overrun Spain in 1808 they declared against France. The word junta is the name given to the leaders of the Whig party in England during the reigns of William and Mary, and Anne, 1689 to 1714.

Forest Fires

The forest service has experimented with reference to forest fires, and finds that pipe lines are only second to lighted matches in their ability to start fires, and that this smoldering tobacco is much more likely to kindle forest litter, bark, rotten wood or pine needles than either a cigarette or cigar.

Tiny Church

The smallest Catholic church in the world is on the Old Palo Alto plantation in Louisiana. The chapel is large enough for a small altar and standing room for the priest celebrating mass. The congregation occupies benches outside of the chapel.

Unfair to Child

There are few persons who realize that pampering, indulging and training a child in the habits and ways of domination are inadequate training for life and are destructive to the child's mental health and emotional adjustment.—Hygeia.

Founded by Women

The famous French academy grew out of an exclusive literary circle of women formed about 1615 by the Marquise de Rambouillet for the purpose of rescuing the French language from the vulgarity which characterized it.

THEATRE

Edna Means, Reader

Miss Edna Means, noted interpretive reader, who is to appear on the local Lyceum course Friday evening, February 19, ranks among the foremost professional entertainers on the Lyceum and Chautauqua platform.

In a cleverly assembled group of readings, "From the Passing Crowd," Miss Means has drawn upon the people of real, everyday life for her inspiration. Her character sketches entertain, amuse and instill a friendly spirit of helpfulness and good will toward others. No one will forget her presentation of the "Whistling Boy" or the farmer who would go back to the farm, two characters almost invariably included in her program.

Miss Means is an earnest student of human nature, and, to quote the Des Moines, Iowa, Register, "she has a wonderful voice, a charming personality and an unusual mastery of her art." She achieves a gratifying success in her every appearance.

Miss Means was secured for the local Lyceum course through the well known Redpath Bureau.

"Silent Sanderson"

More sympathetic and true than anything he has ever done before. That is the way they describe Harry Carey's characterization in "Silent Sanderson," his newest production, which comes to the Palace theatre next Wednesday.

It is true that Carey, as the amiable, whimsical Joe Parsons, strikes that note of sympathetic realism which is all too infrequently registered on the screen. The most vital thing in Joel's life is his love for his younger brother. Beyon.l all selfishness, it spreads its protection about the boy—striving to ward off the evil of the world. Joel fails in this, not because the world's evil is stronger than the good in one man's heart. But before he fails he makes a sacrifice—harder than death —to save his brother's happiness. He stifles his own love for Judith Benson, so that she will marry the boy she loves her.

The first sight of Joel—a huge bulk of a he-man working among his fanciful little herd, fighting to get water for dying cattle, caring for the young ones will all the tenderness of a woman—is enough to make whatever follows of loathsome and sacrilege seem logical as life.

"The Gilded Butterfly"

Alma Rubens is the leading cast in the Fox Films production, "The Gilded Butterfly," coming to the Palace theatre Saturday and Sunday, in which she is co-featured with handsome Bert Lytel. These two prime favorites portray a typically American couple from the wealthier class, the girl a social butterfly and the man energetic and ambitious.

The story itself deals with the problem which faces many parents today—how to raise a daughter. American daughters are notoriously spoiled and humored and in this interesting story there is a sermon preached to the parents which will interest parents and daughters alike.

Alma Rubens is Linda Haverhill, the daughter, the father's pride, who leads a social parasite, who has been living on his friends and family for years. He has married his only daughter merely with the hope that she will eventually marry money. He does this partially because he can't bear to be parted without having the dainty trifles other girls have, and partially because he knows a wealthy marriage for her means independence for him.

The results of his training forms the basic theme for the rest of the story. It is filled with unusual situations, cleverly worked together into a perfect whole, and is responsible for the thrilling and unexpected ending.

WANT COLUMN

LOST—Saturday on State street, from running board of car, an aluminum tea kettle. Finder will confer favor on owning it at A. & P. grocery store.

WANTED—Listings of good lake lots, cottages and acreage. Price must be right. Geo. A. Harper, 2021 S. Division street, Grand Rapids, Mich. 1-4

FOR SALE—Eureka Electric Vacuum Cleaner with attachments, practically new and as good as new—no use for same and will sell at very low price. Mrs. Coryell Sevrey, Bellaire, Mich.

FOR SALE—New cruiser fully equipped and ready for service. Power Peerless Marine Gas engine. Toilet with folding basin in lavatory. A Stevens ship at moderate price. For particular call at Sentinel Office

WANTED—Manufacturer desires lady to introduce its goods. No canvassing. Position pays about $18 per week. Prefer lady who belongs to church or club organization. Write Sales manager, 505 Sloan Bldg Cleveland, Ohio. 43-3t

CHERRYVALE HATCHERY— Baby Chicks every week from March on-il July, hatched from my Mammoth incubators. Commercial hatching $5 00 per hundred. Write for prices. Al Wards, Phone 166 F2, East Jordan.

CASH For Dental Gold, Platinum, Silver, Diamonds, Magneto Points, False Teeth, Jewelry, any valuables. Mail today. Cash by return mail.
Hoke S. & R. Co., Otsego, Mich.

APPLES AND WOOD

By Dr C. S. HERBEN

"Always take hold of wood during the first thunderstorm in January; it gives you strength enough to last you all the new year!" Anyone who is familiar with the Czecho-Slovakian traditions will tell you that proverb was accepted as much more reliable than our saying that "an apple a day keeps the doctor away."

Quaint conceits—both of these, but not sufficiently reliable to warrant our dependence upon either of them for our health and energy! Nevertheless we might explore a little. Wood comes from a living or once living thing. It had life, energy and presumably health in order to acquire sufficient growth to be used for the piece of furniture we might take hold of in a January thunderstorm.

Apples—good enough to eat are products of a form of life and energy. What gave them life and energy? Sunlight and food. If we could lay hold of the secret of the production of healthy trees and the fruits thereof, we might save our strength for a year or more without touching the wood itself for a charm.

Sunlight and food are two of the most important factors in maintaining proper physical strength. It is not necessary to urge the importance of the latter. We all know that without food we should be very helpless people. The benefits derived from sunlight are only being guessed at and while we have made valuable discoveries regarding the use of sunlight in preventing rickets in children, and in helping to cure certain diseases, we probably do not understand the role the sun plays in keeping us all in good health.

In the winter months, sunlight (not thru window glass) and fresh green vegetables sought with more faith than in thunderstorms with a higher motive than just keeping sickness away. Make it positive. Get food and light because it has been proved that they are healthful.

SAFETY LAST

At 50 miles drove Allie Pidd; he thought he wouldn't, but did.

Here he sleeps, one Johnny Fonker; he pounded a ton without a hooker.

Here lies what's left of Harry; at the railroad crossing he did not tarry.

At 90 miles drove Eddie Shawn; the motor stopped, but "Ed" kept on.

Here lies the body of William Jay, he died maintaining his right-of-way.

Beneath this stone sleeps William Kansas, ice on the hill; he had no chains.

Lies slumbering here one William Lake; he heard the bell, but not the train.

Down on the creek sleeps Jerry Bass; the bridge was narrow; he tried to pass.

John William Jones lies under this thistle; he didn't hear the choo-choo whistle.

And here's what's left of Samuel Small; he paid no attention to 'slow' signs a-tall.

Buy New Husbands

Among a certain tribe in the district of Alibi-bibbud, in Indio, there is a custom penalizing women who discard their husbands and to marry again on payment of money compensation to the first husband.

Add Novelists' Mistakes

We Serve "Michigan"

Michigan Railroads Welcome Good Roads

MICHIGAN is one of the states that has made the greatest progress by the extension of its good roads. Its industrial importance has been greatly fortified by the development of a system of internal communication. It can still advance under a careful and judicious extension of this program. With the passing of transportation from the *mud* age to the *hard road* age there are indications that we are experiencing in the United States an industrial revolution as important in its effect as was that which marked the introduction of the macadam road and the steam railroad in England. This is evinced in the expansion of our national income.

For instance, the wealth of our nation—*investment on our plant*—in 1912 was 186 billions of dollars while our national income—*the annual turn-over*—was 30 billions of dollars.

The wealth of the nation in 1922 was 321 billions of dollars, and our national income over 80 billions.

It took a six-dollar investment to make a dollar in 1912.

It took only a four-dollar investment to make a dollar in 1922. An *increase in efficiency of 33 per cent. in a decade.*

THE utility of the railroad, as a freight carrier, has been increased many times through the complementary agency of the good roads system. The traffic in the old days could only be drawn from about eight miles on either side of the right-of-way of a railroad. Now, the railroad's range of activity is five to six times greater. True, these new transportation agencies present some problems that embarrass at times, but better transportation in whatever form it may be, operates to the general good.

The railroads do ask for reciprocal regulation.

Michigan is in the vanguard as an industrial state. Let us retain that position.

The Michigan Railroad Association approves the state's proposed program for more *good roads* because it will yield a large return on the investment.

MICHIGAN RAILROAD ASSOCIATION

NEW PALACE THEATRE

Attractions for Coming Week

Saturday and Sunday, Feb. 20-21

Alma Rubens and Bert Lytel in "The Gilded Butterfly." Full of romance, pathos, thrills, suspense. Exposing the social p rasites and their methods. A thrilling unexpected climax is found in "The Gilded Butterfly."

Another good comedy, "Strong for Love" will also add to an enjoyable evening. Another sensational picture "The Land of Cotton," will explain something of the cotton industry to us.

Wednesday, February 24

Harry Carey in "Silent Henderson." He had purchased her for so much gold—without ever having seen her—she was his, in every sense of the word. Then he discovered that she was the woman that he had worshipped in youth.

Also a Fox News reel. Travel the world with the News reels. The very best form of travel.

Thursday, Feb. 25—"The Scarlet West." Watch next weeks paper for the final announcements.

SWEET CLOVER BEST PASTURE

Strongly Recommended by Mr. J. G. Wells at Feeding School

(B. C. Mellencamp, Agr'l Agent)

Sweet Clover is the most profitable pasture for cows, according to Mr. J. G. Wells, Extension Specialist in Dairying, who spoke at three dairy feeding meetings conducted by County Agent Mellencamp, at Charlevoix, East Jordan and Boyne City.

"It stands the most grief of any pasture, grows the most rapidly and furnishes the most feed per acre. In addition, it is easy to get a stand and due to it being only a two year crop, works in well with a crop rotation. As a result, it is superior to Alfalfa, which is more easily trampled and killed and does not produce as much growth.

The average cow is under fed in the period just before grass pasture in the spring and again during August, September and October, after the June grass and pasture of similar nature dries up and before the cow is fed a winter ration. To have plenty of good palatable feed at those two periods should be the aim of the dairyman living to make money. Sweet Clover is just the crop for the above named conditions, and it can be seeded with oats in the spring and then be utilized for pasture after the oats are taken off for a period of two months or so, immediately after the June grass dries and before the cow are fed their winter ration, the only thing to watch out for is to leave around a six inch growth in order to hold a snow covering for protection in the winter time. Then the clover pasture comes on as soon as grass in the spring and can be pastured straight through to the end of the crop, or the cattle can be taken from the field at seeding time and the crop will re-seed itself. If short on hay, one cutting of hay can be had and still get quite a large amount of pasture.

Then again the cows can be left on the pasture all summer and the remains can be plowed under for a green manuring crop, which is a wonderful soil builder. It is doubtful if any other crop can be used for as many purposes as Sweet Clover and at the end of the crop, leaves the soil in as good, if not better condition, than when first sowed. Why not use Sweet Clover in this way?

Mr. Wells stated that the average cow produces only 160 pounds of butter fat in a year, which means total income of $30.00 net profit, while the average cow in the cow-testing assn. produce 293 pounds of butter fat, which means approximately $70.00 net profit. There are two ways of making more money out of cows, one is to increase the quality of the product, the other to increase production. Figures from 18,000 cows in cow-test assn. show that the greater the production, the greater the profits. A 200 pound fat cow only makes $11.00 net profit, while a 200 pound cow makes $42.00, a 300 pound cow makes $73.00 and a 400 pound cow returns $106.00. It can be readily noted that as the production is doubled the returns are nearly four times and as the production is treble I the profits are nearly seven times greater. Therefore, why not sell the poor cows for meat and feed the better cows better and reap higher returns?

The importance of the right amount of minerals in the ration, was also emphasized.

As a result of conducting a mineral feeding experiment at M. S. C. it has been found that the average cow is in need of calcium and phosphorus, in addition to what is received from the regular hay and grain feeds. Steamed bone meal is the best agency to supply these needs, as it contains both of the necessary elements and is not injurious. The easiest way is to add two pounds of bone meal to every 100 pounds of grain mixture and this will increase more milk and a healthier cow.

Many commercial mineral mixes are sold on the market to take care of the cow needs, but the experiment being conducted, thus far shows that instead of being of benefit, they have proven injurious for the five cows fed this ration, gave less milk and more of the calves lived longer than twelve days after birth. While this experiment has not been run long enough to be absolutely accurate, the results are in conformance with the opinion of our most noted dairy authorities.

Space does not permit a discussion of all the other valuable suggestions given the dairymen by Mr. Wells, but anyone missing these meetings lost a fine opportunity to increase the efficiency of their feeding program.

They "Anisited"

Little Billy Bigby came in from playing with his wee trousers torn. Mrs. Bigby was much put out and scolded Billy. "Well, mamma," he said, "The boys wanted to play bear and they just anisited me and pulled that I be the bear, so they put me in a hamper and a big old mail sparrow up and tore my pants."—Capper's Weekly.

Remarkable Remarks

I have read many bad books, but none of them ever harmed me. I have heard much bad conversation, but it never perverted me, most of it proved a warning. If I fall into a sewer, you may be sure I will scramble out as soon as possible. So will anyone.—E. W. Howe.

Pine Poles Best

Pine poles which have been treated with coal-tar creosote for their entire length by the open cell pressure method give the longest service, telephone companies have found, according to official report.

—PERSONALS—

Miss J. B. Redpath went to Chicago Tuesday, on business.

Mrs. W. W. Mitchell entertained sixteen ladies last Friday evening at bridge

Ira A. Adams spent the week-end in Bellaire on business, returning to Charlevoix on Monday.

Mr. and Mrs. Fred Siminow of Detroit, are spending a vacation with relatives and friends here.

John McCann went to Grayling last Thursday where he spent some days with his son, Dr. Charles McCann and family.

Mrs. Charles Mossington, for some weeks past a visitor with friends in Detroit, returned to her home here last Monday.

The public schools will have a spring vacation this year beginning March 26. The reopening will be April 5th, the day after Easter.

Prizes to be awarded to masqueraders appearing at the Firemen's dance, Feb. 22nd, are on display in the windows of the Charlevoix Hardware Co.

Mrs. Grace Oldham went to Chicago last Tuesday where she will remain for several days attending to business interests that require personal attention.

Rev. B. G. Matteon D. D., will spend the next few days in Chicago where he will attend a meeting of the National Association of Camp Directors scheduled for the 19th and 20th.

Harold McCann and Willie Gibson left for White Lake last Saturday, with the intention of engaging in the fishing industry, an activity which they have pursued for a term of years.

About twenty friends took possession of the home of Mr. and Mrs. Earl Miller last Saturday night, provided a splendid pot luck supper and spent the evening enjoying card games and dancing.

Friends, a number of them, spent an enjoyable evening at the Lester Smith home last Saturday. Music, dancing and nice refreshments furnished the entertainment and pleasure for the assembled guests.

Do not forget the date reserved for the firemen's Masquerade dance, Feb. 22nd, when everyone enjoying this form of entertainment will have an opportunity to spend a pleasant evening. Good music is assured.

The Pilgrim Circle of the Congregational Ladies' Aid society met last Wednesday with Mrs. John Burns. The usual work meeting was followed by a potluck supper. The circle meets again the February 23rd with Mrs. Geo. Swinton.

There was a very successful Valentine party in the social rooms of the Congregational church last Monday evening under the auspices of the Y.P.S.C.E. A large attendance of young people thoroughly enjoyed the program of music, games and eats.

Mrs. A. L. Fitch and Mrs. A. J. Stelzer gave a bridge luncheon at the home of the former last Saturday afternoon. The same hostesses will entertain at the latter's home Friday afternoon, when a one o'clock luncheon will be served, followed by bridge.

Pleasant weather conditions and the recent return of Captain Sanford from an extended vacation indicates the approach of the season of navigation and that the U. S. mail ship James E. Sanford will soon be operating on the Charlevoix-St. James route.

Leo Powers and Frank Poole, for some weeks past in Florida, returned to their homes here last Saturday. The two gentlemen have taken over some business interests in the south and will return soob to take charge of and carry on their business venture.

Captain James H. Gallagher was a Charlevoix visitor last Thursday. He was motoring through from Boyne City on his way to his home in Boyne City. Mr. Gallagher reports favorably the condition of the M-11 road he is traveling through the west part of the state

Mayor Arthur Bergeon and William E. Parmelee went to Lansing last Monday an business connected with matters of importance to the city in which a new sewage disposal plant for Charlevoix will be the chief proposition under discussion and consideration by the state health department.

Mrs. J. F. Barnes, sister of Mr. James Gaskin, passed away at her home, Rochester, New York, according to a telegram received here yesterday, soon after the ladies death. Unfortunately Mr. Gaskin, who suffers from a severe attack of the grippe was not able long trip to attend the final service.

An adjourned term of circuit court for Charlevoix county next week will claim the attention of Judge, attorneys, defendants, law litigants, members of the jury, witnesses and probably a number of citizens, the latter having but little if any, direct interest in the several cases on trial or court procedure

East Jordan basket ball players are scheduled to meet the C.H.S. quintet in this city Tuesday evening, February 22rd, at Hooker's garage at 8 o'clock. Preceding the main event the C. H. S. Freshmen and Seniors will contest for honors. The price of admission is placed at 25c and 35c. According to information given out by the head of the athletic association this game will be the last home contest of the first team.

Roy Ripley spent some time in Benton Harbor last week with his father, Wright Ripley, formerly of this city. The latter has been ill for some time, but at the time of Roy's return last Saturday, was somewhat improved.

Captain James Sanford, for some weeks past a visitor in Chicago, Monroe and Muskegon, returned to Charlevoix last Tuesday. Mrs. Sanford who accompanied him on the trip as far as Muskegon will remain with their son "Joe" for a few days before returning. In the mean time the Captain will be in charge of the home ship.

The big fish that the Traverse daily paper mentioned was caught by Ed. Wood of Kewadin, last Sunday through the ice in Elk Lake, it gained 2 pounds on the way to the city, and there is nothing like this climate to put on the weight this summer and winter. A Traverse City young man purchased the fish we understand for exhibition purposes. —Elk Rapids Progress.

John Kirby, member of the local coast guard crew, took something of a header last Thursday afternoon during a skiing trip on Mt. McSauba. We say a header due to appearance of his face when he returned from the expedition. From personal observation we conclude that Mr. Kirby is not anxious to duplicate his tumble or give a demonstration of the act as entertainment for spectators

A real estate deal that has been under negotiation for a few days was consummated this morning, when the Moline property—formerly Martha Wilson's—known as the Boulder Farm, consisting of about 10 acres of fruit and garden land, located in the northeastern part of the city was transferred to Mrs. Joseph M. Porter. This property is perhaps the finest place of its kind in this region.

Members of the W. R. C. certainly selected a most splendid evening when they decided on the night of February 17th for serving a supper and carrying out an entertainment program at L. O. O. M. Hall. The weather condition was most delightful, the best we have experienced for several weeks, the supper well selected and bountiful, the entertainment a matter in full harmony with other arrangements and with the excellent support given by the public made on all that could be derired by those in charge of the affair.

The splendid winter days of last week and the early part of this was succeeded by two crisp snappy days, Monday and Tuesday—a forty-eight hour period. Late Tuesday night weather conditions moderated materially, the mercury went up several degrees, Wednesday was bright, clear and warm enough to approximate a genuine spring day, all of which is very satisfactory for the month of February. Predictions are freely made at times that spring weather will make an early appearance in this section. If so it will meet with hearty approval from citizens generally.

Young people as well as some of the grown ups have, during the warmer days, indulged in building snow figures and specimens of their work are on display on many of the residence grounds throughout the city. One especially fine figure of this nature was on display on the grounds of Dr. W. W. Mitchell for several days and attracted attention of passers by. The figure still stands but due to recent warm weather has lost much of its original form and beauty. Naturally many of the snow figures, the work of novices, are more or less crude, but others are demonstrations of the art workers.

Poetic Legend

There is a great deal of indefiniteness, not only as to the origin but as to the significance of the name "Forget-Me-Not," applied to the flower. German legend is full of explanations of its origin. In one myth a knight dashes into a lake to pluck the flowers growing on the further bank. On his return his strength is exhausted. Feeling that he cannot regain the shore, though very near it, he throws the flowers at his lady love's feet, and, crying "Forget me not," disappears beneath the waves.

Important Little Things

Of little things—nails, stones, bricks, leaves, bits of grass. So is life made up of little things—words, smiles, frowns, thoughts, gestures. Watch the little things.—Forbes.

Treating Shoe Soles

Copal varnish is the best thing to apply to the soles of shoes. The soles should be thoroughly dry, and if they have not been worn, they should previously be roughed on the surface before applying the varnish.

House Traveled Far

The first frame house erected in the city of Portland, Ore., was manufactured in the state of Maine, and after a ship, in pieces, around Cape Horn, and set up in Portland in 1847.

NOTICE

To the Electors of the City of Charlevoix:

Owing to the change made in the election laws by the last legislature, which were not discovered until it was too late to file nominating petitions, we take this method of announcing ourselves as candidates for the following offices;

For Mayor—Arthur Bergeon
For City Clerk—Charles H. Lamphear
For City Treasurer—Elma H. Cook

First Ward

For Supervisor—Harry A. Craig
For Alderman—Robert Bridge

Second Ward

For Supervisor—Simon M. Rose
For Alderman—Robert J. Madill

Third Ward

For Supervisor—Archie Alcock
For Alderman—William E. Parmelee

Card of Thanks.

I wish to express my appreciation to friends and neighbors who through kindly acts and expressions of deep sympathy gave me aid in my recent affliction and sore bereavement.

Lawrence Livingston.

W. C. T. U. MEETING FRIDAY AFTERNOON

At the Home of Mrs. Charles Novak, Committees Report

The February meeting of the Woman's Christian Temperance, Union was held last Friday with Mrs. Charles Novak, with a good attendance of members and visitors.

The reports of committees and department superintendents showed that good work had been done during the month. The Traveler's Aid Work, formerly in charge of the Red Cross, was taken over and assigned to the Evangelistic department.

A sketch of the life of Frances E. Willard was read by Miss Metcalf and an offering taken for the Willard Memorial Fund, which is used for national extension work. A picture was shown of Miss Willard's statue in the Hall of Fame at Washington, D. C. She is the only woman so honored.

The paper of the day was presented by Mrs. E. E. Cross on the topic, "The Bible In The Public Schools." A few paragraphs quoted from the paper will be of interest to many who are thinking on the subject of Religious Education.

"The principle of religious freedom which insures the separation of church and state is precious. It touches bed rock in its truth. It is a guarantee of our liberty. But the rule of separation of church and state must not be so construed as to render the state a fosterer of non-religion or atheism. Yet that is just what we are in danger of doing in America today.

"Public school men, business men and educators are becoming concerned about this situation. Various experiments are being made looking to a better correlation of religious and public education. In some places courses of biblical literature and history are offered in the public schools. In many more communities credit is given by the schools for Bible study or religious education conducted by other agencies. The plan which has met with most favor is that whereby the public schools grant an hour or two of time from their weekly schedule, during which children may be taught in schools of religion maintained by the churches. This movement was first effective in Gary, Indiana, and is rapidly spreading. Such week-day schools of religion are now conducted in more than one thousand cities, towns and rural communities. The state of Minnesota recently passed a law empowering local school boards to excuse children from public school attendance for not more than three hours a week for this purpose.

"Let the churches agree on an educational policy with respect both to their own teaching and to the sort of recognition that we desire for religion in and by the public schools; let them do their share of education in a way that merits recognition, and a fit measure of recognition will be made possible and will almost certainly follow."

A social hour followed the meeting and refreshments were served by the social department.

Smallest Countries

The five smallest countries in the world are Monaco, 8 square miles; San Marino, 38 square miles; Liechtenstein, 60 square miles; Andorra, 180 square miles, and Danzig (free city), 720 square miles.—Farina News.

Probably She Was Wise

Singleton—"There goes a woman, I owe a great deal of happiness to." Wigwag—"How's that?" Singleton—"Well, about five years ago I asked her to marry me." Wigwag—"But she evidently didn't." Singleton—"It's actly."

Pioneer Builder

Benedict Biscop, an English monk of the seventh century was, according to the chronicler, William of Malmesbury, the first man who introduced in England construction of stone edifices."

Indians Are Efficient in Handling of Tools

Bismarck, N. D.—Innate ability with machinery and tools now commonly attend the American Indian to a new place in the sun, believes Clark E. Dickinson, head of the government Indian School for Girls here.

During his ten years in the Indian service, Dickinson says, he has found that the Indian has no inherently and an ability with tools which other races would envy. This is the result, he thinks, of long centuries in which the Indian was compelled to devise tools to meet his peculiar conditions. Indian boys make excellent automobile mechanics, he declares, and many have displayed proficiency in other trades where soundness of hand and accuracy of eye are assets.

Arctic Not So Cold as Painted, Says Stefansson

Omaha, Neb.—The generally accepted theory that fright weather is prevalent the year round in the Arctic regions was discounted by Vilhalmur Stefansson, noted polar explorer and scientist, in an address here. Stefansson declared he had discovered by experience that the average temperature of Iceland in January is 20 degrees above zero and that on the northern coast of North America during July and August the thermometer very often goes to 80 degrees in the shade and has been known to go to 100 degrees

END BUNION PAIN FOREVER

No Need to Suffer Another Day Those Agonizing Torturing Pains.

There is one simple yet inexpensive way to reduce inflamed, swollen toe joints and get them down to normal and that is to apply Moone's Emerald Oil night and morning and people who suffer from such enlargements would be wise to reduce them before they reach a more or less chronic stage.

Ask any first-class druggist for an original two-ounce bottle of Moone's Emerald Oil (full strength) and refuse to accept anything in its place. It is such a highly concentrated preparation that two ounces last a long time and, furthermore, if this wonderful discovery does not give you complete satisfaction you can have your money refunded.

Special note: People who want to reduce swollen or varicose veins should get a bottle of Emerald Oil at once. Applied night and morning as directed they will quickly notice an improvement which will continue until the veins and bunches are reduced to normal.

Says His Prescription Completely Banishes All Rheumatic Pain and Twinges---Is Guaranteed

Drop Seated Uric Acid Deposits Are Dissolved and the Rheumatic Poison Starts to Leave the System Within Twenty-four Hours.

Every druggist in this county is authorized to say to every rheumatic sufferer in this vicinity that if ALLENRHU, the sure conqueror of rheumatism, does not stop all agony, reduce swollen joints and do away with even the slightest twinge of rheumatic pain, he will gladly return your money without comment.

ALLENRHU has been tried and tested for years, and really marvelous results have been accomplished even in the most severe cases where the suffering and agony was intense and piteous and where the patient was helpless.

Mr. James H. Allen of 26 Forbes St., Rochester, N. Y., the discoverer of ALLENRHU, who for many years suffered the torments of acute rheumatism, desires all sufferers to know that he does not want a cent of anyone's money unless ALLENRHU decidedly conquers this worst of all diseases, and he has instructed druggists everywhere to guarantee it as above in every instance.

The VALLEY of VOICES

by GEORGE MARSH

AUTHOR OF "TOILERS OF THE TRAIL" "THE WHELPS OF THE WOLF"

COPYRIGHT by THE PENN PUBLISHING CO.

CHAPTER IX—Continued

"Hut, mademoiselle, you must be surfeited with pretty words from Monsieur," he said maliciously, sure of the effect.

"Pretty words from heem?" She laughed bitterly, "that ees a joke! No pretty words from heem since the lady, who will marry Lisceles at January, drive heem crazee, eh, Loola?"

Lallamme scowled into her mocking eyes, but was silent. He rose and led his guest to the living room. Then the sound of voices outside attracted his attention, and shortly the Ojibway girl appeared and spoke to him in a whisper.

"You will excuse me for a little while? I am called to the trade-house?" At the door he added with a brutal laugh, "Help yourself to the cigarettes and whisky. And—s—lose will keep you entertained, no doubt."

Steele wondered if David had run into trouble. If the trader were free with liquor with his men, which seemed improbable, David might have been set on, but the Ojibway was too wise to imperil his chief or their plans.

Following the slam of the outer door the girl rose, placed her fingers warningly on her lips and tiptoed out of the room, leaving Steele curious, uneasy. He heard talking in low tones from the direction of the kitchen, then she returned, and walking to his chair, looked quizzically down.

"Are you as much of a man as you look?" she demanded.

"How long before Lallamme surprises us, mademoiselle?" he countered, forcing a yawn, having no intention of playing into Lallamme's hands.

"You thenk I'm working for that liest? Are you blind? Can't you see he's done with me?" She began, dramatically, then, "Why did you look at heem that way before dinner? I saw you! You enabled heem with your eyes. You needn't deny it! You hate heem! Why?"

"You are mistaken, mademoiselle. I never met Lallamme before today."

"You lie! But you are suspicious; you thenk thees is a game—theenk he ees listening. Don't you see—hat me why I went out—to learn if he had left the house? Oh, you can trust me! This ees the naked truth. I would kill heem tonight if I could get away. But you—why d-s you hate heem, too?"

"Does Lallamme suspect me?" he asked, ignoring her question.

"He knows you are what you claim to be."

"What do you want me to do?"

"Mon Dieu! Get me out of dees place—take me with you! He's keeping me here because I know too much. He's afraid I weel talk."

"Talk about what—the whisky trade?"

She lowered her voice to a whisper. "The whisky ees not all—you would not believe me if I told—" A door closed outside, and Lallamme entered the room.

"Ah, this is most unromantic, monsieur," he protested, hand raised in mock gesture. "I return suddenly, to find you still in your chair—alone."

Steele was on his feet. "My man David in my trouble?" he snapped, ignoring the sarcasm.

"Oh, it wasn't his fault. Baptiste fancies he's strong, and took hold of him."

"What's happened?" Steele's blood heated at the possible harm to David outnumbered ten to one at the tradehouse.

Lallamme raised a deprecating hand. "Nothing, nothing at all, I'm glad of it! Your man cracked some of Baptiste's fingers—just squeezed his hand and Baptiste had enough. He always was a bit yellow."

"But will Baptiste follow this up? I don't want trouble here. Where is David now?" Steele was relieved; he had feared the worst. But that meant that David and he would leave the post in the morning. He knew his half-breeds. It would be dangerous to stay—and as yet nothing had been learned from the girl.

"I sent them all to bed. Baptiste won't follow it up. Antoine is with him. I'm boss here," laughed the trader.

Then Steele was aware of the attention of a pair of shining eyes. "Ah, it was magnificent, monsieur—the way you looked," said the girl. "Your eyes were like your name—of steel."

"You are embarrassing, mademoiselle."

"You must excuse Rose this evening," said Lallamme with a grimace. "She has not seen a white man in a year! Not but what she's sincere, but whisky makes her think out loud, doesn't it, Rosie?"

If the glitter of black eyes could have killed, Lallamme would have met sudden death. Instead, he replied the glance, while Steele's mind was busy with what the Frenchman's return from the trade-house had checked the girl from disclosing. If Pierre were Lallamme's man, as he seemed to be, Steele was curious to learn what tale the Indian had brought from Wailing River concerning the lost fur canoe and the Windigo terror. He finally decided to drive straight at the point with the hope that the girl would drop something.

"Did I tell you this afternoon that I heard a Windigo at Wailing River?" he began.

"What? You a scientist, mean to tell me that you heard a Windigo—a creature of Indian myth and superstition—a bugaboo of the ineffective men?"

Steele grinned with delight into the trader's puzzled eyes. "I certainly did. I was waked by his howling on the ridge across the river from the post."

Lallamme smiled, suspectively tapping the bottle at his elbow, as he teased: "Scotch is a wonderful stimulant to the imagination, monsieur."

"You know that the Indians attribute the loss of St. Onge's fur canoe this summer to the same devil?" continued Steele, watching Rose's face.

"The loss of their fur canoe?" cried Lallamme, "You mean to say that St. Onge didn't get his fur to Albany this year?"

"Not a skin," said Steele. This was news Pierre assuredly would have brought from down river. Then he caught a furtive signal from the girl. She cautiously lowered an eyelid, as she watched Lallamme.

So the Frenchman was deceiving him. Pierre had been on the trader's business at Wailing River. But why did Lallamme wish to conceal it? He could not suspect that Steele would return to the Wailing—

"And you believe with the Indians, I suppose, that the Windigo got the canoe, also?" jeered Lallamme. "Thank you, monsieur, for your entertaining story. Rose, you will see that Monsieur Steele will want for nothing. Good night, monsieur."

The face of the girl went gray with fear. "Mon Dieu! If it's Lallamme!"

a bit too raw, monsieur! It is not the first boat to be assailed in that whitewater."

"But it was not lost in the rapids. That has been proved, for no trace of boat, fur or men was ever found. They couldn't steal the fur and get out by the Albany or through the muskeg country. That leaves the Windigo as the only solution, doesn't it?"

"Well, that finishes St. Onge, then," said Lallamme.

"And helps your little plan, eh, Louis?" Rose added.

The trader's face hardened. "Yes, it helps the trade here, of course, if they quit down there. By the way, did St. Onge say anything about scaling a canoe up river this fall?"

Rose Lallamme paused in the act of handing her half-filled glass. Intent on Steele's answer.

"I left the post early in September on a side trip, intending to return before starting for home, but never went back!"—Then, seizing the opportunity to deceive Lallamme into waiting until the last minute before breaking his vengeance on St. Onge, Steele boldly gambled: "He said something about my taking a letter to you."

"He did?" The dark face of the trader flushed with pleasure.

"Yes, now left—and Michel."

A glass was shattered on the table in a fury of passion. Rose Lallamme, heeding to her feet, glared at the Frenchman. "You, you think you've got her at last, do you?" she scrutinized. "When do I go, then? You'll send me now, when she comes? You'll let me go, now?"

What Steele had waited for had happened. Alcohol and her hatred of Lallamme had loosened all restraint on the tongue of the maidenly girl.

Infuriated, the trader rose and pointed to the door, "We've had enough of this; you're drunk! Monsieur Steele will excuse you. Good night!"

The insult drove the Indian from her flaming face; sobered her. She walked to the door, where she turned and said, quietly to Steele: "Hen sair, monsieur, I leave you with theen gentleman and—earthman."

Although pressed by Lallamme, Steele did not s . He had failed utterly in his plan—he'd learned nothing. If only the trader had remained in the trade-house five minutes longer, the girl would have told him what he wished to know. And now they were leaving in the morning.

CHAPTER X

From the outside the cabin where he and David were to sleep was dark, but he entered to find David, aided by the light of two candles, busy with their bags.

"What's the trouble?" Steele asked, flinging the blanket with which David had masked the windows. "You don't think he'd dare live in on you?"

"Maybe," said the Ojibway, pointed to the contents of a large waterproofed bag on the floor at his feet. "They have come to see of you is what you say."

"They've been through our Indian stuff?"

"Yes, dey look at dese bag and not park dem good."

A low knock checked the conversation. David reached for a candle. "Oo", said Steele, turning to with that!" pointing to David's rifle, then opened the door.

It was Rose Lallamme.

Disapproval was stamped on David's face as he slowly shook his head.

"Monsieur Steele, I wish to talk with you in private—" she hesitated with a nod of, her head toward the Ojibway.

"David, wait outside a minute," said Steele concealing from the girl a lowered eyelid.

Carrying his rifle, David reluctantly left the room.

"You needn't worry, Lallamme's asleep," she began, then approaching Steele, placed her hands on his shoulders as she begged: "Will you get me out of here, now—tonight?"

"The girl's knowledge might be of vital importance to the future of Wailing River—if the winnip there believed, and the American did not hesitate to dissemble.

"But, Rose, I haven't horses and flour. You'd starve if we left tonight, unless we struck game. You don't want to live on fish."

"I can leave on anything with you long American!" she said. "She'll get me away—away from that thief. Once I loved heem—but now, I hate, hate, hate!"

Steele interpreted: "But why can't you wait until tomorrow night? Well buy flour then."

"I'm afraid. He cursed me tonight for telling you something. Oh, you don't know that men—the cleverness of them! He knows thees won't last —ewo, three years, threes hell here?"

"Of course he wants to get rid of the post down river?" Steele ventured.

"Oh, St. Onge is gone for—and he'll get the girl," she muttered.

"But what was that Indian Pierre doing at Wailing River?" he abruptly demanded.

"Pierre?" She turned on Steele in surprise. "You saw Pierre? He was told to keep under cover."

"Yes, he was spreading wild tales about the Windigo. Lallamme sent him to do that?"

Her large eyes flashed in amazement. "Oh, yes, of course! but what he went down river for—eh? Quick! the candles! There's someone coming!" The, fave of the girl went gray with fear. "Mon Dieu! If it's Lallamme!"

"But it was not lost in the rapids. That has been proved, for no trace of

creature of Indian myth and superstition—a bugaboo of the ineffective men?"

Steele grinned with delight into the trader's puzzled eyes. "I certainly did. I was waked by his howling on the ridge across the river from the post."

Lallamme smiled, suspectively tapping the bottle at his elbow, as he teased: "Scotch is a wonderful stimulant to the imagination, monsieur."

"You know that the Indians attribute the loss of St. Onge's fur canoe this summer to the same devil?" continued Steele, watching Rose's face.

"The loss of their fur canoe?" cried Lallamme, "You mean to say that St. Onge didn't get his fur to Albany this year?"

"Not a skin," said Steele. This was news Pierre assuredly would have brought from down river. Then he caught a furtive signal from the girl. She cautiously lowered an eyelid, as she watched Lallamme.

So the Frenchman was deceiving him. Pierre had been on the trader's business at Wailing River. But why did Lallamme wish to conceal it? He could not suspect that Steele would return to the Wailing—

"You needn't worry, Lallamme's asleep," she began, then approaching Steele, placed her hands on his shoulders as she begged: "Will you get me out of here, now—tonight?"

"The girl's knowledge might be of vital importance to the future of Wailing River—if the winnip there believed, and the American did not hesitate to dissemble.

"But, Rose, I haven't horses and flour. You'd starve if we left tonight, unless we struck game. You don't want to live on fish."

"I can leave on anything with you long American!" she said. "She'll get me away—away from that thief. Once I loved heem—but now, I hate, hate, hate!"

Steele interpreted: "But why can't you wait until tomorrow night? Well buy flour then."

"I'm afraid. He cursed me tonight for telling you something. Oh, you don't know that men—the cleverness of them! He knows thees won't last —ewo, three years, threes hell here?"

"Of course he wants to get rid of the post down river?" Steele ventured.

"Oh, St. Onge is gone for—and he'll get the girl," she muttered.

"But what was that Indian Pierre doing at Wailing River?" he abruptly demanded.

"Pierre?" She turned on Steele in surprise. "You saw Pierre? He was told to keep under cover."

"Yes, he was spreading wild tales about the Windigo. Lallamme sent him to do that?"

His eyes flashed in amazement. "Oh, yes, of course! but what he went down river for—eh? Quick! the candles! There's someone coming!" The, fave of the girl went gray with fear. "Mon Dieu! If it's Lallamme!"

Steele glanced out the candles and she clung to him helplessly, her body trembling against his, as they listened. There was a sound of a scuffle outside, the fall of a body, the dull impact of blows. Pushing aside the frightened girl, Steele seized his rifle, and opened the door.

"I got here!" came the low voice of David from the blackness. "Hun' me dat rawhide."

The man who had approached the cabin had walked into the strongest pair of arms in the Nelson country, and his helpless on the ground, cooked and bound into insensibility. Returning with the thongs, Steele peered at the face of David's victim.

"Lallamme?"

"Yes! We feex heem and start?" urged th. Indian, fiercely.

MONARCH Coffee and Cocoa

Quality for 70 Years

Every man can see where there is room for a lot of improvement in all other men.

Clothes do not make the man, yet a man may owe a great deal to his tailor.

Conquer Constipation with Yeast Foam!

For constipation try this: drop a cake of Yeast Foam in a glass of water; let stand for five minutes; stir with spoon; let settle and drink the milky water, including the white precipitate.

Do this regularly and your constipation—no matter of how long standing—will be a thing of the past! Yeast Foam is equally effective for indigestion, boils, pimples, lack of weight and strength.

Or, if you prefer, eat the yeast with a cracker or a piece of Butter.

SAMPLE CAKE FREE

NORTHWESTERN YEAST CO.
1750 North Ashland Ave., Chicago, Ill.
Send me FREE and POSTPAID your booklet, "Eat Your Way to Health," and a sample cake of Yeast Foam without obligation.

Why Suffer Pain
from a cut or burn? Cole's Carbolsalve stops pain instantly and heals quickly without a scar. Keep it handy. All druggists, 30c and 60c, or J. W. Cole Co., Rockford, Ill.—Advertisement.

Don't measure your industry by the thing you are going to do tomorrow.

From School Teacher to Great Eminence

A young man who was brought upon a farm, qualified for district school teacher, then managed to save enough money to put him thru medical college.

Later, he moved to Buffalo, N. Y., and today the name of this man, Dr. R. V. Pierce, is known throughout the world. His Golden Medical Discovery is the best known blood medicine and tonic. More than fifty million bottles have been sold. If your dealer does not sell the Discovery, in liquid or tablets, you can obtain a 50¢ of the tablets by sending 50¢ to the Dr. Pierce Clinic, in Buffalo, N. Y. Also write for free medical advice.

Men think they may justly do that for which they have a prevelent—Cicero.

Partners Wanted

Assist in buying 320 acres farm for nursery, park, bankers, or gentleman hobby. Have two acres planted. Nursery stock. Splendid location. Terms. Water, timber market, good soil. Price $100 per acre. Will exchange for auto. Price $40,000; need $10,000, buy in part or whole. Address Box 1, Charlevoix Sentinel, Charlevoix, Mich.

ALL GOLD RHEUMATIC SPECIFIC will banish your rheumatism. "Try it." Bottle sent prepaid $1.50. B. A. SMITH, Middlebury, Pennsylvania.

PROFITABLE CHICKEN FARMS around 100 acres; 4 room house; electricity. Address: Manton Missouri Farms 309-Bs, Manton Building, Kansas City, Missouri.

RHEUMATISM NOW CONQUERED

Amazing discovery ends uric acid troubles. Cures for rheumatism, arthritis, neuritis, sciatica, lumbago and all similar diseases. Tested by a former U. S. Naval officer. The secret is known to Medical Science. Full information sent free. Write Scientific Medical Laboratory, 1200 Wesley Ave., Evanston, Ill.

Farmers everywhere are turning to "U.S." Blue Ribbon Boots and Overshoes!

The "U.S." Blue Ribbon Walrus slips right on over your shoes. Its smooth rubber surface washes clean like a boot. Made in red or black, 4 or 5 buckles

THIS is why. "U.S." Blue Ribbon Overshoes and boots are built with thick, oversize soles, tough as an automobile tire. Into the uppers goes rubber so elastic that constant bending won't crack it. Anchored in this rubber are the strongest of reinforcements. Look for the "U.S." Blue Ribbon when you buy. It will pay you!

United States Rubber Company

If you cut a strip of rubber from a "U.S." Blue Ribbon boot or overshoe you'd find it so elastic it would stretch more than five times its length.

"U.S." Boots Walrus Arctics Rubbers

TRADE MARK BLUE RIBBON

Long hard wear built into every one!

Handshake Guide to Love

This handshake is a correct and infallible guide to true love. This is the conception of Dr. David V. Bush, a teacher of applied psychology. "Shake hands," he says, "before you start to courtship—not because you are to start something resembling a prolonged hug, but because if the hands don't fit perfectly, don't stop it." Doctor Bush says "the affair isn't even a milestone in the course of love; it's not to be a milestone. A marriage certificate is no guarantee of love. Marriage, looked at as the goal of love, is apt to be a grave if the game ends when the knot is tied." The exponent of applied psychology thinks trouble can be avoided by proper character-analysis before the courtship advances too far.

A Pity

Some people take so much pleasure in telling what they know that it's a pity they know so little.—Boston Transcript.

Cricket Is Held in High Importance in China

In Shanghai the public parks, the gardens and the trees of the cathedral yard, in the center of the business district, are the hunting grounds of hundreds of Chinese coolies and boys. The country is the great cricket. To the Chinese a chirping cricket is a symbol of good luck. And crickets swarm on all the trees in the international settlement and their noise rises above even that of the traffic. Boys climb the trees, pick off the crickets, put them into small basketlike cages and then go through the streets selling them for a copper or two each. One cricket or more are to be found in almost every native home, where they chirp and trill all day and all night. The noise of a cricket is to a Chinese the height of musical excell

AMERICA HAS NO NATIONAL DANCE

Most Countries Have Steps Which Are Distinctly Their Own.

Washington.—Whether the current frenzy called the Charleston is destined to be a permanent addition to the art of dancing, or whether it shuffles out of the spotlight of popular favor after the "turkey trot," the "bunny hug," the "camel walk," the "whinney," and other high-pressure steps of the past, discussion of it has revived interest in characteristic national and folk dances in many parts of the world," says a bulletin from the Washington headquarters of the National Geographic society.

"America has no generally recognized national dance," the bulletin continues. "There is the moribund Virginia reel, at present the subject of pathetic efforts at resuscitation by old time dance revivalists. In many of the more remote rural sections of the country the Virginia reel flourishes, more or less, despite the growing scarcity of capable figure callers, but the younger generation of most of the country today knows little about it.

"In the cast of some steps it is necessary only to name the dance, and its birthplace flashes to mind, so thoroughly have the country and the name of its most characteristic dance become linked. The Jig, Ireland; the hula-hula, Hawaii; the tango, Argentine; the polka, Bohemia (now Czechoslovakia); the snatch, India, the minuet, Old France. These are only a few samples of dances which automatically furnish their own places and date lines.

Egypt's Star Dances.

"The most ancient dances are believed to be astronomical dances of the early Egyptians. The object of these dances was to inspire a feeling of harmony among the planets, and to so influence them that their effect on life might not be harmful. The Greeks took the star dances from the Egyptians and found a place for them at the chorus, or background, of their tragedies. The Romans, as in other arts, produced few original dances, but they developed their heritage from the Egyptians and Greeks.

"In the more primitive civilizations dancing and religion were almost synonymous. As for the lower strata of humanity: 'A savage does not preach his religion, he dances it,' Livingstone wrote from Africa. For all solemn occasions in the lives of primitive peoples there are dances—for weddings, for funerals, for each of the wars and for harvest, for war and for peace. Where today we find people praying in church for rain, or for the restoration of friends to health, sixteen tribes danced for those ends.

"One of the liveliest of the world's dances is the tarantella, the diver, as originally practiced with tambourines and was formerly supposed to cure the bite of the tarantula, a large venomous spider. Another version of the origin of the dance says that it is based on the theme of 'la morra,' a game consisting in guessing at the number of fingers suddenly held out by an opponent. Until recently visitors to Akin Minor were delighted and mystified with the gyrations of the famous Turkish whirling dervishes. Originally a religious glorification, the art of the dervishes had degenerated so that not long ago the new Turkish Republic prohibited the dance.

"Perhaps the only original contribution the United has made in the last four centuries is the sailor's hornpipe. The neighboring island of England, however, boasts of the jig, the reel, and the hornpipe clog-and-shuffle dances. Britain's colonies offer colorful and diverting steps, most of them symbolic or religious, such as the devil dance of Ceylon.

Earliest "Turkey Trot."

"The buoyant and the imitative impulse doubtless have played large parts in modeling many of the more picturesque and exotic steps of savage peoples. Of great interest to the student of animal life are such mimicking steps as the kangaroo hops of the Australian and the Tasmanian; the gorillalike movements of a tribe of natives in the heart of Africa, and the half-bird parties at a bushman's ball. In the mechanical frenzies of the American Indian harvest and war dances may be visioned the embryonic 'turkey trot' or 'bunny hug.'

"The close association of early dances with warfare is brought out in such survivals as the sword dances. The Scotch sword dance is the most graceful and least bloodthirsty of these. Chinese and Turkish sword dances, however, are not so esthetic. While wildly beautiful, they are not wholly free from danger. Natives of the Fiji islands have a war dance in which clubs are flourished in a frenzied manner. In East Africa the native tribes honor distinguished guests with a ceremonial dance, in which spears and other weapons are rushed up within an inch of the visitor's nose. It is a test of the honor guest's nerve, for if he moves or shows the least sign of fear or annoyance he fails in the respect of his well meaning hosts."

Coughs Up Needle

White Sulphur Springs, N. Y.—During a severe coughing spell, James Cox, a farmer, coughed up a needle. He complained of having a sore throat, and his physician was treating him for tonsilitis.

Poultry Profits Tripled by Proper Feed, Care and Culling

UNLESS a poultryman is clearing at least two dollars for each layer in his flock every year, there is something wrong with the methods he is using, says the Larrowe Institute of Animal Economics. It may be a case of poor layers, poor housing or just plain poor food.

Even the best bred hen will not lay day after day unless she is fed with those elements which she must have to turn into eggs. Any hen will lay in the spring—it's her nature to do this—but if poultry keeping is to be a profitable business the hen must be induced to lay throughout the year. During the cold weather season the days are short and the feeds require additional food. Quantity of grain is important but it takes quality concentrating nutrients to produce eggs from Labor day to Easter.

FINDS BIGGEST VOLCANO WAS ACTIVE IN VIRGINIA

Dr. W. A. Nelson, State Geologist, Discovers Ash Which Was Deposited Millions of Years Ago.

Charlottesville, Va.—Discovery of a layer of volcanic ash ten feet deep in Rockbridge county, four miles south of Lexington, has just been announced by the Hon. Dr. Wilbur A. Nelson, state geologist and head of the school of geology of the University of Virginia.

This layer, says Doctor Nelson, was probably ejected by one of the oldest known volcanoes in America, its presence coincides with shallow deposits of ash discovered by Professor Nelson ten or more years ago in Kentucky, Alabama and Tennessee.

Virginia's ash deposit is the thickest so far found, says the state geologist. It shows that in early geological times, millions of years ago, the mountains just to the west of Virginia, now buried under the Cumberland plateau, were a region of great volcanic activity.

From the measurement of the area over which the ash fell and was deposited in the ancient sea around this island volcano, it has been estimated that more than 60 cubic miles of ash was ejected. In addition to thick deposits in the southern states, several inches have been found as far northwest as Minnesota and as far northeast as Pennsylvania. This would indicate that this volcano, located probably in western North Carolina or West Virginia line, was one of the greatest of which knowledge exists.

The main objection lies in the fact that a family which has been unfortunate enough to lose one of its members may be unduly impoverished in upholding the custom. This is especially so in the case of high chiefs whose family connections combine several villages. The cost of the great amount of food sometimes so impoverishes the entire community that it does not recover financial comfort for months.

SAMOANS CLING TO FEAST IN HONOR OF THEIR DEAD

Island Chiefs Decide Against Abandoning Ceremony Handed Down From Remote Times.

Pago Pago, Samoa.—The death feast, an institution which has been handed down to our succeeding generation of native Samoans from the earliest times, will not be abandoned at present, the assembly of tilled chieftains has decided. In this decision his excellency Henry F. Bryan, captain in the United States navy and present governor of American Samoa, has acquiesced.

In its laroads, western civilization has abolished many of the picturesque social or tribal customs of the islands, but the primitive method of showing respect for the dead will not be outlawed until the Samoans people themselves are ready for the change.

A resolution to do away with the ceremony was defeated in the American Samoan annual fono. The fono is an assembly of tilled chiefs who meet each year to confer with the officials of the administration, and is presided over by the naval governor in person.

The Samoans believe that the proper way to honor the dead is to gorge themselves with food, then yell, chant or sing their hymns of sorrow until they fall asleep from exhaustion. The food is furnished by the family or clan of the deceased. All people are at liberty to partake of the feast. Food usually consists of pigs roasted whole, taro, nuts, bread-fruit, baked bananas, fish, bread and perhaps kegs beef bought from the trader's store.

The main objection lies in the fact that a family which has been unfortunate enough to lose one of its members may be unduly impoverished in upholding the custom. This is especially so in the case of high chiefs whose family connections combine several villages. The cost of the great amount of food sometimes so impoverishes the entire community that it does not recover financial comfort for months.

Indian Princess Lays Claim to Whole State

Mrs. Roberta Lawson, prominent member of the General Federation of Women's Clubs, is an Indian princess, the last surviving grand daughter of the chief of the Delawares, and through that descent claims ownership of the tribal lands which now compose Delaware. Mrs. Lawson is vice chairman of the division of Indian welfare of the federation.

Before you try to say something well take care that you have something to say. Arrangement of thought, more than anything else, is the fundamental secret of a good style. It enjoins going direct to our subject, and it enjoins placing everything in its right place.—Prof. A. Y. Hicev.

First Horses in America

The earliest horses which were the primitive ancestors of the American horse, were brought over by Cortez for the campaign in his conquest of Mexico, begun in 1519. The horse-breeding enterprises of the Twentieth century date back to the cavalry mounts used by Cortez.

To Build Airship Twice Size of the Shenandoah

New York.—Completion of the designs for the largest metal-clad airship in the world, two and one-half times the size of the Shenandoah, to be built by the Aircraft Development corporation at the Ford airport, Dearborn, Mich., was announced by Carl F. Prinzler, general manager of the corporation.

Speaking at a meeting of the American Society of Mechanical Engineers, Mr. Prinzler said that the ship will be luxuriously equipped for commercial use but in the event of war can be equipped for military purposes in 24 hours. Another smaller ship, one-tenth the size of the Shenandoah, will be built.

The larger airship will have a gas capacity of 5,000,000 cubic feet, and the smaller a capacity of 200,000 cubic feet. Both ships will be fireproof, lightning-proof and weather-proof, Mr. Prinzler said, none of which requirements are fulfilled by fabric lighter-than-air craft. The smaller will be used for demonstration and experimental purposes.

Discussing the future of lighter-than-aircraft, Mr. Prinzler said:

"The transcontinental metal-clad commercial airship of the future will show an operating cost of fuel and power plane charges per passenger mile not greatly in excess of the present cost per passenger mile of touring in a first class limousine motor car.

He expressed doubt that airships ever will be used extensively for transatlantic travel, since too much of the available space would have to be used for fuel.

Traveling for Pleasure

After considerable urging, Herr Schultze of Berlin took his wife on a tour of northern Europe.

Arriving in due course at Nordhap, the promontory of Norway, they viewed the midnight sun, and Herr Schultze lilly serenaded on a reek:

"Sat here with wife. Fine! Schultze, Berlin."

Three weeks later a neighboring rock read:

"Sat here without. Fine! Meier, Hamburg."

Agriculture's Charm

What pursuit is more comfortable for a man's servants, more delightful to his wife, more attractive to his children, or more gratifying to his friends? I should be surprised for my own part, if any man of liberal feelings has met for the campaign in his conquest of Mexico, begun in 1519. The horse-breeding enterprises of the Twentieth century date back to the cavalry mounts used by Cortez.

INDIAN IS SICK OF CIVILIZATION

White Man's Dances Mean Nothing, He Says—Scores "Too Much Machinery."

Omaha, Neb.—Deer Tracks Up, Taos Indian of Arizona, who has been to Omaha for several months posing for an artist on a model, now grown three of the white man's way, and especially of the white man's dances, and has gone here to his pueblo among the Arizona deserts. Particularly he wanted to get back home for the Taos tribal "holy dance," which has been danced by the Taos Indians for hundreds of years. Its exact date is governed by the phases of the moon, similar to the white man's Easter.

Deer Tracks Up was chosen as the most perfect type of the southwestern Indian by August Dunbier, Omaha artist, who spent all last summer among the Arizona tribes searching for just such an Indian type as presented by Deer Tracks Up. When Dunbier came back to Omaha he brought Deer Tracks Up with him to pose for a series of paintings.

Deer Tracks Up, after three months of city life, sums up the white man's civilization in three words: "Too much machinery."

Points to Lack of Religion.

Then the Indian, who is extremely intelligent, pointed out several flaws in the white man's way, goes on to explain:

"When the Indian plants his corn there is a religious festival. When he goes hunting, he does, in general the rival. When he erects his village there is yet another festival. All his actions, everything he does, is governed by his religion. When the time of harvest comes around, there is a festival. At the harvest time there is another. Even in the past when the tribe went forth to war there was a religious ceremony which must be strictly adhered to, else the enemy would be the victor.

"These festivals were interpreted by dancing, and there was a different dance for each occasion.

"White man's dance means nothing. It's crazy," said Deer Tracks Up after he had viewed a Charleston at a public dance hall. "I ask, 'Why you do this' and 'what does that step mean?' and they answer 'don't know' or 'that's part of the dance.'

"Indians dance instead of pray. It's same thing. But every step in an Indian dance has a meaning. Foot turned in this way means a buffalo hiding in Indian dance. Foot turned that way means something else. Indian dance, hold arm so, means the Great God one thing; but hold another way, tells Great God something else.

"White men get nowhere with their dance. Means nothing. Indian dance tells entire story."

"Soon comes Holy dance. Deer Tracks Up must be there to take part."

Double White Man's Pleasure.

"How Taos Indian white man sees night just as well as slaves and he does with it. They take no pleasure in their work, he thinks. They are like machines.

"Too much machinery," he says. That was his comment after viewing a big printing press turning out thousands of newspapers by the hour, down in the press room where the sun never shines, and with workmen with grim and grimy faces intent on every sound made by the big machine.

"Too much machinery. White man might as well be slave. No smiles. All work. No dances in preparation for work. No ceremonies."

Deer Tracks Up tells the Dunbiers that he has had enough of the white man's way of living and that he never shines to try them again. A cozy hut or even a tepee on the Arizona desert, near a water hole of some kind, is far preferable to a city dwelling with all the modern conveniences.

"No machinery there," says Deer Tracks Up. "Going home."

Charleston? Here's a Few Things It Will Do to You

New York.—Any one who dances the Charleston excessively risks dementia praecox, interior consolidating ire rains of Boston's Pickwick club, shaken down by this jazziest of new steps. Heart trouble, nervous disorders, fallen arches, broken ankles, strained backs and fallen abdominal organs are only a few of the disorders that follow the Charleston, accord-

Notice Primary Election

To the Qualified Electors of the City of Charlevoix, State of Michigan.

Notice is Hereby Given, That a City Primary Election will be held in the Council Rooms, corner of State and Clinton streets, for the First, Second and Third Wards of said city, on Monday, the first day of March, A. D. 1926, for the purpose of nominating by direct vote candidates for the following offices, viz:

Storing Flour

Under proper storage conditions flour should keep entirely satisfactorily for three months. Much of the high-grade wheat flour is kept for a considerably longer period of time, even for a year or more, and such flour is satisfactory for bread-making purposes.

Hating Oneself Ill

Hate, in the course of time, creates poison in the system as well as in the mind, and all evil emotion is bad for the health. One of the earliest-discovered truths was that health and morality depend on each other, and many religions are built largely upon hygiene.

All Hymns in Book Sung in Single Service

Redlands, Cal.—All the hymns in the standard hymn book of the Methodist Episcopal church were read, recited or sung in The Methodist Episcopal church at Yucaipa during an eleven-hour period. A total of 748 hymns were used in the service. Walter Fritts, Redlands high school student, recited 32 hymns. About 100 persons participated in the service. Each fun fly in the resurrection had been assigned ten hymns.

Last Slave Law Victim

Anthony Burns, who escaped from slavery in 1853, was the last slave to be seized in Massachusetts under the fugitive slave law of 1850. He was arrested in 1854 and was sent back to his owner.

Satisfied With Work

When despondent, John Sargent, the painter, used to look at a little panel of self-painted roses and say to himself: "Well, John, there's one thing you did in your life that is worth while."

Variant

He was writing poetry and said: "Shakespeare, I tried to say love and so is modestly objected to said Shakespeare. "Don't be hurt you a bit," boston Transcript.

Worms Eat Up Ship

Teredos, the bivalve mollusks commonly known as shipworms, destroyed Drake's famous ship, the Golden Hind, by honeycombing its timbers with their burrows.

Odd Snake Bite Cure

Fine dust found at the bottom of ants' nests and taken internally was a popular cure for snake bite among the early American Indians.

Order For Publication.

STATE OF MICHIGAN — The Probate Court for the County of Charlevoix, in said county, on the 29th day of January, A. D. 1926.

Present: Hon. Servetus A. Correll, Judge of Probate.

In the Matter of the Estate of Mary Goode, Deceased.

William E. McDonnell having filed in this Court his petition, praying that he be appointed as the administrator of said estate or certain real estate therein described.

It is Ordered, That the 25th day of Feb., A.D. 1926, at ten o'clock a.m. at said Probate Office be and is hereby appointed for hearing said petition, and that all persons interested in said estate appear before said court, at said time and place, to show cause why a license to sell the real estate in said real estate should not be granted.

It is further ordered, that public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing in the Charlevoix Sentinel a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
42-3t Judge of Probate.

Appointment of Administrator

STATE OF MICHIGAN—The Probate Court for the County of Charlevoix.

At a session of said Court, held at the Probate Office in the City of Charlevoix in said County, on the 2nd day of February, A.D. 1926.

Present: Hon. Servetus A. Correll, Judge of Probate.

In the Matter of the Estate of John Dunlop, deceased.

Edward B. Dunlop having filed in said court his petition praying that the administration of said estate be granted to petitioner or to some suitable person.

It is Ordered, That the 25th day of February, A. D. 1926, at ten o'clock in the forenoon, at said probate office, be and is hereby appointed for hearing said petition.

It is Further Ordered, That public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing in the Charlevoix Sentinel, a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
42-3t Judge of Probate.

Order of Publication of Non-Resident Defendant.

STATE OF MICHIGAN,
The Circuit Court for the County of Charlevoix.—In Chancery.
Mina Pierson, Plaintiff.
vs.
Charles Pierson, Defendant.

Suit pending in the circuit court for the County of Charlevoix, in Chancery, on the 21st day of December, 1925, at the City of Charlevoix, in said county.

It satisfactorily appearing to this court by affidavit on file that the defendant, Charles Pierson, is not a resident of the State of Michigan, but his last known residence was Mount Horeb in the State of Wisconsin, on motion of Clink & Williams, attorneys for the Plaintiff, It is Ordered that the Defendant, Charles Pierson, cause his appearance to be entered in this cause within three months from the date of this order and in case of his appearance that he cause his answer to the bill of complaint to be filed and a copy thereof to be served upon the Plaintiff's attorneys within twenty days after service on him of a copy of said bill and notice of this order, and that in default thereof that said bill be taken as confessed by said non-resident Defendant.

And It Is Further Ordered, That within twenty day after the date hereof the said Plaintiff cause a notice of this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulated in said county of Charlevoix, and that such publication be continued once in each week for six successive weeks or that he cause a copy of this order to be served personally on said non resident Defendant at least twenty days before the time above prescribed for his appearance.

And It Is Further Ordered, That the said Plaintiff cause a copy of this order to be mailed to said Defendant at his last known postoffice address by registered mail and a return receipt demanded at least twenty days before the time herein prescribed for the appearance of the Defendant. Perch Fishermen Make Moderate Catches Thru Ice

Perch fishermen, a large number of them, daily ply their vocation on Round Lake, all with various degrees of success, but so far as we have learned, without making phenomenal catches. That moderate luck is the universal expression given when inquiry is made of the several men frequenting this popular winter fishing territory.

Earlier in the season good catches were made by many of the parties engaged in the pastime, but of late reports are less favorable. Weather conditions for this class of sport has been exceptionally fine for days, perhaps too nice for successful fishing.

Bagpipe and Organ Alike in Principle

The Highland bagpipe is a primitive instrument with a quality all its own, says the Chicago Journal. It has nine tones, but they are not like the chromatic scale. The bagpipe scale does not exist in any other instrument and its music, unlike "regular" music, cannot be transposed from one key into another.

The bagpipe itself, in its Highland form, consists of an airtight leather bag with three wooden pipes, or chanters, of ebony, fitted into it, one of them holding the mouthpiece, another the chanter, another the three drones. As most people know, it is played with the bag held under the arm, the drones over the shoulder, and with the fingers on the noteholes in the chanter at the front.

Except that its scale is its own and does not exist in any other instrument, the bagpipe is similar to a church organ in principle. The player maintains the wind pressure on his drones and chanter by keeping the bag full of wind and regulates the volume of sound by the pressure of his arm on the bag.

What he produces may not be the sweetest form of music in the world, but even to one who has no ear for Scottish it is the most unforgettable of all music. Those who have listened to the piercing, eerie, wild skirl of the pipes as they march down the village street, playing the tune of "The Campbells Are Coming," will understand why Scotsmen in exile have always loved the bagpipes.

Preserving Pewter

Many housewives are now acquiring now and then a few pieces of old pewter and find that it is wise to wash this ware in warm, soapy water after using it, then to dry it off with a little wheat bran and a soft cloth. It is very dirty, a paste made of whiting and alcohol will clean the article in a jiffy. Rub the pewter afterward with a soft polishing cloth.

Rough Going

A little girl was crossing the Atlantic with her mother. It was her first ocean trip. The sea was as smooth as the proverbial millpond for the first three days; then the ship began rolling and pitching heavily. The child could not understand what had happened. "Mamma," she said, "what's the matter? Are we on a detour?"—The American Boy.

The Journalist

The journalist—The journalist has one client, one patient, one flock—the whole community, and nothing should stand in the way of his single-minded and devoted service to that one common interest. He should beware of all entangling alliances—political, social, commercial—that might in any way embarrass such service. His own office, if properly administered, is more important and powerful than any that can be held by a private citizen. Only in his fellow citizens are likely to confer on him.—Springfield, Mass. Republican.

ASSOCIATION OF COMMERCE

Regular Meeting at Council Rooms Wednesday

Members of the Charlevoix Association of Commerce held a regular monthly meeting at the City Council rooms Wednesday evening, Feb. 17th, which was attended by about forty local members of the organization.

Several committees made report all of which showed that favorable progress was being made in their several capacities, particular attention being given to highways, fish, game and tennis.

As to the latter Mr. W. G. Parker, chairman of this committee, reported that arrangements had been made and gave assurance that the Annual Michigan State Tennis tournament would be held in this city and gave the opening date of this meet as July 4th, and that games and contestants would consist in matched games for three or four days.

Also a special committee on transportation, hotels and board was appointed, the latter named for the purpose of arranging for reduced rates and combination tickets entitling the holder special rates and privileges with the full benefit of side trips similar in purport as is being carried out in the Detroit resort cities throughout the country. This committee is composed of Postmaster G. W. Weaver, L. R. Chase and A. Russell.

Also a special committee composed of R. F. Sease, Olaf Nordrum and W. W. Mitchell to prepare a revision of association by-laws. The above two committees to report at the next meeting, at which time time according to instructions given to the entertainment committee a banquet will be served and a special speaker engaged to address the association.

The standing committees for the year follows:

Membership—M A Levinson, A Powers Bert Hayes, Fred Partridge, Charles Carpenter, H A Crane, Robt Bridge, Wm Gillacchio, H A Crane, Robt Bridge, Wm Gillacchio, Entertainment—A L Fisher, Clarence Wood, George Priest, Leo Powers, Earl Young, Ogden S Hadley, L Russell.

Finance and Purchasing—A Bergeon, A Livingston, Robert Bridge, F J Fessenden, W. E. Parrender.

Entertainment—A L. Livingston, Chas. E. Sease, Geo W. Weaver, F J Moran, Ed O'Neill, J U Redpath, R C Hammet, H K Fowler, H B Hooker, Dr. Simmons, S Sorenson, Ernest G. Loeb, B A Herman.

Lamphear, L P Adams, Mrs. L Elston, Mrs. Sarah Emery, Don McHugh, Rev. H Burns, Rev C E Pollock.

Industrial—H A Craig, A F Bridge, W S Richardson, B A Herman, Louis Orlowski, James Bogart, Fred Myers, B Satterstall.

Winter Sports—Don McHugh, D J Eckinger, A Bergeon, J J Hallet, A L Livingston.

Conventions—Chas H Emrey, A I Creamer, J J Hallett, Arthur von Dolcke, Mrs. F C Sears, A L Fitch, Wm Wallace.

Fish and Game—Clarence Wood, De Forest Wood, Charles Graves, H E Dean, Perry Smith, Jess Smith, Claire Webster, Olaf Nordrum, L E Benton, L A Cannon.

Base Ball—Alton Smith, James Gaskin, Ray Asbdon, R C Korth, Mont Withers, R Washburne, Wm T Driggett, Jas Wyers

Merchants—Chas Gale, P D Campbell, Archie Livingston, Chas E See, Ben Brown Henry Jacobs.

Auto Park—Wm Wallace, Robert Malott, Milton Block, Dr F H Whallmon, L C Hannah.

Beaches and Playground—W E Parmeter, Clarence Bridge, Marvin Block, Lee Smith, Dr. F F McMillan, C S Dodge.

Publicity—Ira A Adams, A L Fitch, L Chase, W G Parker, Ralph Price.

Legislation—Lisle Shanahan, Rollie L Lewis, Arthur Le Fevre.

Harbor—S M Rose, Capt. F Partridge, Capt Jas Sanford, Olaf Nordrum, G C Geiken, O E Wilbur.

Aviation—P D Campbell, Henry Partridge.

Claims and Adjustments—Judge S A Correll, Chas Gale, A E Mason.

WASHINGTON REMEMBERED

Two Silk Flags Presented Methodist Episcopal Church

Patriotism was much in evidence last Sunday evening at the Methodist Episcopal church. The pastor had announced a Washington feature service, and in spite of the stormy weather, the church was filled for this patriotic evening service.

Special features of the evening were patriotic hymns, a patriotic prayer hymn, prayer under the light of the flag, and the presentation by two Sunday school classes of a large American flag and its standard, and a smaller silk American flag and standard, the setting of the flags by "George and Martha Washington." The developed the idea that the principal difference between George Washington and Napoleon Bonaparte was the quality of soul that each brought to his task. The Virginian brought certain qualities of character the American task there lacking in the Corsican. Among these qualities which Washington possessed were discussed were his unselfishness, the faith in a particular Providence, the eternity minded disposition and the love of peace which were his characteristics..

He quoted Washington as saying about war, "My first wish is to see this plague of mankind banished from the world." His comment upon this was, "Personally, I see no hope for a warless world unless the nations and peoples of the world really elect Jesus Christ as their individual King and leader."

The presentation of the flags was timely to mark the anniversary of the birth of him of whom it was said that he was "First in war, first in peace, and first in the hearts of his countrymen."

Lived Happily Until He Inherited Money

Boston—In the Suffolk Probate court Judge John started to hear a separate support petition brought by Edith M. Piper against her husband, Fred W. Piper, whom she married in 1918, and with whom she claims she lived happily until 1920, when Piper inherited $180,494 on the death of his father.

After their marriage the couple lived in the height of fashion. When he received his inheritance she claims her husband said to her: "Well, dear, we have now what we wanted for all our lives. We'll go to California and take trips."

Instead, she claims, his love seemed to wane, and in 1922 he stopped all her charge accounts and she found herself, after a time, in actual need.

Winking Bandit

Philadelphia. — A bobbed-haired winking bandit who threatens to shoot a victim full of lead is loose. Winking and waving a pistol as she issues commands, she has robbed a woman grocer.

Residence Sold—The residence property, owned, and until recently occupied by Henry Kaufman was sold late last week to Edgar Smith. Robert Bridge had charge of negotiations and is credited with having carried out the sale and transfer to the new owner.

SECOND WEEK OF SESSION

Highway Finance Seems the Only Issue on Horizon

Lansing, Feb. 23.—Just what the final outcome of the present special session of the Michigan legislature would be remained a matter of conjecture as the lawmakers assembled here this afternoon to begin the second week of the extraordinary session which was convened Feb. 16 by order of Governor Groesbeck.

Thus far no fireworks have developed, but no one can guarantee a short and peaceful session as long as there remains the least possibility that some definite effort may be made to upset the present system of highway finance and to republicate or delay the payment of the delinquent highway awards due the counties.

Thus far only two bills relating to highway matters have made their appearance. One of them, sponsored by Rep. Eugene Kirby of Covert, chairman of the House committee on roads and bridges, would reduce the amount which the counties would receive on past due awards during 1926 from $2,000,000 to $1,000,000 but would recognize the claims of townships as well as the counties and would provide for the payment of the awards to the townships in full on April 1, 1926 and on April 1 of each year thereafter until all of these accounts which are now due or which may become due have been settled by the state. The bill specifies that the $1,000,000 which would go to the counties during 1926 would be paid on June 1, and that in future years the counties would be paid $1,000,000 on Feb. 1 and $1,000,000 on June 1 until all these accounts have been settled.

The second highway finance bill is sponsored by Sen. C. E. Atwood of Newaygo and would specifically appropriate $4,000,000 instead of two-fifths of automobile license tax receipts for state maintenance work in 1927 and future years. Of course, this would result in a considerable increase in the funds available for other construction purposes. $500,000 that now is intended to be spent in the rural sections for non-trunk line highway maintenance and bridge construction would also be made available for state construction.

During a special session, the legislature can consider only those matters referred to it by the governor. In his message delivered in person to a joint convention of the House and Senate on the first day of the session, the governor outlined his recommendations to four matters, as follows:

1. Legislation authorizing the making of a contract providing for the surrender of the special charter of the Detroit, Grand Haven and Milwaukee Railroad company—the removal of its tracks from Woodward avenue—the acquirement of a new right of way therefore by the state and the financing of the cost of both by the state, to be refunded by the railroad company at the rate of $200,000 annually.

2. Legislation revising the appropriation from the gas tax and the weight tax so as to make more money available to the state highway commissioner and if possible for construction purposes.

3. Appropriating a sufficient sum to rebuild the main building of the Central Normal School at Mt. Pleasant, including a library.

4. Legislation authorizing appointment of joint committees from both

A Writer Thinks All Newspapers Are Rotten

We are reading Oswald Garrison Villard's book, "Some Newspapers and Newspaper Men." The writer thinks all newspapers are rotten. Evidently he has never heard of the Times.—Eldorado Times.

Oswald was present at a state editorial meeting at Lawrence a dozen or so years ago. Oswald impressed us as a big man with a tenor voice that registered in high C, and was perfectly ladylike in his manners. Some of those who were present may remember the discussion in the barber shop at the foot of the hill between Charley Blakesley, of the Kansas City Star, and this writer. We disagreed as to whether Oswald were pink or blue baby ribbon in his corset cover. It got into "the papers" and drifted to New York. We can understand why Oswald thinks newspapers are rotten.—E. E. Kelly in Topeka Capital.

Lyons, Kan. News—We newspaper men in Kansas never do anything by halves. Every rain is worth a million dollars, every snow storm is a blizzard, every wind is a cyclone, every bride is beautiful, every groom is prosperous, every bootlegger is a criminal and every electign is a landslide. And then we grow the best wheat in the world.

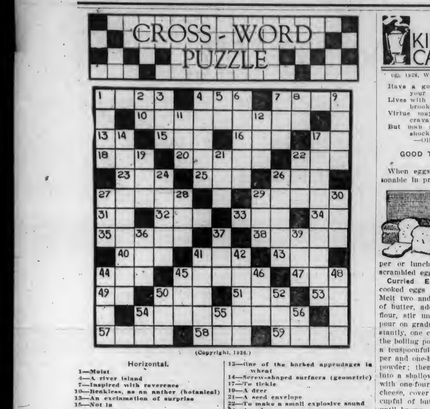
WEST MICHIGAN TENNIS MEET

To Be Held in Charlevoix Early in August

This Year

The Western Michigan tennis championship meet has been awarded to the Charlevoix Tennis Club through the support of friendly interests in Grand Rapids, prominent players from the Furniture City having enjoyed Charlevoix hospitality and the successful tournament

CROSS-WORD PUZZLE



(Copyright, 1932.)

Horizontal.

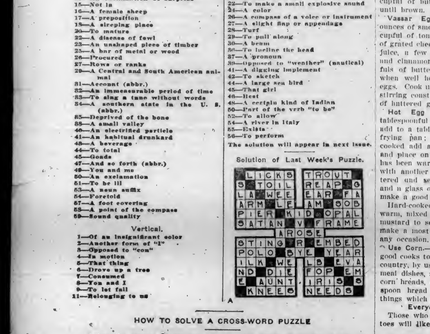
1—Moist
4—A river island
7—Inspired with reverence
13—Small fresh-water cyprinoid
13—An exclamation of surprise
14—Not in
15—A female sheep
16—A preparation
18—A sleeping place
20—To recline
21—A disease of fowl
23—An unshaped piece of timber
25—A bar of metal or wood
26—Cancel
27—Hems or ranks
28—A Central and South American animal
31—Abbreviation (abbr.)
32—Ashes that remain after burning
33—To sing a tune without words
34—A southern state in the U. (abbr.)
35—Integrity of the vowel
38—A small valley
40—An electrified particle
41—An habitual drunkard
42—A beverage
44—To fetal
46—Grande
47—And so forth (abbr.)
49—Yes and no
50—An exclamation
52—To be ill
53—A noun suffix
54—Foretold
57—A foot overthrow
58—A point of the compass
59—Sound quality

Vertical.

1—Of an insignificant color
2—Pertaining to "I"
3—Opposed to "con"
4—Satisfies
5—That thing
6—Grew a tree
7—Consumed
8—Cuts fuel
9—To let fall
11—Belonging to us
12—Letter of the hotshot superunges in wheat
13—Convex-shaped surfaces (geometry)
17—To tickle
19—Fuel
21—A seed envelope
22—To make a small explosive sound
24—A color
26—An synonym of a valve or instrument
27—A slight flap or appendage
28—Turf
29—To pull along
30—A brook
36—To incline the head
37—A pronoun
39—Opposed to "another" (musical)
40—A percussion implement
43—To attack
44—A large sea bird
45—Young girl
48—Heat
51—A certain kind of Indian
50—Part of the verb "to be"
55—To allow
54—A river in Italy
56—Ended
58—To perform

Solution will appear in next issue.

Solution of Last Week's Puzzle.



Find big sister. Among the leaves in lower right-hand corner.

Earliest Music

Instruments producing a clashing sound, such as cymbals and drums, are supposed to be the first used by musicians, because people understood them before they knew anything about tune. Then followed the reed, the pipe and other wind instruments, while the string instrument was a later product of civilization. The Greek fable attributes the invention of the lute to the mischievous god Hermes, who, on the first day of his life, killed a tortoise, tied seven strings across the shell and picked them with a small stick, singing to this accompaniment with much satisfaction.

Not Explained

It is not revealed whether the Boston financier who left $1,000 to educate his son's fiance in cookery was a victim of his own wife's biscuits or just the monotonous diet of codfish and Boston baked.—Louisville Courier-Journal

THE KITCHEN CABINET

Have a good hat; the secret of your success.
Lives with the beaver in Canadian brooks
Virtue may flourish in an old hat;
But modern natures scorn the mocking hat.
—Oliver Wendell Holmes.

GOOD THINGS WE LIKE

When eggs are plentiful and reasonable in price is the time to serve them freely. A poached egg on toast that has been well toasted and buttered is a breakfast dish which will appeal to almost any appetite. For a supper or luncheon dish an omelet or scrambled eggs will be liked.

Curried Eggs.—Cut three hard-cooked eggs into eighths lengthwise. Melt two and one-half tablespoonfuls of butter, add two tablespoonfuls of flour, stir until well blended, then pour on gradually, while stirring constantly, one cupful of milk. Bring to the boiling point and add one-third of a teaspoonful of salt, a dash of pepper and one-half teaspoonful of curry powder; then add the eggs. Turn into a shallow buttered dish, sprinkle with one-fourth of a cupful of grated cheese, cover with three-fourths of a cupful of buttered crumbs and bake until brown.

Vassar Eggs.—Finely chop two ounces of smoked dried beef. Add one cupful of tomatoes, one-fourth cupful of grated cheese, a few drops of onion juice, a few grains each of cayenne and cinnamon. Melt two tablespoonfuls of butter, add the mixture and when well heated, add three beaten eggs. Cook until the eggs are creamy, stirring constantly. Serve on squares of buttered graham toast.

Hot Egg Sandwiches.—Mince a tablespoonful of shredded onion and add to a tablespoonful of butter in a frying pan; when hot and partly cooked add an egg, fry until cooked and place on a piece of bread which has been warmed—not toasted; cover with another warmed slice well buttered and serve. An egg sandwich and a glass of hot milk or cocoa will make a good meal.

Hard-cooked eggs, chopped white warm, mixed with butter and a little mustard to season with salt to taste, make a most satisfying sandwich for picnics.

Use Corn.—Now is the time for all good cooks to come to the aid of their country, by using plenty of corn—corn meal dishes, such as corn-meal mush, corn bread, corn cake and also puddings, hominy bread and many other good things which will be easy to find.

Everyday Good Things.

Those who are fond of sweet potatoes will like this recipe:

Sugared Sweet Potatoes.—Select medium-size sweet potatoes pare and slice a layer in a well buttered dish—a casserole is best; add one and one half cupfuls of water and sprinkle with one teaspoonful of salt and four tablespoonfuls of maple sugar; dot with bits of butter, using four tablespoonfuls. Bake 30 minutes and then set into a pan of hot water to wait for serving time.

Eggs in Spinach Nests.—Prepare six rounds of toast, butter well and cover each round with cooked and seasoned spinach, making a hollow in the center. Drop in egg into the hollow of each nest and place the dish in the oven until the eggs are cooked. Sprinkle with paprika, dot with butter and sprinkle with chopped ham.

Cheese Sandwich Filling.—Prepare a white sauce, using two tablespoonfuls each of butter and flour and one-half cupful of milk. Put one-half of a can of pimentoes, two hard-cooked eggs, and one-half pound of cheese through the meat grinder; add one raw egg, one tablespoonful each of sugar and one teaspoonful of salt, with one-half cupful of vinegar. Cook over water until smooth and thick. After combining mixtures. Cool and use as sandwich filling for white bread.

Beefsteak Sandwiches.—Cut white bread into one-fourth inch slices. Shape with a heart cutter, spread with pimento butter, put together in pairs, press edges lightly and decorate with small hearts cut from pimentoes, using the small, vegetable cutter for this purpose.

Prune Relish.—Boil together one cupful of stoned and finely cut prunes with one and one-half cupfuls of water in which they have been soaking; add three tablespoonfuls of sugar, the juice of half an orange; one-half teaspoonful of ground cinnamon and two tablespoonfuls of currant jelly. Cook all together, adding the orange juice and jelly at the last. This makes a fine relish to serve with mutton or lamb, or with sliced cold roast. Raisins may be used with the prunes if desired, adding a different flavor. Prunes are one of our versatile fruits. They add to many dishes. A little prune pulp added to boiled frosting makes a delicious cake filling. Cooked with a bit of flour, lemon juice and a few raisins, the filling is especially good for filled cookies.

Nellie Maxwell

Bertillon Measurements

The Bertillon system consists of simple and exact measurements of certain parts of the body. The measurements are taken with calipers and include the height, standing and sitting; reach of outstretched arms, length and width of right ear, and the length of the left foot, forearm, middle and little fingers. The entire process takes from five to seven minutes and the measurements are planned to be accurate within one thirty-second of an inch.

MANY GORGEOUS SILK PRINTS; FASHION FAVORS BRIGHT CREPE

WERE it possible for anything so gorgeously gay as the new silk prints which the mode heralds for spring to exist even the suggestion of a shadow, then of them might one say that "Colour events cast their shadows before." Figuratively speaking, this is true, for certain it is that all signs point to a season of patterned silks the like of which, when it comes to flamboyant design and bizarre coloring, the world of fashion never knew.

Crepes, taffies, stuntings, georgettes, radiums, and even taffetas, show prints quaint and prints modernistic, large bold designs, tiny prim figures, border effects and all-over patternings as well. Some of the latest silks suggest the inspiration of beautiful stained glass cathedral windows. Others bespeak flowers of exotic hue, while geometric, chrysanthemums, dahlias and roses splash their rich colorings in border design across silks whose plain surfaces are also printed with small buds and leaves.

The styling of the new silks is as fraught with new interest as are the fabrics themselves. Two outstanding points in the making of these novelty silks are capelet effects and long fanciful sleeves. A third interesting feature is the trimming of bold patterned silks with solid colored borderings, fringes and plisses.

The handsome afternoon gown in

A HANDSOME AFTERNOON GOWN

the picture emphasizes all of these style items. The graceful side drape also bespeaks the list word in styling as does the bow of wide velvet ribbon, for there is presumed for velvet ribbon a pronounced vogue as millinery trimming as well as dress embellishment.

Bordered silks are being made up effectively in two-piece jumper suits, the border finishing the hem of the blouse-earlier than that of the skirt.

Perhaps a little too early it is for the big evening-out party of the go silkies frocks which fashion declares to be "the rage" this season. However, early arrivals are not waiting for spring, but already are peeping out shyly yet confidently from beneath the "vanity" fur and novelty cloth coats of the smart set. Let come balmy days and colorful gowns of crepe and silk prints will burst forth as plentiful and lovely as the spring flowers themselves.

As to colorings, the fine crepe weaves, of which so many of the new models are fashioned, almost outrival nature itself in their freshness and charm. Perhaps the rose shades come first in favor. The range includes bois de rose, arabesque (very deep rose), rose-bloom, rose-beige and rose-leaf, the latter trending to pink. Closely allied to these are peach and apricot. Hints, from periwinkle to navy, are green here for mention, and it was not, therefore, until the close that animals became carnivorous. Men tell us that Jehovah became reconciled to Noah, who—is Life.—Physical death is the separation of the spirit—which is man's moral likeness to God—from the body. Now God executes the threat; "So he drove out the man." Out from that garden of delight in which He had walked with Adam, that fallen sinner now goes. And in this place of exile from God have all the fallen sons of Adam been found. But Christ, too, has gone outside for us. "My God, my God, why hast thou forsaken me!" He cries, as in that awful place, outside the gate," he entombed the hiding of the Father's face. Beneath the weight of our sins, He is treated like a sinner—made sin for us that we might be made the righteousness of God in Him.

7. The last feature displays God's infinite righteousness: "He placed at the east of the garden of Eden a flaming sword which turned every way, to keep the way of the tree of life." But that flaming sword has been, for believers, quenched in holy blood. "Awake, O sword, against my shepherd, and against the man that is my fellow, saith the Lord of hosts" (Zech. 13:7).

Jehovah lifted up the rod against Christ, it fell on Him. And in receiving that judgment stroke in our stead, we are forever delivered from our most just desert—saved and safe forever!

Beginning and End

Better it is to the right conduct of life to consider what will be the end of a thing than what is the beginning of it, for what promises fair at first, may prove ill, and what seems at first a disadvantage, may prove to be very advantageous.

The Want of Man Is God

Low grades of being want low objects, but the want of man is God. And as all great wants in things inferior, such as knowledge, honor, power, belong only to great men, what shall we consider this want of God to be but the highest possible endowment.—Horace Bushnell.

Truth

God is truth. To be true, hate every form of falsehood, to live a brave, true and real life—that is to love God.

TYPICAL OF THE MODE

rials the story is fascinating and endless. Outstanding high lights stress long and fanciful sleeves, high necks some of which are convertible, and widened skirt hemlines.

So marvelously powerful is Moone's Emerald Oil that thousands have found it gives wonderful results in the treatment of dangerous swollen or varicose veins.

Care of the Hair Brush

A brush may be easily ruined, no matter what its quality. Among the don'ts are these: Don't wash a brush in a strong alkaline or acid solution; don't dry it in an oven; don't permit it to remain wet longer than necessary; don't bend the bristles with your fingers; don't squeeze two brushes together. Sunlight is the best purifying agent for brushes as well as other things. Good brushes come fairly high a price, but they are worth what you pay if you make sure of your value. Your hair brush should last you a life time, and it will if you buy and use wisely.

Color Emphasized

Much emphasis is laid on color in the designing of the new afternoon frocks of satin or velvet. All shades of blue are used, according to arrivals from Paris with hais de rose, brown, red, pink, failed cyclamen and green also popular. Often two shades of the same color are combined in the same frock.

The Curse and Its Removal

By REV. GEORGE E. GUILLE
Midwestern Representative, Moody Bible Institute, Chicago.

TEXT—Cursed is the ground for thy sake.—Gen. 3:17.

Rev. G. E. Guille

Human sin has brought a curse upon the whole creation. It extends to earth's remotest bounds and affects the land, the sea and the air. The fertility of earth has been restrained thereby and the very nature of the brute creation has been changed. At the conclusion of the six days of work God gave to man, the beasts and to fowl "every green herb for meat," and it was not, therefore, until the curse that animals became carnivorous. Men tell us that physical death is separation from God, who—is Life.—Physical death is the separation of the spirit—which is man's moral likeness to God—from the body. Now God executes the threat; "So he drove out the man." Out from that garden of delight in which He had walked with Adam, that fallen sinner now goes. And in this place of exile from God have all the fallen sons of Adam been found. But Christ, too, has gone outside for us. "My God, my God, why hast thou forsaken me!" He cries, as in that awful place, outside the gate," he entombed the hiding of the Father's face. Beneath the weight of our sins, He is treated like a sinner—made sin for us that we might be made the righteousness of God in Him.

7. The last feature displays God's infinite righteousness: "He placed at the east of the garden of Eden a flaming sword which turned every way, to keep the way of the tree of life." But that flaming sword has been, for believers, quenched in holy blood. "Awake, O sword, against my shepherd, and against the man that is my fellow, saith the Lord of hosts" (Zech. 13:7).

Jehovah lifted up the rod against Christ, it fell on Him. And in receiving that judgment stroke in our stead, we are forever delivered from our most just desert—saved and safe forever!

Beginning and End

Better it is to the right conduct of life to consider what will be the end of a thing than what is the beginning of it, for what promises fair at first, may prove ill, and what seems at first a disadvantage, may prove to be very advantageous.

Low grades of being want low objects, but the want of man is God. And as all great wants in things inferior, such as knowledge, honor, power, belong only to great men, what shall we consider this want of God to be but the highest possible endowment.—Horace Bushnell.

Truth

God is truth. To be true, hate every form of falsehood, to live a brave, true and real life—that is to love God.

Two Letters

The first written twenty years ago, the second recently by Mrs. J. H. Bouriand, Frankston, Texas.

June 2, 1904, she writes:—"For twenty-three years I was a constant sufferer from chronic catarrh. I had a severe misery and burning in the top of my head, a continual dropping of mucous into my throat causing frequent expectoration. My entire system became involved and I grew worse. It seemed as if I could not recover from a constant cough and frequent attacks of bilious colic. My bowels were affected, causing alarming hemorrhages. I tried many remedies and finally took Pe-ru-na. In three days I was relieved of my bowel trouble and entirely cured by five bottles. I most cheerfully recommend Pe-ru-na."

June 30, 1924, Mrs. Bourland writes again:—

"I will soon be seventy-nine years old and enjoy good health for one day after another. I still recommend Pe-ru-na and take it myself when necessary."

For more than half a century Pe-ru-na has a proud record of good done. Men and women the world over stand ready to testify to its value in the treatment of all catarrhal disorders.

Send 4 cents postage to the PE-RU-NA COMPANY, Columbus, Ohio, for book on catarrh.

Pe-ru-na is obtainable at liquid form sold everywhere.

For Croup —What Would You Do

Here is a physician's prescription for croup. Mix it yourself. The ingredients will relieve croup without vomiting in 15 minutes. Also the quickest relief known for Coughs, Colds and Whooping Cough. Keep this recipe handy in your home you should never be without a bottle of this valuable prescription, prepared by the best children's specialists. Ask your druggist now for Dr. Drake's Linoxin. If costs the bottle.

The Valley of Voices

CHAPTER X—Continued —16—

"No! The hiss up and put him in the shack and get our outfit to the canoe! I'll get rid of the girl!"

The die was cast. Every minute as the post spelled danger. But Steele saw had an excuse for refusing to take Rose Laflamme to the railroad.

"You understand, David? Keep your knife out of him. Your turn will come on the snow. Now get the canoe!"

David carried Laflamme into the shack, and went for the canoe.

Returning to the girl, trembling in the dark, Steele said: "It was he. David knocked him out, but he's not hurt. We must get away at once."

With an impulsive movement, Rose Laflamme found Steele's neck with her arms and kissed him wildly.

"But," explained the harassed American, "we've got to travel fast; they'll follow us—we can't take you."

"You mean you'll not take me now? Leave the girl in her misery?"

"We'll have to run the portages, break our backs to beat the Indians. We'll need speed. You'd only get us!" protested Steele.

"Take me, take me with you!" she moaned. "Am I not beautiful, beautiful, beautiful? Don't leave me here!"

Then Steele gave in. "What was Pierre doing down river?"

"I was not there. I was alone," she parried, and he crunched his teeth in his chagrin. "When we are in the canoe I will tell you things—things you nevaire dream of," she urged, "I know-diz!"

She would exchange her information at a price—her freedom; and that price Steele would not pay. But it was necessary to get her back to the house.

"All right," he said, "go and get some heavy clothes, and be at the log landing in an hour. Don't make any noise. We don't want them to find Laflamme until morning. Now be careful!"

With a low cry, she again circled Steele's neck with her arms, kissed him and disappeared. In an hour he and David had loaded the canoe on the lake on their way to Nepigon house. She had intended making a catspaw of him to escape from Steele, but Steele wasted no sympathy on her. He wondered whether, on finding herself tricked, she would arouse the people or take to her bed, feigning ignorance of the whole business.

And he also wondered whether if Denise St. Onge ever learned of this night's work at Opoke, would she believe that every act and word of his had been in her service to her.

Through the night, like churn-sticks, churn-swish of the paddles of David and Steele—crescendo and pianissimo of the oars, for with the sun might come a head wind, which meant fighting for every foot while their pursuers gained on them with a four or six-man crew. Time and again through the long hours, the keen eyes of David alone had sensed floes of the hunt in which they travelled, the faint splash of a paddle, the shout of a voice. Then would come the dash and effort to put them out of sight and hearing.

Human sin has brought a curse upon the whole creation. It extends to earth's remotest bounds and affects the land, the sea and the air. The fertility of earth has been restrained thereby and the very nature of the brute creation has been changed. At the conclusion of the six days of work God gave to man, the beasts and to fowl "every green herb for meat," and it was not, therefore, until the curse that animals became carnivorous. Men tell us that physical death is separation from God, who—is Life.—Physical death is the separation of the spirit—which is man's moral likeness to God—from the body. Now God executes the threat; "So he drove out the man." Out from that garden of delight in which He had walked with Adam, that fallen sinner now goes. And in this place of exile from God have all the fallen sons of Adam been found. But Christ, too, has gone outside for us. "My God, my God, why hast thou forsaken me!" He cries, as in that awful place, outside the gate," he entombed the hiding of the Father's face. Beneath the weight of our sins, He is treated like a sinner—made sin for us that we might be made the righteousness of God in Him.

7. The last feature displays God's infinite righteousness: "He placed at the east of the garden of Eden a flaming sword which turned every way, to keep the way of the tree of life." But that flaming sword has been, for believers, quenched in holy blood. "Awake, O sword, against my shepherd, and against the man that is my fellow, saith the Lord of hosts" (Zech. 13:7).

Jehovah lifted up the rod against Christ, it fell on Him. And in receiving that judgment stroke in our stead, we are forever delivered from our most just desert—saved and safe forever!

Beginning and End

Better it is to the right conduct of life to consider what will be the end of a thing than what is the beginning of it, for what promises fair at first, may prove ill, and what seems at first a disadvantage, may prove to be very advantageous.

The Want of Man Is God

Low grades of being want low objects, but the want of man is God. And as all great wants in things inferior, such as knowledge, honor, power, belong only to great men, what shall we consider this want of God to be but the highest possible endowment.—Horace Bushnell.

Truth

God is truth. To be true, hate every form of falsehood, to live a brave, true and real life—that is to love God.

By GEORGE MARSH

Author of "Tolliver of the Trail" "Valley of Vengeance"

(Copyright by the Penn Publishing Co.)
(W. N. U. Service)

They were rounding a bend below a backwater when the man in the bow lifted his hand and pointed. In the shallows, not fifty yards away, stood a yearling moose.

"Meat to take us to Nepigon!" groaned Steele.

David stepped the water with the flat of his paddle. "Marche, you!" he cried, "or de cut'-throat feelin' us wee get you."

"One shell would have got him!" said Steele, ruefully, as the moose slowly turned and disappeared.

"Wal, I not wast' de last shot on moose," and the Indian held up a shining cartridge for the inspection of his friend.

"Where in the devil did you get that?" cried the amazed and delighted American.

"I fin' eet een de grub bag."

"And you never told me! Is that fair, David?"

"Wal, eef I tell you, you fire eet at de moose."

"Why not? We would have red meat to Nepigon."

The Ojibway shook his head soberly: "Dweed save eet for one of La-flamme's men."

To Steele, who felt now that sunstroke would find them at the Lafamme portage; that their pursuers were far in the rear; the words of David sounded unduly pessimistic. It was possible that some of the Indians on their trail could travel the forty miles of lake, Indian fashion, in a night and a day, but he doubted it. So he laughed loudly at the square back of his friend when, an hour before sunset, they landed at Jackfish Portage.

"Well, we did it, old boy!" cried Steele, slapping the rounded shoulder of the grinning David. "Now we'll take her all over in one trip or throw this accursed canoe away. Can we do it?"

David nodded. "De carry to de lake ees short. I tak' de canoe an' de Injun stuff. You tak' de rest."

"Good! It will go four hundred—with the both."

But David was busy slinging his pack to the back-strap of the bags and made no answer.

Then, after further protest, which the Indian brushed aside, Steele packed the three hundred pounds of bags on his companion's wide back, and on top balanced the canoe, and the thick bowstring of the bow. Out of Anak moved steadily up the trail.

With the dusk, the canoe was in the lake, and for the two men stripped hands in mutual congratulation. They had set a record—a pace over a hundred miles a day—which they would not soon forget. Dropping downstream they camped in the lake's spruce, back from the river, and fog the first time in two days, they rested, ate their beans and bacon, and feasted.

Beside a fire which the scrub smoke kept free, two men, at ease with the world, pulled on after-supper pipes. With a little luck in the pike and bass line, they could hope to eke out their scanty food supply; and the Ojibway, knowing the habits of their pursuers hopelessly behind, the shell in David's rifle might bring them meat.

"Boss," said the Ojibway, after a period of silence which was characteristic, "I nevaire tell you wy' I hunt dis Lafiamme."

"I was weary in which Denise St. Onge again played to him on her Hill of Dreams, far in the north, Steele turned with interest to the speaker.

"No, I should like to hear."

"Wal, some years back—ten, twelve. Dis Lafiamme trade wid de 'Jibway up 'Lost lak' way. My brother work for heem. He sen' my brother an' 'boder man to mak' caches on de 'Lost River.' One day, long spruce log, she fall and hit heess in de back. De 'broder feller try carry heem ovair de portage but eet fall on 'broddier too much. He say, 'I stay here—wife you tenang men from Lost-lak.' Day tak' me ovair de long portage on de spruce pole?"

"What did he find?" asked Steele, "Nodin."

"What!"

"My brodder crawl to de riviere an' drown hisself—before he starve."

"David," said the man across the fire, "I want to apologize for keeping you on that snake. He was helpless and I thought if I allowed you to go back that night, and we were afterward overhauled, it would mean our finish; but now I wish you had throttled him."

"I had hard fight not to keel heem—but you're de boss," added the loyal Ojibway.

"You'll have your opportunity this winter—have fear."

"Mebbe; but day may wait for us tomorrow at de Frying Pan."

"You still think that some of them may have been sent overland to cut us off?"

"Wal," said the cool half-breed, "eef I hunt canoe traveling dis way from Opoke, dat ees where I sen' eem."

"But they won't have had time to get there."

"Mebbe not. Tomorrow we see." And the red stole rolled himself in his blanket.

* * *

The stars still shone above the Jackfish, although there was a hint of dawn in the grayling east, when a canoe slid swiftly through the shallows on the way to the Frying Pan rapids. Once over the carry around this roaring cauldron of white-water, into the spray of whose flumes and cross currents no man, nor white, had ridden a canoe and come through, and the two friends could snap their fingers at Lafiamme's pursuing pack of wolves, for thirty miles of hard-running river, from which they would not lift their flying canoe, then lay before them.

As they paddled toward the carry above the thundering Frying Pan, Steele asked the Indian whose eyes consciencly searched the shore below them: "Have these rapids ever been run?"

"No! Dey are ver' bad een some place," muttered David.

"Could we run them?"

The Indian shook his head.

"Then why did you insist on our having our setting poles handy?"

David did not answer.

"You're wasting your time watching that portage," laughed Steele.

Still the Ojibway ignored the man in the stern. Then the scoffer suddenly wondered why the boatman was edging the nose of the boat, as they drifted, away from the carry. A thrill shot through him. Had David seen something suspicious?

The boat was free for everything easy ritte rance. With his possible hunted, the Indian, stimulating leisurely action, and followed Steele, was rapidly adding to the distance between the canoe and the shore. Yet to the straining eyes of the American the scrub told nothing.

"What is it? I can't make anything out," demanded Steele.

Back from the lone canoe: "Keep on paddle; dey tak' shore!"

Steele's paddle dipped and pulled with the strength of desperation. They had set Lafiamme's gang a pace over a hundred miles of lake and river, but the pursuers had not soon forget. Dropping downstream they camped in the lake's spruce, back from the river, and fog the first time in two days, they rested, ate their beans and bacon, and feasted.

Beside a fire which the scrub smoke kept free, two men, at ease with the world, pulled on after-supper pipes. OUR PROSPERITY

According to the New York Times the New York correspondent of the London Times has sent to his paper a resume of American conditions, setting out that American standards of living in 1925 rose to a level never before approached by any nation. The year, it was added, marked the largest material gains of any peace time year in American economic history.

The correspondent added that wages remained high and that there was increased efficiency on the part of the workmen and the management in the great industries to meet increasing European competition.

Of course every American knows that America is the most prosperous and most contented country in the world, but it is at least satisfactory to get confirmation from so noted a foreign source. And in passing, let us not forget to give credit to where credit is due. It will be generally admitted that the present administration in Washington, with its program of efficiency, and tax reduction, and its rules of interfering as little as possible with legitimate business, has had a great deal to do in creating the atmosphere which has made this season of prosperity possible. Let it not be forgotten too, that we are living under a protective tariff which has made possible the stabilizing of industry and the giving of jobs at the highest wages in the world to American workmen.

Free traders used to tell us that protection led to inefficiency and waste because it took keen European competition to put the American manufacturer on his mettle. It is now generally admitted that American manufacturing is more efficient than ever before, and this leads to the belief that maybe a good job at good wages, with plenty to eat and clothes and gasoline in the tank behind the workman's old automobile brings on a state of mind that induces effectiveness rather than of sabotage. For the workman like the student and the professional man can't stay on his mettle long if he is underpaid, hungry and cold.

The correspondent also adds that things are beginning to look up a little in Great Britain. It is to be hoped that there will be substantial improvement in Great Britain this year and all over Europe too, for it is the common enemy of America and all constitutional government is bolshevism and this thrives best on poverty and discontent.

WHAT WASHINGTON SAID

The time has arrived when patriotic Americans begin to think a little more than usual about the father of his country. Orators for a century have liked to dwell on Washington's farewell address to the American people which is admittedly one of the finest things of its kind ever penned, in America or elsewhere.

Of late there has been a disposition in certain quarters to decry Washington's advice, especially on international affairs, as timeworn and out of date. Washington, it will be well remembered, admonished us as a nation to beware of foreign entanglements, to keep free of European alliances and diplomatic bargainings, to keep on friendly terms with all nations, but to make favorites of none.

Now some of our budding statesmen declare that times and conditions have changed, that we are so strong this advice is no longer necessary. But George Washington did not write a mere political program. He enunciated a principle of conduct, and principles founded on truth and common sense never change. The ten commandments are just as sound and logical as they were two thousand years ago.

Times have not changed so much either. There were then and are today alliances then as now. No sooner was the young republic launched than European nations tried to use it as a catspaw, and it was only the wise guidance of Washington, and men like him, in these early days, which prevented the carrying out of these schemes. For there were men then too, who thought our destiny was in Europe rather than America.

It is true that we have grown immeasurably stronger that we are now perhaps singly the most powerful nation on the globe. But other nations have grown more powerful too, and it is not nearly so far across the Atlantic as it was in the year 1800. Besides all Europe is in debt to us, either to our government or to our bankers. This for the first time, makes possible a common American policy on the part of European nations.

Therefore, let us not forget that Washington spoke not for his day alone but for the future of America, because truth is eternal. Washington's advice is not discredited by age any more than the Ten Commandments.

BAD MIDDLE MAN

The picture of the middle man ridding the neck of the downtrodden consumer has been a favorite one in America these many years. "Eliminate the middle man" has long been a familiar slogan and the movement based upon it a popular bandwagon.

There have, of course, been cases in which there are too many middle men. And every business man is familiar with the abnormal condition in which phantom middle men are erected for the purpose of advancing prices beyond their economic value.

But sound business requires the economic function performed by the middle man. This function becomes a middle man whether he acknowledges the label or not. Only in the minds of the unthinking does there exist the possibility or even the hope that he may be eliminated.

Clarification, however, is needed upon this point, and it has been authoritatively supplied by the committee on methods of distribution of the U. S. Chamber of Commerce. In a report which was presented at the national distribution conference held in Washington on Dec. 15-16, appears the following assertion on the subject:

"The middle man system of marketing developed for the simple reason that middle men are able to perform the marketing functions in the most economical and effective manner. The term 'elimination of the middle men' is slightly misleading because when one so-called middle man is eliminated the producer or some one else has to undertake the functions previously performed."

It need not be forgotten that there are middle men and middle men, just as, in another department of distribution, there are more and less expensive routes. The middle man cannot be eliminated but uneconomic middle men can be—in fact they are eliminated when economic law functions normally.

TROTSKY WANTS REVOLT

A sort of unofficial diplomatic war seems to be on the verge of breaking out between Russia and Great Britain. Leon Trotsky, in his recent book "Whither England" which is to be published soon, is said to be advising a real revolt by the proletariat in Great Britain. The book advises the working classes to drop political methods and go the whole way by overthrowing the middle classes and forcing them into the ranks. Only great bolshevists in this revolutionary struggle will be of any assistance, Trotsky says, and this will strike the weapons from the hands of the capitalists, greatly shorten the civil war and lessen the number of victims.

On the other hand, it is said that a new drive will be made in the British parliament in the near future looking forward to the breaking off of diplomatic relations between Great Britain and Russia. The reason of this will be the alleged failure of the Russians to keep their pledge to cease circulating anti-British propaganda in the Orient.

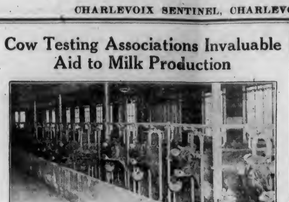
Whether or not this move will succeed is regarded as doubtful for the reason it is not known just what position the British government will take on the matter. It is generally admitted however that the recognition of Russia by Great Britain has been barren of any satisfactory results.

The example of British relations with Russia, however, can serve as a lesson for America. It is difficult to see just what benefits if any America would gain from recognition now of the Soviet government. Certainly the danger of red propaganda in America would not be lessened if the experiences of other governments with Russia can be taken as examples.

All is Vanity!

"There was never yet fair woman but she made mouths in a glass."—Shakespeare.

Cow Testing Associations Invaluable Aid to Milk Production



Elimination of non-productive cows from milk herds increases net profits.

Getting more milk from fewer cows is the aim of the cow testing association. Hundreds of cases have demonstrated in a most striking manner that the weeding out of non-productive milk cows and better care for the producing members of the milk herd pay big dividends.

This point was strongly stressed in an exhibit at the International Dairy Exposition held at Indianapolis last October. An actual instance was given which disclosed the following facts.

A milk producer had a herd of six milk cows producing 27,000 pounds of milk annually. He joined a cow testing association. The first step taken was to weed out the non-productive cows, that is, those cows yielding insufficient milk to net a profitable income over and above feed cost.

The weeding out process left only four cows in the milk herd. But these remaining cows were fed according to their individual requirements. No sanitary or beneficial feeding measure was neglected. During the stabling months, they were given plenty of clean bedding; stables were kept clean; the long hair on flanks and udders were kept clipped. The cows were brushed or wiped with a damp cloth before each milking. Utensils were sterilized. The stable was well ventilated and plenty of clean, pure water was given the cows.

A year from the time the member joined the association, his records showed an increase in milk to more than 75,000 pounds from the four cows as compared to 27,000 pounds from six cows prior to this period. There was more than a corresponding increase in butterfat.

The cow testing association consists of about twenty-six farmers who cooperate and employ a trained tester to test their cows for economical production of milk and butterfat. The tester spends one day a month on each farm and obtains a complete record of each cow's milk and butterfat production, feed consumed, feed cost, growth, and income, and income over feed.

The first cow testing association in the United States was that organized in Newaygo County, Michigan, in 1905. Since then, there has been a fairly constant growth until 1925 shows a tally of 132 cow testing associations with excellent prospects of the number doubling within the next three years.

COMMENT.

—A buried Indian city with six temples and everything has been dug up in Yucatan. Some of these days, some explorer in Mexico or Egypt is going to uncover a prehistoric city with a lot of filling stations.

—If you eat six cornc kes at breakfast every morning for a month you will have done more for the corn farmers than Congress will accomplish in one session.—Toledo Blade.

—The folks who think that America's heart ought to be touched by the suffering of those European nations needn't worry, America is being touched.—Boston Post.

—Not all the ventriloquism is on the vaudeville stage. There is, for example, that voice of the people that so many patriots hear every election year.—Gazette.

—Of course the Mrs. Grundys over the country are going to be much annoyed by the repeal of that income tax publicity clause.

—Our guess is that if the Italian king bragged as much as Mussolini does they would have to fight.—Dallas News.

Discovering a Friend.

If sorrow never happened and trouble never came
The only thing you'd know about your neighbor is his name,
If all your days were bright and fair and certain was your place
You'd only know a fellow by the features of his face.
Acquaintances upon this earth are all you'd ever own
If care had always passed you by and grief you'd never known.

Time was I used to nod to one who lived across thy way,
I knew his name and he knew mine; we passed the time of day.
But nothing did he mean to me and nothing I to him
Until one morning sorrow came and all my world was grim.
I saw his face, I felt his hand and knew he'd come to tend
The strength I needed, and right then I found I had a friend.

'Tis not in sunshine friends are made,but when you're skies are grey,
The splendid souls that men possess are never on display.
We cannot tell what lies behind the hasty nod or smile
Nor what of worth will come from it in just a little while;
We only know that when we face the cares that life must send
We realize the passer-by has changed into a friend.

—Author Unknown.

HAVE NO PEASANTS

Decatur, Ill. Herald

Louis Untermeyer the other evening described Robert Frost as the poet of the New Hampshire peasantry. We most correct Mr. Untermeyer. We don't have peasants in America,either in New Hampshire or Illinois.

The word is European and French in origin. It seems to have been applied originally to the tillers of the soil who under a feudal system had been serfs or villeins bound to a feudal lord.

A peasant may be in France, or Germany, or Italy a proprietor of a tenant, but his condition is usually of the lowest. His living conditions are about on a par with his cows who share his cottage with his wife and children. Freeborn, and his own man, he still has the mentality of a slave and the obedience of a serf. Usually he is ignorant and has no desire to rise out of his class. He doesn't crave books or bathrooms.

We don't have peasants in America because we have no class system which prevents a man from rising. A farmer on a rocky New Hampshire hillside may be poor, but his sons and daughters may go to college. The farmer's vote is just as good as that of his wealthy neighbor and he may be a greater influence in local politics.

In the last few years a good deal has been said about the American farmers degenerating into peasantry through the force of economic conditions. There's nothing to it. We wonder if the peasantbaiters, for we shall protest against European class terms being employed to distinguish American occupations.

Paper Out of Date

What with an increase in the "butcher paper," the daily heavy, brown paper used to wrap up meats, is no longer manufactured in any great quantity in the United States. It has been replaced by what is known as "bogus manila." The old butcher paper was made from straw.

Power of Vibrations

A London chemist says he can put a dime into the vibration of his fiddle, but that's nothing. A saxophone skilfully played can put an entire orchestra.—Cleveland Plain Dealer.

WANT COLUMN

WANTED—Listings of good lake lots, cottages and acreage. Price must be right. Geo. A. Harper, Real Estate, 2021 S. Division, Grand Rapids, Mich. 43-tf

FOR SALE—Eureka Electric Vacuum Cleaner with attachments, practically new and as good as new—no use for same and will sell at very low price. Mrs. Carvell Servoy, Bellaire, Mich.

FOR SALE—New cruiser fully equipped and ready for service. Power Peerless Marine Gas engine. Toilet with folding basin in lavatory. A Staunch ship at moderate price. For particular call at Sentinel Office

WANTED—Manufacturer desires lady to introduce its goods. No canvassing. Position pays about $18 per week. Prefer lady who belongs to church or club organization. Write Sales manager, 505 Sloan Bldg. Cleveland, Ohio. 43-3t

CASH For Dental Gold, Platinum, Silver, Diamonds, Magneto Points, False Teeth, Jewelry, any valuables. Mail today. Cash by return mail.
Hoke S. & R. Co., Otsego, Mich.

THEATRE

A Comic Thriller

All the thrills of the serial chapter play are promised in the new Educational-Tuxedo Comedy "Curses!" with Al St. John which will be at the Palace theatre tonight. This, according to advance information, is a burlesque on the wild and wooly situations which have furnished screen fans with thrills for years.

In the comedy these tense situations are said to be cleverly burlesqued and where fans formerly thrilled with horror and excitement at the serious chapter-play, they will roar with laughter at the comedy burlesque. St. John will have a large and suppo ting cast under the direction of Grover Jones.

The King on Main Street

That Paramount wanted to make sure that Monta Bell production, "The King on Main Street," would be one of the outstanding pictures of the current year is evidenced by the all star calibre of the players who appear in the principal roles in the cast.

Adolphe Menjou is starred in the title role, while Greta Nisson and Bessie Love are featured in support of the star.

"The King gets excited Sire," he explained, "what I want is about four thousand woolies." "Woolies," said Ryan, "What's woolies?"

"Sheep," he replied, "You see Buck and I have decided that in order to make certain scenes in his new picture together we will require four thousand sheep."

The casting director breathed a sigh of relief and assured Van that the sheep would be on hand. Then the funistarted. Sheep unfortunately have no telephone numbers. The boss kindly send told him of a large ranch at Mammoth Lake, Cal., where the sheep could be obtained. So it was at Mammoth Lake that many of the scenes for "The Desert's Price" were shot.

Quite Likely.

Howell—"My wife never keeps me waiting while she gets ready for church." Powell—"She would if you went."—New York Sun

Buy New Husbands

Among a certain tribe in the district of Alimphabad, in India, there is a custom permitting women to discard their husbands and to marry again on payment of money compensation to the first husband.

Add Novelists' Mistakes

Penny Hemlin Lea in her story: "A picture of the Good Shepherd bringing home the ninety-and-nine sheep," Mrs. Lea is one short in her count," B. H. points out: "it was the hundredth that was lost."—Boston Transcript.

We Serve "Michigan"

Michigan Railroads Welcome Good Roads

MICHIGAN is one of the states that has made the greatest progress by the extension of its good roads. Its industrial importance has been greatly fortified by the development of a system of internal communication. It can still advance under a careful and judicious extension of this program. With the passing of transportation from the mud age to the hard road age there are indications that we are experiencing in the United States an industrial revolution as important in its effect as was that which marked the introduction of the macadam road and the steam railroad in England. This is evinced in the expansion of our national income.

For instance, the wealth of our nation—*investment on our plant*—in 1912 was 186 billions of dollars while our national income—*the annual turn-over*—was 30 billions of dollars.

The wealth of the nation in 1922 was 321 billions of dollars, and our national income over 80 billions.

It took a six-dollar investment to make a dollar in 1912.

It took only a four-dollar investment to make a dollar in 1922. An increase in efficiency of 33 per cent. in a decade.

THE utility of the railroad, as a freight carrier, has been increased many times through the complementary agency of the good roads system. The traffic in the old days could only be drawn from about eight miles on either side of the right-of-way of a railroad. Now, the railroad's range of activity is five to six times greater. True, these new transportation agencies present some problems that embarrass at times, but better transportation in whatever form it may be, operates to the general good.

The railroads do ask for reciprocal regulation.

Michigan is in the vanguard as an industrial state. Let us retain that position.

The Michigan Railroad Association approves the state's proposed program for more *good roads* because it will yield a large return on the investment.

MICHIGAN RAILROAD ASSOCIATION

NEW PALACE THEATRE

Attractions for Coming Week.

Thursday, February 25th

Robert Frazer and Clara Bow in "The Scarlet West." Come on out. Sweep the plains with your forefathers; grab your gun, swing astride that waiting pony and dash hell bent for leather to protect the ones you love. There's the touch in it that tingles the blood; there's the spirit of great events and great loves. You own it to yourself to see it.

Also Al St. Johns in "Curses." A thrilling, bloodcurdling, smashing, crashing comedy with thrills, chills and a hundred laughs. Benefit of Senior class.

Saturday and Sunday, Feb. 27-28

Buck Jones in "The Desert's Price." Cast as a young ranchowner, Jones, who is called upon to do two fisted fighting, makes things highly interesting for the enemies of two young Western girls who have been thrown upon their own resources. This is a rip-roaring, double-barreled drama of the plains. The comedy will be a laugh-getter and you will drive the blues away when you see it. "Failure" is not what it seems. Another sensational picture, "The Sugar Trail." These pictures will give you some idea of the sugar industry.

Wednesday, March 3rd

Adolphe Menjou and Bessie Love in "The King on Main Street." See the king—On the boardwalk, eating hot dogs and shooting the shoots; on Broadway, flirting with flappers; on Main street, falling in love. Laughter and heart tug linked in a really great picture.

Also a Fox News reel. Travel the world with the News reels. The very best form of travel.

IN CONGRESS SET

One of the most charming of the new hostesses in congressional society is Mrs. Goff, wife of Senator Guy D. Goff of West Virginia. Mrs. Goff is no newcomer to Washington, however, as Mr. Goff was an assistant attorney general in the Harding administration.

Editor Journal, Daytona, Florida.

Good reinforced concrete roads really and truly are the only roads that should be built in every place in Florida. In other kinds have been tried out in all the states in the union, but none stand the test as well as the concrete and now that we are about to begin to build them—having "put our hand to the plow let's not turn back." It is a shame that we have allowed ourselves to be denied so long. As I look at it—the people really are not to blame—so many have not had the time to give to this great work. They were busy with their own affairs and seemingly nobody wished to place an additional burden upon themselves by bonding their county. But now it is different —we are a very rich state and we have a great many rich men in the state and they all wish to grow richer—and they know good reinforced concrete roads add to their wealth, because concrete roads are an actual asset to tell you what I consider the very best good road "spiel" I ever heard.

It was in Danville, Illinois on the Dixie highway, the home of Uncle Joe Cannon the Illinois senator.

William G. Edens, president of our Illinois State Bankers Association, as well as a union railroad man and vice president of one of our big banks, asked an old German farmer to speak. The farmer excused himself by saying, "I just come down here to speak, I cannot make a speech, I came here to listen and learn." So Mr. Edens said, "Well you have 330 acres of land located at so and so." "Yes Sir, Mr. President, I have."

"Well, what did you pay for it?"

"$250 an acre."

"How long ago did you buy it?"

"Let me see, about twenty-two years ago."

"How much can you sell it for now?"

And with great pride and in good dead broken voice he answered, "$950 per acre."

"Well, will you kindly tell the people (there were 1,500 present) to what do you attribute this large increase in the value of your farm?" He said, 'Oh' Mr. President, I got me a good concrete road within one mile of my house."

It is needless to say the cheering to this was loud and long and he was the hero of the day. The thing that made the greatest impression was that he was so well satisfied that his road was within one mile of his house. Afterwards, he explained, he would put on his truck so much as he could get out with to the concrete road and at the same time he would also haul out all that his two teams could haul, and there load them onto the truck. The truck would then go to town and the two teams would go back to work on the farm.

Do you fellows also understand the situation blame the old German for thing stiff and proud? How many men would be satisfied to be within one mile? I know a lot of men who would fight unless the road passed in front of their house. Do you blame us for cheering?

George H. Van Pelt

Mesdrs. M. A. Levinsion and H. A. Craig are spending part of this week in Grand Rapids where degree work in the Consistory and Shrine occupies their attention. Mr. Craig will continue his trip to Ann Arbor and will spend a little time in the University city before returning to Charlevoix.

Lawrence R. Chase has definitely located in Charlevoix. He will engage in the real estate business, acting as a broker and renting agent. Experience as a salesman, and the energetic application of his knowledge of advertising should fit him to render peculiarly effective service to his clients.

Special work, refinishing and decorating is the order of the day at the salesroom of the Charlevoix Hardware Company, making preparations for receiving and placing on display their new line of furniture in addition to the line heretofore carried. The entire second floor of the big store will be utilized for the display and handling of the new line—which will be formally opened to the public in the near future.

—) PERSONALS (—

Mr. O. H. Sisson of Central Lake, was a business visitor here last Thursday and Friday.

Mrs. Grace Oldham, for some days in Chicago on a business trip, returned to this city last Tuesday afternoon.

John McCann returned from Grayling last Friday after spending some days with his son, Dr. Charles McCann and family.

Mrs. Margaret Swinton went to Ann Arbor last Monday and will probably spend the next two or three weeks with her daughters in that city.

Mr. T. J. Braily, for several weeks in the south, the major part of the time in Indiana and Kentucky, returned to Charlevoix early this week.

Mr. C. A. Barry, of Central Lake, spent several days here this week on business, one of his periodical trips in the interest of his real estate agency.

Attorney Rollie E. Lewis was called to Chicago yesterday on business of a legal nature and will probably spend the remainder of this week in the windy city.

Playing marbles is the pastime indulged in by some of the little folks on the sidewalks in this city for several days past, an indication that spring is near at hand.

Messrs. Will Bellinger and John Waggner made the trip to Boyne City last Thursday afternoon and helped out with the music at a dance given by the local O.E.S. society.

Messrs. Giles T. Warner and William Bridge of Hammond, Ind., spent several days last week in this city on business. They returned to Hammond Friday afternoon.

H. B. Jacobs, for something over two weeks spent on a vacation trip through the south part of the state, returned to Charlevoix last Friday and is again on the job at his place of business.

Friends were entertained with music and dancing at the Arthur Barnes residence, 401 Newman Street, last Saturday night, which also happened to be the birthday anniversary of Mrs. Barnes.

A large number of friends spent last Thursday evening at the Milton Russell home, 402 Newman street, the event being on Mr. Russell's birthday anniversary. Music, dancing and a special dinner was greatly enjoyed by everyone.

Dr. Carlton V Hinman, for upwards of thirty-five years and until recently engaged in the practice of his profession at Bellaire, died at the State hospital in Traverse City last Friday, where he had been taken for treatment about two weeks prior to his death.

Joseph Howard and Joseph J. Hallet will be called to serve as members of the grand jury, Federal court for the Western district of Michigan, that convenes in Grand Rapids March 2nd, and Charlie See as a member of the trial jury on March 3rd.

Dr. W. H. Parks had a slight mishap on the hill near the George Bunn place in Hayes township last Sunday, due to his car skidding, striking a stump near the roadside. The damage was of minor importance on the machine, the left fender and running board of the car.

Dan McSauba has been unable for some days to attend to his work as one of the city mail carriers, due to a bad case of poison ivy on his side. He has practically recovered from the injury and will probably be attending to his regular work within two or three days.

Local Petoskey citizens have designated Saturday, February 27th, as a day for enjoying winter sports. Preliminary arrangements have been made for putting on a variety of sport contests in which several local enthusiasts will endeavor to win first place in the scheduled events.

Friends, a goodly number of them, gathered at the residence of Mr. and Mrs. E. C. Sterrett when they all enjoyed a splendid dinner, music and other forms of entertainment, Wednesday evening, and report a most splendid enjoyable time for the evening spent with their friends.

Work of decorating the interior of the County Bank this week is causing more or less annoyance to the corps of workers in the financial institution. This feature will soon be finished, as improvement to the banking room is in appearance and source of gratification to employe's.

Mrs. Mike McCann came over from Saint James last Friday, visited St. Ignace and Cheboygan on business and returned to St. James Tuesday.

Lawrence Malloy spent several days recently in Chicago with his father who is ill. He returned yesterday and will continue to his home, St. James, Saturday if weather condition permits.

Peter Nelson, who has been in Chicago several weeks, returned from the big city last Wednesday. He is spending a few days with friends here after which he will go to his home, St. James.

Two games of basket ball are scheduled for Wednesday evening, March 4, with Ellsworth furnishing two teams. The boys No. 1 team to play Charlevoix No. 2 team and the other being a contest between Ellsworth and Charlevoix girls. These games will be played at Hooker's garage.

H. A. Thomas, master of Pomona Grange, Antrim county, a life long resident of Forest Home township, prominently identified with the agricultural interests of this region, passed away at his former home last Thursday following a stroke of paralysis suffered the previous Sunday. He is survived by his wife and several children.

W. S. Darling, deputy collector of internal revenue for this district has an appointment for Charlevoix next week and will be here two days, March 1st and 2nd, for the express purpose of assisting local citizens with their income tax statements. Those in doubt or who feel that they cannot make a correct return should make it a point to consult with Mr. Darling on one of the dates mentioned.

The question of building a new movie theatre is again being agitated by local citizens, some of whom are anxious to take a block of stock in the venture. Those interested have found a location for the structure that is very desirable for the purpose intended and the project will probably develop and mature into an established going proposition if the promoters can secure the $75,000 or thereabouts necessary for construction work, equipment and lease to be decided upon.

Invitations have been sent out by the Michigan Bell Telephone Company inviting the public to visit the local telephone offices Wednesday, March 11th, that date being the "fiftieth anniversary of the telephone." With a request that the public join in the observance of the occasion. The invitation also states that "your visit will be filled with interest." Also, "if you cannot call when us on March 10th you will be welcomed any succeeding day of that week or at any other time."

W. E. Parmelee who spent part of last week in the south part of the state reports that snow to the depth of from eight or more inches fell in Detroit last Wednesday evening, February 10th, the heaviest fall of the winter for that part of Michigan. Charlevoix has no reason to complain in this respect as at no time during the season have we had a snow fall equal to the one reported. While the storm in progress in this region at the time of the heavy snow fall reported did not exceed three inches.

W. H. here is another fish story, and it's true, too. This isn't the one that got away, but about the one that got caught. Now, if there are any of you fishermen who haven't been having very good luck in catching the denizens of the deep you should watch Art Jackson and he'll show you how he does it. He takes two small minnows and puts them into a gall fish globe, puts a piece of sugar in the top and leaves it into the lake. A muckinaw away in the offing, sees this delectable morsel, and in his unsuspecting haggishness gulps down the minnows and makes a dive for it, bumps it's nose against the globe, sees stars for a minute and becomes an easy prey for the gaff.—Boyne Citizen.

Several local fishermen had a close call last Sunday when ice formation on Lake Michigan on which they were spending part of the day, broke loose from the main land leaving the party on huge blocks of ice and drifting out toward the centre of the big lake. Of those who dimally made the main land in safety guesswise were Henry D. Marshall and son "Dick", Paul Heise, Ray Graves and "Denny the barber," but in making the trip they were in grave danger several times when jumping from ice floe to ice floe across wide spaces of open water. Grover Gravel, another member of the party was less fortunate and was carried farther from the main land with no possible method of escaping without assistance on account of a wide space of open water which increased in size every minute. Members of the local coast guard were notified and after a little time and a lot of hard work succeeded in their effort to reach the imperilled fishermen and brought him in safety to the main land. It was an exciting experience for the entire party all of whom are congratulating themselves over their lucky escape.

Simple Home Remedy

For Matrimonial Heartache: A limp of pride dissolved in a glass of common sense. Swallow immediately and settle with a kiss. Add a dose of wholesome compliments. Repeat as often as needed.

Great Lawyer-Presidents

Van Buren and Benjamin Harrison are considered the greatest lawyers who have been President of the United States.

The ladies of the Altar Society of St. Mary's church, will serve a St. Patrick supper Wednesday evening, March 17, at the Hotel Charlevoix.

Go-to-Church-Sunday

Next Sunday has been selected by the pastors of the city as a special Go-to-Church Sunday for all the churches of Charlevoix. It is a fitting thing to follow the religious visitation of the city by the churches with a cordial invitation on the part of the churches for all the people of the city to attend the church of their preference next Sunday, and as often thereafter as possible.

In accord with this idea the churches hereby unite in extending such an invitation in this public manner. A cordial welcome will be given to all who attend next Sunday's services of worship. The welcome will extend to all succeeding Sundays. Interesting and profitable hours of worship may be spent in any of the churches.

They are our local institutions, and all local people may well find a place in some one of them they may choose where they may feel quite at home.

There is no attempt made in this invitation to reason why any one should go to church—no doubt there are plenty of reasons. All that is presented here is a cordial invitation to attend next Sunday and make it a great day for the churches and for the city. Particular church announcements appear elsewhere in the several churches announcements. Go-To Church-Sunday.

Some fifteen fishermen from Petoskey received something of a scare last Sunday when the ice floe on which they were fishing on Little Traverse Bay, near Bay Shore, became detached from the main ice field and was carried out toward the big open waters of Lake Michigan. The entire party escaped from the perilous position and were later by the assistance of a man who came to the rescue with a row boat. The lives of the men however were more or less jeopardized for a short time. Not an unusual occurrence with fishermen at this season.

Community Banquet

The Community Banquet held last evening under the auspices of the Woman's Christian Temperance Union, was a success in every way. After a short program consisting of a reading by Mrs Ed. Stewart, two solos by Claud Greenway and some community singing, Mr. Usher introduced the speaker of the evening, Hon. Farm C. Gilbert of Traverse City, our circuit judge, who gave an inspiring address on Law Enforcement. Following are some of the points made by the speaker:

"If there is to be law enforcement we must recognize that there is such a thing as law. There are hundreds of people in every community who ignore the fact that the laws is in existence.

People like to pick out their laws and we hear them remark that certain laws are fine laws while others to them do not seem so agreeable. No one can excuse himself for law breaking by saying he hadn't anything to do with making the law. In a representative form of government no one has the right to say that. Taking up our shoes in a state makes the laws of that state obligatory upon us. People have a right to change the law and there is a lawful way to do it. When we talk about law enforcement what kind of enforcement do we want? There are many people who do not want an impartial administration of the law and seem to think that what should be modified in another. The only fair method is to treat all alike. Law enforcement will come only when all are equally amenable to the law. In a representative form of government no one has the right to say that he will be guided by this law and not by that law. In a democracy like this the law-worker must be the law-abider. Law enforcement must be equal and equitable. And back of every statute must be the rich and the humble alike. When a law is found unconstitutional it means this text book says it is so, but that the law works out some inequality or thwarted the purpose of safety.

How do we expect to enforce the laws? Can we elect the sheriff and other officials and go home and go to sleep? Public sentiment is what enforces law. It encourages officers. It will make a witness willing to tell the truth fearlessly, it makes it easier for all the administrative officers.

What is public sentiment? Where do we get it? Isn't it in the home and in the family circle? Our children grow up around us and every time they move and wherever they go they take with them the spirit of the home. The influence of that home goes out and reaches other communities. Wherever we carry with us wherever we go the real sentiment within us, it reproduces which the home life has produced. This knits itself together with the ideas of other homes and produced what we call public sentiment. So the important thing is, what do we think about these questions?"

Honor for Colonists

Following a semi-official suggestion 57 Hutton towns-ships and cities bear the name of Charlevoix county dates from October 12. This rebirth of entire counties, the project of which was put together without political inspiration, it is one more sign of a new growth of nationalistic consciousness among the Indian people, who are beginning to feel that their past explodes in the light of civilization entitles them to special consideration on the part of the nations yet in hope for brilliant fruits in the future. One Indian newspaper has urged seriously that because Columbus once willed America to Isabella and the Indian people are thus heirs to the United States, they should get cash payment of the Indian war debt but really should not be duly all the surplus cash.

World's Large Cities

The following cities reported at the last official census—1910 to 1923—as having more than two-score population: London (county), 4,885,226; London (greater), 7,476,168; Berlin, 1,962,566; Berlin (greater), 3,846,779; Paris, 2,902,500; Vienna, 1,866,147; Moscow, 1,511,345; Leningrad, 1,907,328; Glasgow, 1,034,174. Several other cities just close to 1,000,000 mark and perhaps exceed that number now. These were Hamburg (985,779 in 1910); Warsaw (936,046 in 1921); Budapest (928,098 in 1920), and Birmingham (919,438 in 1921). Constantinople was formerly considered to have a population in excess of 1,000,000, but has lost considerably in late years, and after a canvass in 1924 was reported to have 880,988.

Go-to-Church Sunday

Next Sunday has been selected by the pastors of the city as a special Go-to-Church Sunday for all the churches of Charlevoix. It is a fitting thing to follow the religious visitation of the city by the churches with a cordial invitation on the part of the churches for all the people of the city to attend the church of their preference next Sunday, and as often thereafter as possible.

In accord with this idea the churches hereby unite in extending such an invitation in this public manner. A cordial welcome will be given to all who attend next Sunday's services of worship. The welcome will extend to all succeeding Sundays. Interesting and profitable hours of worship may be spent in any of the churches.

They are our local institutions, and all local people may well find a place in some one of them they may choose where they may feel quite at home.

There is no attempt made in this invitation to reason why any one should go to church—no doubt there are plenty of reasons. All that is presented here is a cordial invitation to attend next Sunday and make it a great day for the churches and for the city. Particular church announcements appear elsewhere in the several churches announcements. Go-To Church-Sunday.

Some fifteen fishermen from Petoskey received something of a scare last Sunday when the ice floe on which they were fishing on Little Traverse Bay, near Bay Shore, became detached from the main ice field and was carried out toward the big open waters of Lake Michigan. The entire party escaped from the perilous position and were later by the assistance of a man who came to the rescue with a row boat. The lives of the men however were more or less jeopardized for a short time. Not an unusual occurrence with fishermen at this season.

Community Banquet

The Community Banquet held last evening under the auspices of the Woman's Christian Temperance Union, was a success in every way. After a short program consisting of a reading by Mrs Ed. Stewart, two solos by Claud Greenway and some community singing, Mr. Usher introduced the speaker of the evening, Hon. Farm C. Gilbert of Traverse City, our circuit judge, who gave an inspiring address on Law Enforcement. Following are some of the points made by the speaker:

"If there is to be law enforcement we must recognize that there is such a thing as law. There are hundreds of people in every community who ignore the fact that the laws is in existence.

People like to pick out their laws and we hear them remark that certain laws are fine laws while others to them do not seem so agreeable. No one can excuse himself for law breaking by saying he hadn't anything to do with making the law. In a representative form of government no one has the right to say that. Taking up our shoes in a state makes the laws of that state obligatory upon us. People have a right to change the law and there is a lawful way to do it. When we talk about law enforcement what kind of enforcement do we want? There are many people who do not want an impartial administration of the law and seem to think that what should be modified in another. The only fair method is to treat all alike. Law enforcement will come only when all are equally amenable to the law. In a representative form of government no one has the right to say that he will be guided by this law and not by that law. In a democracy like this the law-worker must be the law-abider. Law enforcement must be equal and equitable. And back of every statute must be the rich and the humble alike. When a law is found unconstitutional it means this text book says it is so, but that the law works out some inequality or thwarted the purpose of safety.

How do we expect to enforce the laws? Can we elect the sheriff and other officials and go home and go to sleep? Public sentiment is what enforces law. It encourages officers. It will make a witness willing to tell the truth fearlessly, it makes it easier for all the administrative officers.

What is public sentiment? Where do we get it? Isn't it in the home and in the family circle? Our children grow up around us and every time they move and wherever they go they take with them the spirit of the home. The influence of that home goes out and reaches other communities. Wherever we carry with us wherever we go the real sentiment within us, it reproduces which the home life has produced. This knits itself together with the ideas of other homes and produced what we call public sentiment. So the important thing is, what do we think about these questions?"

Honor for Colonists

Following a semi-official suggestion 57 Hutton towns-ships and cities bear the name of Charlevoix county dates from October 12. This rebirth of entire counties, the project of which was put together without political inspiration, it is one more sign of a new growth of nationalistic consciousness among the Indian people, who are beginning to feel that their past explodes in the light of civilization entitles them to special consideration on the part of the nations yet in hope for brilliant fruits in the future. One Indian newspaper has urged seriously that because Columbus once willed America to Isabella and the Indian people are thus heirs to the United States, they should get cash payment of the Indian war debt but really should not be duly all the surplus cash.

World's Large Cities

The following cities reported at the last official census—1910 to 1923—as having more than two-score population: London (county), 4,885,226; London (greater), 7,476,168; Berlin, 1,962,566; Berlin (greater), 3,846,779; Paris, 2,902,500; Vienna, 1,866,147; Moscow, 1,511,345; Leningrad, 1,907,328; Glasgow, 1,034,174. Several other cities just close to 1,000,000 mark and perhaps exceed that number now. These were Hamburg (985,779 in 1910); Warsaw (936,046 in 1921); Budapest (928,098 in 1920), and Birmingham (919,438 in 1921). Constantinople was formerly considered to have a population in excess of 1,000,000, but has lost considerably in late years, and after a canvass in 1924 was

Gentle Hint

Aunt—Why don't you eat your egg, dear?

Niece—I don't want it.

Aunt—When I was your age I should have been glad to eat that egg.

Niece—Yes, perhaps it was fresh then, Auntie dear.

Unflattering Reading

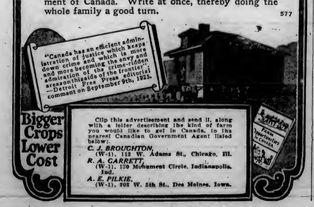
Hostess—That gentleman you just danced with is a mind reader.

Fair Guest—Indeed! Then I'm sure he won't ask me to dance with him again.

Bird Well Nourished

They do these things better in Canada. An employee in Alberta was presented by his employers with a turkey at Christmas. While it was being prepared for the festive board, three gold nuggets, valued at $10, were found in its crop. As might be expected, the feeding place of that bird is being kept a profound secret.—Christian Science Monitor.

Since his return to England, the prince of Wales has become a slogan maker, his favorite being "Get to know the empire."

Farmers' Wives are Happy in Canada
RURAL life in Canada appeals to the women folk. Schools and churches abound. The educational needs of the children are fully met. The standards of social life are high. American women find conditions in Canada all that could be desired for the upbringing of their families. The wives of American farmers who cross the imaginary line for the greater opportunities of newer, richer, cheaper land in this neighbor country become enthusiastic over Canada.
"We have found farming very good in this part. The land is very fertile—the best I have seen." So writes Mrs. Alfa Levasseur, of Arborfield, Sask.
Mrs. S. L. Harris, of Crossfield, Alberta, has this to say: "This district is especially noted for oats, barley and rye, but it seems that farmers are going in more and more every year for wheat growing. Dairy cattle, hogs and poultry all do well here, and I don't think a farm is complete without them. My husband and I have always liked this country very much. We first came to this district in 1903, and have never known a failure. Anyone who is willing to work can certainly do more than make a living here. In 1915 we decided we would like a change, and went to Michigan, but we were glad to return in 1919."
Be Independent in Canada
The certainty of agricultural prosperity awaits you in Canada. Land is cheap—virgin soil on which the world's finest hard wheat can be raised—$15 to $20 per acre! (Free homesteads still available further back).
Canada wants more good farmers who will grow wealthy and independent. The Government of Canada stands ready to *assist* as well as *welcome* you and your family and neighbors. A simple explanation of this practical help is included in the information that will be forthcoming without charge or obligation if you write to the nearest salaried official of the Government of Canada. Write at once, thereby doing the whole family a good turn.
577


"Canada has an efficient administration of immigration matters, and those coming will be assisted to make good citizens."—Extract from editorial comment on Government Press, 1923.

THE GRAVE OF GOLD

By HAROLD KINSABBY

(© by Short Story Pub. Co.)

ADVENTUROUS prospectors who have followed the perilous trails over the Colonet mountains have, as a matter of course, heard of the Lost Lead, but only he who is a total stranger to fear has penetrated the clinotic wilderness of Hell's canyon, and thus come suddenly upon the Grave of Gold. Four rude granite posts, connected by heavy log chains, enclose the spot. On the face of the giant howlder that stands guard over the few square feet of sacred earth is carved:

THE LOST LEAD.
LOUIS GILBERT.
1860-1891.

This inscription marks the loneliest, yet richest, grave in the world.

Late in the spring of 1880, Louis Gilbert left his home in Kentucky for a visit to his uncle's mine in the Northwest. He had long trouble, and the doctor had ordered an outdoor life. While his health improved, he became infected with another ailment, perhaps the only one to be caught at that great altitude—the gold fever. Miners were his only associates, the talk was all of holes, leads and drifts, and the only communication with the outside world was by the train of pack mules that carried the heavy ore sacks down the winding trail, &c. It was not surprising that his walks took the character of prospecting tours, and carried him further and further from camp. Late in October, when his visit was nearly over, he started with three days' food for a last trip, into new territory. From a confusal mountain top, about ten miles west of the mine, he had looked over a lower range of summits to a great expanse of wild and broken country that he had never explored.

The weather was like summer when he started, but thirty-six hours later, on the evening of the second day, a fierce snowstorm set in. By midnight, the first blizzard of the season was raging through the mountains. On the third day the storm still howled furiously, but searching parties were sent out with a faint hope of finding the young prospector before the trails became entirely impassable. In the dim twilight of the afternoon they returned one by one, almost worn out, convinced that the body of the missing man would not be found till the warm winds of spring should melt away the drifts. Yet, as a humane precaution, lights were set in cabin windows, and guided by one of them, Louis Gilbert staggered into camp and fell like a dead man before the mess-room door. He was taken from the snow, wrapped in blankets and laid before a blazing fire. When he showed signs of life he was given hot drinks and undressed. His prospector's hat dropped to the floor like lead, and when opened was found to be stuffed with nuggets of virgin gold.

In the fever that followed, Gilbert talked deliriously of his long struggle through the blinding drifts, hunger, cold and aching for the sleep which would mean death, yet forcing himself onward with the blizzard at his back as his only guide. The unusual quickness of his find had given him the strength that saved his life.

Finally he opened his eyes with the old look and told more in detail the story of his wonderful discovery. On the east side of a stream, in a canyon so terribly wild and broken that it was almost impassable, he had found the gold on the very surface of a ledge.

Filling his belt, he had started to blaze his way back, when the storm came down with frightful violence. The end of the journey was simply a horrible nightmare.

As nothing could be done while the snow lasted, Gilbert returned to Kentucky for the winter, yet could think of nothing but his gold mine. He had found a fortune, and even pur his hands upon it, and knew it was his whenever he could make of his claim and take possession. He spent his time in making a chart of the stream he had followed on which he set down every detail he could recall of the eastern bank, along which he had traveled.

Early in the spring he was back at his uncle's mine, waiting impatiently for the snow to melt and be carried away by the swollen streams. Finally, after a tedious delay, he set out with a small party of miners, all eager to have a hand in locating the prospect.

"Hell's canyon!" exclaimed the foreman, as, starting Cone Top mountain, Gilbert pointed out the way. One of the men, a Mexican, declined to go any farther with the party, and the foreman explained to the wondering Gilbert:

"The Mexicans give Hell's canyon a wide berth. They say that one of them found a big treasure there, and then lost it and his life in some uncanny way. They found his bones, though, next summer. Knew him by his dilly-vining rod, that he clung to even in death."

On the second day Gilbert and his companions found the stream, which fought its way among the upturned rocks, cavernous gorges and piling logs of Hell's canyon. At the sight of the stream Gilbert eagerly led the search along the east bank, and every yard was carefully searched. But the howlder, the two dead trees—every other characteristic landmark on Gilbert's chart—had disappeared. All search was vain. The long was not that of the locality they were in—as Gilbert himself was obliged to admit.

During that summer Gilbert led one four other searching parties, but never got any nearer the lost lead. Then he again went south for the winter. When he next returned it was with a flushed cheek that contrasted horribly with his pale, pinched look and steadily failing strength. In spite of all disappointments, he was still hopeful, and to humor him his uncle's money was unsparingly made exorbitant use of. Once more he started for the mine of peaks and gulches.

One evening, late in the season, Gilbert asked for one more chance to solve the mystery of Hell's canyon. He had a dream, he said outlined it so practically, that this time he would be successful. The miners did not put much faith in dreams, but, for his uncle's sake, and because it was recalled that this was the second anniversary of the great discovery, they made up a party and started out in the usual direction. Although they went slowly, the young man's feebleness increased until it became necessary to carry him on a litter made of boughs. This delayed them even more, and it was late on the third day before they reached the stream. At the sight of the dashing water, Gilbert's strength appeared to rally, and sitting up, he directed them to cross to the west bank. At this stream order the bearers exchanged glances and called the rest of the party. They all believed that with a brief return of physical strength the young man's mind had broken down. The one point on which he had always been most positive—that the gold was on the eastern bank of the stream—he had now abandoned. It was evident to them that the lost lead was never to be found.

But it was time to camp for the night, and the west bank was much more sheltered. With much difficulty, owing to the numerous rapids, they carried the litter across the swift current. Selecting a site sheltered by a huge howlder, the men set in advance to pitch camp begin with picks to clear a space for the tents. With a ring that could not be mistaken the steel struck rock. The young man would not be found till the warm winds of spring should melt away the drifts. Yet, as a humane precaution, lights were set in cabin windows, and guided by one of them, Louis Gilbert staggered into camp and fell like a dead man before the mess-room door. He was taken from the snow, wrapped in blankets and laid before a blazing fire. When he showed signs of life he was given hot drinks and undressed. His prospector's hat dropped to the floor like lead, and when opened was found to be stuffed with nuggets of virgin gold.

In the fever that followed, Gilbert talked deliriously of his long struggle through the blinding drifts, hungry, cold and aching for the sleep which would mean death, yet forcing himself onward with the blizzard at his back as his only guide. The unusual quickness of his find had given him the strength that saved his life.

Finally he opened his eyes with the old look and told more in detail the story of his wonderful discovery. On the east side of a stream, in a canyon so terribly wild and broken that it was almost impassable, he had found the gold on the very surface of a ledge.

Filling his belt, he had started to blaze his way back, when the storm came down with frightful violence. The end of the journey was simply a horrible nightmare.

As nothing could be done while the snow lasted, Gilbert returned to Kentucky for the winter, yet could think of nothing but his gold mine. He had found a fortune, and even pur his hands upon it, and knew it was his whenever he could make of his claim and take possession. He spent his time in making a chart of the stream he had followed on which he set down every detail he could recall of the eastern bank, along which he had traveled.

Early in the spring he was back at his uncle's mine, waiting impatiently for the snow to melt and be carried away by the swollen streams. Finally, after a tedious delay, he set out with a small party of miners, all eager to have a hand in locating the prospect.

"Hell's canyon!" exclaimed the foreman, as, starting Cone Top mountain, Gilbert pointed out the way. One of the men, a Mexican, declined to go any farther with the party, and the foreman explained to the wondering Gilbert:

"The Mexicans give Hell's canyon a wide berth. They say that one of them found a big treasure there, and then

Your Own Place and Hour

Do not despise your own place and hour. Those are the gates of heaven. every place is the center of the world. Stand in your own door-yard and you have eight thousand miles of solid ground beneath you, and all the sidereal splendors overhead. The morning and the evening stars are no more in the heavens and no more obedient to the celestial impulses than the lonely and time-scarred world we inhabit. How the great drifts and recesponds to the heavenly forces and occurrences we little know, but we get an inkling of it when we see the magnetic needle instantly affected by solar disturbance.—John Burroughs.

One of Wren's Churches

The Church of St. Michael, one of Wren's churches in London, which has just reopened after extensive renovations, is one of the most historic churches in that city. It is built on the site of that erected by Dick Whittington, and in which he was buried, but the original was entirely wiped out in the great fire that in 1666 razed Sir Richard Whittington's tomb remains. The representations of Moses and Aaron found in all Wren's churches, are in this case exquisite statuettes which formerly stood on pedestals beside the altar. They have now been accommodated in niches in the walls.

Needed Sporty Apparel

And yet cheaper might have become the national game if somebody had thought up a snappy costume for it.—Rochester Times-Union.

Tenor Got His Chance at Expense of Rival

Arthur Rubenstein—whom I should mention among the best raconteurs I ever met—was talking to us of the jealousy among great singers, writes Margot Asquith in London Magazine.

He said that two tenors were chosen to take the same part on alternate nights in a new and arduous opera which was being produced in Milan. The first had such a dazzling success that the manager had not the courage to put the other on the stage, and the second tenor remained for ten days in obscurity and despair.

In the last scene of the opera the hero encounters a hear. He kills the bear and, standing on its dead body, sings the final aria, which invariably brought down the house.

The part of the bear was played by the theatrical hair dresser, and one day the second tenor persuaded the good-natured barber to let him take the part. When the final scene arrived, to the amazement of the audience the bear refused to be killed, and sparred with the hero to suck good purpose that he felled him to the earth.

Standing on his prostrate body, he flung off his disguise and sang the aria to a perplexed but enraptured audience.

Florida Pineapple State

Florida is the only state in which the pineapple is successfully raised for commercial purposes in this country, as the pineapple is close to a tropical fruit. The pineapple is a fruit of the pineapple plant, which grows from two to four feet high. The individual plant produces only a single fruit, which varies in size from four to ten inches in diameter.

Explanations Harmful

Avoid explanations. Friends do not need them; enemies will not believe them. They are indicative of weakness rather than strength. As a rule strong men seldom have occasion to engage in explanations.—Ex.

Cover Crops Lower Temperature Some

Tests Show Frost Hazard Is Increased Slightly.

(Prepared by the United States Department of Agriculture.)

The weather bureau of the United States Department of Agriculture has conducted several experiments in citrus-growing sections of California to determine what influence a cover crop has on the temperature of the orchard atmosphere on a frosty night. Purple vetch, a heavy volunteer crop of bread Windsor horse beans, and many high weeds were included in the cover crop in these experiments.

The conclusion reached were that while the cover crop increased the frost hazard very slightly, the difference made in the temperature was not such as to damage the fruit seriously. At a height of five feet above the ground, the air temperature was depressed by the presence of the cover crop only 0.1 degree Fahrenheit, and 1 degree Fahrenheit at a height of 10 inches. Since there is usually but little fruit near the ground these slight differences should have little effect on the damage to fruit.

In many cases increased damage is probably due to the fact that the grove is no longer ground, where the temperature is naturally lower. Differences in the amount of damage between clean cultivated groves and those in cover crops may also be attributed to some other influence than temperature, such as decreased vigor of the tree, due to competition from the cover crop, a less dormant condition of the trees caused by more frequent irrigations, or increased deposit of moisture on the fruit or foliage from dew or frost. The cover crop also acts as a windbreak, allowing the cold air to accumulate near the ground, and preventing it from mixing with the warmer air above.

Milking Three Times a Day Produces More Milk

Recent studies completed by the United States Department of Agriculture on the comparative yield of cows milked twice a day and those milked three times a day will no doubt be viewed by the farm boy and the hired man with the feeling that some one is always taking the joy out of life. The department's milkers have found that milking three times a day produces more milk than twice-a-day milking. In fact, over a short period the increase in production is 12.5 per cent, while over a long period it appears that this increase is even greater. It was noted that cows milked three times a day hold up better near the end of the lactation period than cows milked twice a day. The economy of three-times-a-day milking has not yet been accurately estimated, but it will depend upon several factors, chief of which are quantity of production, cost of labor, and value of product.

Seed Grain Planted in 1926 Needs Treatment

Every farmer should treat his seed grain in 1926 in order to prevent smut, says Dr. E. C. Stakman, a plant disease authority at the University of Minnesota. Besides smut in oats, of which there is always a great deal, Doctor Stakman finds there was an unusually large amount of stinking smut of wheat in 1925. In one country elevator 75 per cent of the wheat which was brought in was badly smutted.

Methods of treating seed wheat differ from those of treating oats and barley. Folder No. 13, entitled "Treatments for Seed Grain," explains the use of copper carbonate dust and formaldehyde and can be obtained without cost on application to the agricultural extension service, University farm, St. Paul. Information as to the spraying for treating oats and barley can be obtained by writing the plant disease department, University farm, St. Paul.

Corn Yield Problem Is One of Soil Fertility

Corn growers face a problem of raising general soil fertility, if they are to redeem production from the decline which depletion of organic matter in the soil has brought about, according to Prof. H. L. Throckmorton, head of the department of agronomy at the Kansas State Agricultural college.

Geiserl fertility, Professor Throckmorton pointed out, can be increased by growing corn in rotation with such crops as alfalfa, clover, and soy beans; by returning all manure and crop residue to the soil; and by good tillage methods.

Water Supply for Live Stock in Cold Weather

Live stock frequently suffer from lack of water during freezing weather. When the only water supply available is a stream or spring, daily attention is necessary to be sure that the ice is broken. Often the approach to such a water supply becomes so slippery that it is almost impossible for the cattle to get to and from water without falling and floundering around a great deal. After such an experience animals will avoid going to the water hole just as long as they can possibly get along without water. Live stock need plenty of water all the time.

Spray to Save Fruit

The orchardist will have better plums if he will spray, giving the plums the fall spray program just before the blossoms open apply the first spray; three pounds arsenate of lead and eight quarts of lime sulphur to fifty gallons of water. Just after the blossoms fall spray again, using two pounds of arsenate of lead and five quarts of concentrated commercial lime sulphur to fifty gallons of water. About fifteen days after the blossoms fall repeat the last spray. Soon after the middle of June give them one more spray of the same character.

Self Control

Mrs. Peteet — Is your husband trained in the social graces?

Mrs. Gray—Oh, yes; he can appear as little bored as anyone.

"I'll tell you why they wouldn't insure you—
"You allowed constipation to become chronic—until finally it resulted in organic disease.
"People don't realize how insidious constipation is. Its first effects are hardly more than annoyances—headaches, loss of appetite, sleeplessness and the like. But in time, as the body is subjected to continued intestinal poisoning, it may lead to high blood pressure, rheumatism, diabetes or even Bright's disease.
"Stop constipation if you wish to live long. Take a little Nujol every day—that will keep you regular."
Nujol relieves constipation in Nature's way
Constipation is dangerous for anybody. Nujol is safe for everybody. It does not affect the stomach and is not absorbed by the body. Medical authorities approve Nujol because it is safe, gentle and natural in its action.
Nujol makes up for a deficiency—temporary or chronic—in the supply of natural lubricant in the intestines. It softens the waste matter and thus permits thorough and regular elimination without overtaxing the intestinal muscles.
Nujol can be taken for any length of time without ill effects. To insure internal cleanliness, it should be taken regularly in accordance with the directions on each bottle. Unlike laxatives, it does not form a habit and can be discontinued at any time.
Ask your druggist for Nujol today and begin to enjoy the perfect health that is possible only when elimination is normal and regular.

INSECTS STAR AS MOVIE ARTISTS

Films of Plant Pests Rival Screen Thrillers Made by Humans.

Washington.—When Uncle Sam wants to stage an agricultural movie thriller he selects a nasty insect for a villain and puts the pest through rehearsal. Some of the pests are natural movie actors; others are as temperamental as any Hollywood star. The primary reason for this, department of agriculture officials explain, is that certain insects stun light, whereas others exult in the glare of the studio kleigs.

Consider the case of the common clothes moth. The department desired to make a picture showing the destructive habits of this pest, but the insects refused to work under the bright studio lights. Moths placed on an article of clothing flew so regularly into a sense of goods that the closeups were a failure. The camera man then hit upon the novel idea of chloroforming the insects to retard their speed, and the picture was a success.

Cotton boll weevils, on the other hand, perform best under the intense lights. They are regarded as star actors, only close-ups seeming to satisfy the vanity of the pest. Not content with flying close to the lens, the boll weevils fly into the machine at first it is necessary every now and then to stop cranking in order to clean out the camera.

Bees Are Hard Subjects.

Honey bees are unsatisfactory as bad actors. In the midst of a picture one day last summer the bees descended en masse on the unprotected camera man, who fled and hid in a cellar. The picture could be completed only by erecting a canvas shelter over the camera so as to make shade. Bees will not fly into shady places.

More than 20 motion pictures featuring insects in star roles have been made by the Department of Agriculture. They include pictures of pests such as the pink boll worm, which destroys cotton, the Mexican bean beetle, the Japanese beetle, stable fly, honeybee, poultry louse, cockroach, grasshopper and others. The pictures are distributed free to agricultural colleges, county agents, and other agricultural agencies, some of the reels being exhibited all over the world.

Recently the department's cinema men made a special trip to Grasshopper glacier in Montana to photograph some of the famous mountain grasshoppers. This glacier is famous. It is believed that these pests were swept up the canyon through the ages by strong winds, which dashed them against the precipitous walls, the grasshoppers then falling into the glacier and becoming frozen in the ice.

Grasshopper swarms of years old, but not unlike the grasshoppers of the present day, have been found perfectly preserved. The melted ice at the end of the glacier deposits the grasshoppers on both banks, tons of the insects having been piled up in this way. The department camera men made an ascent of 12,000 feet to take their pictures.

Live grasshoppers are difficult to photograph. The lady grasshoppers, in particular, are camera shy. Recently in making some movies of a female laying eggs it was necessary for the camera man to crawl along a roadside trench on his stomach and "shoot" close range, calling the insect unaware.

Working Far Afield.

Federal quarantines on pests, such as the European corn borer and the Japanese beetle, are strict and the department camera men are prohibited from bringing them into the District of Columbia so as to work on them in the studio. This results in considerable expense, in that the movie force must sometimes go far afield to take a picture, of the insects in their natural environment.

The expense is, however, justified, say the department movie men, who point out that it is much better to take authentic pictures than to "fake" insects in the laboratory. Faked insects are used occasionally, but only in animated cartoons. An amusing incident in this connection was the construction of a mechanical reproduction of a Mexican bean beetle, so clike that it fooled even the department entomologists, who thought it real.

The occasion for this deception was the building of an outline map on which it was desired to show graphically the spread of the pest since its introduction into the United States. The habits of the beetle were studied carefully by the movie men, and an imitation was made that bore a lifelike resemblance to the original. It was made to crawl around the map at will, and the entomologists wanted to know how the photographers had contrived so perfectly to train the insect.

Bedbugs, like the clothes moth, refuse to act under the glare of the studio lights, or even in ordinary daylight. In order to make them perform it was necessary to build a miniature bed in which a ferret wearing a nightgown was placed. The ferret had to be chloroformed to insure its remaining stationary, and the bugs, seeming easy prey, readily came out for a feast, despite the bright lights.

Making Up the Rat.

Outside the insect family, but among the pests that destroy millions of dollars' worth of property annually, is

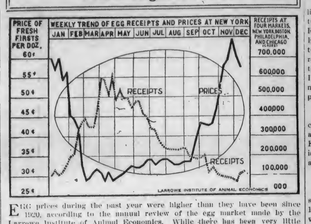
Egg Eaters Increase in 1925 Prices Highest in Five Years



EGG prices during the past year were higher than they have been since 1920, according to the annual review of the egg market made by the bureau of agricultural economics. While there were little differences in the total production this past year as compared to 1924, the higher prices during 1925 indicate larger consumer demand.

SKIES FERTILE FIELD FOR AMATEUR SCIENCE

Astronomer Campbell of Harvard Bids Novices Turn Their Attention to Study of Stars.

Boston.—How amateurs with no mathematical or other scientific training can aid the professional astronomer to solve the mysteries of space was explained here when Leon Campbell of the Harvard college observatory told of the work of the American association of Variable Star Observers and other bodies of lay astronomers. In fact, the amateur does not even need a telescope, for meteors may be observed with the unaided eye, it was said.

"When one realizes that millions of meteors enter the earth's atmosphere daily," said Mr. Campbell, "some of them no larger than grains of sand, others large enough to light up the heavens even in broad daylight, one soon perceives that there is plenty of work available in observing meteors. In counting them, gauging their positions and estimating their brightnesses, especially during meteor showers etc.

"If one watches my selected area of the sky on almost any clear night for, say, half an hour, he will be able to count several conspicuous meteors. And, with no more than a passing knowledge of celestial topography, he can plot their paths and thus furnish material for determining the points in the sky from which they appear to come."

Another field for the amateur without a telescope is in watching for new and "novae," as the astronomer calls them, which suddenly flash out in some previous obscurity.

H. Watson, an amateur astronomer in South Africa, has discovered two of these. Mr. Campbell stated, while Rev. T. D. Anderson, an amateur in Edinburgh, Scotland, has discovered three.

"Since most of the novae occur near the Milky Way," said Mr. Campbell, "it might be well worth while for the

Will Next Try Wilds of Pacific Northwest

Joseph Knowles, well-known nature man who stralled fame a number of years ago for his stunts, contemplates returning to the wilderness. Knowles will try life next nature stunts in the wilds of the Pacific Northwest. He is shown above rehearsing for the trip.

On Its Way

"Last night," said the blonde cashier, "I had a dream that my watch was gone, and the shock woke me up."

"Did you find the watch gone?" asked the delivery boy.

"No," giggled the cashier. "But it was going!"—The Progressive Grocer

Notice to Federal Income Taxpayers

For the convenience of those who are liable to file Federal Income Tax Returns, a Deputy Collector of Internal Revenue will be at the State Savings Bank, Charlevoix, on March 1-2, 1926, to assist taxpayers in preparing their returns. No charge will be made for this service. The matter of filing your Income Tax Return should be given immediate attention, in order to avoid penalty and interest.

Form To Be Used

Form 1040A should be used if the income is derived chiefly from salaries and wages and does not exceed $5,000. Form 1040 should be used if the income is more than $5,000, or is derived from a trade or business, including farming.

When and Where to File

You return for the calendar year 1925 shall be filed not later than March 15, 1926, with the Collector of Internal Revenue for the district in which you reside or have your principal place of business.

Penalty

A penalty of not more than $10,000 or imprisonment for not more than one year, or both, and in addition, 25 per cent of the amount of the tax, is imposed by law for the willful failure to make a return on time.

Vet Would Give Away $1,221 Won After Fight

New York.—Twenty-seven years ago, Solomon Harper, negro ex-soldier, fought with the veterans' bureau. He was indefatigable. Now that he has what he set out to get, he wants to give it away. He proposes to offer away his unlimited service certificate ($1,221) to establish a scholarship fund to help other youths, regardless of race or religion, to get education.

Harper keeps his eyes open for the other veterans to make some use of their hard-earned rewards. He has a boat named after him whereby the fund would replenish itself.

A year ago Harper's eyes were dark for Solomon Harper. He had attended every school within a day's ride of New York and had even been a member of some night schools besides, he waited to spend his evenings at Mme Christmas telegram. He did and all at once things happened to reward a career of gratitude to the indifferent to honor found and every thing he desired.

Ice "Telescopes"

—Methods of the inventors of the telescope) was led to the discovery of optic glasses by observing sugar sellers "looking through the ice which made one of their sugar books, filled up in the shape of tubes, in order to each other, to which they sometimes added pieces of ice at the end to view distant objects.

"Famous Equine Strain"

Early Arabian horses, the breed introduced by the Moors from Barbary into Spain in the Middle Ages, the breed was famous for speed and endurance. Barbs were taken to England and crossed with the fleet horses to been the foundation of the English thoroughbreds, so famous on the turf.

"Black Sheep" Relations

"Are you ashamed of being related to Adam and Eve?" asked Elizabeth one day of her mother.

"Why, no," replied her mother laughing. "Whatever made you ask such a question as that?"

Elizabeth was rather offended. "It's no laughing matter," she replied with grave dignity. "Especially since I never heard you mention them."

NOTICE

To the Electors of the City of Charlevoix:

Owing to the change made in the election laws by the last legislature, which were not discovered until it was too late to file nominating petitions, we take this method of announcing ourselves as candidates for the following offices:

For Mayor—Arthur Bergeon
For City Clerk—Charles H. Lamphear
For City Treasurer—Elmer H. Cook

First Ward
For Supervisor—Harry A. Craig
For Alderman—Robert Bridge

Second Ward
For Supervisor—Simon M. Rose
For Alderman—Robert J. Madill

Third Ward
For Supervisor—Archie Alcock
For Alderman—William E. Parmelee.

Notice Primary Election

To the Qualified Electors of the City of Charlevoix, State of Michigan.

Notice is Hereby Given, That a City Primary Election will be held in the Council Rooms, corner of State and Clinton streets, for the First, Second, and Third Wards of said city, on Monday, the first day of March, A. D. 1926, for the purpose of nominating by direct vote candidates for the following offices, viz:

CITY

One Mayor; one City Clerk; one City Treasurer; one Justice of the Peace; one Park Commissioner, full term.

WARD

One Supervisor; one Alderman; one Constable for each of the three wards of said city.

The Polls of said election will be open at 7 o'clock a. m. and will remain open until 8 o'clock p.m.

Chas. H. Lamphear, City Clerk.

German Women Urged to Use U. S. Methods

Berlin.—The prevailing method of American women in conducting their households has been recommended to German women by Frau Clara Mundt, one of Germany's foremost woman parliamentarians and closely identified with the National Association of German Housekeepers.

"Economy of time and strength" is the keynote of American housekeeping, Frau Mende found on a visit to the United States, and she would have her German sisters modify and adapt their methods to the exigencies of life in modern Germany.

"The German woman is the most conservative housekeeper in the world," she said, "but she is still conducting her household along precisely the same lines as did her mother and grandmother. She is unmindful of the fact that changed conditions demand changed methods."

Urges Good English in Homes as Tax Saver

Detroit, Mich.—Not to be outdone by business, education is offering cash bonuses on its stock in trade.

"Speak correct English and save yourself money," is the appeal that Miss Clara Beverly, supervisor of English in Detroit schools, is holding out to the pupils.

"English, as it is mis-spoken actually costs money," she said. "Children acquire their English habits from their parents in preschool days. The same habits pass from father to their sons, and therefore much of the tax payers' money, in overcoming those habits.

"All this would be unnecessary if children would learn proper speech," she asserted. "Correct those English errors and reduce taxes."

World's Food Consumption

A German scientist, Hubner, declares that Germans are the greatest food consumers in the world. According to his figures, Germans devour 3,306 calorie units daily; England, 3,067; France, 2,973; Australia, 2,879; Austria-Hungary, 2,770; Canada, 2,764; Russians, 2,900; Italians, 2,612, and the Japanese, 2,553. Professor Hubner is the English at the head of the meat consumers of Europe and the Italians last.

Appointment of Administrator

STATE OF MICHIGAN—The Probate Court for the County of Charlevoix.

At a session of said Court, held at the Probate Office in the City of Charlevoix, in said County, on the 19th day of February, A.D. 1926.

Present: Hon. Servetus A. Correll, Judge of Probate.

In the Matter of the Estate of James McKee, deceased.

Ira M. McKee having filed in said court his petition praying that the administration of said estate be granted to Robert Bridge or to some other suitable person.

It is Ordered, That the 17th day of March, A. D. 1926, at ten o'clock in the forenoon, at said probate office, be and is hereby appointed for hearing said petition.

It is Further Ordered, That public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing in the Charlevoix Sentinel, a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
45-3t Judge of Probate.

Order For Publication.

STATE OF MICHIGAN—The Probate Court for the County of Charlevoix

In the matter of the estate of Elizabeth Clink in the City of Charlevoix, in said county, on the 23rd day of February, A. D. 1926.

Present, Hon. Servetus A. Correll, Judge of Probate.

In the Matter of the Estate of Minnie M. Woodgate, deceased.

Robert Bridge having filed in said court his petition praying for a license to sell the interest of said estate in certain real estate therein described.

It is Ordered, that the 18th day of March, A.D. 1926, at ten o'clock a.m. at said Probate Office is hereby appointed for hearing said petition, and that all persons interested in said estate appear before said court, at said time and place, to show cause why a license to sell the interest of said estate in said real estate should not be granted.

It is further ordered, that public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing in the Charlevoix Sentinel a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
45-3t Judge of Probate.

Order of Publication of Non-Resident Defendant.

STATE OF MICHIGAN,
The Circuit Court for the
County of Charlevoix—In Chancery.
Mina Pierson, Plaintiff.

vs.

Charles Pierson, Defendant.

Suit pending in the circuit court for the County of Charlevoix, in Chancery, on the 21st day of December, 1925, at the City of Charlevoix, in said county.

It satisfactorily appearing to this court by affidavit on file that the defendant, Charles Pierson, is not a resident of the State of Michigan, but his last known residence was Mount Horeb in the State of Wisconsin, on motion of Clink & Williams, attorneys for the Plaintiff, It Is Ordered that the Defendant, Charles Pierson, cause his appearance to be entered in this cause within three months from the date of this order and in case his appearance that he cause his answer to the Plaintiff's bill of complaint to be filed and a copy thereof to be served upon the Plaintiff's attorneys within twenty days after service on him of a copy of said bill and notice of this order, and that in default thereof that said bill be taken as confessed by said non-resident Defendant.

And It Is Further Ordered, That within twenty day after the date hereof the said Plaintiff cause a notice of this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulated in said county of Charlevoix, and that such publication be continued once in each week for six successive weeks or that a true copy of this order to be served personally on said non resident Defendant at least twenty days before the time above prescribed for his appearance.

And It Is Further Ordered, That the said Plaintiff cause a copy of this order to be mailed to said Defendant at his last known postoffice address by registered mail and a return receipt demanded at least twenty days before the time herein prescribed for the appearance of the Defendant. FARM C. GILBERT,

CLINK & WILLIAMS, Circuit Judge.
Attorneys for Plaintiff.
Business Address, East Jordan, Mich.

HAVE GOOD REASON FOR THEIR NUDITY

Clothes Fatal to Residents of Tropical Jungles.

Bushmegro children of the Dutch colony of Surinume (South America) go totally unclothed until they are seven or eight years old, when a solitary cotton string is tied about their waists—to get them used to clothes —such is the theory.

An adult is fully dressed if he wears a bit of bright cloth slightly smaller than a pocket handkerchief, though each man has a more pretentious rag of red cotton cloth to wear on visits to Paramaribo, the capital. But this is discarded at the first opportunity. Long ages have taught the Bushnegroes that one of the surest ways to commit suicide in the jungle is to wear clothes, John W. Vandercook writes, in Harper's Magazine.

This is not an exaggeration. A young English mercenary soldier, who spent five years in Surinume in the latter part of the Eighteenth century, boasted in the book he subsequently wrote that he was the only man in his regiment who never suffered a serious illness.

Their experience was anecdotally trying. The troops had been imported by the Dutch government to put down one of the slave rebellions that subsequently resulted in the formation of the independent Bushnegro tribes. Their equipment was inadequate and their search for the elusive rebels took them into the most unhealthy districts of the colony.

Nearly all of the soldiers died. But Capt. John Stedman, the author, soon observed that the Surinume negroes were never ill. He asked them the reason why. Then he adopted as best he could the negro mode of life. He lived nearly all his clothes, he accustomed himself to going barefoot, he slept on the ground, he dined on fish, deer, beetles of sharks, and "his constitution became well use to bearing too particular as to its purity. So he lived to tell his tale, a story of extraordinary adventure and affection for the negroes who were technically his enemies.

Bushnegro adopted way of life is in detail the practice of all present-day Bushnegroes. They know that in a tropical climate the body must perspire continually and without interruption. They replace their evaporation by drinking incredible quantities of water. They bathe in the river new or less than five times a day. They vigorously clean their teeth several times daily by means of a twig and tobacco. When the sun comes out after rain it promptly dries their clothes.

Leading Evil Spirit

Mephistopheles is the modeling fiend who figures prominently in Goethe's "Faust" and in Gounod's opera of the same title. He is also familiar to readers as the attendant evil spirit in Marlowe's tragedy of "Faustus." In the old demion lore, Mephistopheles is one of the seven fallen archangels, and is next in power to Satan.—Kansas City Star.

SHELL PROBLEM IS SOLVED BY CIVILIAN

New Way of Turning Out Ammunition Suggested.

Washington—An apparently offhand suggestion on shellmaking, dropped casually into an army ordnance expert's meeting, may serve to simplify Uncle Sam's whole problem of having at hand enough big gun projectiles to shoot up an enemy who obtained or attempted to obtain a footing on American soil.

Experiments already made indicate a wholly practical way of turning the American peace-time production of 350,000 tons of seamless steel tubing every year into a war output of shell castings up to 10-inch caliber at a rate of thousands per day without additional machinery.

All shell castings used during the war or manufactured since were turned to size, pointed on one end and squared off on the other in lathes, as bored out. It is a long, hard manufacturing process. It took forty-five drive in the war to build up the output of the single factory to 200 or 300 shells a day.

He Asks Why.

At a session of ordnance men, a reserve officer who is a steel plant man, in civil life, asked, in discussing shell-turning facilities, why it would not be possible to spin them out of sheet stock, rather than cut them from solid bars. He suggested that a copper tube which are produced by the ton for use in making shell cartridges. Why not spin all sizes for the artillery up to 16 inches in diameter. Experiments were started immediately along the scheme. While the War department is not in position to make any definite announcement, it looks as though a big stride in national preparedness had been made.

"They just cut 'em off like sausages," is the way one officer described the new process.

New Angle Developed.

Even the necessity of boring out the squared and pointed ends after the spinning in order to make a place for the rotating band, has been met by developed a new angle of its own. It appears that the final inspection in the metal are forced inward the center by the spinning process and when this is cut out by boring the imperfections are removed automatically.

The new scheme of economy reserve project of the War department is based on storing $500,000,000 worth of small arms and artillery, including all the oldest projectiles and cartridges to be discovered, carefully preserved in cosmoline and stored in warehouses. And it will be carried over from year to year without new stock.

If the spun shell case plan works out and it seems likely to, ordnance experts say, no new tooling, handling, etc., is developed to supplement it presumably a material reduction could be made in the stored reserves, as the twelve-month delay in procuring projectiles in sufficient numbers after war is declared now necessary would be dispensed with.

FATHER'S VOICE

Many Years of Silence is Bridged by Telephone

Hearing his father's voice for the first time in twenty-three years, Herbert Reese of Livingston, Mont., had the privilege the other day of talking with his father, H. E. Reese, of Marysville, Mo. Young Reese went west nearly a quarter of a century ago and has never had the opportunity of retracing his steps. Finally the desire to hear his father's voice once more led him to take advantage of the long distance service, and the conversation with the home folks followed.

THE PRIMARY NOMINATIONS

Results of Election Held Last Monday in this City

No great display of enthusiasm was exhibited by electors concerning the primary nominating election held in this city last Monday, for the various city offices are to be filled at the general election for next year. The successful nominees for the several offices follow:

Mayor, Arthur Bergeon.
Clerk, Charles H. Lamphear
Treasurer, Elmo H. Cook.
Justice, Carlton S. Dodge
Park Com., John Zeitler

1st Ward—Supervisor, Harry A. Craig; Alderman, Robert Bridge; Constable, Joseph Howard.

2nd Ward—Supervisor, John Bogdee, Alderman, Robt. Madill; Constable, Elmer Johnson.

3rd Ward—Supervisor, Archie Alcox; Alderman, William E. Parmelee; Constable, Will Weber.

Nearly all of the above have for the past year been officials in the same capacities for which they have again been placed in nomination. There are three exceptions in this regard, that of Carlton S. Dodge for Justice of the Peace, full term, John Zeitler for member of Board of Park Commissioners, and in Ward two John Bogdee for supervisor, the latter succeeding to the office heretofore held by S. M. Rose.

"Colds" Afflict Holland

In Holland "catching a cold" is a national trouble. During the winter half of the Dutch people sniffle while the other half recover from colds. The raw sea winds of the lowlands seem not yet to have hardened the Hollanders, in no country is the humidity-chiller industry more prosperous.

A scientific inquiry into the causes of "colds" in the Netherlands and means to prevent them has been organized by the sanitary section of the University of Ansgerdam. The inquiry will last 35 weeks. From all parts of the country reports of army patholy have reached the heroes of applied science will try to cure Dutch of a great affliction. Eight thousand Hollanders offered to support the inquiry in their campaign.

Rats Cost $350,000,000

London.—Rat experts estimate that it costs England about $350,000,000 a year to feed its rats. This does not include the damage done.

Flyer Is Attacked in Air by Eagle

New York.—Lieut. James H. Howard, who completed his annual 15-day training period as a reserve aviator at Mitchel field recently, told a story of an aerial encounter with an eagle, in which he emerged the victor with one of the eagle's tail feathers as a trophy. While 9,000 feet over Long Island, he said, a great bald eagle swooped down and fastened its claws in his plane. Howard kicked the bird and it blast carried the bird away.

Howard exhibited a dark-colored battle barred eagle feather and a section on his helmet to the gathering men.

SEA TERROR NOW PEDDLES BANANAS

ONCE DREADED GERMAN MOEWE, HAD A VERY LIVELY CAREER IN NORTH SEA.

The Moewe is abroad again. The news may send a chill down the spine of many surviving travelers who met her on the high seas in the height of her power. This ship-raider once spread terror wherever she went. In her wake many vessels lit by her fire, sank without trace. But that was almost a decade ago, and the mighty has fallen. When the former commerce destroyer recently arrived in Liverpool from the West Indies, she had lost even her name. Moewe, or Seagull, had been dropped, and the hostile Greenbriar taken instead. Her hold, where prisoners huddled and bombs were stored, carried only unripened fruit. The former German raider was peddling bananas.

Any passenger who crossed the ocean in 1917 on a merchant ship, laden with coal, steel, foodstuffs, horses, oil or some other valuable cargo for war-torn Europe, might have had the ill-luck to encounter the Moewe and observe her methods of operation. At a distance, she seemed an innocent enough craft, flying a neutral flag. But as she drew nearer, half concealed by her sails and careening about as if manned by a crew of crazy men, she grew more strange.

Then of a sudden, down went her bulwarks and the muzzles of her guns appeared. Up went her German flag and bloodgoat. "Stop!" Three were vessels that even then put on full steam and tried to get away, but a shot across their bows invariably bore them to. There were others that tamely attempted to man their guns, if they chanced to carry one. But with armed rifle shots from the Moewe usually sent the sailors scurrying below decks.

What Prevented Mutiny.

The launching of the prize boys for a boat and a search of the captive. The prize crew got their rewards in the form of jars of jam and cigarettes, perhaps; and the Moewe got hers in whatever of the doomed cargo she chose to select.

Most of the vessels she encountered found their way at once to Davey Jone's locker. Others served their captor as colliers or as prison ships. One of the latter, the Appam, put in at Norfolk, Va., in 1917. She carried a German lieutenant and prize crew and hundreds of passengers from ships that had been sunk. Another turned up at Santa Cruz and another at Fernambuco, Brazil. Still another, the Yarrowdale, actually succeeded in reaching Germany, with her 400 prisoners from one Norwegian and seven British ships, in charge of a German crew of 60 men.

On her way the Yarrowdale dropped anchor in Swedish waters and was boarded by members of a Swedish destroyer, but there was nothing amiss. The prisoners had been ordered below and were held there quite by some German guards. Never once during the strange voyage did the captives suspect mutiny, though they knew that the ship was prepared, in such event, to blow herself up.

Captures In North Sea.

The Moewe, under the command of Count Dohna-Schlidlen, commenced her raiding career when she slipped through the English blockade under cover of darkness and rough weather. Under the very nose of England she sank one ship and captured another within a few minutes of each other on January 30th. The captured prize, the Corbridge, was on her maiden voyage and full of coal. Her fate therefore was soon apparent. Next day, by 3 o'clock in the afternoon, the Moewe had blown up one steamer and had reached another.

The second suffered the usual fate; and by the time the last trace of her had gone the moon had risen and discossed still another prey. This, too, was blown sky high. The crews of all these vessels were brought to the Moewe's side, transferred to the Yarrowdale, and taken to Wilhelmshaven and 20 out and work as a dissuade in order that she might keep her little girl with her.

Both sides have announced their intention to fight to the last straw over the still. The father of the little seventeen-year old girl whose desertion caused untold suffering to her and her mother, is believed to be dead and therefore, her counsel states, she is entitled to her share in grandfather's estate.

Men Dilatory About Repairs to Teeth

Said the dentist: "I make it a practice to point out remember cards six months after a client has passed out of my office. The suggestion that it is time to go over the teeth brings the women back. Their teeth may need no attention only cleaning, but they want to make sure. It is his experience that reminder cards have no effect on the men.

"A man discovers a small cavity in a tooth, but thinks he may as well wait till it is larger; or he finds there are other teeth that need to be filled, so have all done at once. His is the wholesale manner of mind. I tell a man a certain tooth ought to come out, and he will repy that he guesses he will hold on to it a while and then have all of them out. He knows the value of a stitch in time in his office, but he can't realize the value when applied to a cavity."

The dentist added that women were more patient than men when in the dental chair, but, "do you know, I do not think they are so long suffering as their mothers. My father, who was a dentist, told me of little, delicate women who had come to him and had all their teeth pulled out at one setting, refusing and anaesthetic. There was a woman in my chair yesterday who was so nervous that it took two hours to give her teeth a polishing that should have been done in twenty minutes. She was afraid something was going to hurt her."

Chicken Feed Mine

With the rapidly rising cost of crushed oyster shells for chicken feed the discovery of a mine of argonite or calcium carbonate has been found so important that the mine is now going to be developed. The mine is in Charleston, Cache county, Utah, and the installation of $2,000 worth of machinery is thought worth while, because of the potentiality of the mine for chicken feed alone.—Detroit Free Press.

Future Railroad Speed

Railway trains will travel as fast as airplanes and more safely, the president of the Pere Marquette predicts for a not far-distant future. Concrete ways reinforced with steel beams will cross-cross over the country, and trains will run on motor boat-lugs at incredible speeds. And it will be safe, interesting and not impossible. This nation has a way of overcoming almost any kind of obstacle to obtain speed.—Capper's Weekly.

Entertainment by M. E. Literary and Sewing Club at M. E. church, Friday evening, March 12th. A short play and single numbers on program, all with good music. Price 20 and 35c

New Terror of the Air

A radio-steered and propelled torpedo plane capable of swooping down from the sky, in Hitlin formation, at 150 miles an hour and launching a score of torpedoes against naval squadrons at sea, has been tested and O. K.'d by the British admiralty, which ordered a large number to be built. One feature of this first torpedo-carrying plane is the extraordinary rapidity with which it can change direction, which means that, after sweeping down to discharge its load of death and destruction, it can quickly rise out of range of antiaircraft guns.

One more reason for going slow about building more $50,000,000 battleships —Capper's Weekly.

Island Russia Forgot

Bolshei Hoodeh, an island in the Arctic ocean, just north of Bering strait, almost forgot that it belonged to Russia and thought itself part of the United States. No Russian ship had called at the island for ten years and the sum of war Voevosky arrived only a few months ago. Its officers then learned that the inhabitants know nothing about the Union of Soviet Socialist Republics or of Soviet culture and believed that Russia was still a monarchy. This impression will be corrected. The island's connection with the outside world has been brought by an American coastal schooner that made regular trips from Alaska.

"ALL OFF MENTALLY DURING LONG FAST

Test Shows Result of Abstinence From Food.

Can you rise to greater poetic heights and to clearer regions of thought on an empty stomach or not on a square meal? From earliest times persons have claimed they reached rare esthetic levels by forswearing food, and now a scientist has set out to study the facts.

J. A. Glaser of the University of Chicago tested the psychological effects of fasting on a number of subjects and reported the results to the American Psychological association, which met at Cornell university recently. Two men and a woman lived on water for from ten to thirty-three days.

One of the most important facts determined was that the mental efficiency of all the subjects as shown by their performance of tests decreased during the fast in five of the tests out of the total of seven. The average loss in efficiency compared with the period before and after the fast, ranged from 1 to 24 per cent.

The subjects, however, gained in bodily steadiness during the fast, especially after they had been foodless for a week or more. They were able to point more steadily at small holes with a pointer. They could stand at attention, blindfolded just with vision, for two minutes at a time, with none what less wabbling than before the fast.

"The after effects of fasting," Mr. Glaze said, "are beneficial in many ways. One's mental activity seems to be increased, but this only takes place after the fast is over."

The subjects described their various experiences during the fast in diaries which they kept. One of them recalled his dreams and they were mostly about food. The sense of smell, it was agreed, was much more acute while fasting. The pangs of hunger were not noticed after the third day.

How appetite comes back to those fasting was illustrated by one of the men who had occasionally enjoyed a cigarette. After about three days he did not want to smoke at all, and only after he began eating normally again did he have any desire to resume smoking.

Women's Rights in Turkey

Women's rights in Turkey do not yet include the ballot, but they do include reserved seats in trolley cars, formerly red curtains inclosed the first two rows in the trolley cars, and women were required to sit by the red curtains. Now the curtains have been removed and Turkish women now may sit side by side with men, but the women still have a monopoly on the first two rows of seats.

Once Rich Woman Works to Keep Child

Boston.—Facts pertaining to "the mysterious disappearance" of Harold Lawton, scion of a prominent family and son of the late Superior Court Judge George F. Lawton were made public by Walter L. Badger, counsel for the seventeen-year-old daughter, Laura, who is objecting to the probate of the will of her grandfather which cut her off from the $75,000 estate with the sum of $300.

A school teacher, Gladys Dunbar, was partly the cause of Lawson's desertion of his wife and child six years ago, the counsel stated. As a result of the desertion, Mrs. Harold Lawton, receiving no aid from her husband's people, was obliged to give up her cultured home in Winchester and go out and work as a dissuade in order that she might keep her little girl with her.

Both sides have announced their intention to fight to the last straw over the still. The father of the little seventeen-year old girl whose desertion caused untold suffering to her and her mother, is believed to be dead and therefore, her counsel states, she is entitled to her share in grandfather's estate.

THE FIETIETH ANNIVERSARY

Subscribers are Invited to Participate March the Tenth

"Old timers" have been especially invited, by Manager Johnson of the Charlevoix exchange of the Michigan Bell Telephone Company to participate in the local observance of the 50th anniversary of the telephone, of the 40th anniversary of the service in Michigan and the 42nd anniversary of service in this community.

Among the "old timers" and pioneer users of the service were M. J. Stockman, J. M. Eston, A. F. Bridge, Lisle Shanahan, and Harry Nicholls, whose names appeared in the first list of subscribers to telephone service here.

The program marking the occasion will be held in the telephone business office at the telephone building at two o'clock, when visitors will be received by a local committee of telephone people headed by O. A. Soloman. Other members of the committee are, Miss Marvel Cooper and Miss Brunilla Richardson.

Included in the list of local telephone people who will greet visitors at the central office and will show them through the operating room, plant and business office are O. A. Soloman, combination man, who has had twenty-nine years of service with the telephone company.

Visitors to the telephone office will witness the actual operation of the service, the operation of the 'switchboards for the handling of local, rural and long distance messages and the functioning of the intricate plant equipment.

All telephone employees will wear as a badge of the anniversary, a pin or button of blue on which will appear a telephone, with the numerals "50" in white superimposed over all.

Those subscribers who will be unable to visit the central office on Wednesday, March 10, are invited to do so at any time. Open house in commemoration of the telephone's anniversary will be held throughout the remainder of the week.

The Drawback

The two great drawbacks to the happiness of the motor tourist are the policeman and the board bill.—The New Yorker.

Dust Fuel for Autos Predicted by Chemist

New York.—W. A. Noel, an engineer of the bureau of chemistry of the Department of Agriculture, demonstrated the explosive power of dust here recently and declared that automobiles might be using dust for fuel within a short time.

The dust must consist of carbonaceous particles. It will not be sufficient merely to suck into the cylinders the road dust created by the motor car, but the dust must be such as collects on sawmill mantles, flour, rubber, aluminum or wood would be suitable, Mr. Noel said.

The Drawback

The two great drawbacks to the happiness of the motor tourist are the policeman and the board bill.—The New Yorker.

OF INTEREST TO OUR POLITICIANS

Judge Perkins Rejects Sheriff's Plea for Third Term

Circuit Judge Willis B. Perkins Saturday denied the petition of Sheriff William L. Smith for a mandamus to compel County Clerk Edward L. Wagner to accept his petition for nomination as candidate for a third term. The court held it had no right to act on future or anticipated conditions and that to grant the mandamus would injure the rights of others to run for the office.

The anticipated condition to which Judge Perkins referred is the submission at the next November election, at which the sheriff would be a candidate, of an amendment to remove the restriction of two years to six for the office of sheriff.

"This matter ought to be passed on by the state supreme court," said Judge Perkins, "so that there can be no question."—Grand Rapids Press, March 1st.

RESORT PROPERTY FOR SALE

Nice Location on Pine Lake on North Shore

Some especially desirable water frontage on the north shore of Pine Lake is a recent offering made by J. H. Parker of Boyne City, to some one desirous of purchasing frontage on this beautiful body of water. The property is near the Young State Park and has a total frontage of 3765 feet.

Two rows of lots have been surveyed and blue prints of the engineers work have been prepared showing size and shape of lots, street layouts and other valuable information connected with the ground platted.

There are 53 lots along the lake shore but a few feet above the water with a small bluff and further back on the terrace 16 or 12 feet higher and separated from the water front lots by a main road the way. All lots are so situated as to give a wonderful view of Pine Lake and will be under restrictions as to the character of the buildings to be erected thereon, the purpose being to protect the interests of the owner who prefers to sell all and not single lots.—Adv.

Power of Vibrations

A Boston violinist says he can put out a flame with the vibration of his fiddle. But that's nothing. A saxophone stiffly off boy can put out an entire ——boston.—Cleveland Plain Dealer.

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition-listed below the puzzle. Thus No. 1 under the column headed 'Horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black squares. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

Full many a gem of purest ray serene,
The dark unfathomed caves of ocean bear;
Full many a flower is born to blush unseen,
And waste its sweetness on the desert air.

—Thomas Gray.

A FEW FAVORITES

Here are a few recipes that other folks like, and they may appeal to you.

Bon-Ton Omelet.—Beat the yolks and whites of four eggs separately. Mix one-fourth of a teaspoonful of cornstarch with one-half cupful of milk, then add to the yolks and fold in the beaten whites, add salt and pepper to taste and pour into a hot, smooth frying pan in which a tablespoonful of butter has been melted, and cook slowly, loosening the edges with a knife occasionally until done. Slash the opposite side and fold over on to a hot platter. Serve at once. If the top of the omelet does not seem to be well cooked, set in a hot oven for a few minutes before folding.

Quick Tea Cake.—Cream two tablespoonfuls of butter with one cupful of sugar, add two-thirds of a cupful of sour cream, one-fourth teaspoonful of soda, two beaten eggs, one teaspoonful of vanilla, and one and one-half cupfuls of flour sifted with one teaspoonful of baking powder. Beat well; add a few raisins or nuts on top of each; bake in gem pans or irons and serve warm.

Prune and Date Jam.—Cook one pound of prunes until soft in a small amount of water. Remove the stones and add one pound of stoned chopped dates. Cook for a few minutes until the mixture is of a thick consistency. Add the juice of half a lemon with half a cupful of honey. Cook for one hour until thick.

Prune Cake.—Stir together and boil for two minutes the following: Put in a pan two cupfuls each of brown sugar and boiling water, three cupfuls of soaked pitted prunes, stoned and chopped, one teaspoonful each of salt and cinnamon, one-half teaspoonful each of cloves and nutmeg. Dissolve a teaspoonful of soda in two tablespoonfuls of warm water, and add four tablespoonfuls of fat. Sift two cupfuls of flour with two teaspoonfuls of baking powder and add the first mixture with a cupful of chopped nut meats. Bake in a tube cake pan for one hour.

Oyster Soup Supreme.—Take one quart of veal or chicken stock, two tablespoonfuls of flour, two of butter, two-thirds of a cupful of minced chicken, one pint of oysters, one teaspoonful of onion juice, one cupful of thin cream, salt and pepper to season, and a little minced parsley. Prepare as usual, adding the oysters and chicken just long enough to curl the oysters, and heat. Add the parsley. Delicious for a company supper.

Good Things to Eat.

For a change from the every-day muffin here is a good one to try:

Rice Muffins.—To two well-beaten eggs add one cupful of milk, one teaspoonful of salt, one tablespoonful of sugar, three cupfuls of flour sifted with three teaspoonfuls of baking powder; add one cupful of rice and five tablespoonfuls of melted butter. Stir lightly and bake in muffin pans.

Asparagus Cream Salad.—Soften two tablespoonfuls of gelatin in one-half cupful of cold water, add one cupful of boiling water and cool. Rub one can of asparagus through a very coarse sieve, or chop it into small pieces. When the gelatin has dissolved and cooled add the asparagus, one cupful of cream, one cupful of grated cheese and a few dashes of cayenne. Mix one cupful of heavy cream until thick and fold into the mixture. Let it harden in molds. Serve on lettuce leaves.

Stuffed Egg Salad.—Cut six hard-cooked eggs into halves lengthwise and remove the yolks. Cream three tablespoonfuls of butter and salt with the egg yolks; add six skinned and boned anchovies to the egg yolks and stuff the whites with the mixture. Serve on lettuce leaves with a mayonnaise dressing.

Pimento Butter Sandwiches.—Cut white bread into one-fourth inch slices. Spread generously with pimento butter; spread lettuce leaves with mayonnaise and place between each pair of slices. Press edges lightly and cut into triangles. To prepare the pimento butter, cream one-half cupful of butter. Drain the liquor from a can of pimentoes, rinse with cold water and dry. Rub the peppers through a sieve and gradually work into the butter; season with salt. If the pimentoes are small, use four.

Peanut Salad.—Soak one tablespoonful of gelatin in one-fourth cupful of cold water, then add one and one-half cupfuls of boiling water and stir until the gelatin is dissolved. Add one-fourth cupful of lemon juice, two tablespoonfuls of sugar, the grated rind of a lemon, then two cupfuls of chopped celery, one pimento chopped fine, two cupfuls of sliced, diced pineapple and one cupful of nut meats. Mold and serve on lettuce leaves with mayonnaise dressing.

Nellie Maxwell

Fergus Hume's Odd Start

Fergus Hume, author of 137 detective novels, made his first great reputation with "The Mystery of a Hansom Cab." Mr. Hume, curiously enough, wrote the book not to make money, but a name. He was very anxious to publish some poems he had written, but the publishers told him he was not sufficiently well known —that he must first make a name for himself by writing something more popular. "The Mystery of the Hansom Cab" was the sequel to this.

NURSERY RHYME PUZZLE

CURING PECANS

Pecans may be cured by leaving them exposed to the air in a partially shaded place for about a week, then place the nuts in bulk quantity in a well-aired building for one month. They may then be stored at a temperature between 40 degrees and 60 degrees Fahrenheit, in bags, boxes or barrels. The air in the storage room must not be too dry. Polished nuts as formerly marketed are now considered undesirable, as only the cheaper grades nuts are stained. The velvety surface now often found is a result of passing them through a special wire grader, similar to the one used for prunes.

Power of Vibrations

A Boston violinist says he can put out a flame with the vibration of his fiddle. But that's nothing. A saxophone slightly off key can put out an entire orchestra.—Cleveland Plain Dealer.

DRESS OF BORDERED SILK PRINT; GAY SCARFS ARE IN FASHION

MODERNISTIC! The newest and most popular word in our current fashion vocabulary. In this one word is the explanation of the whyfor and the wherefor of all this riotous coloring and unique designing which just now dominates the mode. If the silk print of one's frock be unusual both as to coloring and design, which it should be according to the latest style mandates, account for it in that all-important word "modernistic."

One item among a legion in favor of the handsome gay-colored modern silk print is its adaptability in clever styling. Especially do the bordered silks lend themselves smartly to the demand for novel effects in the now-so-modish two-piece frocks. Note

A CHIC TWO-PIECE DRESS

the interesting manipulation of the bordered silk print as interpreted in the two-piece dress here pictured. This silk is a "made in America" product, which fact should appeal to our spirit of patriotism. It is designed by Rene Clarke, one of a group of artists who are making every effort to create for American women, truly American silk prints, thus encouraging the development of creative textile art within the limits of our country.

Many of the new silks, in the very nature of their designing suggest being made up along the lengthwise stripe. Such is a silk print whose top portion is traversed with graduated bands of floral stripes. Red and green add a more elaborate note to the decorative patterning" which features the lower section. A pretty way of manipulating this particular silk is to use the heavily bordered portion for a pleated skirt, making the blouse of the block printed part, using also some of the bordering for the full-below-the-elbow sleeves.

Fifty-four-inch bordered silks are also exploited in very lovely floral patterns. All the larger flowers are represented and wisteria presents a charming new theme both as to coloring and patterning.

There are also a galaxy of entrancing figured silks, with sunset old-fashioned posies. In fact it is a silk-print season, so make the most of it and indulge in color and design to heart's content.

A scarf cannot be too bizarre, too hectic in coloring this season. Furthermore, the trend is toward a scarf with every hue, a scarf with every cast and a scarf with every

Salesman For Face Cream Learns a Lesson

New York City.—Mr. H. D. Mothe writes:—"I was a salesman of creams for healing pimples, blemishes, etc., but when my face broke out with blotches, pimples and blackheads, I tried one salve after another with no results. I found it as impossible to sell skin creams as a bald headed man finds selling hair tonic. Finally I decided I would have to get at the cause—constipation. I was amazed to find that within a few days after taking Carter's Little Liver Pills my skin took on a new healthful look."—Druggist, 25 & 75c red packages.

FOR SALE—SPEARMINT SEALS. FARM near Rockford, Illinois. Reasonable price. Terms. TIELOCK, URBANA, ILLINOIS.

WANTED, AGENTS—Complete Hand Board and Personal Knife. Combination, readily sells for $1. Agents' price 60c. Sample 75c, postpaid, guarantee either refunded. Michigan Made Block Co., Parkaway, Mich.

FISTULA, HOSSES CURED, $5. Send no money until cured. COAN CHEMICAL COMPANY, Hawley, Kansas.

Must Be Conspicuous

Earrings, to be worn at all, should call attention to themselves by their unusual length and charm of design. Modernistic to the last degree are the earrings which depict of a series of bangles or a linked effect of jewels set in intricate design.

Very Practical, Too

One of the most popular combinations of the season is the patent skirt and the jumper of metal cloth or of metal brocade shot with brilliant colors

Dancing Girdles

Dancing girdles of hand-woven silk elastic have but two short bones in the back. Four strong silk elastic garters keep it trim and prevent it from slipping up. Satin straw in various colors is used in the floral design at the top edge.

Plaid Velvet Frocks

A two-piece jumper frock is of peacock blue and green plaid velvet with a simple overblouse and full circular skirt.

Millions Affected by Change of Alphabet

When Soviet Russia abandons the every word is pronounced as it is every Cyrillic and adopts the Roman, the spelled. In abandoning it Russia will alphabet which has been the vehicle make a stupendous reform affecting of written communication in Slavic not only schools, newspapers and the countries since the Greek missionary books of the day, but centuries of Cyril translated the Scriptures in the literature. Textbooks in the Roman Ninth century, will survive in only Bul- alphabet have been prepared for the garia and Serbia. Cyril devised the vernacular of the Georgia soviet social-36 letters which phonetically are superlistic republic, for the Abkhaz autonopior to those of the Roman alphabet of 26. With the Cyrillic alphabet with a different dialect—for the Kurds in the Armenian soviet socialist republic and for the Yakut tribes in the far north. Some of them have valuable scripts and others never had a written language.

Peculiar Incident

BUFFALO BILL

The Last of the Great Scouts

TWENTY-FIVE TO ONE

By ELMO SCOTT WATSON

WHEN Col. W. F. Cody (Buffalo Bill) died in 1917 his passing was widely heralded as that of the "Last of the Great Scouts." Buffalo Bill was a great scout, but how many army officers have testified to the value of his services to doubt that. But the great amount of publicity given his exploits by the dime novels of Ned Buntline and by Cody's Wild West Show have exaggerated his place in frontier history. It built up a tradition of Buffalo Bill, the scout, that in some ways, was as much a matter of fact he was only the best advertised of the great scouts. Those who know the secrets of other scouts in our Indian wars, those who never got the publicity that Cody did, doubt the claims of the Buffalo Bill press-agents.

So, deserving as Buffalo Bill may be of a place in the select list of greats, it is not true that the race was exhausted when he died. One of them lived to the ripe age of eighty-eight years and died only last summer. Two others are still living, one now seventy-seven years old, and the other eighty, and not, until they cross the Great Divide will the pioneer West of the Texas Panhandle be free.

On July 18, 1927, there died near Selling, Okla., a man known as Amos Chapman to his white friends, but among the Cheyenne Indian tribe, into which he married, called Tun-e-yuh-tuh, "The Man With the Cut-Off Leg." He won that name and a Congressional Medal of Honor for valor in the Buffalo Wallow fight on September 12, 1874. Chapman was born in Michigan in 1837 and at the age of seventeen enlisted in the army. After several years as a "bullwhacker" for government army trains in the Indian-infested frontier country, he enlisted as a scout for Gen. Nelson A. Miles in the campaign of 1874-75 against the southern tribes. During this campaign Chapman and Billy Dixon (one of the heroes of the Adobe Walls fight, earlier that summer) with four soldiers of the Sixth cavalry were sent with dispatches from Miles' camp in the Panhandle of Texas to Dodge City, Kansas, a distance of 300 miles. The scout and Indian messenger was surrounded by 125 Kiowa and Comanche Indians, Private Smith was mortally wounded at the first fire and Chapman went down when a bullet struck his left knee. Realizing that they would soon be wiped out on the barren hillside, Billy Dixon led a dash to a buffalo wallow, several hundred yards away. After reaching this slight shelter, Dixon ran back through a hail of Indian bullets, picked up Chapman and carried him back to the wallow. A little later Dixon and Private Smith also rescued Sculth but he died of his wounds that night.

Sergeant Woodall and Private Harrington were also wounded in the fight and Dixon and Chapman's leg was amputated at the knee, but despite this handicap, he afterwards continued his service as a scout. He was chief of the Indian scouts at Fort Supply until 1892, when that post was abandoned, after which he settled on a claim near Selling. Dixon remained in the government service until 1893. He died in Texas in 1913, but his widow, Mrs. Olive K. Dixon, still lives in Miami, Texas. She is active in a movement to erect an appropriate monument on the site of the Buffalo Wallow fight which, as General Miles wrote in recommending medals for the survivors, was "a scene of cool courage, heroism and self-sacrifice which duty, as well as inclination, prompts us to recognize, but which we cannot duly honor."

Of the two living "really great" scouts, one, like Chapman, won much of his fame as a scout for General Miles. Maj. Luther Sage Kelly is his full name and he is now engaged in the peaceful pursuit of an orchardist near Paradise, Utah. But back in the days when the Indians were on the warpath he was first known as the "Lone Wolf" and later as "Yellowstone" Kelly, and of him General Miles once said, "He was a remarkable man of the type of Kit Carson or Daniel Boone and his work as a scout was invaluable to me."

Kelly was a native of New York. He spent one year at Genesee Methodist college, then at the age of sixteen enlisted and served during the last year of the Civil war. He was honorably discharged as a private trooper in the spring of 1868. He first went to Fort Carry in Canada and from there started along through the wild country north of Fort Benton. After an exciting experience with a war party of Sitting Bull's Sioux, he arrived at Fort Berthold in the heart of the hostile Sioux country. The next few months found the young tenderfoot serving as a mail carrier between Fort Berthold and Fort Buford and making a name for himself because he dared do what none of the frontiersmen around those posts would—carry the mail without an escort.

During one of these trips he was attacked by three Sioux warriors and killed them all. The Mandans, Gros Ventre and Arikara Indians, who camped close to Fort Berthold for protection from the Sioux, were most with joy at Kelly's victory, hailed him as "The Little Man With the Strong Heart" and crowded about him in admiration when he returned and reported at Berthold. Even the Sioux were impressed with the "strong medicine" of this "Man Who Never Lays His Gun Down" and never again tried to ambush him.

Kelly next became a free trapper and hunter in the then-mysterious Yellowstone country until he knew it as did no other white man. It was because of his life as a wilderness hermit that he became known as the "Lone Wolf" and as "Yellowstone" Kelly. When Gen. George A. Forsyth was sent in 1873 to explore the upper Missouri and the Yellowstone he secured Kelly as his guide and interpreter. In the report, the accuracy of which he owed solely to "Yellowstone" Kelly, was invaluable to the army when the Sioux war broke out three years later. Kelly is described at this time as "a man reticent in speech and modest in demeanor, yet highly picturesque in appearance and bearing himself with an air of self-reliance and hardihood which could not be mistaken. He was dressed entirely in a suit of fringed buckskin and his feet were encased in beaded moccasins. His face, darkly tanned by sun and weather, was smooth-shaven except for a sleuler mustache and his features were lean with the hard, muscular gauntness of a hunting ouhoul that carries not an ounce of superfluous flesh. A mass of thick hair, straight and black as an Indian's, sweeps back from his pallid brow and hung below his shoulders. Across his arm he carried a long breech-loading Springfield rifle, army model, on the butt of which was carved the name he had bestowed upon his trusty companion and guardian of his lonely life, 'Old Sweetness.' The rifle's barrel from muzzle to stock was covered with the skin of a great bull snake, shrunk on so tightly that it resembled varnished hide."

Kelly's services to General Miles, for whom he became chief scout during the bitter winter campaign of 1876-77, were, as General Miles has testified, invaluable. He remained with Miles until 1878 and from 1880 to 1883 was a scout for our troops in the Ute country in Colorado. After his scouting days were over he was in the general service of the War department from 1892 to 1898 and in the latter year was guide for Captain Glenn's exploring expedition in Alaska. He was back in Alaska the next year with the Harrfunn expedition and then became captain of the Fortieth United States Volunteers in the Philippine insurrection, where he saw hot service under General Bates. In 1900 he was placed in command of Daputan, Mindanao, and the next year was made provincial treasurer of the province of Surigao. He was acting governor there when bandits and escaped criminals took possession of the principal town. Here for 18 hours Kelly and a few companions held off a howling mob of Filipinos and it is doubtful if the former Indian scout had ever been in a tighter hole, even in his Sioux fighting days.

Kelly's last public service was as Indian agent for the Ute Creek Apache agency, to which he was appointed by President Roosevelt who had known him in the Little Missouri country. At the conclusion of his work there in 1906 he engaged in mining in Nevada until 1915 when he retired to the fruit ranch where he now lives.

The career of Capt. Luther H. North of Columbus, Neb., is in many ways a striking parallel of Kelly's in that he served an apprenticeship of

The Secret of a Happy New Year

By REV. J. R. SCHAFFER, Superintendent of Men, Moody Bible Institute, Chicago.

Rev. J. R. Schaffer.

TEXT—Philippians 4:11. "I have learned, whatever be my outward experiences, to be content."—Wyemouth.

Our world once again is filled with New Year's attitude. They record their vibrations on eye and ear and hand. Most of them are artificial — much of them is superficial. All constitute a united, annual endeavor to create a spirit of hope and cheer. The new year offers new opportunities, new achievements, new victories. To these, there is unusual incitement. But alas! all gather up into a bundle of wishes. The secret of obtainment remains a mystery. We need something more than wishes, beautiful as a bigeon and sincere in this custom is. We eagerly long to know how to have a happy new year.

The aged Christian philosopher discloses the secret which opens the door to this treasure house, before which all mankind has stood and called like cannibals in utterances in vain. It is, to be content in every state, with every circumstance.

I. This Secret Must Be Learned.

"I have learned."—Contentment is not innate but acquired. It is the primary objective of all life—its common denominator. Every living soul is in pursuit of happiness and the chase waxes hotter. The multitudes are deceived in thinking it can be overtaken by sungle, or seized through some camouflage of the highway; but so, it is seen by the learned in every experience. If you would know how to have a happy new year, turn aside on the road of life and tarry where did the apostle and learn this wondrous secret. Sit at the feet of the Holy Spirit, "who shall teach you all things," with the open textbook of God's Word before you and you will be instructed in the mysteries of contentment. Take the divine principles of earth that seek happiness as the highest good. It is not a state to be sought but fruit to be produced, the result of cultivation. He must seeds study spiritual arboriculture.

II. This Secret is Sufficient for All Experiences.

"Whatever be my outward experiences." There are few who do not find satisfaction in some of life's experiences. Almost infinite as they are, there is something to meet the sufficiency of all. The commonest of mankind is the mingling of lights and shadows, storm and sunshine, pleasure and pain. Our happiness is best admitted, short lived and of uncertain duration. If we would enjoy continuity, indulge in those activities that satisfy, live in that environment that spells contentment and the absolute proof against all irritable ills then we would have learned the requisi. Such is not Paul's idealism. No such mocking chimera does he hold up. He has learned the secret of a contented heart for every kind of human experience. The worst cannot affright him—he best cannot deceive. He had run the gamut of trial, of sorrow, of peril, of suffering and knew every tragedy of the soul but in all these outward experiences, he had learned to be content. What a discovery! He wrested it from a store IV.

III. What is Contentment?

"To be content." Contentment, is more than the flowers of resignation, the very etymology of the word suggests that these are cut from the lingeringes of life. Alas, however beautiful and fragrant they, too, soon wither and fade.

It is more than the tree of godliness for the tree may bear fruit with "nothing but leaves." Paul wrote to Timothy that godliness plus contentment is "great gain." Godliness is profitable" beyond question but add contentment and great is the gain. It need not comment on the discernment of godly people. It is the fruit of the Holy Spirit's possession—the manifest of His productive activity in the soul. He is life and life is ever begotten and cultured in development.

The only process by which we become Christians is the new birth. Except ye are born of the water and the Spirit, ye cannot enter the Kingdom of God." The Spirit of God inspires His own divine life within on and we are the born ones of God. This life must be cultured by elements similar to those that promote growth in the physical world of nature. All life must have three cultivating factors, air, food (including water), and exercise. The development of the spiritual life is conditioned on the breath of prayer. The food of God's Word and the exercise of service for Him. Faithful cultoring of the life begotten by the Spirit results in Christ-like character, goodness, brotherly kindness, faithfulness, meekness, self-control. Such fruit is contentment for every outward experience of life.

God's Work

God takes a thousand times more pains with us than artist does with his picture, by many touches of sorrow and by many colors of circumstance to bring man into the form which is highest and noblest in His sight.—J. Tauler.

In God's Light

If any one should take this broadling over himself for self-knowledge, he would be very much mistaken. He is simply taking discouragements for himself by looking for them and so confusing them up. Self-knowledge is not to be found in our own darkness, but in God's light.—Ulhehorne.

Men Who Have Seen

Some of the world's greatest benefactors have been men who have seen and done one thing.

ASPIRIN

A PATRIOTIC STAND

The Minnesota Society, Sons of the American Revolution, condemns the direct primary laws of Minnesota and other states as departures from the fundamental plan of government of the United States. This purely patriotic organization is thus leading the way back to the first principles, a fitting task for men banded together to preserve the work of the nation's founders.

The Constitution guarantees to each state a republican form of government. That means representative government, not a pure democracy such as some of the modern "progressives" sigh for. The socialistic Serbian direct nominations violate this guarantee of the Constitution. The point is not new and has been raised in court actions, but courts have avoided deciding it. The courts' evasion has been on the ground that such questions are political and not proper ones for courts to deal with. The result is that we must deal with this issue and solve it as a political question.

Evil results from the direct primary system, recited in the society's resolutions, now are quite widely conceded. They are only symptoms, however. They indicate the disease, which is fundamental. Its cause lies in a departure from the principles of the Constitution. The remedy is, "Back to the Constitution."—Minneapolis Journal.

A magazine writer says. "It's the size and use of a man's brain, instead of his body, that counts." While this editor can heartily indorse the sentiment, he can't avoid a suspicion that it was written by a guy who weighs about 110 pounds.—Craig, Colo., Empire.

THE GIRLS READ THIS

It is time for the plump girl to take heart. The thin girl has been a fashionable for some time, but her inordinate desire to be a willowy shadow may be her undoing. According to no less an authority than Dr. L. H. Parker, emeritus professor of medicine at John Hopkins University, the desire of the modern girl to be extremely and fashionably thin regardless of consequences is threatening her health and happiness. And of course, without health and happiness she won't have a thing on the fat girl.

Undernourishment, which comes with the desire to grow thin, may develop tuberculosis, or at best a nervous breakdown according to Dr. Barker, who says:

"The ideal of the exaggeratedly thin figure, dictated by the fashion of the moment is not to me but it may not go. I am afraid, until it has been the cause of many tragedies. The trouble with young women today is that their ideal of what is proper weight is all wrong. They have developed an obsession against being fat. They say doctors 'I would rather die than get fat.' Some of them starve themselves to the point of almost literally carrying this out. Often already too thin, they diet to grow thinner. By unscientific dieting they fail to eat a balanced ration, and thus predispose themselves to food deficiency diseases. They smoke constantly, especially during meals to take away the normal appetite they have, and by too many cigarettes increase their nervousness.

These girls, the greater number of them between sixteen and twenty years of age, but many of the same mind between twenty and thirty, are trying to face a pace of life that makes far greater demands of them than it did on their mothers and grandmothers with thin scrawny bodies that do not hold the needed reserve of strength. What is the result? Many of these young women are incurring wrecks of health that not only forbids their continuing public activities but that interferes seriously with their eventually fulfilling the responsibilities of marriage and motherhood."

OUR MARINE PROBLEM

The shipping problem so far as the United States is concerned is still an unsolved problem. Every good American wants Uncle Sam to have a merchant marine, flying the red, white and blue, but there are many theories as to how this should be brought about. One of these theories which deserves careful consideration is the theory of protection. Isn't it likely that the principle of protection, applied to our merchant ships, might be as effective in maintaining them as the protective tariff has maintained our industries?

Those who favor assistance to our merchant marine through the protective tariff say that this can be effectively brought about not only without cost but really with profit to the government through the additional revenue available.

In the early days American ships were given adequate protection because a higher duty was charged on imports coming to America in foreign ships than in American ships. To the extent that foreign ships were employed in our trans-oceanic trade their cargoes paid a higher duty at our Custom Houses. Under this system the United States became one of the maritime powers of the world. Our ships were better in every way than the ships of other nations and the morale of the seamen was high.

All recent attempts to give this protection to American ships have been frustrated in Congress. Foreign nations with large merchant marines of course oppose this granting of favors to American ships, just as they oppose our protective policy as a whole. But there is no reason why Americans should oppose it or should permit foreign shipping interests and their allies to block it.

In the good old days when the principle of protection was applied to our American merchant marine, American ships carried four fifths of our foreign trade. Other nations of course, tried to retaliate, but our ships got four fifths of the American business just the same. When the principle was abandoned our merchant marine began to languish and it has been languishing ever since. The plan of the protectionists is at least worthy of serious consideration.

AFFILIATIONS

One of our faithful readers wants to know why it is that pacifists of otherwise good relations and intentions apparently are so unfortunate as to get into the company of international Socialists and of William Z. Foster's Third International Communists.

They can't help it, dear reader; if they wish to keep company with any one and naturally they do. Pacifists, and especially professional pacifists of the advanced type, have to pick associates from those who admire Russia more than they do their own country.

It is very difficult for professional pacifists to enjoy the company of those who might be inclined on a pinch to stand up for their country and especially such a country as ours. Of course, a fair degree of compatibility is essential in enjoyable associations.—Springfield Union.

JOHN ADAMS WAS ORIGINAL IRRECONCILABLE

John Adams was the original irreconcilable and deserves a place next to George Washington as one of the founders of the country, according to Frank P. Litschert, who writes in the current issue of the National Republic on the life and opinions of our second president.

After Concord and Lexington the army of "unbattled farmers" was around Boston, besieging and harrassing the British army, but without an official head and without official standing as an army. It was the courageous stand of John Adams who remedied this situation.

Adams was in the Continental congress at Washington and was discouraged and chagrined by the inaction of the Congress, for in the congress were many weak kneed patriots who advised caution and further petitions to the King rather than a bold stroke for independence. Finally one morning on his way to Congress, John Adams said to his kinsman, Samuel Adams:

"I am determined to make Congress declare for or against something. I am determined this morning to take a direct motion that Congress should adopt the army before Boston and appoint Colonel Washington commander of it."

Adams did make the motion and it dropped like a bombshell in the Congress. But after two days it was adopted and the United colonies had an army and a commander who was to lead it to final victory. Concerning Mr. Adams as an irreconcilable, Mr. Litschert says:

"It was late in 1775 that the plan of sending diplomatic representative to Europe was discussed. Mr. Adams advised caution, while others were in favor of making foreign alliances, even at the cost of some of our territory. To all this Adams vigorously objected. He declared no alliances, only treaties of commerce, asserting that we should separate ourselves as far as possible and as long as possible from all European politics and wars. Adams was therefore the original American nationalist. His advice on foreign affairs antedated the famous Farewell Address of George Washington. So the policy of 'no foreign entanglements' was born even before the republic."

That William G. McAdoo will seek the nomination as presidential nominee of the Democratic party in the 1928 campaign is conceded by his campaign manager, David Ladd Rockwell of Cleveland, who also makes the prediction that Mr. McAdoo will fail in his political aspirations and that Governor Vic Donahey of Ohio, will be the successful 'democratic nominee and candidate of the party during the presidential campaign. This opinion of Mr. Rockwell is based largely on the future attitude of Gov. Al Smith of New York relative to the campaign. Should the latter seek the nomination then Mr. McAdoo will enter the contest, otherwise it is intimated that McAdoo will not be in the race—all of which "listens" like an echo from the campaign of 1924

COMMENT.

—President Hindenburg costs the German republic twice as much as did his predecessor, Pres. Ebert. But anyhow it will have to be admitted that he is worth more than he was when he worked for the Kaiser.

—Leaders of the British Labor party are arguing as to whether they should wear full dress suits in attending social functions. And yet some people have been afraid that England might go Bolshevik.

—Uncle Billy Gamester was in favor of admitting the Countess Cathcart and highly indignant with the Department of Labor, until he saw the counjess' picture. Now he is not so sure about it.

—If Senator Borah, who says that the people will be asked to decide the World Court issue, can prove that it is responsible for radio static, the people will do the rest.—In Jinapolis News.

—We think "The Democratic Outlook" is a subject worthy of discussion by serious minds. We wish the miserable humorists would leave it alone.—Houston Post-Dispatch.

—A sudden electrical storm caused a panic in a Brooklyn theatre the other night. Doubtless the audience thought the local gunman were staging a city wide celebration.

—As soon as he got word that the Senate had adopted the World Court resolution Deacon Jones came to town and traded his army musket for two pounds of honey.

—Who remembers the old fashioned butcher who used to give each of the children a big frankfurter when you went in to pay the meat bill on Saturday night.

—London has opened cabarets for working men. This should afford amusement for those who are living on the government dole.—Louisville Courier-Journal.

—Charley Schwab says the way to be happy is to work. And think of the large number of people who are trying not to be happy.—New York Commercial.

—Things have come to a pretty dull pass when we have to get excited over some of the secrets in George Washington's life.—Des Moines Register.

—Reports say that freight carried in British ships last year was the lowest in tonnage since 1920. Wonder if the figures include the rum boats.

—A woman member of the British parliament recently spilled eighty-three columns of speech. Wait until some of our Senators hear about this.

—Mussolini should change his diet. Eating nothing but raw meat always has proved to be fatal to great statesmen.—Cincinnati Enquirer.

—Those women who asked President Coolidge for equal rights must want to fire the furnace and carry the ashes out.—Indianapolis Star.

—The Prince of Wales is carrying an umbrella to make them popular again. This is all right but we hope he doesn't adopt ear muffs.

—The Earl of Craven wants it known that he didn't run away. He merely retreated to Canada for strategic reasons.

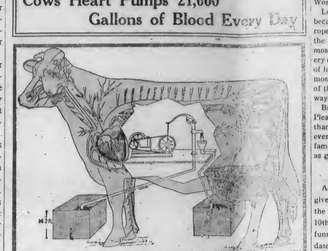
—They say life isn't as colorful as it used to be and one reason is that there isn't any more red woolen underwear.

—Its a good bet that Mr. Mussolini couldn't win a popularity contest around League of Nations headquarters.

—The Council of the League of Nations seems about as hard to break into as the New York Four Hundred.

—One way to find out how many double crossers there are in the community is to run for county office.

Cows Heart Pumps 21,600 Gallons of Blood Every Day



MORE than 21,600 gallons of blood—enough to fill a tank 11 feet in diameter and 14 feet high—are pumped through the average cow's heart in twenty-four hours, according to the Larrowe Institute of Animal Economics. Twenty to forty seconds are required for the blood to make a complete circuit of the human circulatory system.

The railroad engine deriving its power from the coal burned in its furnace, transforms the fuel into mechanical energy, but the dairy cow not only derives all her power from the grain, hay and grass she consumes, but, further, turns those materials into blood and milk, which is made of blood. A cow does not perform miracles, and her "milk factory" will not produce abundantly unless she herself is fed plentifully on a tested grain ration, good hay and silage. This is the only sure and safe method as yet discovered by scientists to keep the milk pail filled month after month.

Great for Barbers

London.—Among the millions receiving unexpected short dollar pay on bankers, since English women are spending $100 or $1000 or more annually on shingling and bobbing.

THEATRE

Meighan Breaks Jail

Tom Meighan a convict for-a-day for scenes in his newest picture, "The Man Who Found Himself," a prison story written for the star, recently "broke jail," hopped from a bridge to a fast-moving freight train which carried him to freedom while several hundred inmates of the "college on the Hudson" looked on with a half-hearted they do-it-the-movies' grin.

This picture will be the feature at the Palace theatre tonight, March 4. Tom, as vice president of his father's bank in a small town, is suspected of having taken a considerable amount of bank funds for his own use. A rival banker puts the examiners wise. Result: A two years' vacation up the river for the star.

By frustrating an attack on one of the guards, Tom is made trusty, and he takes advantage of his new position to make his escape when he hears that "the girl back home" is to marry the man who sent him to jail through trickery. So out he went, while prisoners peering from the barred windows wondered just how far they would get if they tried the same thing.

The Palace of Pleasure

Since her first great success in "The Miracle Man," Betty Compson, who plays the leading feminine role in "The Palace of Pleasure," coming to the Palace theatre March 6-7, has nursed an ambition with a carelessness that only an artist could evince. It is to play on the screen the worlds greatest Queen of Love.

Strangely enough, it is her first role under the Fox banner that gratified her ambition, in part at least, for she portrays Lola Montez, the most noted siren that ever helped to make history in the Old World.

Lola Montez was an Irish girl who later became identified in the theatres of Europe as a Spanish dancer. She attracted the attention of Princes, Premiers and most of the great national leaders of every country on the continent. The weight of her power and her love was felt in almost every political crisis in the history of the early Nineteenth century, but always on the side of justice.

But, the Lola Montez of the "Palace of Pleasure" is a more modern personage than the original. Miss Compson, however, has given her all the charm of the famous Queen of Love in a setting that is as gorgeous as it is vast.

Hands Up

Admirers of Raymond Griffith should give this popular comedian a welcome at the Palace theatre next Wednesday, Mar. 10th. "Hands up"is by all odds his finest, funniest and most spectacular picture to date. It has a combined Civil War and western background, and this gives the inimitable Raymond an excellent opportunity to burlesque all the heavy war dramas and the wide and well advertised open spaces.

As a Confederate spy, sent by Robert E. Lee, to Detroit to get more ammo and g'od supply, Griffith runs into one exciting adventure after another. Yet, despite the fact that lie is kept busy dodging Indians, battling western "bad men" and in general trying to win the war single handed, he still finds time to fall in love with two—and win—two pretty girls.

After many hair-raising experiences, in which the rollicking young soldier escapes hanging first at the hands of an Indian, he succeeds in returning to the Confederate lines, only to discover that the war is over. But he still has the two girls on his hands, and his surprising way of solving the romance brings the picture to a humorous conclusion.

Machine Reveals Ills

Vagrant pains and pains which often afflict the stomach and are hard to identify may now be accurately detected and classified by an instrument resembling a miniature seismograph, the device with which earthquake tremors are recorded, according to Populair Mechanics Magazine. The pain finder, perfected by Dr. W. C. Alvarez, of the University of California, is said to register the course of such pains in almost any part of the abdomen and to reveal every step of the digestive processes. By the recording the passage of food through the digestive tract can be closely followed, and the exact time and instant of the setting up of any trouble definitely learned in a few minutes. The instrument, called the multiple-electrogastrograph, is said to obtain its data by means of a pendulum swung in a vacuum tube and marks its records with a needle.

Mary Felt "Squashed"

Mary's knowledge of vegetables was confined to side dishes on the table. What they looked like "in the rough" she had never given serious consideration. One day it fell to her lot to do the family marketing. Walking between the stands she bought this and that, and then finally spied some extra large heads of cauliflower. Crammed cauliflower, nothing wrong with that for Sunday dinner.

"How much is it a head?" she asked the vendor.

"Fifteen cents, ma'am. Want two? Ah she needed out for the sack, she asked doubtfully, "This is cauliflower, isn't it?"

"No, lady, that's summer squash," said the man behind the stand distinguishedly.—Indianapolis News.

Odious Comparison

A congressman, with a former constituency, received a letter from one of his constituents, who was planning to visit Washington during the Christmas holidays, asking for tickets to the house. "I want to see all there is to see in Washington," the farmer had written. The congressman replied explaining that while tickets were not necessary for admittance to the inner galleries, that congress would not be in session during the holidays. A few days later he received another letter, stating: "As the house will be closed, will you please send me some tickets for the zoo. They will do equally well."

Where Is the Race Going?

A Beloit college expedition is being fitted out for the purpose of tracing the origin of man. It is believed the expedition will find the beginnings of the race in northern Africa. When it is known where the race came from it will someone please fit out an expedition that will find out where the race is going?—Kansas City Star.

RIPPLING RHYMES
By WALT MASON

The cheerful and contented wife is of unmeasured worth; she brighten's up the old man's life, and fills his soul with mirth. It is a pleasant thing to know, amid the workday strain, that when the evening comes he'll go to smiling Susan Jane; and she will meet him at the door with greetings blithe and gay, and soothe his spirit, sad and sore, and shoo his griefs away. In Susan Jane he has a friend of sympathetic mood, who hears his stories without end of man's ingratitude. She hands him bowls of wholesome tea and parks him in his chair, and tells him everything will be all right side up with care. Financial worries bear him down, and he can hear her cry, "I'll do without that brindled gown that I had planned to buy." He'd like to own a Mateso cat, but can't afford the price she says, "I'll do without the hat that looked so rich and nice."

With such a wife a man's inspired to sing a cheer up song, and if the evening sees him tired, the morning finds him strong. But there are wives who can't forget the idle rich inside; for costly things they sigh and fret, things in the mart displayed. Of such a sort is Sarah Ann, a fretful dame and bored; she always nags her weary man for things he can't afford. She cares not for his troubled tale of problems he confronts; her thoughts are all of needed sale, and hostile shopping stints. With such a wife to jar and wreck the spirit of her pal, he ties a millstone to his neck, and jumps in a canal. A bride's a messenger of fate, and woe or joy she'll bring; she is a blessing fine and great, or she's the other thing.

WANT COLUMN

WANTED—Good second hand trunk; medium or large size. Call Sentinel office. 46 1t

FOR SALE—Eureka Electric Vacuum Cleaner, practically new, practically new and as good as new—no use for same and will sell at very low price. Mrs. Coryell Sevrey, Bellaire, Mich.

FOR SALE—New cubipen fully equipped and ready for service. Power Peerless Marine Gas engine. Toilet with folding basin in lavatory. A Staunch ship at moderate price. For particular call at Sentinel Office

WANTED—Manufacturer desires lady to introduce its goods. No canvassing. Position pays about $18 per week. Prefer lady who belongs to church or club organization. Write Sales manager, 505 Sloan Bldg. Cleveland, Ohio. 49-3t

Thursday, March 4th

Thomas Meighan in "The Man Who Found Himself." After prison, what? Is there a worse fate waiting out side for the jailbird? Does the world ever forgive the man with a prison record? See Thomas Meighan in "The Man Who Found Himself." The most gripping story of prison and regeneration ever filmed.
Also an educational picture, "Big Deeds."

Saturday and Sunday.

Betty Compson and Lowe in "The Palace of Pleasure." The love story of the greatest siren of the Old World, Lola Montez. Drama, romance and humor are blended to a nicety and you will find entertainment to your liking in "The Palace of Pleasure." We also have a deep sea comedy, "Heavy Swells" and another educational picture.

Wednesday, March 10

Raymond Griffith in "Hands Up." You'll never know what laughter means, until you have seen this picture. Proving that Sherman was wrong and war is—hilarious. Griffith has them all beat. He was the star in "Forty Winks," "Pallis to Paupers," "The Night Club," and others. Honestly this is the best ever. Also a Fox News reel. Travel the world with the News reels. The very best form of travel.

Communication

Charlevoix, March 2, 1926.

Editor Sentinel:

There has been such a general misunderstanding coupled with some special criticisms, concerning the election held yesterday that an explanation of the situation might be beneficial and instructive to some of the electors.

The Legislature of 1925 passed a new election law. It was not the usual amendment of parts of the old law, but a complete election code, and repealed all of the former laws on the subject of elections. It changed the date of the spring primary from the first Wednesday in March to the first Monday in March. It also changed the time limit for filing nominating petitions. Under the former law the last day for filing such petitions was the twenty-first day before the day of the primary. Under the new law the last day is the fifth Tuesday before the primary, which date this year was January 26th. It happened that the change advancing the time limit for filing petitions escaped general notice until it was too late. This condition was general throughout the state. Charlevoix was no exception. Few were concerned about election on January 26th, with an election to be held in the spring.

It seemed to be the impression of some electors who found a blank ballot at the polls, that certain city officials were negligent and failed to perform their duty. That impression is wrong. It is not the duty of any official to notify candidates for office as to the time within which their petitions must be filed. That is for the candidate himself to look after. The sole duty of the officials is to give the prescribed notices of registration and election, and to cause the ballots to be prepared. Neither the City Clerk, Mayor, Common Council or the City Attorney is charged with any further duty, nor is it their duty to provide electors with ballots with names of candidates printed thereon unless the candidates have taken the steps necessary thereto. So-called slips must be provided by the candidate. The city does not and cannot provide them. Neither can the city legally print and furnish the so called instruction ballots. Candidates may obtain them if they wish, at their own expense.

The reason that the ballots in use in this election were blank is because no candidate filed the necessary nominating petitions. As a result, the voter must either write in the names of his, or her, choice or use a printed slip. Charges that the recent situation was contrived by city officials and others for the purpose of deceiving someone are false and absurd. As a matter of fact, the failure to notice the change in the law worked to the disadvantage of those city officials who were seeking a renomination as it prevented them from getting their names printed on the ballot.

In passing I wish to drop this suggestion for the benefit of taxpayers. A primary election is held to enable a political party to choose its nominees for office by direct vote. It is not a final election. It costs as much, if not more, than a general election. This cost can be saved.

The Y. P. S. C. E. of the Congregational church planned and carried out a most pleasant sleighride to the Emmet Cutler farm last Monday night. About thirty young people were in the company which included Mr. and Mrs. Matteson and Mrs. Herrington. A potluck supper was followed by a program of games. The Social committee plans another good time for the 15th.

—— PERSONALS ——

Attorney Rollie L. Lewis and Earl A. Young spent some time in Lansing on business last week.

Mr. and Mrs. Albon Smith spent Sunday with friends in Boyne City, making the round trip by automobile.

Mrs. Anna K. Wood, for some weeks past a visitor in Duluth and Chicago, returned to her home here early this week.

Ernest G. Loeb for the past month a visitor in the south, mainly in Alabama and Havana, returned to Charlevoix last Thursday.

Mrs. Joseph Howard left for Sault Ste. Marie last Monday, where she will visit her sister, Mrs. Emory Pierce and family for a few days.

Mrs. Charles Hamlin went to Detroit early this week and will spend a few days in that city on business before returning to Charlevoix.

Captain and Mrs. James Gallagher, son Charles and Mrs. Green motored over from Boyne City and spent some time here last Saturday.

Orley Friend of Bellaire, spent Wednesday and Thursday here the guest of his sister, Mrs. Hugh L. Brady and family and other friends.

Mr. and Mrs. H. S. Harsha, for several weeks with relatives and friends in Detroit, are again occupying the State street family residence.

Mr. and Mrs. E. A. Robinson of Boyne City, motored over and spent Sunday with Mrs. Robinson's parents, Mr. and Mrs. A. E. Edwards in this city.

We hear that Dr. R. B. Armstrong is traveling north and expects to arrive in this city within a very few days, probably the latter part of this week.

Mr. and Mrs. Harrison Bedford have finished their trip through the South and are spending a short time in Waukesha, Wis., before returning to Michigan.

Mrs. R. A. Emrey made a business trip to Grand Rapids last Monday going via Boyne City by automobile. She returns probably some time during the week.

Mr. and Mrs. Will Graves went to Chicago a few days ago and will probably remain in the big city until about June 1st, when they will return to Charlevoix.

Entertainment by M. E Literary and Sewing Club at M. E. church Friday evening, March 12th. A short play and single numbers on program, with good music. Price 20 and 35c.

Mr. Gerald W. Richardson returned from his vacation spent in the south, Miami, Fla., and Havana, Cuba, last Tuesday and is again on duty at the Charlevoix State Savings Bank.

Messrs. Joseph Howard and J. J. Hallett left for Grand Rapids last Monday afternoon to serve as members of the Grand Jury in the Federal Court, Western District of Michigan.

Entertainment by the M. E Literary and Sewing Club at the Methodist Episcopal church, Friday evening, March 12th. A short play and single numbers on program, with good music. Price 20 and 35c.

The Pilgrim Circle of the Congregational Ladies' Aid Society, was entertained last Tuesday at the home of Mrs. A. Russell on Dixon avenue. The circle will meet Tuesday, March 9th, at Mrs. Saltoustall's for work.

Mrs Henry Partridge and two children left for Detroit Monday, going by way of Boyne City and then south via the Pennsylvania line. She will spend about two weeks in Detroit with her parents and other relatives before returning.

W. S. Darling of Harbor Springs, deputy collector of internal revenue for this district, was here Tuesday and Wednesday assisting local citizens with their income tax reports and attending to business incident to the duties require in an official capacity.

Mr. and Mrs. Franklin C. Sears, for some weeks past visitors in Florida, returned to this city last Sunday evening. They made the round trip by automobile. It was a most pleasant journey and no or less heavy driving a goodly part of which was in the drive before entering this state.

Fred B. Wells, of Cass county, representative in the State Legislature and present speaker of the house, announces his candidacy for the office of Lieutenant Governor on the Republican ticket. In this ambition he will be opposed by Mr. George Welsh, of Grand Rapids, at present Lieutenant Governor and also a candidate for renomination.

Members of the Royal Neighbors of America have arranged for an old time dancing party at Lakeside pavilion, Wednesday evening, March 10th. A general invitation is extended to the public to participate in the event. An admission fee of 75c per couple with 25c each for extra ladies will be charged. Special good music will be provided for the occasion.

CHARLEVOIX

Oh Charlevoix, the beautiful, the place I love to be,
Surrounding lakes of clearest blue, down by the Inland Sea!
Thy daughters all are charming, thy sons have manly grace:—
Each summer time returning, they flock back to thy place.
Oh Charlevoix, we hail thee! And in the years to come,
We'll love thy ways,
And sing thy praise
Until our days are done.

Oh, take me back to Charlevoix, by the side of the big, blue sea,
Where the balmy air, the ozone rare, will cheer and comfort me;
In a shady greenplot let me down, where chattering red squirrels hide;
And on the right the terraced town, and on the left the tide.
Oh Charlevoix, no greater boon than this could I bespeak;
The rippling lake,
Would music make,
And lull me fast asleep.
—F. F. McMillan, M.D.

Improvements are being made at the Sugar Bowl this week with Merritt Miller superintending the work for Mr. Gladeo. In the main the work under way includes a complete refinish of the already fine appearing room used by patrons.

A large number of automobile drivers have within the past few days, added a good substantial shovel to their equipment of tools. From reports received we judge that a good shovel, particularly on some of the cross country trails, is mighty essential if progress is made for pleasure or for business.

Although the deer season of 1925 was five days shorter than any previous year, more hunting licenses were sold than at any time since it became necessary for hunters to pay the state for this privilege. The final tabulation of the past season shows that 41,818 residents paid $2.50 each to the endeavor to bag their buck, while 350 non-residents contributed $50 each. Camp License to the number of 1,000 were sold.

This issue of the Sentinel carries several legals that are of interest to local sportsmen, particularly fishermen, who enjoy following the streams in order to catch brook trout or those having a preference for the larger members of the finny varieties found in larger bodies of water. The orders all are of recent issue, some of which are modifications of earlier edicts but all are for the benefit of sportsmen and promulgated for the purpose of game fish protection.

Mr. Lawrence R. Chase has established his real estate business and taken space for same in the building with the Crooks Abstract and Engineering Company, where he will be found in the future. This arrangement was perfected early this week. Notwithstanding the fact that he is for the present only at his office evenings and Sundays, he will be able to transact business with those having real estate for sale or to rent during the day time by telephone. Mr. Chase has had considerable experience in the real estate business and has a number of choice properties for sale and rent. He will be found in the future at the office of the Crooks Abstract and Engineering Company, where he will be found in the future. This arrangement was perfected early this week. School Census

Annual school census for this year will be taken, between March 11th and April 1st. Enumerators will receive special instruction by letter from the County Commissioner of Schools.
A. C. BELDING, Commissioner.

Growth of Hair

Hair grows much faster in the summer than in any other season of the year. This is due partly to the heat of the sun and partly to the opening of the pores of the skin, and the escape, in the form of perspiration, of body poisons which, unexploited, arrest the growth of the hair. It has been noticed that those whose work induces perspiration nearly always have luxuriant hair.

Patriotic Hymn Not of American Origin

The British have a rather claim to the time "America"; we are the ones who borrowed it.

Dr. John Bull, an eminent English composer and organist, is sometimes credited with having written "God Save the King" in about the year 1690, the king he had in mind being James I. A manuscript of the song, attributed to Bull, is still exhibited at the cathedral of Antwerp, where he was organist at the time of his death in 1628.

The hymn did not then, nor for a long time afterward, become the British national anthem; and its authorship is more commonly ascribed to Henry Carey, an Eighteenth century composer, than to Bull. If Bull did write the original, at least Carey recast both words and music about 1740, at the behest of one of the London trade guilds, the Mercers' company, in honor of a birthday of George II.

Whoever first fitted it up as a hymn for the king, it is probable that both the music and the opening words were suggested by a religious composition of medieval origin. Since Carey's time the hymn has been sung in numerous versions and many kinds.

The verses we in this country sing to the tune were written by Rev. Samuel F. Smith, a Baptist clergyman and editor of Massachusetts, who loved the air but thought Americans should sing a more American version than "God Save the King." Consequently, about 1832, he wrote "America." Smith, who died in 1895, lived to see his hymn become the most popular of American patriotic songs.

Synthetic Gold

The first sample of synthetic gold that has reached this country is to be on exhibit in the collection of elements at the American Museum of Natural History in New York. Dr. George F. Kunz, curator of gems, claims the difficult task of gathering together samples of as many of the 92 elements as are obtained or exhibited, says that the sample of white is said to be symbolic gold in a tiny speck. It is a product from the laboratory of Prof. Hantaro Nagaoka, of the Tokio Imperial university, who obtained microscopic quantities of what are reported to be artificial gold from mercury by running a mercury lamp for a long period and energizing extremely high voltage. Professor Nagaoka has in his collection the first crystals of pure fluoride of lutecium and metallic lutecium. He has not yet published samples of the two new elements, rhenium and masurium.

Human Electric Waves

Professor Skripsky of the Leningrad Electro-Technical institute, who has already proved that the human body is able to radiate electro-magnetic waves, has succeeded in constructing an apparatus for capturing and measuring these waves, which, according to Professor Skripsky, will enable scientists to give theoretical characteristics to every individual.

Electro-magnetic waves are peculiar to every human being, and a change in them depends on the state of health and the frame of mind," says Professor Skripsky. Details of his invention are as yet kept a great secret.

Leningrad scientists describe Professor Skripsky's invention as "the great service in the domain of biology and physiology."

Way to Treat Them

"The way to treat cubism and dadaism and super-realism and all the other catchpenny fads is to laugh at them," said Pete du Bois, the artist, at a dinner in New York.

"A super-realistic painter was giving an exhibition. He buttonholed a well-dressed chap—a good prospect, as they say in the business world—and led him up to a picture and began:

"'This will show you, old man, the thing I'm after. We super-realists, you see, strive for the complete of the superficious, we paint esoterically and not exotically, portraying only that in the nura or inner urge. Do you follow me?'

"'Follow you?' said the prospect. 'Gosh, I'm ahead of you. I came out of the hug-house last Monday.'"

Latest Passenger Plane

To be used in the cross-channel service between France and England, a single 650-horse power engined airplane to seat 14 passengers, has been built in a British aircraft factory. It has a large, roomy cabin with wicker armchairs for the passengers, who will have a constant supply of fresh air by means of special ventilation. Emergency exits are provided in the room should it be necessary for the passengers to emerge in case of landing on the sea, in which case the wheels, axis and undercarriage struts can be dropped by means of a lever in the pilot's cockpit. The body of the machine is watertight and brought and would float for several hours.

Ain't or, Isn't

Billy, three-year-old son of Mr. and Mrs. Harry McClain Shelbyville, has a fondness for William Herschell's poem, "Ain't God Good to Indians?" but there was one clause concerning it that had to be settled.

A few days ago Billy approached his mother, a troubled expression revealing that something difficult was paralleling through his juvenile mind.

"Mother," he said, "there's something I don't understand. You tell me to say 'Ain't' instead of 'isn't,' yet you don't care when I say, 'Ain't God Good to Indians?'"

And mother isn't—or ain't—through explaining yet!—Indianapolis News.

Anyway

Somebody who cracks that it often takes a man's children to make sense of him. At any rate they can get married and make a grandfather of him.—Strickland Gillilan in Farm Life.

Only Chemical Food.

Scientists say there is no plant that does not serve as food for some animal; but the only article used as food from the mineral kingdom is common salt.

Havana Gets Skyscraper

In Cuba, up to the present time, the highest buildings were about ten stories, which would equal the height of a 20-story building in the United States, owing to the fact that higher ceilings for all floors have to be allowed there on account of the climate. However, Havana is to have a new building 20 stories high, which will correspond with the highest buildings used for business and hotels in the United States.

Prevention is the best bridle.

Garfield Tea

Was Your Grandmother's Remedy

For every stomach and intestinal ill. This good old-fashioned herb home remedy for constipation, stomach ills and other derangements of the system so prevalent these days is in even greater favor as a family medicine than in your grandmother's day.

Herbaceous, gently vegetable, infants' and Children's Laxative, on every label. Guaranteed non-narcotic, non-habit-forming.

MRS. WINSLOW'S SYRUP
The Infants' and Children's Regulator

Children grow healthy and free from colic, diarrhoea, flatulency constipation and other troubles if given it at teething time. Mrs. Winslow's always brings relief, safe, sure and gratifying results. At All Druggists.

Green's August Flower for Constipation, Indigestion and Torpid Liver
Relieves that feeling of having eaten unwisely. 30c and 90c bottles. AT ALL DRUGGISTS.

The Valley of Voices

By GEORGE MARSH

Author of "Tollers of the Trail," "The Whelps of the Wolf"

(W. N. U. Service.) (Copyright by the Page Publishing Co.)

CHAPTER X—Continued

—7—

"Can we run it?" he called, above the thunder of the white-water, muscles set in a crouch, nerves raw with suspense.

"Down, flat!"

With a fierce lunge of his blade, David swung the nose of the craft toward the beach as an Indian rose to his feet in the low scrub. In mockery of his victims the assassin laughed as he deliberately raised his rifle. But the Manslicher with the nine shell spat first and the surprised Ojibway crumpled where he stood.

"Down!" cried David. A rifle exploded on the shore, and the men in the boat again flattened, as a bullet splintered the gunwale. Then, caught in the pull of the first pitch, the canoe slid sidewise, until straightened by the lunge of two paddles, and leaped down, out of range of the beach, into the white half-mile of the boiling Frying Pan.

The thought of two women who would wait for his coming—the mother at home and the girl far on the Wailing—wait while two battered bodies lay stiff in the ice somewhere along the Jacatish, flashed through Steele's brain, then the battle was on.

As the boat shot down the first flume, the stark despair which had gripped Steele when they had been sucked into the bend of the rapid, gave way to desperate hope. For it was clear, from the insistence of David on the poles being free in the boat, that he had foreseen the possibility of being driven into the Frying Pan. He believed the fight to get through worth making.

On leaped the canoe, like a runaway horse, ever seeking the dark water channels, hanging momentarily on the lip of disaster, only to be lifted and flung off by the pole of the fighting bow-man; hurying its nose to the spume of broken water, to rise, shake free, and plunge on into the white riot beyond.

Finally, as the rock walls of the gorge swept past in a gray blur to eyes which hunted the water trail ahead, David's right hand shot up and circled in the air then regripped his paddle.

"Whirlpool!" gasped Steele, the hope which had grown with the passing moments, dying.

A matter of seconds and they would take the big chute ahead; beyond this, the suck of the whirling water. Once in the grip of the eddy, the canoe would up-end and go down—into the maw of the vortex.

From braced knees the bow-man, leaning far out-board, with bowed back, fought the nose of the boat inshore as it plunged and took the chute; then, as it shot with the current for the pool below, two madmen battled with their blades for the inches—inches which meant victory or—

With a leap the canoe hit the pool; wavered, caught in the lip of the eddy; but held by the lunging blades, steered off, was free, and shot on; then, charging through a stretch of broken water, rode the "boilers" below the last pitch and out into the easy going of the open river.

With legs awash in the slop picked up in the rapids, panting, spent, the two men smiled into each other's drawn faces.

"We licked 'em both, Laflamme and the Frying Pan!" gasped Steele.

"Good job, dat!" grunted the Ojibway, proudly, between breaths. "Dey say we lie—w'en we tell dem—at Nepigon. Now we run back—an' set de Windigo!"

"And Laflamme!"

"We get heem anyway—de Windigo, mebbe."

"Thought you said it couldn't be run?"

"Wal, I look her ovair one tam, and I t'ink of you keep her side ov dat eddy, you can run eet."

"We beat it, but I thought it had us when we struck it. I heard but one shot from the shore when we started; do you suppose that there were only two there?"

"Unless two, I t'ink. Dey wait for us to come out. W'en I hit dat one, de odder get scare. He not know 'bout dat shell. Dat eag w'y he miss."

"That was good shooting, David! You fired so quickly, you couldn't have seen the sights—and our only shot."

"Wal, we drop down piece, get de water out, and patch her up. I got two bad leaks under me."

"Suppose that Indian follows down the gorge, he'll get a pot shot at us if we go ashore here."

David laughed loudly. "W'en he see us hold for de Frying Pan, he say 'Bo-Jo-le! Dere go two dead men!' He weel not follow."

CHAPTER XI

For a week the two voyageurs had traveled on half rations eked out with an occasional pike or deer, which had been lured with much patience from their winter lethargy, but each morning as they ruefully surveyed the fading food supply, Steele had reiterated: "You t'ink I starve two men who've run the Frying Pan?"

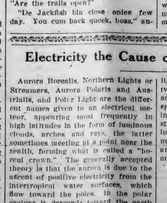
Then followed silent hours of paddling which the thoughts of David centered largely on the future consumption of savory moose steaks at Nepigon House, while for Steele, heart hunger and the necessity for an early solution of the problem at Wailing River had served as anodyne to his craving for food.

Another week and Steele was hurrying east on the Canadian Pacific. Arriving in New York and reporting at the museum, he readily obtained permission to follow up this most amazing example of the abnormal in the habits of Canadian mammals, inextricably involved with Indian superstition in so baffling a manner as to defy any ordinary methods of solution.

On the way west—once made frequent trips to the baggage car to talk to a long-eared, wrinkle-faced hound.

"If I had had you, old boy, last September, up on Big Feather lake," he often repeated regretfully, rubbing the ears of the great black and tan beast, "there would be one less Windigo in the Wailing River country. I don't know what you can do on the snow. You may freeze in that country, with your short hair, but you're surely going to have a chance to help us out when we lose a trail. The huskies haven't got your nose, and won't hold to a trail as you will. And when that fox-hom boy of yours booms out over the hills, there's going to be a general scramble for cover among the beasts and devils that bear it."

The bloodhound, trained in the Tennessee hills, had arrived in New York in response to an urgent telegram from Steele to a friend who loved the man-hunters on his southern plantation. There was no doubt in Steele's



"Whirlpool!" Gasped Steele, the Hope Which Had Grown With the Passing Moments Dying.

mind that the riddle of the Windigo would have been solved in the autumn, had he had a bloodhound at Wailing River. But the ability of the moon-bred dog to hold a trail on the strange medium of snow or ice was a matter of conjecture, even to those who he had consulted. However, as there would be no great snow until March, daylight tracking would be easy in the new snow. It was for night work that the absence of shadows obliterates a snow trail, and when a trail followed wind-swept ice, that Steele had gambled on the sensitive nose of the bloodhound to aid them.

In his wallet he carried a sealed letter of instruction from the Montreal headquarters of the Revillon Freres, addressed to Lascelles at Fort Albany, supplementing orders to be sent with the Christmas mail packet by the Abbitibi route. But, as he was informed, "business was business," and the payment to the company for the value of the fur lost by St. Onge would not justify the management, against the advice of their inspector at Albany, in keeping the post open, as it had never done well.

At Ottawa, Steele had been assured that a police canoe would be despatched to Ogoke in the early spring, but that all available men would be on duty elsewhere during the winter on more pressing business.

So, as his train carried him west through the white wilderness to Nepigon station, where David was to meet him with the best dog-team obtainable, the problem he faced continued unchanged by his trip east. It still remained for Michel, David and himself unaided, to run down the beast or beasts which had spread terror through the valley of the Wailing, and to hold the Indians on their traplines. There was yet the mysterious tragedy at the Devil's Mile to be solved before the taboo would be lifted from the lower river.

At Nepigon station a five-dog sled, driven by a half-breed, waited in the snow for the passenger with the bloodhound, and only the swift use of David's long, curiously-hilt whip saved the dazed beast from speedy annihilation by the team of half-wild huskies.

"Hello, David!" cried Steele, keeping his dog at a distance from the white fangs which threatened him. "Are the trails open?"

"De Jackfish his close onlee few day. You cum back queek, boss," answered the Ojibway, a wide grin furrowing his face.

"We've got plenty of planning to do at Nepigon home before we start. Guess how many shells I've got for your Mannlicher."

"Wal, I need one for fi'ty or yours, an' 'noder for bear dat seeng lak de cut—two oes all, I t'ink."

Steele laughed. "Uh, I've got a few more than that for you. You may need more, or meet someone at the Frying Pan some time, so I've brought you three hundred. How's the family? Does your wife object to your going?"

"She say she t'ink I got girl down at Wailing Riviere."

Three days of sledding over a good trail, for the snow was not deep, brought the team to Nepigon House at the head of the great Nepigon lake which was partly iced over. There, while the bloodhound, wearing a blanket, became somewhat more accustomed to the cold, and the huskies were forcibly taught to respect him as a permanent member of the party, David and Steele made their plans for a campaign on the snow.

Each white mile they put behind them, each camp they made at night, meant to the impatient Steele, one mile, one day, nearer the girl who needed them. But, as he broke trail ahead of the team, when they cut back from the skine ig circle rapids or quick-water, or rode in the easy going of the river ice, the task he had set for himself and his two friends appeared more and more difficult of accomplishment. Suppose the Windigo were not again to appear in the valley; or, they might not again cross its trail? What then? The storm had been done, and the Indians would continue to desert the Wailing as the rumors spread.

In that case, it was a lost cause—hopeless. Only in the event of the early reappearance of the beast at the post when they could speedily take up the trail and stay on it until they came up with the owner of the voice, could a swift solution of the mystery be possible. The future looked gray to Steele.

However there was one ray of light in the gloom of his fear of failure. Michel had definite suspicions, of some nature or other, which he had promised to share on Steele's return to Wailing River. And as Steele and David nightly sat under their sled tent before a fire in the heart of a spruce thicket, and talked over after-supper pipes, the optimism of David was so marked that the American knew that the clue which had, for some reason, been kept from him deeply impressed the Indian.

At last, through the early dusk which shut down on the valley one November afternoon, gleamed the yellow lights of Wailing River.

The pulse of Steele speeded as he smote out the tiniest shape of the house which Denise St. Onge called home. The morning he went away she had come to him with mist in her eyes. Would they shine again, he wondered, with that new light, now that he had come back to fight for her, or would she freeze into that other self—hold him at a distance because of her quixotic bargain with Charles?

Steele opened the door of the trade-house, followed by David. At their entrance, St. Onge turned in his chair behind the slab counter where he sat in conversation with his head man.

"Good evening, gentlemen!" The voice of Steele rang in the silent room. With eyes wide with amazement, and surprise, St. Onge slowly rose to his feet, while the lean face of the Iroquois thrust forward, tense, apprehensive, as if he feared a trick of vision.

"Ho-Jo, Michel! W'at you t'ink you see, de Windigo?" And David grinned with unrestrained glee.

"We have returned as we promised, monsieur!" added Steele, approaching the counter behind which the startled men stood, staring at the hooded apparitions.

Then, with a yell and a hound, Michel cleared the counter and was hugging the lokey Ojibway.

(TO BE CONTINUED)

Growth of Law Library

A law library which would have been complete, with all of the volumes of American decisions and all of the volumes of American statutes, has recently been extended to have contained one hundred years ago about 180 volumes of decisions and 60 volumes of statutes, says the Nation's Business magazine. Today, it is said, a library which would be complete in the same sense would contain 18,500 volumes of decisions and 5,500 volumes of statutes. One hundred years in the future, if the increase during the last century is maintained, such a library would have to contain 1,850,000 volumes of decisions and 550,000 volumes of statutes.

Electricity the Cause of Auroral Displays

Aurora Borealis, Northern Lights or Streamers, Aurora Polaris and Australis, and Polar Lights are the different names given to an electrical phenomenon, appearing most frequently in high latitudes in the form of luminous clouds, arches and rays, the latter sometimes meeting in a point near the zenith, forming what is called a "boreal crown." The generally accepted theory is that the auroral is due to the ascent of positive electricity from the interrupted water surfaces, which flow toward the poles. In the polar regions it descends toward the earth and comes in contact with the terrestrial negative electricity, which results in luminous discharges of great brilliancy. Intimate relations exist between sun spots, magnetic storms and aurora, the appearance of a large spot on the solar disk being almost invariably accompanied by a magnetic storm in all parts of the globe. During magnetic storms auroral displays usually take place, but not all auroras are coincident with magnetic disturbances.

Plain Spoken

"You walk very quickly?"

"I walk faster when I am by myself!"

"I'm glad I'm not walking with you when you are by yourself."

PHONE'S BIRTH WILL BE NOTED HERE MARCH 10

MICHIGAN BELL EMPLOYEES WILL SHOW INTRICACIES OF SERVICE TO SUBSCRIBERS

OPEN HOUSE DATE ANNOUNCED

Workers, Proud of Half Century of Progress, Will Be Hosts at Central Office.

Fifty years ago on March 10 the telephone came to life, for on that date, in 1876, the first complete sentence was spoken and heard over the instrument of speech transmission which was the crude forebear of the highly developed instrument that is so commonly used today.

So, on Wednesday, March 10, employees and patrons of the Michigan Bell Telephone Company throughout Michigan will make special observance of the birth anniversary of the telephone. Similar observances will be held throughout the Bell System in this country and Canada, on that date, according to the local manager of the Michigan Bell, who announces that a special program will be arranged in the local telephone office on March 10 and that many users of the service are expected to be present. An invitation to visit the central offices and telephone plant has been extended to each subscriber of the service.

Local Committee in Charge

The local program of observance on March 10 will be in charge of a local telephone people, assisted by pioneer telephone men and women, members of the telephone employes' associations and early subscribers furnished in the program will be a visit of inspection through the telephone operating rooms and plant by customers of the company, to whom a detailed explanation of the work will be made. The Michigan Bell will hold open house throughout the week, following March 10, to permit those unable to visit the office on that date to do so later. Details of the program will be announced later.

Telephone employes will wear a 50th anniversary button, a telephone on a field of blue with the numerals "50" in white, superimposed.

Development of the telephone service in Michigan has been rapid and growth of the service has outstripped population growth. Only a half a million Michigan Bell operated telephones in the state, in the Bell System, in this country and Canada, are 16,000,000 telephones. The Michigan Bell company is expanding its plant throughout the state upwards of $20,000,000 each year.

Chronology of the Telephone

The history of the telephone, including many Michigan items, has been summarized chronologically as follows:

1876 First words transmitted by telephone.

1876 First complete sentence transmitted by telephone.

First conversation by overhead line two miles—Boston, to Cambridge.

1877 First pair of telephones brought to Michigan by W. A. Jackson.

First Michigan telephone company incorporated.

1878 First Michigan telephone exchange established at Detroit.

1880 80,872 Bell telephone stations in the United States.

Conversation by overhead line, 45 miles—Boston to Providence.

1881 Conversation by underground cable, one-fourth mile.

First Michigan line built, Port Huron to Detroit.

1884 First hard drawn copper toll line built, Detroit to Saginaw.

1889 Upper and lower peninsulas of Michigan joined by submarine cable.

1890 211,503 Bell telephone stations.

1891 Michigan's first underground cable laid in Detroit.

1892 Conversation by overhead line, 900 miles—New York to Chicago.

1900 673 telephones in Bell system.

11,600 telephones in Detroit.

1902 First conversation by long distance underground cable 16 miles—New York to Newark.

1903 50,000 Bell telephones in Michigan.

1904 Michigan State Telephone Company incorporated.

1906 Conversation by underground cable, 90 miles—New York to Philadelphia.

1907 100,000 Bell telephones in Michigan.

1910 5,142,492 telephone stations in Bell System.

1911 Conversation by overhead line, 2,160 miles—New York to Denver.

Conversation by overhead line, 3,000 miles—New York to Salt Lake City.

1915 First conversation by transcontinental line, 3,850 miles, Boston to San Francisco.

Speech transmitted for the first time by radio telephone, from Arlington, Va., to San Francisco, over the Hawaiian Islands, and across the Atlantic to Paris.

First Michigan telephone repeaters installed on toll circuits at Pelonkey.

1918 Second submarine cable placed across Straits of Mackinac.

1920 13,786,747 telephone stations in Bell System.

1921 Conversation by deep sea cable, 115 miles, Key West, Fla., to Havana, Cuba.

First conversation between Havana, Cuba, and Catalina Island by submarine cable, overhead and underground lines and radio telephone—distance 5,600 miles.

President Harding's inaugural address delivered by loud speaker to more than 100,000 people.

Armistice Day exercises at burial of Unknown Soldier delivered by loud speaker and long lines to more than 150,000 people in Arlington, Va., New York and San Francisco.

800,000 Bell telephones in Michigan.

1923 Ship-to-shore conversation by wire and wireless with S. S. America, 400 miles at sea in Pacific.

1923 Successful demonstration of trans-oceanic radio telephony from New York City to New Southgate, England.

First broadcasting of a presidential message to Congress, 400,000 Bell telephones in Michigan.

1924 Pictures sent by telephone circuit from Cleveland to New York and New York to Chicago.

Nation-wide mobilization of communication by wire and wireless for the United States Army on Defense Test Day.

1925 15,906,550 telephone stations in Bell System.

800,000 Bell telephones in Michigan.

852,000 telephones in Detroit.

1926 Fiftieth anniversary of the telephone nationally observed.

Freak Formation of Trees Not Uncommon

If anyone doubts that Nature has a sense of humor, he had better turn his attention to trees, and see what queer things she invents at times.

Evidently the long neck of the giraffe struck her as a joke that would keep repeating, for she has copied it almost to perfection in Key West, Fla. There, in what is known as Maloney's garden, is to be seen the giraffe tree, a date palm grafted onto a fig tree.

The graft has taken place about five feet from the ground, and is so far to support it the fig tree has flung several roots across and around it. The date palm has curved downward, and upward until it presents a faithful copy of a giraffe's neck, at the top of which shoot out the orthodox leaves, mingling on its left with those of the fig tree.

The Siamese twins offered Nature a chance too good to be lost, and she has reproduced them nearly as true in the tree family. There was a tree of this kind at Palgnon, in Devon, England, and in the United States there are two splendid specimens.

At Sterling, in Massachusetts, two great oaks are solidly joined by a transversal branch or trunk a year's long and as thick as a man's body; while in New York state there are two ash trees joined by a thick branch which takes their trunks (distant one from the other more than 20 feet) at a considerable height from the ground.

Some years ago Nature discovered a distinct quarter-note chimney in Siam. Very soon a green branch was seen peering out of the top of the chimney, and it rapidly became a bouquet of greenery. The whole thing looked like an immense flower vase, but it is more than likely that by this time the roots inside the chimney have burst the brickwork, and that the "vase" has crumbled away.

Fewer Aliens Seek to Become U. S. Citizens

New York—There was an extraordinary decrease in the number of aliens applying for their first step toward citizenship papers during 1924-25, according to a summary and analysis of the 1925 annual report of the United States bureau of naturalization prepared by Harold Fields, executive director of the League for American Citizenship, and just made public.

Fields points out that applications after 1922 had shown a marked tendency to rise.

The statistics for the year July, 1924, to June, 1925, as analyzed by Fields, show that 277,218 aliens applied for first papers or made declarations of intention, as compared with 424,540 the year before. Of those applying this year, 225,293 were for men and 51,927 for women. The working force of 1922 is thus evidently working favorably for 13.5 per cent of the applicants for first papers in 1924 were women, while in 1925 they were approximately 20 per cent.

Over Hills, Poorhouse, for Beauty Queen at 68

Janesville, Wis.—Mary Lulu Leseventy-one years old, who was a "beauty" exactly a little over a year ago, rode through the streets to the poorhouse, recently. She outran a hundred aspiring young women for the honor of being acclaimed queen of beauty in a theater publicity campaign.

Her victory in the contest was caused by a press agent whose stunt got beyond control. Her name struck the fancy of the voting populace and before those in charge knew she was a woman of sixty-nine and lived in a little shack in the railroad yards, she had a commanding lead.

The poorhouse became a necessity when her husband, Austin, broke a leg. He appealed to the county for aid.

TRAVEL FAR IN HEALTH SERVICE

Nurses Take Work of Children's Bureau Into Remote Regions.

Washington. — Two public-health nurses attached to the maternity and infancy division of the children's bureau have just come in to headquarters after being in the field for several months. One, Miss Marie T. Phelan, has been engaged in advising and demonstrating to state nurses, while the other, Miss Elsie Witchen, has been doing actual work in a remote district of 10,000 square miles, where the railroad touches at one spot only.

The experiences of these two nurses show the great need for the work done by the maternity and infancy division under the Sheppard-Towner act, as well as the fact that the people of these inaccessible regions are eager to avail themselves of the opportunities offered.

Miss Witchen covered in eight months approximately 13,300 miles. All of this trip was made by motor car, which she drove herself. For the most part she traveled alone and was obliged to change a tire by moonlight. The roads were so little traveled that there were no tourists nor local residents to come to her assistance.

Though much of the trip was made over some of the most beautiful roads and through the most spectacular scenery in this country there were also some of the world's worst roads to be gone over. One was called the Jump, and took its name from the double "S" curves and the terrific drop. One of the greatest thrills this woman experienced was the day she met a truck on this road and both stopped with their radiators touching.

There was one town which had to be reached by horseback trail, since it was impossible to take an automobile through. This was through barren country, where there were no grass or trees.

The people of this district do not live on their farms and work in that way. They live together in small communities of perhaps 300 to 1,500 inhabitants, and ride out daily to their farms or ranches. Originally they adopted this mode of living as a protection against the Indians. While a number are now doing diversified farming, the large majority are engaged in raising cattle and sheep. Miss Witchen says that one day while driving alone she met a herd of 10,000 head of sheep on their way to northern markets. Almost any motorist has had the experience of trying to dodge two or three cows in the middle of the road, but for a lone woman to meet a herd of 10,000 sheep would seem like a fantastic nightmare.

Co-operate With State Officials.

The children's bureau representative undertook work in this region at the invitation of the state health officials and worked in co-operation with them. She also worked with the local health center associations and the various woman's relief associations. She terms as probably the most outstanding work done that of the local antitoxin clinics for the prevention of diphtheria. There had never before been any work done along this line, and during her stay 708 local or preschool children were inoculated.

Child-health conferences were held in 15 towns at which 902 infants and small children were examined. Many corrections of physical defects resulted from the home follow-up work done by the nurse in this connection.

Another very interesting thing accomplished was the eager co-operation received in the preventive treatment of goiter. This section of the United States is known to be a goitrous country and goiters are prevalent, especially among the mothers. The nurse in charge of this work, therefore exploited at the meetings held the use of iodized table salt as a substitute for the ordinary salt. This, of course, is more of a preventive measure than a curative one. In most of the towns the people had never heard of iodized salt, but by the time the workers left it could be obtained practically everywhere. In one place, in fact, the merchants reported that the people had become 100 per cent converted to the use of it in place of the ordinary salt.

The children's bureau worker held classes for mothers and expectant mothers and found everywhere an eager desire for information. These towns are small and many miles apart. Often the nearest physician was 150 miles away. Usually patients were taken in to the doctor or advice was given over the telephone. In a section of such vast distances it is important for the people to have some understanding of first aid and some knowledge of hygiene.

Saved Life of Child.

In one town where the worker was staying a message came that a child near by was very ill and the nurse was asked to go and look at him. The mother thought that probably he was suffering from stomach ache as the result of overindulgence in green apples. The nurse, however, had a different opinion and suspected a ruptured appendix. The child was taken to a hospital 150 miles away, where in operation saved his life.

Another child hurt his leg while playing, but it was not thought that the injury was serious. However, when it did not improve as quickly as could be ordinarily expected, the advice of the nurse was sought. She thought that there might be a green stick fracture and applied first-aid splints. The child was then taken 40 miles to a physician. Another emergency case was a broken collar bone. The nurse was able to apply first-aid so that the patient might travel the necessary 60 miles to a doctor.

Whenever a clinic was held children were brought in from distances of 15 and 20 miles. This was particularly true of the toxin antitoxin clinics. At one of these clinics one flivver brought 14 people—two adults and 11 children. In another town the leading merchant donated his truck, which made trips to all the outlying districts, bringing in the children. It is a section of large families. Seven or eight children is a small family.

Permanent Workers Go There.

The object of all this work was to show the value of enlightened modern health education, particularly in so far as mothers and babies are concerned, for people in rural communities where the medical and nursing facilities are more or less inadequate. A number of this work is that next year permanent workers are to be established in this section.

Miss Marie T. Phelan, who was cooperating with state nurses, was away nearly four months and in that time was in Minnesota, Nebraska, Utah, New Mexico, Nevada and South Carolina. In New Mexico the work consisted largely of conducting classes for midwives, who are usually Spanish-Americans speaking very little English. She says that these women learn amazingly quick, considering their limited English.

In South Carolina she attended an institute for nurses and assisted the nurse in charge with the examination of midwives, who had been attending clinics. Most of these were negroes, and some of the replies made to questions asked were very amusing. When one was asked regarding the effect of the mother's diet upon the child she replied: "Green vegetables stick their bones together."

Red Knee Breeches Worn by Girls in Switzerland

Geneva.—The short shirt still holds sway as the favored costume of American and European girls during the visit of the Swiss mountain resorts. But knee breeches are clearly the thing for skiing and bob sledding.

Observation at the more noted winter resorts in Switzerland has shown emphatically that youthful American and youthful England are going in more and more for knee breeches. The young people are letting their parents and their older brothers and sisters find contentment in bridge, billiards and other indoor games, while they disport themselves on the snow and ice.

One particularly striking costume recently seen on the skating rink at St. Moritz was a short-kilted skirt of violet-colored woolen material, with a knitted jacket of the same shade, and a woolen cap to match edged with sable.

For skiing the knee breeches are often of red material. They are worn with a white blouse and red woolen waistcoat and a white knitted cap.

The gaiety surprised us that, after the morning efforts, the young women take their trunk without waiting to change their clothes. After lunch and coffee comes a brief siesta, after which the young people join their afternoon pursuits or the invigorating sleigh-driving. Then comes more dancing, which lasts well into the night, the dancing parties are open to the public, and they do not break up until the early hours of the morning.

Famous "Newspaper Row"

A part of the site chosen for the new National Press building was known as Washington's Square in the row in Civil war days. G. A. Townsend is authority for the statement that newspaper correspondents had pitched tents this block before a hotel was completed. The correspondents previously to government buildings, telegraph offices and lines of communication made it their base. This phase of affairs was known the country over as "Newspaper Row." Then many dwellings were converted into hotel property the correspondents continued to occupy the offices. When the Riddle house was rebuilt the projector reserved the basement story for newspaper men's quarters. The building which is to be erected on this favorable location will be the second home of the Washington bureaus of many of the leading newspapers of the country, as well as of the National Press club.

Refined Scrap Metals

According to data collected at the Bureau of Mines, Washington, during 1923, the establishments engaged primarily in the smelting and refining of scrap metals other than gold, silver and platinum reported products valued at $2,376,201, a large increase of 1922 per cent as compared with 1921, the last preceding census year.

The Pistol Cracked

The runners were lined up, ready and eager. A deathlike hush gripped the people in the stands. The starter stood ready, with his gun raised above his head.

"On your marks!" The runners crouched down.

"Get set!" They leaned forward. The pistol cracked. They were off with a leap and down the track they they had to be called back, because the pistol had misfired and a new one had to be procured.—Kentucky Gateway.

STATE OF MICHIGAN— The Circuit for the County of Charlevoix—In Chancery.

James L. Tunath, Plaintiff

vs.

Joseph Graham, ue his unknown heirs, devisees, legatees and assigns; Lester Collentz, or his unknown heirs, devisees, legatees and assigns; Julian M. Wheeler, or his unknown heirs, devisees, legatees and assigns; William Green, or his unknown heirs, devisees, legatees and assigns; and the Bradley Manufacturing Company, a Wisconsin corporation, Defendants.

Suit pending in the Circuit Court for the County of Charlevoix, in Chancery at the City of Charlevoix on the 27th February, 1926.

In this cause it appearing that it is not known whether the said Joseph Graham, or the said Lester Coblentz, or the said Julian M. Wheeler, or the said William Green, each or any of them is living or dead, or where each or any of them may reside, if living; therefore on motion of Lisle Shanahan, attorney for the said plaintiff, it is ordered, that the said defendants, Joseph Graham, Lester Coblentz, Julian M. Wheeler and William Green, or each of their unknown heirs, devisees, legatees and assigns, enter each, his or their appearance in said cause on or before three months from date of this order; and it appearing that the said Smalley Manufacturing Company, a Wisconsin corporation has no office or offices within the State of Michigan; therefore on motion of Lisle Shahahan, attorney for the said plaintiff, it is ordered that the said Smalley Manufacturing Company, a Wisconsin Corporation enter its appearance in said cause on or before three months from date of this order; and that within twenty days the plaintiff cause this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in the said county of Charlevoix, said publication to be continued once in each week for six weeks in succession, or that he cause a copy of this order or order to be personally served on said defendants at least twenty days before the time above prescribed for their appearance. The above cause to be for the purpose of clearing and quieting the title to the following described lands and premises in the west of section twenty six in township thirty north, range seven west in said plaintiff.

Order Modifying Order Issued by the Conservation Commission by the Twenty-First Day of September, 1925, Prohibiting Trolling from a Motor Boat on the Inland Lakes of this State for a Period of Five Years from the First day of January, 1926.

An order was issued by the Conservation Commission by the Twenty-First Day of September, 1925, prohibiting trolling from a motor boat on the inland lakes of the State for a period of five years from the first day of January, 1926.

It now appears after a thorough investigation by the Director of Conservation of the conditions prevailing in certain inland lakes that the order should be modified as it affects the following lakes: Elk and Torch in the counties of Antrim and Grand Traverse; Pine and Round, Charlevoix; Black, Ottawa county; Portage, Jackson; Pleasant, White and Duck, Muskegon county and St. Clair and any other lakes deeper than 120 feet in depth.

Therefore, the above mentioned order is hereby rescinded as it affects trolling in the said lakes, but in all other regards the order issued on the twenty first day of September, 1925, shall be in full force in full force and effect, for the period of five years from April 1, 1926.

Dated, Lansing, Mich., February 7,1926
JOHN BEARD, Director
Dept. of Conservation.
Conservation Commission by
Edgar Cochran, Secretary. 46-3t

Order Issued by Authority of Act 230 of the Public Acts of 1925, Regulating the Taking of Large and Small Mouthed Bass from the Inland Waters of the Lower Peninsula of the State for a period of Five Years Commencing June 16th, 1926.

STATE OF MICHIGAN, County of Ingham, ss.

The Director of Conservatiin having made a thorough investigation of conditions relative to bass fishing in the inland waters of this state, recommends certain regulations.

Therefore, The Conservation Commission by authority of Act 230 of the Public Acts of 1925, hereby orders that for a period of five years from the 16th day of June, 1926, it shall be unlawful for any person to take, catch or kill, or attempt to take, catch, or kill any large or small mouthed bass in the inland waters of the Lower Peninsula of the State, of a less length than 12 inches, or to take in any day in excess of 10 bass of fish, or to have in possession more than 10 of these fish at any time, under penalties provided by Section 5 of Act 230 of the Public Acts of 1925.

Signed, sealed and ordered published this 21st day of September, 1925.

Order Appointing Time for Hearing Claims.

STATE OF MICHIGAN—The Probate Court for the County of Charlevoix.

At a session of said Court, held at the Probate Office in the City of Charlevoix, in said County, on the 25th day of February, A. D. 1925.

Present, Hon. Servetus A. Correll, Judge of Probate.

In the Matter fof the Estate of John Dunlop, deceased.

The above estate having been admitted to probate and Edward D. Dunlop appointed administrator thereof.

It is ordered that four months from this date be allowed for creditors to present their claims against said estate, and that such claims will be heard by said court on Tuesday, the 20th day of June, A. D. 1926, at ten o'clock in the forenoon, at the probate office in the City of Charlevoix.

It is Further Ordered, That Public notice thereof be given by publication of a copy hereof for three successive weeks previous to said day of hearing in the Charlevoix Sentinel a newspaper printed and circulated in said County.

SERVETUS A. CORRELL,
Judge of Probate.

OYSTER SHELLS, MOUNTAINS OF 'EM

Considered Sign of Prosperity in Long Island.

New York—Man-made mountains are changing the landscape in a dozen shore villages of eastern Long Island. Places that last year were smooth stretches of wind-swept beach now are the site of these synthetic hills.

Despite the fact that the mounds are neither artistic nor utilitarian in themselves, community pride of each hamlet appears to be in direct proportion to the size of its local mountain since the size of the heap measures the town's prosperity. So closely is the altitude of these mounds linked with good times that Long Islanders have come to speak of their piles of oyster shells as "financial summersaults."

At Greenport, Huntington, Oyster Bay, Blue Point and other villages some of the heaps already have attained mountain size. The old theory that the size of a carpenter can be determined by the number of his chips finds confirmation among the oyster fishermen.

Oysters this year are plentiful and of fair size, fishermen say, so there is more than ordinary enterprise among those who go down to the sea in ships to make their living. So it appears last year that the bivalve was a disease-spreading agency yet the demand was so great that it is apparent that confidence has been restored. Most oysters this year are putting into effect every suggestion of health authorities.

In Greenport, one of the chief oyster lands, Hardly a day passes but a carload of 1,500 gallons is shipped from the town.

As a result of the demand and supply this year every oyster thing is alive of industry. Vessels arrive constantly from the oyster field to dump their cargoes into the receptacles that take them on long journeys west. As they arrive at the opening and packing house the oysters are handled almost exclusively by conveyors.

Many months ago the natives are washed in different waters. In one process a stream current of air is used to remove particles of sand that might have been left behind in opening. Mainly the stock is packed in five-gallon iced tins, stored in refrigerator cars and shipped by fast trains. Oyster dealers say that the tins there are more apt to send shipments from Long Island to the Pacific coast.

Localities vary in the matter of favoring various sizes of oysters for home consumption. Some like the small oyster, while others have a marked preference for the medium or large varieties. Size alone is not necessarily an indication of oyster quality. However, the order that each community may have its preference, the oysters are graded as to size. The largest size runs about 200 oysters to the gallon.

There is no complaint when the heap of oyster shells in the various villages of Long Island grow to rather mountainous proportions.

Thieves Had Conscience

C. V. Combes was held up and robbed at Winnipeg, Manitoba, while on his way home with $227, the proceeds of a concert held for the benefit of the Salvation Army building fund for the poor children of Winnipeg. A day later a shabby man called at the campaign headquarters, left a package and the cashier and quickly departed. In the package was found the money and Combes' watch. Also inside was a note signed: "Sorry we did the job. We did not know whose money it was. Spent $2 before reading."

ENTERTAINERS HERE THURSDAY, MARCH 18

Jack Wood's Male Quartet and Bell Ringers

A great musical treat is in store for those who hear Jack Wood's Male Quartet and Bell Ringers, who are scheduled to appear on the Lyceum Course Thursday evening, March 18th, at Palace Theatre. The company presents a unique program with a dash and verve which instantly makes a tremendous impression on the audience. Bell ringing selections are a prime feature of this company's offerings.

The bells used were made by the same bell founders who cast the great bells of Westminster Abby and St. Paul's Cathedral in London. The company has been touring Canada and range from such a powerful number as Rachmaninov's Prelude in C, sharp minor to the liveliest strains of jazz. Male quartet numbers are a notable part of the program and frequently the singers accompany themselves on the bells with an effect which will be long remembered.

Between numbers the music of the bells and the vocal selections, humorous readings and instrumental numbers are employed. Violin, cello, banjo and piano are splendidly presented.

Dog Population Shows No Tendency to Drop

An attempt to ascertain how many dogs there are in this country has been made for the first time since 8,000,000 are known to the public authorities. They are the dogs that are taxed or licensed.

All that is known about the untaxed dogs, the strays, the puppies too young to get their owners into trouble if they are not reported or tagged, and the dogs kept where no officer is made to register or tax them, is that their number is great. It must surely be enough to bring the total up to 10,000,000 or more.

That means 1 dog for every 11 human inhabitants, or a fraction over 2 dogs to a household. The distribution of dogs to people in Great Britain. There about 40,000,000 "humans" to nearly 2,000,000 dogs. That is about fifteen persons for every dog.

The Japanese seem to be fonder of dogs than Americans, as a rule, but the fraction of the British people who live on farms is very small. Here it is large, and dogs flourish in the country. They sometimes multiply and pertite in cities, the bigger the worse.

Beyond doubt, the proportion of loyal, affectionate pets is too instinctive, too deep, too wide for that. Millions of people are too dingy for devotion, even if it comes from animals in many respects inferior to human beings.

Power in a Pocket

Sufficient electrical energy to work for nine hours a day ordinary wireless receiving set using several valves is contained in a novel accumulator invented by a Russian scientist.

So small that it can be carried easily in the waist-coat pocket, this tiny accumulator has already attracted the attention of experts, who foresee great possibilities in its use for motor cars and cycles.

ASSOCIATION OF COMMERCE

Have Banquet Thursday March 25, Masonic Temple

Arrangements have been made for a specially interesting meeting of the Charlevoix Association of Commerce for Thursday evening, March 25th, at which date the members of the O.E.S. will provide and serve a banquet at the Masonic temple, the hour for this being scheduled for 6:30.

Following the banquet a set program will be carried out including an address by Mr. Lee Bierce, secretary of the Grand Rapids association. The principal speaker of the evening is not a stranger in this city. He has appeared at public gatherings of this character on several occasions,—is recognized as an interesting talker and will no doubt be ready with a fund of valuable information relative to association work that will be of value to the local organization and Michigan as a whole insofar as resort projects and entertainment of summer visitors are concerned. At any rate it will be worth while for each member of the local association to grace the event with his presence and make an effort to absorb everything in the address that will be of value to themselves, the members of the Charlevoix association generally, and the entire region as a whole.

We are unable to state just what the entire program will be on this occasion but members can rest assured that the major part will be forthcoming in the address given by Mr. Bierce

AMERICAN CAMEL COLONY RECALLED

Project Tried by Government in Fifties.

Washington.—Escape of a circus elephant 50 miles west of San Antonio, Texas, and his efforts to get beyond easy reach of keepers and strike out across the open farms recall the strange project to establish a governmental camel colony in the same region, says a bulletin from the Washington (D. C.) headquarters of the National Geographic society.

"Egypt and Asia Minor were the camel sources of supply for the federal government," says the bulletin. "Two 'shiploads of camels were brought over in 1856 and 1857 for use in the great American desert,' between those early days to be a sort of a Suez canal to the west of the sphere.

"The project was in charge of the War department, and Jefferson Davis, then secretary of war, was its most ardent advocate. The strange beasts —75 of them in all—were landed at Indianola where they were to be cared for and marched westward overland. Sixty miles west of San Antonio at Camp Verde the government's camel station was established, and for many years its pest inmates of the camels gave the countryside the appearance of Asia or Africa.

"Uncle Sam's camel experiment was a failure not because the beasts could not live in America, but chiefly because of the human factor. After the first year of the venture, when the Indianola camels were crossed with Texas and marched westward overland. Sixty miles west of San Antonio at Camp Verde the government's camel station was established, and for many years its pest inmates of the camels gave the countryside the appearance of Asia or Africa.

"Uncle Sam's camel experiment was a failure not because the beasts could not live in America, but chiefly because of the human factor. After the first year of the venture, when the Indianola camels were crossed with Texas breeds, became acclimated and increased in numbers. But the army muleteers detailed to the camel station declared a feud against the strange creatures from the first; only the few Greek and Turkish camel drivers brought from Smyrna had any patience with them. The muleteers and other residents of the country shared the feelings of the western boss for whenever a camel appeared, horses and mules bolted in terror.

"The coming of the civil war, however, put an end to the experiment. Some of the camels were sold to circuses, some to individuals, and some were turned loose in the rough, uninhabited country of Arizona.

If there is a remedy why not apply it now?

CAMP CUSTER TRAINING CAMP

Will Open on July 8 and Continue Until Aug. 6th

Detroit, March 10.—After the first week recruiting for C.M.T.C. students who will attend Camp Custer this summer it was announced by Maj. Gen. Joseph D. Leitch, chief of staff, 95th Div, Detroit, who will be the commanding officer, as follows: The names of the commissioned in the various counties in the state. Many of the young men who have signed up for this year's camp have attended previous camps, and some of them have been members of the drums, and they too have signed up.

Because congress failed to appropriate sufficient funds the war department has found it necessary to conduct smaller camps this year in order to keep within the appropriation. As a result Michigan will have two training camps, one at Camp Custer and the "citizens" at Fort Brady. Both of these camps will be conducted efficiently and the instructors will be well versed in their subjects and the training will be just as thorough as though but one big camp was held.

General Sheldon is anxious for every boy who has already signed up, or who is planning to make an application, to enjoy the benefit from these camps, and he is planning special instruction in a number of all kinds, training on the rifle range, and an education of American citizenship and loyalty to the United States. There will be all kinds of athletic contests, and the usual number of trophies will be awarded to boys who are most proficient in their special lines.

Any healthy, normal youth between the ages of 17 and 24 years, of good moral character, may make application. The government pays all the expenses from the time he leaves home until he returns back home. The students are furnished railroad fare from home to camp, and back home again, food, clothing, laundry, medical care, if it is necessary a cot to sleep on, mattress, pillows, bed linen, and everything he needs. Because of the fact that applications came in so fast during the first week, Colonel Sheldon advises any boy planning to attend to get in his application early,or he may be disappointed as the quota for Michigan may be filled in a few weeks.

Applications can be made to any of the county committees, at the 85th, Division Headquarters, 204 New Telegraph Bldg., Detroit, Commanding General, 6th Corps Area, 1819 West Pershing Road, or at any regular army post or station.

AMATEUR GARDENERS TO STUDY PROBLEMS

Special Course For Home Talent March 22 to 27

Michigan's amateur gardeners, a class said to include a great majority of all the home owners in the state, will have an opportunity to study the particular problems of their "home" plantings during a special gardening short course which is to be given at the Michigan State College from March 22 to 27. The program for the week's course included everything from the simply pasted on lawn, to the grounds from the landscape point of view, to detailed cultural study on vegetables, flowers and shrubs. House plants, window boxes and even the control of insect pests will also be taken up in the "course."

That many women-folks, as well as the men gardeners of the family, will be interested in the gardening short course is the opinion of Prof. V. R. Gardner, head of the M. S. C. Horticultural Department, which is sponsoring the course. Emphasis on flowers and on the small home vegetable garden should appeal to the housewives.

This year will mark the first time that the school for "amateur" gardeners has been offered at the college

Hungry Girl Passes 2 Days in Subway Car

New York.—Bertha Fintell, fourteen years old, who ran away from home in New Bedford, Mass., late in November because her mother remarried, learned that of all places in New York to pass a couple of days the subway is not one.

Bertha was found huddled shivering on a seat in a downtown Seventh avenue train by Mrs. Pauline Bergmann of 706 Croton Park north, the Bronx, who noticed her misery. She approached the girl and learned that Bertha had been riding on the train two days without food or drink.

The time between her arrival in New York and her decision to spend her last nickel for a subway ride was passed in various ways by Bertha, to whom New York was an enchanted island until that last nickel shook dully in her purse.

Bertha was fed on sandwiches and coffee at police headquarters and she heartily until agents for the Children's society came for her. She will live there until her story is investigated.

SUMMER HOME IS DAMAGED

Fire Loss on Michigan Avenue on Thursday Evening

The fine summer home of Mr. Arthur Joseph, 351 Michigan avenue in this city, was the scene of a most disastrous fire at an early hour last Thursday evening, a fire that for some time threatened to destroy the entire residence property together with its equipment of house furnishings.

The fire was discovered by "Bud" Gill, was promptly reported to the department about 7:30 p.m. The call for help was quickly answered and the chemical engine plac

PHONE'S BIRTH WILL BE NOTED HERE MARCH 10

MICHIGAN BELL EMPLOYEES WILL SHOW INTRICACIES OF SERVICE TO SUBSCRIBERS

OPEN HOUSE DATE ANNOUNCED

Workers, Proud of Half Century of Progress, Will Be Hosts at Central Office.

Fifty years ago on March 10 the telephone came to life, for on that date, in 1876, the first complete sentence was spoken and heard over the instrument of speech transmission which was the crude forebear of the highly developed instrument that is so commonly used today.

So, on Wednesday, March 10, employees and patrons of the Michigan Bell Telephone Company throughout Michigan will make special observance of the birth anniversary of the telephone. Similar observances will be held throughout the Bell System, in this country and Canada, on that date, according to the local manager of the Michigan Bell, who announces that a special program will be arranged in the local telephone office on March 10 and that many men of the service are expected to be present. An invitation to visit the central offices and telephone plant has been extended to each subscriber of the service.

Local Committee In Charge

The local program of observance on March 10 will be in charge of local telephone people, assisted by phone telephone men and women, members of the telephone employes' associations and early subscribers included in the program will be a visit of inspection through the telephone switching rooms and plant by customers of the company, to whom a detailed explanation of the work will be made. The Michigan Bell will hold open house throughout the week, following March 10, to permit those unable to visit the office on that date to do so later. Details of the program will be announced later. Telephone employes will wear a 50th anniversary button, a telephone on a field of blue with the numerals "50" in white, superimposed.

Development of the telephone service in Michigan has been rapid and growth of the service has outstripped population growth. There are more than a half a million Michigan Bell operated telephones in the state, in the Bell System, in this country and Canada. Here 16,000,000 telephones. The Michigan Bell company is expending its plant throughout the state upwards of $20,000,000 each year.

Chronology of the Telephone

The history of the telephone, including many Michigan items, has been summarized chronologically as follows:

1875 First words transmitted by telephone.

1876 First complete sentence transmitted by telephone.
First conversation by overhead line two miles—Boston to Cambridge.

1877 First pair of telephones brought to Michigan by W. A. Jackson
First Michigan telephone company incorporated.

1878 First Michigan telephone exchange established at Detroit.

1880 $0,872 Bell telephone stations in the United States.
Conversation by overhead line, 45 miles—Boston to Providence.

1881 Conversation by underground cable, one-fourth mile.
Michigan Bell line built Port Huron to Detroit.

1884 First hard drawn copper toll line built, Detroit to Saginaw

1889 Upper and lower peninsulas of Michigan joined by submarine cable.

1890 21,891 Bell telephone stations.

1891 Michigan's first underground cable laid in Detroit.

1892 Conversation by overhead line 900 miles—New York to Chicago.

1900 676,723 telephones in Bell System.
11,000 telephones in Detroit.

1902 First conversation by long distance underground cable 10 miles—New York to Newark

1903 50,000 Bell telephones in Michigan.

1904 Michigan State Telephone Company incorporated.

1906 Conversation by underground cable, 90 miles—New York to Philadelphia.

1907 100,000 Bell telephones in Michigan

1910 5,142,692 telephone stations in Bell System.

1911 Conversation by overhead line 2,000 miles—New York to Denver.

1913 Conversation by overhead line 2,600 miles—New York to Salt Lake City.

1915 First conversation by transcontinental line, 3,650 miles, Boston to San Francisco.
Speech transmitted for the first time by radio telephone, from Arlington, Va., to San Francisco, over the Pacific to the Hawaiian Islands, and across the Atlantic to Paris.

1918 Second submarine cable placed across Straits of Mackinac.

1920 11,795,747 telephone stations in Bell System.

1921 Conversation by deep sea cable, 115 miles, Key West, Fla., to Havana, Cuba.
First conversation between Havana, Cuba, and Catalina Island by submarine cable, overhead and underground lines and radio telephone—distance 4,500 miles.
President Harding's inaugural address delivered by loud speaker to more than 100,000 people.
Armistice Day exercises at burial of Unknown Soldier delivered by loud speaker and long lines to more than 150,000 people in Arlington, Va., New York and San Francisco.
800,000 Bell telephones in Michigan.

1922 Ship-to-shore conversation by wire and wireless with S. S. America, 400 miles at sea in Atlantic.

1923 Successful demonstration of trans-oceanic radio telephony from New York City to New Orleans, Southaste, England.
First broadcasting of a presidential message to Congress.
400,000 Bell telephones in Michigan.

1924 Pictures sent by telephone circuit from Cleveland to New York and New York to Chicago.
Nation-wide mobilization of communication by wire and wireless for the United States Army in Defense Test Day.

1925 15,804,550 telephone stations in Bell System.
800,000 Bell telephones in Michigan.
252,000 telephones in Detroit.

1926 Fiftieth anniversary of the telephone nationally observed.

Freak Formation of Trees Not Uncommon

If anyone doubts that Nature has a sense of humor, he had better turn his attention to trees, and see what queer things she invents at times.

Evidently the long neck of the giraffe struck her as a joke that would bear repeating, for she has copied it almost to perfection in Key West, Fla. There, in what is known as Maloney's garden, is to be seen the giraffe tree, a date palm grafted onto a fig.

The *fruit* has taken place about five feet from the ground, and in order to support it the fig tree has thrust several roots across and around it. The date palm has curved downwards and upwards until it presents a faithful copy of a giraffe's neck, at the top of which shoot out the orthodox leaves, mingling on its left with those of the fig tree.

The Siamese twins offered Nature a chance too good to be lost, and she has reproduced them many a time in the tree family. There was a tree of this kind at Fulgnton, in Iwopa, England, and in the United States there are two splendid specimens.

At Sterling, in Massachusetts, two great oaks are solidly joined by a transversal branch or trunk a yard long and as thick as a man's body, while in New York state there are two ash trees joined by a thick branch which unites their trunks (almost one from the other more than 20 feet) at a considerable height from the ground.

Some years ago Nature discovered a diamond mine—near Pretoria in Slam. Very soon a green branch was seen peering out of the top of the chimney, and it rapidly became a bouquet of greenery. The whole thing looked like an immense flower vase, but it is more than likely that by this time the roots inside the chimney have burst the brickwork, and the "vase" has crumbled away.

Fewer Aliens Seek to Become U. S. Citizens

New York.—There was an extraordinary decrease in the number of aliens applying for their first and second citizenship papers during 1924-25, according to a summary and analysis of the 1925 annual report of the United States bureau of naturalization prepared by Harold Fields, executive director of the League for American Citizenship, and just made public.

Fields points out that applications after 1922 had shown a marked tendency to rise.

The statistics for the year July, 1924, to June, 1925, as analyzed by Fields, show that 277,218 aliens applied for first papers or made declarations of intentions, as compared with 424,540 the year before. Of those applying this year, 225,231 were for men and 51,927 for women. The Cable law of 1922 is thus evidently working favorably for 11.5 per cent of the applicants for first papers in 1924 were women, while in 1925 they were approximately 20 per cent.

Over Hills, Poorhouse, for Beauty Queen at 65

Janesville, Wis.—Mary Lulu Lee, seventy-one years old, who was a "beauty" queen a little over a year ago, rode through the streets to the poorhouse, recently. She outran a hundred aspiring young women for the honor of being acclaimed queen of beauty in a theater publicity campaign.

Her victory in the contest was caused by a press agent whose stunt got beyond control. Her name struck the fancy of the voting populace and before those in charge knew also was a woman of sixty-nine and lived in a little shack in the railroad yards, she had a commanding lead.

The poorhouse became a necessity when her husband, Austin, broke a leg. He appealed to the county for aid.

TRAVEL FAR IN HEALTH SERVICE

Nurses Take Work of Children's Bureau Into Remote Regions.

Washington, — Two public-health nurses attached to the maternity and infancy division of the children's bureau have just come in to headquarters after being in the field for several months. One, Miss Marie T. Plunkins, has been engaged in advising and demonstrating to state nurses, while the other, Miss Elsie Witchen, has been doing actual work in a remote district of 10,000 square miles, where the railroad touches at one spot only.

The experience of these two nurses show the great need for the work done by the maternity and infancy division under the Sheppard-Towner act, as well as the fact that the people of these inaccessible regions are eager to avail themselves of the opportunities offered.

Miss Witchen covered in eight months approximately 13,500 miles. Ah of this trip was made by motor car which she drove herself. For the most part she traveled alone and was obliged to camp a tire by moonlight. The roads were so little traveled that there were no tourists nor local people to come to her assistance.

Though much of the trip was made over some of the best beaten public roads and through the most spectacular scenery in this country there were also some of the world's worst roads to be gone over. One was called the "seven sisters" because from the double "S" curves and the terrific drop. One of the greatest thrills this woman experienced was the day she met a truck on this road and both stopped with their radiators touching.

There was one town which had to be reached by horseback trail, since it was impossible to take an automobile through. This was through barren country, where there were no grass or trees.

The people of this district do not live on their farms and work in their way. They live together in small communities of perhaps 300 to 1,500 inhabitants, and ride out daily to their farms or ranches. Originally they adopted this mode of living as a protection against the Indians. While a number are now doing diversified farming, the large majority are engaged in raising cattle and sheep. Miss Witchen says that one day, while driving alone she met a herd of 10,000 head of sheep on their way to northern markets. Almost any motorist has had the experience of trying to dodge two or three cows in the middle of the road, but for a lone woman to meet a herd of 10,000 sheep would seem like a fantastic nightmare.

Co-operate With State Officials.

This children's bureau representative undertook work in this region at the invitation of the state health officials and worked in co-operation with them. She also worked with the local health center associations and the various woman's relief associations. She terms as probably the most outstanding work done that of the typhoid antitoxin clinics for the prevention of diphtheria. These had never before been any work done along this line, and during her stay 708 small or preschool children were inoculated.

Child-health conferences were held in 15 towns at which 602 infants and small children were examined. Many corrections of physical defects resulted from the home following work done by the nurse in this connection.

Another very interesting thing accomplished was the eager co-operation received in the preventive treatment of goiter. This section of the United States is known to be a goitrous country and goiters are prevalent, especially among the mothers. The nurse in charge of this work, therefore explained at the meetings held the use of iodized table salt as a substitute for the ordinary salt. This, of course, is more of a preventive measure than a curative one. In most of the towns the people had never heard of iodized salt, but by the time Miss Witchen left it could be obtained practically everywhere. In one place, in fact, the merchants reported that the people had become 100 per cent converted to the use of it in place of the ordinary salt.

The children's bureau worker held classes for mothers and expectant mothers and found everywhere an eager desire for information. These women are small and many miles apart. Often the nearest physician was 150 miles away. Usually patients were taken in to the doctor or advice was given over the telephone. In a section of such vast distances it is important for the people to have some understanding of first aid and some knowledge of hygiene.

Saved Life of Child.

In one town where the worker was staying a message came that a child near by was very ill and the nurse was asked to go and look at him. The mother thought that probably he was suffering from stomach ache as the result of overindulgence in green apples. The nurse, however, had a different opinion and suspected a ruptured appendix. The child was taken to a hospital 150 miles away, where an operation saved his life.

Another child hurt his leg while playing, but it was not thought that the injury was serious. However, when it did not improve as quickly as could be ordinarily expected, the advice of the nurse was sought. She thought that there might be a green stick fracture and applied first aid splints. The child was then taken 40 miles to a physician. Another emergency case was a broken collar bone. The nurse was able to apply first-aid so that the patient might travel the necessary 60 miles to a doctor.

Whenever a clinic was held children were brought in from distances of 15 and 20 miles. This was particularly true of the toxin antitoxin clinics. At one of these clinics one driver brought 14 people—three adults and 11 children. In another town the leading merchant donated his truck, which made trips to all the outlying districts, bringing in the children. It is a section of large families. Seven or eight children is a small family.

Permanent Workers Go There.

The object of all this work was to show the value of established modern health education, particularly in so far as mothers and babies are concerned, for people in rural communities where the medical and nursing facilities are more or less handicapped. The result of this work is that next year permanent workers are to be established in this section.

Miss Marie T. Plunkin, who was cooperating with state nurses, was away nearly four months and in that time was in Minnesota, Nebraska, Utah, New Mexico, Nevada and South Carolina. In New Mexico the work consisted largely of organizing classes for midwives, who are usually Spanish-American in speaking very little English. She says that these women learn amazingly quick, considering their limited English.

In South Carolina she attended an institute for negro midwives and assisted the nurse in charge with the examination of midwives, who had been attending them. Most of these were negroes, and some of the replies made to questions were more than amusing. When one was asked regarding the effect of the mother's diet upon the child she replied: "Green vegetables stick their bones together."

Red Knee Breeches Worn by Girls in Switzerland

Geneva.—The chief style still holds sway as the favored vacation of American and English girls for summer is the Swiss mountain resorts. But knee breeches are among the thing for skiing and bob sledding.

Obermatlik is the more noted winter resort. Here, during the season, it is hospitality that reunited American and English girls and men who have returned more for winter sports. The young people are testing their parents' and their girl brothers and sisters' bad conduct in bobbing, billiard and other lines at hotels, while they disport themselves on ice and snow.

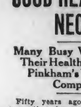
One particularly striking costume seen recently at the winter sports at St. Moritz was a short kilted skirt of violet-colored woolen material, with a knitted jumper of the same shade and a woolen cap to match edged with fur.

For sliding the knee breeches are worn, and in the evening they are worn with a white blouse and red velvet waistcoat and a white kilted skirt.

GOOD HEALTH NECESSARY

Many Busy Women Owe Their Health to Lydia E. Pinkham's Vegetable Compound

Fifty years ago there were few occupations for women. Some taught school, others did housework, some found work to do at home and a few took up nursing.



Today there are very few occupations not open to women. Today they work in factories with hundreds of other women and girls. There are also women architect, lawyers, dentists, executives, and legislators. But all too often a woman has economic independence at the cost of her health.

Mrs. Elizabeth Chamberlain who works in the Unionall factory making overalls writes that she got "wonderful results" from taking Lydia E. Pinkham's Vegetable Compound. Mrs. Chamberlain lives at 600 Monmouth St., Trenton, N. J. She recommends the Vegetable Compound to her friends in the factory and will gladly answer any letters she gets from women asking about it.

If Lydia E. Pinkham's Vegetable Compound has helped other women, why shouldn't it help you?

A Good Plan

Bobby—Mother, the Monday Morning Posttun says that this is "better brush," week, and tells everybody to observe it. What shall I do?

Mother—You had better brush your hair.—Trouveur de Sentiers.

Definite Object

Helen—Why is it every time I sing, you cry?" Wray—"I'm trying to drown you out."

One may like to read about European problems, though he does not consider them his affair.

Get Rid of Your Rheumatism

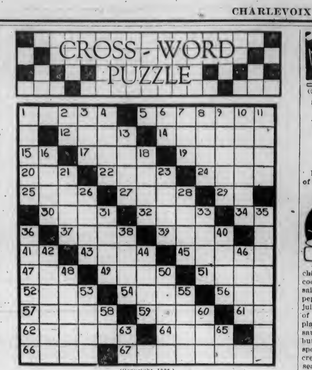
Deep Seated Uric Acid Deposits Are Dissolved and the Rheumatic Poison Starts to Leave the System Within Twenty-four Hours.

Every druggist in this county is authorized to say to every rheumatic sufferer that if a full pint bottle of Allenrhu, the sure conqueror of rheumatism, does not show the way to stop the agony, reduce swollen joints and do away with even the slightest twinge of rheumatic pain, he will gladly return your money without comment.

Allenrhu has been tried and tested for years, and really marvelous results have been accomplished in the most severe cases where the suffering and agony was intense and piteous and where the patient was helpless.

James H. Allen, of 26 Forbes St., Rochester, N. Y., the discoverer of Allenrhu, who for many years suffered the torments of acute rheumatism, desires all sufferers to know that he has instructed druggists to guarantee it as above in every instance.

CROSS-WORD PUZZLE



(Copyright, 1924.)

Horizontal.

1—Lamp
4—A vertical cleated drum used on ships
12—A filthiest word
13—Aged
14—Has proceed
15—Fur of the dog
16—Part of a roof
17—The night before a holiday
22—To counsel
24—Instruct
26—Various shades of a certain color
28—Spoken
29—Accountant General (abbr.)
30—Ceremony
32—One who tells falsehoods
34—Kind of vehicle (English)
36—Any wrongful act (law)
38—A ferocious animal
41—To perform
42—Letter of the Testament
45—Entertainments given by two people working in unison
46—One hundred (Hom. numerals)
48—Joint
49—A weed of greisdecia
52—A western state in the U. S.
54—Long, narrow aperture
56—A thick black liquid
57—Most county in Idaho
58—A tying in a rope
61—Mountain (abbr.)
62—A girl's name
65—To send forth
66—The ego
67—Every alcohol at

Vertical.

1—Bigger
2—Another form of "a"
3—Behold or close
4—Forest power
5—Sick
6—Ship
7—To break suddenly
8—Leg bone
10—To decree
11—Fuel
13—A proper meaning "air"
18—A nobleman
21—To prepare for publication
23—A container for water

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell out a complete and correct solution to the problem originally presented by A Simile, which refers to the definition listed below the puzzle. Thus the first letter in each word defined is found in the first white space up to the first square to the right, and a number under "vertical" defines a word which will fill the first vertical white space below. No letters go in the black spaces. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

So we went strolling,
Down by the rolling, down by the rolling sea.
You may keep your croak for other folk,
But you can't frighten me!
—Sidney Lanier.

GOOD SEASONABLE DISHES

During the cold weather, hot dishes of various kinds appeal to the taste.

Hot soups are good for either luncheon, dinner or supper, and there are of such variety that the same one need not be repeated often.

Hot Chicken Salad.—Mix one pint of cooked chicken cut into cubes, one cupful of cooked peas, one-half teaspoonful of salt, one-fourth of a teaspoonful of pepper, one tablespoonful of onion juice, one pimento, one teaspoonful of lemon juice; set aside in a cool place for at least one hour. Make a sauce using one-fourth of a cupful of butter, the same of flour, one-half teaspoonful of salt, one cupful each of cream and chicken broth. Add the seasoned ingredients and let stand over hot water until ready to serve.

Savory Smoked Fish.—Cut one pound of smoked fish into strips, put over the fire in cold water, let come to a boil, then simmer slowly for ten minutes. Heat one cupful of stock with one-fourth of a cupful each of tomato sauce and vinegar, one tablespoonful of made mustard and a few dashes of cayenne. Drain the fish, saute in a little butter with two tablespoonfuls of flour; stir this into the saucepan containing the fish and stock, cover and simmer for five minutes. Serve on a hot platter surrounded with split and toasted crackers.

Pork chops are very good and a little unusual served with:

Tomato Celery Sauce.—Chop one onion, one green pepper, a large bunch of celery. Mix two and one-half cupfuls of tomato (which have been drained) with one and one-half teaspoonfuls of salt, two tablespoonfuls of allspice berries and a few shreds of a cupful of vinegar. Simmer for two hours. Place the allspice in a small muslin bag and remove it before serving. If kept some time leave the spice in the mixture.

Raisin Muffins—Rent one egg, add one cupful of sour milk, one teaspoonful of soda, one cupful of graham flour, three tablespoonfuls of melted shortening and one cupful of finely cut raisins. Bake in muffin pans.

Sweets for the Children.

The candy which is prepared in one's own kitchen is the confections

loaned in any candy store. Why not get a few good recipes for candy making and using occasionally when the specific clamors for sweets?

Creamy Fudge.—Take one cupful each of brown and white sugar, one-half cupful of milk, one tablespoonful of butter, one-third of a cupful of corn syrup and four tablespoonfuls of cocoa. Boil to the soft ball stage and set away in the dish to cool. When quite stiff work until creamy, flavoring and nuts if desired. Spread until cool and cut in squares.

Cream Candy.—Take a cupful of cream, two cupfuls of sugar, boil to the soft-ball stage, flavor to taste, then beat until thick; drop from a spoon on buttered plates.

College Nuggets.—Take one pound of brown sugar and one cupful of water, boil to a soft ball, then pour over the well-beaten white of an egg. Continue beating until the mixture is creamy, then add flavoring of vanilla and chopped nuts. Drop by spoonfuls on a buttered sheet before it gets too hard.

French Fondant.—Take one pound of sugar, one-half cupful of water, two tablespoonfuls of corn syrup or one-eighth of a teaspoonful of cream of tartar. Boil until a soft ball is formed in cold water. Set away to cool in the same dish or pour out on a large buttered platter. When cool stir until creamy, then knead into a ball and pack into a buttered bowl to stand for several days to ripen. Melt over hot water, add coloring and flavoring and drop by spoonfuls to take shapes. Mold into balls and decorate with nuts or fruits for bonbons.

Chopped pineapple added to fondant, flavored with a little vanilla or almond, made into balls and dipped into chocolate makes delicious candy. Melt the chocolate over hot water.

Egotism Condemned

Egotism, or anything like an offense than a crime, though it is allowable to speak of yourself provided nothing is advanced in your own favor; but I cannot help suspecting that those who abuse themselves are, in reality, angling for approbation.—Zimmerman.

Persistent

"Yes," said the beautiful heiress, reflectively, "I married for love; and I'm going to keep right on marrying till I get it."

Curious Color Contest

A novel competition has been described by the editor of a French radio journal. Listeners are invited to state the color of the hair of the various singers being broadcast. Science has established that blind persons can often tell the color of a speaker's or singer's hair by the sound of the voice, and the purpose of the competition is to determine whether ordinary persons, when deprived of sight of the speaker, can exercise a similar gift.

Church Organs Destroyed

In England there are no remains of organs constructed during the mediæval period. Ardsley says: "Owing to the general destruction of organs in the time of Cromwell we have no conception of the richness of the church organs during the fifteenth and sixteenth centuries. The most beautiful and richly decorated of organs the most completely they were destroyed and their pipes melted down for bullets."

COATS OF EXQUISITE WOOL REP; ACCESSORIES COMPLETE PICTURE

SPRING forecasts present a limitless opportunity for the exercise of individual taste and preference. Among the vast array of new wraps two distinct fashion trends are emphasized. On the one hand is the swagger, sometimes bizarre novelty woolen coat whose supremacy in the arena of fashion is challenged by the conservative type of classic distinction, for the styling of which designers choose exquisitely refined reps and twills of subtle coloring.

There is no denying the genteel elegance of a coat of the latter genre. Fortune favors the woman who becomes the possessor of a coat such a garment as the picture defines, for it is an exponent of high-class fashion. The purchase of a garment styled

OF GENTEEL ELEGANCE

along these lines and of like fabric is without a doubt a wise investment. This model is of a superior purl rep, the sort that never retains dust, always looks spick-and-span, perfectly groomed, so to speak. Its color is the new grayphase, a sort of tan-gray. It is youthfully collared with squirrel fur. The sleeves describe each a point at the shoulder and there are insets down the sides with stitched seams at the hips. In the exquisite finesse of this garment there seems absolutely no room for improvement.

Fur collarettes are ostensible over the new woolen reps and luster twills. They are of a super-delicate texture, having a lightsome feet to the touch,

SCARFS ARE POPULAR

which makes them a joy in the wearing.

The latest finely textured woolen topcoats add to their exclusive appearance in that they are detailed with matching satin revers, collar and cuffs. This is accomplished in a strictly tailored way. As an example, a fine gray twill is used for a straight-line model. The mannish collar and straight-line cuffs are of matching gray satin, of quality kind.

These lighter-weight cloth coats also often carry interesting shirred and flaring collars which are edged with a flat fur of corresponding color-tone. Sometimes in the simpler models the collar is merely a narrow band ending in ties at the front.

White crepe de chine is the favorite lining for the fine cloth coat; there is also a tendency to use bright silk for the prints. Considerable designing is being concentrated on the back of the coat, and clever fullness is being introduced with inverted plaits which extend from the neck.

It is the trend of the spring mode to complete the picture with charming shades, for instance, as hats de rose, peach, bright or mudcoun blue, lovebird or chartreuse green, wild honey or maybe phantom red, or probably orchid. Then to the silk counter do they wend their joyful steps, ask-

SUFFERED MANY YEARS WITH FEMALE TROUBLE

PE-RU-NA LIKE A GIFT FROM HEAVEN

Mrs. Katie Scheffel, R. F. D. No. 5. Lowell, Ohio

"I have been suffering for years with female trouble. Was operated on five years ago. It relieved me some but I did not regain my strength. Two years later was taken sick and bedfast several months. I treated a long while without much relief. I was discouraged, my mind affected, my nervous I could neither eat or sleep and unable to do anything.

We tried several doctors but one after another gave up my case as hopeless. Finally a good friend advised me to try Pe-ru-na. I did. It relieved me almost immediately. Your medical department said I was suffering from chronic catarrh of the system. I began taking your medicine in March, 1914, and continued until August. I took ten bottles of Pe-ru-na and three bottles of Man-a-lin and felt like a new person. Your medicine seemed like a gift from Heaven. It was like coming from darkness into light.

We have used your medicine since for coughs, colds and grip with good results. We will always keep it on hand. I weigh twenty-five pounds more than I ever did, eat and sleep well and can do a good day's work. Everybody says I look fine. Even the doctors are surprised. I cannot thank you enough and will always recommend Pe-ru-na to sufferers from catarrh."

MRS. KATIE SCHEFFEL, R. F. D. No. 5, Lowell, O.

Mrs. Scheffel is only one of many thousand women in the world, who owe their present health to Pe-ru-na. The record of this medicine is a proud one as Pe-ru-na has held the confidence of both sexes for fifty years, or more.

If your trouble is due to a catarrhal inflammation in any organ or part of the body, do like Mrs. Scheffel. Try Pe-ru-na. Insist upon having the original and reliable remedy for catarrhal conditions. You won't be sorry.

MUSTEROLE WILL NOT BLISTER

Better than a mustard plaster

Smithsonian Institution

Famous Scientific Establishment Would Widen Scope of Its "Diffusion of Knowledge"

By JOHN DICKINSON SHERMAN

NE hundred years ago there was living in Continental Europe an Englishman who was known as James Smithson. And he was rather widely known, too, especially in scientific circles. He had a considerable reputation as an analytical chemist, and his collection of more than 10,000 mineral specimens was noted. And there was an atmosphere of mystery about him that intrigued public interest.

Certain things about this James Smithson were public for all men to read. It was known that he was a British citizen; that he was an A. M. of Pembroke college, Oxford (1786), and that in 1787 he had been made a fellow of the Royal society.

But people sensed a mystery in these conditions: He was unmarried. He possessed ample means. He chose to keep away from England. He had apparently cut loose from all British ties. In short, he was to them an English expatriate with scientific research as an avocation.

James Smithson died in Genoa in 1829 at the age of sixty-four. He was buried on the heights of San Benigno. It was then discovered that this mysterious Englishman had left a will that caused world-wide astonishment.

James Smithson, in short, had bequeathed his entire fortune in trust to

the United States of America, to found at Washington, under the name of the Smithsonian Institution, an establishment for the increase and diffusion of knowledge among men."

Of course, there is a story back of this astonishing will. And here it is:

James Smithson was the natural son of Hugh Smithson, afterward Percy, who became the first Duke of Northumberland of the third creation. James Smithson made demand in 1838 upon his blood relatives for recognition under the name of Percy. This recognition was refused by them. Thereupon James Smithson exclaimed:

"Very well. Then I will make the name of Smithson famous when the name of Percy is forgotten."

Why did James Smithson select the United States as his agent in carrying out his expressed intention to make the name of Smithson famous? It is hard to say. He had never been here. The young nation was unknown to the European world under their defeats in the Revolution and the War of 1812. Most Englishmen of his station in life were predicting its downfall. That one man was father to the thought was shown immediately upon the outbreak of our Civil war.

Perhaps James Smithson was for the United States because his countrymen were against the young nation. Perhaps he thought the gift would be appreciated in America—and would not be in England. Perhaps he was unwittingly a prophet and had a vision of his expressed purpose fulfilled.

James Smithson's estate amounted to $541,069.63. Congress formally accepted the bequest and established the Smithsonian Institution by an approving act August 10, 1846.

Republics are said to be ungrateful. The United States accepted James Smithson's gift and made use of it. But for 75 years apparently there was no thought of the giver. Finally in 1901 Alexander Graham Bell, the inventor of the telephone, moved in the matter—the Percys are Scotch and Sandy Bell was a transplanted Scot. James Smithson's body was removed from Genoa and brought to America sealed in the original tomb and was placed within a mortuary chapel erected near the entrance to the Smithsonian Institution.

So it is that on The Mall near Tenth street in the Capital City of the United States stands the Smithsonian Institution, in effect. It is a century old this year. In fact, for eighty years it has been carrying out the purpose of its founder. And now its fame is world-wide—and so is the name of Smithson.

Congress, in accepting the gift, decided that the Federal Government was without authority to administer the trust properly, and therefore constituted exactly what James Smithson had specified—an "establishment." The statutory members of this establishment are the President of the United States, the vice president, the chief justice of the Supreme court and the President's cabinet.

The affairs of the establishment are administered by a board of regents whose membership consists of "the vice president, the chief justice, three members of the senate, and three members of the house of representatives, together with six other persons other than members of congress, two of whom shall be resident in the City of Washington" and the other four shall be inhabitants of some state, but no two of them of the same state." One of the regents is elected chancellor by the board; in the past the selection has fallen upon the vice president or the chief justice. The regents choose a suitable person as secretary of the institution; he is also the secretary of the board and the executive officer directly in charge of the institution's activities.

The Smithsonian, as constituted, sees frequent changes in the personnel of the establishment and of the board of regents. A change of national administration, for example, may put in a practically new establishment. Again, the death of President Harding automatically ended the service of Calvin Coolidge both as regent and chancellor and made him head of the establishment. Chief Justice Taft was elected chancellor in his place. Again, the senators on the board at the end of the 1924 fiscal year were Lodge of Massachusetts, McCormick of Illinois and Stanley of Kentucky. The senators now are Sunset of Utah, Pepper of Pennsylvania and Fernis of Michigan. Johnson of Washington, Moore of Virginia and Newton of Minnesota are the present house members on the board.

Dwight W. Morrow, a member of the firm of J. P. Morgan & Co. and recently head of the President's aircraft investigating committee, has been appointed by joint resolution of congress to the board of regents—a significant appointment in view of conditions which will be set forth later. The other citizen members are: Henry White and Frederic A. Delano of Washington, D. C.; Charles F. Choate, Jr., of Boston; Robert S. Brookings of St. Louis, and Orville H. Laughlin of Pittsburgh.

The Smithsonian's secretary is the center of scientific activities in America too largely even due to the extent of the interests of the three were: Joseph Henry, who served from 1846 to 1878; Spencer F. Baird (1878-87); Samuel P. Langley (1887-1906). All three were scientists of note.

Dr. Charles D. Walcott has been secretary since 1907. He enjoys world-wide fame as a geologist and as an organizer and executive. His activities aside from the Smithsonian have been many. From 1902-7 he had charge of the organization and conduct of the United States reclamation service. He was secretary of the Carnegie Institute during 1902-5, its formative period. During the World war he was chairman of the national advisory committee for aeronautics and chairman of the military section of the national research council. He has been president of the American Association for the Advancement of Science, the largest organization of scientists in the world. He is a nature lover, a national park enthusiast and a leader in the National Conference on Outdoor Recreation.

Most Americans assume the Smithsonian to be a government institution, a sort of bureau of one of the executive departments. It is not as the foregoing shows. Not only was it privately founded and privately endowed, it is privately directed and financed. The federal government is merely the guardian. This gives the Smithsonian Freedom, from politics and otherwise, and, at the same time security and stability.

The manifold successes of the Smithsonian largely come under the three headings: research, co-operation with governments, institutions and individuals and spread of knowledge.

No fewer than ten of the federal government's scientific bureaus have grown out of the Smithsonian's researches and several still remain under its direction. Those include:

The National Museum—this is one of the most tangible of the achievements of the Smithsonian. It began with a small collection of miscellaneous curiosities. It has now more than 10,000,000 specimens covering almost the whole field of human interests, and attracting more than a million visitors a year.

The National Gallery of Art—This includes a number of important individual collections—the gifts of public-spirited citizens. A unit of the National Gallery is the Freer Gallery of Art, presented to the nation with its building and an endowment by Charles Lang Freer.

The Bureau of American Ethnology—This is engaged in the collection and publication of information relating to the American Indian and natives of Hawaii,

Astrophysical Observatory—This investigates solar phenomena, with stations in California, Arizona and Chile. Dr. Charles G. Abbot, famous director of the work, is now abroad looking for a site for a fourth station in Asia or Africa, through the generosity of the National Geographical Society.

International Exchanges Service—Is the agency of the United States government for the exchange of scientific, literary and governmental publications with foreign governments, institutions and individuals. It handles about 500,000 packages a year, its shipments abroad going by eighty distributing agencies in fifty-four countries. The Smithsonian evolved this service to insure the widest possible distribution of its own publications; the world has now adopted the system.

International Catalogue of Scientific Literature—This organization consists of a central bureau in London and thirty-three regional bureaus in thirty-three of the nations and publishes an annual classified index.

The National Zoological Park—This is the famous collection of about 1,800 animals in Rock Creek Valley in Washington.

Congress of late years has done fairly well in the matter of appropriations for these bureaus under the direction of the Smithsonian (the Freer Gallery of Art has its own endowment).

But the Smithsonian Institution itself is in financial straits. In eighty years its activities have increased a hundred fold, while its endowment has only doubled. Its present endowment is but $1,200,000, from which the annual income is about $85,000. From that sum only about $10,000 is available for research and $5,000 for publications. Compare these figures with the $27,000,000 endowment of the Carnegie Institution, with its income of $1,400,000.

Since the World war $65,000 does not go very far and gifts have fallen off. So the Smithsonian has found its income so inadequate that it has had to curtail its major services of research and publication. It has been forced to postpone the printing of important manuscripts and to reject other manuscripts of equal importance. Even the cataloguing of its wonderful scientific library has fallen far behind.

In the major field of research the secretary's annual report makes a surprisingly good showing. It appears, however, that no less than 90 research projects are now being held up for lack of funds and must be financed before they can be undertaken.

Herein lies the significance of the appointment by congress of Dwight W. Morrow as a member of the board of regents. In its current report to Washington that Mr. Morrow may be elected chancellor by the board. The situation seems to demand that more funds must be had from the American people by gift and the board feels someone must lend a campaign to raise these funds.

Chief Justice Taft, chancellor at this writing, does not think he should be the man for the reason that it might in some way embarrass the work of the judiciary. Vice President Dawes thinks it does not comport with the dignity of his office; otherwise, he has said, he would gladly undertake the work. So Washington has its eye on Mr. Morrow and has the idea that he is the man slated for the job.

In my event the board of regents has announced that it will ask the American people for a hundred million dollar addition to its endowment.

New Metropolis in Old National Park

A new town has sprung up and is being crowded against the eastern boundary of Glacier National park within view of the rocky mountains.

It is Bald, Mont., which in frontier history used to be nothing but a "settlements post office" where cowboys and trappers got their mail out of a pouch left hanging upon the side of a log cabin. And they rode in for a radius of 60 miles to pick up their letters from the folks at home in many of the other 47 states of the Union.

Today it is different. With the population suddenly increased overnight by the acquisition of many crews of men who are working on the construction of the new government Bald to Many Glacier automobile highway, the long log cabin has grown, almost overnight, into a busy little community. The town has a modern school and the cowboy guides of Glacier park and tourists from the surrounding country step inside an up-to-date post office and have their mails handled out to them from rows of pigeonholes by a bob-haired flapper Indian maiden. In short everything now is modern and up to date in Bald.

Riddle of Columbus

Did Christopher Columbus really discover America? The recent discoveries on Labrador may throw light on this remarkable riddle, or may further deepen the mystery. Be sure that historically still lurkers around the generally accepted story. Proof that Norsemen settled on the American continent before it was "discovered" by Christopher Columbus is believed to have been obtained by Commander Donald MacMillan, the leader of the American Arctic expedition, who has returned to Sydney, Nova Scotia. Commander MacMillan claims to have located Viking ruins in Labrador. Next year he will return to excavate.

Propagate Currants and Gooseberries

Cuttings May Be Made From Vigorous Bushes.

For those who would like to plant a few currant or gooseberry bushes, but do not wish to go to the trouble of getting them from a nursery, propagation by cuttings is suggested by the New Jersey State College of Agriculture as a very easy and economical method.

Cuttings may be made from vigorous healthy bushes any time during fall, winter or early spring. If made during the spring, care must be taken to see that the plants from which cuttings are taken are still perfectly dormant. The lower and middle portions of vigorous, one-year-old wood should be cut into lengths of six or eight inches. The cuttings are then tied in bundles of 50 with the name of the cuttings all pointing the same way. These bundles should then be buried upside down in light, well drained soil, and completely covered in such a way that there will be two or three inches of soil over the ends of the bundles. The base of the cuttings will begin to callous over two or three weeks after they are buried. If the ground is frozen, the cuttings may be stored in a cool place in sand or soil which must be kept moist until they can be buried outside.

As soon as the soil is in a tillable condition in spring the cuttings may be planted six inches apart in the nursery row. The depth of planting should be such that only one or two buds are above the surface of the ground.

Where only one or two additional plants are desired, they may easily be secured by layering, which consists of bending some of the side branches down to the ground, and covering them with a small mound of soft until roots are formed.

Cuttings From Canes to Obtain Desired Grapes

Grape varieties do not as a rule come true from seed, although some of the young plants may closely resemble the parent. The only sure way to obtain plants just like a desirable variety is to make cuttings from the canes of the past season's growth. These are taken some time after leaffall, and preferable after several hard freezes. The cuttings are usually made in 10 to 12-inch lengths. The lower cut is made very closely to the lower bud, and sometimes even through the node. The upper cut is made an inch or more above the upper bud. The cuttings thus made are then placed in bundles with the butt or lower ends all at the same level and buried in a trench or pit with the butt ends up and with the cuttings in a vertical position. Three or four inches of soft is sufficient over the ends. The soil in which the heeling is done should be open and well drained. When the soil has warmed sufficiently in the spring so that the cuttings may be planted out they are planted vertically in a trench with the butt ends down, and to a depth so that the upper bud is level with the soil when the trench is filled. The cuttings are usually spaced 2 or 3 inches in the trench.

Good Roads Lead to Joy

The author of a recent treatise on the economic cost of sin to the United States estimates it at $13,000,000,000 a year, certainly a startling sum. The bureau of public roads at Washington says that the current year will witness the construction of 24,000 miles of improved highways in the United States at a cost of more than a billion dollars. A billion dollars for roads, large as it is, is small compared with the annual waste of $13,000,000,000 for forms of self-gratification, described as sin. "The wages of sin is death," according to high authority, but good roads lead to economic efficiency and joy and prosperity that will endure.

Spread Manure Green

Manures can be spread as much more lightly when green, whether by hand or the spreader, that there is a great saving of material. The thin, dry land needs a heavy coat of manure is errone-ous, most lands giving far better results with two light coatings than one heavy covering in a given number of years. As the remedy of nearly all dewaxing matter is downward, the longer it remains on or near the surface, the better results you will get.

Improving Hen Flocks

Many poultry keepers are successful in improving their flocks by paying attention to the type of birds that they use as breeders. If your own stock is not satisfactory, it may be more economicl to purchase new stock than to attempt to improve your own. However, be sure that the new stock is superior to yours and when once a satisfactory stock is obtained, do not destroy it by constantly bringing in new blood.

Farm Hints

A legume not only increases the production of crops which follow it in rotation, but provides a valuable feed in itself.

* * *

Cribbed corn shrinks on the average about 16 per cent from November to June. Most of the shrinkage occurs during April and May.

* * *

Are the brood sows getting plenty of exercise these winter days? Be sure that they also get sufficient protein and mineral matter to maintain their body weight and develop a good litter of pigs.

* * *

Fall-sown wheat on a piece of poorish land is a good place to apply winter manure. At the Kansas station only two and a half tons of manure to the acre increased the wheat yield seven bushels.

Alabastine for all your walls

For sleeping rooms—formal parlors and reception halls—dining room and living room—for the library—and for public buildings.

Properly applied it won't rub off. Ask your dealer for Alabastine Colorchart, or write Miss Ruby Brandon, Alabastine Co., Grand Rapids, Mich.

Alabastine—a powder in white and tints. Packed in 5-pound packages, ready for use by mixing with cold or warm water. Full directions on every package. Apply with an ordinary wall brush. Suitable for all interior surfaces—plaster, wall board, brick, cement, or canvas.

Better and more Economical

The Hookup

Nugs—I was in a transportation tie-up downtown in the rush hour.

Pugs—How come?

Nugs—I got inserted in a taxicab.

DEMAND "BAYER" ASPIRIN

Take Tablets Without Fear If You See the Safety "Bayer Cross."

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 25 years.

Say "Bayer" when you buy Aspirin. Imitations may prove dangerous.—Adv.

Few people are satisfied with their fortune or dissatisfied with their wit.

WHEN CROUP COMES AT NIGHT

The sudden hoarse bark of your child in the middle of the night may be the first warning of croup. It comes with startling suddenness. Then mamma instant action—delays are dangerous. Give Dr. Thacher's Liquid Syrup of Hoarhound and Tar at once. Relief comes almost instantly. Without vomiting. Endorsed by doctors and druggists for a half-century. Get a bottle—worth $50.00 at 2 a. m.—Adv.

If there were no other fools in the world, we would be more dissatisfied with ourselves than ever.

WHY SOAK THE FARMER?

President Coolidge is as honest a friend as the American farmers ever had; he is braver, and wiser, than most of their official sympathizers, for he refuses point blank to approve any crop-price-fixing scheme, under whatever name.

To fix a price for corn, wheat, beef, pork, puts the government into the farming business, either to pay the farmer as a beggar or rob him as a tyrant. If competitive prices are not up to the legal mark, the state must tax itself, including the farmers, to pay the deficit. If prices run higher, and with them expenses of raising a crop, the farmer may not sell at the higher price; but the tax army goes on.

An insured price for anything is an unfair price; for the insurance requires a tax for maintenance, that fn the end has to come out of the beneficiary. It increases costs, it decreases profits. The power that can fix the price of a man's wheat at a living point, can likewise fix a low price, or take it without price, as a Soviet might do.

Once the government goes into this business, there's no end. On a price fixing plan, there are left no free Americans; everybody is bound both as to what he sells and what he buys. The farmer cannot buy for less; for the other man must be protected. He cannot sell for more; the other man will not pay. Federal armies must be recruited to adjust and enforce these artificial prices—armies beside which the two-men-for-one-job during the [federal] railroad days were insignificant. Under such a system taxes must rise. Open competition may sometimes be ruthless; but it is infinitely better and more self-respecting and intelligent than federalism.

It seems certain that price-fixing and tax-raising for a federalized army of regulators about the least desirable things yet proposed to "help" the farmer.—News, Oregon.

Spend Your Money

with your home merchants. They help pay the taxes, keep up the schools, build roads, and make this a community worth while. You will find the advertising of the best ones in this paper.

The Harris Egg Ranch

Breeders of S. C. White Leghorns

OFFER

BABY CHICKS

TOM BARRON STRAIN

We are producing these chicks from stock whose sires were imported direct from Tom Barron, England. They are heavy bodied, rugged birds and never-failing layers. Beginning March 20, we can furnish up to 1,000 chicks each week. Price $10 per hundred. 500 lots $1 less; 1,000 lots $2.00 less.

TANCRED STRAIN

We can furnish a limited supply of the famous Tancred Strain. These chicks are sired by cockerels from the pen holding *The Highest Egg Records East of the Rocky Mountains*. These cockerels were sired by a son of a *Hen with a 324 official Egg Record*. Price **$25.00** hundred.

JACK WOOD'S BELL RINGERS

Jack Wood's Male Quartet and Bell Ringers is a notable new Redpath company which sets a brisk pace for novelty musical entertainment organizations. Its unique program is presented with a refreshing breeziness and a dash and spontaneity instantly felt by the audience.

Jack Wood, manager and organizer of the company, is a versatile and clever entertainer, long known as one of the leading bell ringers of the country. He has associated with himself in this organization three other entertainers of experience and attainments.

The bells used by the company were made by the same bell-founders who cast the great bells of Westminster Abbey and St. Paul's Cathedral in London. The selections given are remarkable in their scope, ranging from such a powerful number as Rachmaninoff's "Prelude in C Sharp Minor," to the liveliest of popular tunes. A descriptive number, "Sunday Morning in London," provides a unique vehicle for the music of the bells and is always a great favorite.

Everybody likes a good male quartet. The Jack Wood singers have pleasing voices and sing remarkably well together and individually. They put into their songs an infectious enthusiasm and verve. A feature of the program is a group of ballads sung to the accompaniment of the bells with an effect of poignant sweetness long remembered.

The program is an extraordinary varied one. In addition to the music of the bells and the vocal selections, instrumental ensemble numbers employing violin, cello, banjo and piano, instrumental trios of cello, violin and banjo, violin solos, cello solos and humorous readings are splendidly interpreted.

COMMONWEALTH OF AUSTRALIA

The Commonwealth of Australia, like the United States, has been bothered by the absentee voter, the citizen fully qualified who has ignored his opportunity. The average of eligibles who vote has been about the same in Australia as in the United States, but the fact that forty per cent of the people refrained from attending the poles worried the Australians. At the last session of the Australian legislature, with very little discussion, a compulsory voting bill was passed imposing a penalty of Ten Dollars on those who failed to vote. At the last election ninety-one per cent of those enrolled exercised the franchise and the credit is given to the new law. In New York the Legislative League has unanimously endorsed a bill in the state legislature at Albany which also fines non-voters Ten Dollars each.

HAVE NOSE, FOR NEWS

Who would write advertising ought to have as good a "nose for news" as the newspaper reporters themselves, according to Thomas Twentyman, advertising mahager of a large department store, in a recent address to an advertisers club.

Mr. Twentyman declared that the good advertising writer, the one who brings results for his store or business, prepares his copy from the viewpoint of the customer. To do this the ad writer must have imagination and must visualize a prospective customer coming into the store, and try to write the advertisement with a view to interesting this prospective customer, and creating in him or her a desire to buy.

Because the news stories are written in a snappy fashion, it is necessary for the advertising man to produce just as clever stuff. He is a specialty declared. "The reading public is used to it and will not read advertisements unless they are alive."

"Putting the Punch in Layouts" was the subject of the talk. Mr. Twentyman is considered an expert at "laying out" full page advertisements. "If I had my way, the advertising writer would not be called an advertising manager. He would be called a 'public representative.' And he would devote half of his time to the interests of his employer and the remainder to the public."

AGAINST THE PRIMARY

It looks as if that ill-timed and unnecessary expense to the taxpayers—the state wide primary—will be abolished at no distant date. It was originated in most states by demagogues and has, ever since its establishment, enabled blocks and minorities to work their will over the desire of the great majority of the voters. The solid, closely,organized minority, with selfish men, and personal gain as the chief stimulant, have been, through primaries, able to defeat the will of divided and unorganized majorities. Interior men have been able to secure office that would not have had a look-in with the old, representative delegate convention. The United States, and Indiana in particular, now have a saner vision and will abolish this un-American, pernicious primary system.

In Indiana the Democrats under the leadership of Thomas Taggart, are now against the primary, and a majority of Republicans have always been so opposed. There is now a clear swingback to the old-fashioned, representative, American form of control of political parties and opposition to direct primaries and block system of government.—New Albany, Ind., Tribune.

AN OLD INSTITUTION

Nearly every one in America has a radio nowadays, and nearly everyone who has a radio has tuned in sometime or other to hear the United States Marine Band, the music of which is regularly broadcast from Washington. This band, according to Peter Roman Sterling, who writes entertainingly on the subject in the current issue of the National Republic, is the best known and oldest musical organization in the republic.

The band was started on its career by the Continental Congress in the exciting days of the Revolutionary War and Benjamin Franklin was much impressed by the martial airs played by the band which was assisting in the recruiting of the U. S. marines.

In 1798 a law was passed by Congress putting the U. S. marines on a permanent basis, and in conjunction with the marine corps there was created "a drum major, a fife major and thirty two drums and fifes." Since that time the bond has been the republic's finest. With the gradual development of musical instruments the fifes and drums were superseded by horns and reed instruments.

Among the first presidents, Jefferson took a great interest in the Marine Band and at the inauguration of President Madison when the new chief entered the inaugural ball with the beautiful Dolly on his arm the band played a brand new composition known as "Madison's March."

The music for the White House weddings has always been furnished by this band. This war the ease when Nellie Grant, daughter of PresidentGrant, became a bride, and when Alice Roosevelt became the bride of Nicholas Longworth. Abraham Lincoln was very partial to the Marine Band and during the days of the Civil War insisted that its 'concerts be continued as usual. The historic band was present when Lincoln made his immortal Gettysburg address.

THEATRE

The Best Bad Man

Given a thrilling story and surrounded by an excellent cast, Tom Mix will open a two days run at the Palace theatre next Saturday, March 13, when he presents "The Best Bad Man." The action opens in New Orleans, quickly shifts to the Texas Border, where Tom Mix, cowpuncher, who turns her loose when she promises to go straight. How she becomes a dressmaker's apprentice, her romance with a society chap and the sensational developments that follow which lead her to commit "the splendid crime" form the largest and most exciting part of the picture.

Neil Hamilton is happily cast as the gallant who loses his money and is tempted to turn crooked.

Jack Wood's Male Quartet and Bell Ringers

In connection with the appearance here on the Lyceum Course, on Thursday evening, March 18th, of Jack Wood's Male Quartet and Bell Ringers, it is interesting to know that the art of bell ringing was presented in America first in the 1840's by the late P. T. Barnum. While touring England he heard a group of church bell ringers practising upon hand bells, and he conceived the idea of using a larger peal of bells and playing more elaborate music.

The bells for the Barnum bell ringers were made in England, as the world's best bells always have been, but in conformity with the showman's unfailing originality as an advertiser, he dressed the players, both men and women, in the costumes of Swiss peasants, and called them Swiss Bell Ringers. For many years this company toured the United States in wagons before railroads were at all general. The art at that time was so successful that our grandfathers recalled most vividly the visit of Swiss Bell Ringers to their native towns.

Superfluities

A Chicago doctor says that colds are due to excess luxuries. There is nothing that most of us would more willingly dispense with than these widespread maladies.

Land of Little Value

Bad lands is a name applied to various arid regions of the West. The Big Bad lands of western South Dakota embrace an area of about 2,000 square miles.

REGISTRATION NOTICE

For the Election to be Held April 5th, 1926

To the Qualified Electors of the City of Charlevoix:

Notice is hereby given that in conformity with the Michigan Election Law, I, the undersigned City Clerk, will, upon any day except Sunday and a legal holiday, the day of any special election or primary election, receive for registration the name of any legal voter in said city NOT already registered who may apply to me personally for such registration. Provided, however, that I can receive no names for registration during the time intervening between the second Saturday before the regular election, and the day of such election.

March 27th, last day of registration, for the election to be held on Monday, April 5, 1926., Charles H. Lamphear By D. S. Payton, City Clerk. Deputy 47-2t

MY SIMPLE CREED

By S. C. Longacre.

What this sinning, sad world needs
Is less of wrangling over creeds,
Fewer laws and better deeds.
Less of hate and more of love,
Shows a creed that's from above,
And in spirit like a dove!
"I am right and you are wrong,"
Is the creed and rabid song
Of the mob and rabble throng.

This old world is full of hate,
Its own creed t'will tolerate—
All the rest assigns to fate.

But the creed that wins my love
Is the creed, the heavenly dove
Brought to man from up above.
To be good and to be kind
Is the rule of the Christ mind,
And the standard for mankind.

Oh, the love that rules the world
Will do more than missiles hurled,
And old musty laws unfurled.
To be kind and to be true
To my master and to you,
Is the creed of heavenly hue,
To be fair and to be just,
Free from spoil and office lust.
Is my creed, and holy trust.

HOW ABOUT FERTILIZERS?— POINTS TO CONSIDER IN BUYING

B. C. MELLENCAMP, Agricultural Agent

At this particular time of the season it is very important to think about what kind of fertilizer are necessary for the farm, what kinds to buy for different crop needs, and what the benefits will be. For the purpose of assistance in knowing what to buy and the various points to be considered, the following discussion of fertilizers are submitted:

Fertilizers are used to supply available and necessary plant food to the soil for growth and maturity of crops. Of the ten essential plant elements in crop production, only three are important consideration in Michigan, because the supply of nitrogen, phosphorus and potash, in an available form are apt to be deficient in Michigan soils. Sometimes only one is the limiting factor. Sometimes all three are limiting.

In addition to the above mentioned 3 elements, the calcium of lime content is often deficient,especially in the carbonate form or limestone, as shown by acid soils. In many cases the -correction of the lime content will be all that is necessary to harvest larger yields. All grain crops, truck and vegetable crops and especially legumin.ous crops are particularly benefited by the addition of limestone. Fortunately this country can get limestone from Petoskey at $1.00 per ton f.o.b. in carload lots in bulk, which is surely very reasonable. By all means test your soil for acidity, if acid, the best fertilizer you can buy is this limestone and from one to two tons per acre will increase your yield from an almost failure to profitable production. A Soiltat Outfit can be purchased for 25c from the County Agent and can be used in testing for acidity by any farmer. Get in touch with your neighbors and order a carload.

The three different plant foods can be received in the form of blended grades of manures, which add:s nitrogen; in the form of bi=nyard manure, which adds all three, or in commercial fertilizer, which adds from one to three of these elements.

In buying fertilizer, the first consideration should be the crop to be fertilized the next should be the soil with its supply of available nutrients; a third should be the soil management practices, including the use of lime, farm manures, green manures and crop rotations; and the 4th consideration, the analysis of the fertilizer. The latter means the ratio between nitrogen, phosphorus and potash.

Nearly all the soils can use a high percentage of phosphoric acid, but the response to nitrogen and potash varies. The heavier soils contain larger amounts of nitrogen and potash than the lighter sandy soils. If a good system of soil management is followed, including the use of both barnyard and green manures, the nitrogen and potash are pretty well taken care of. Phosphoric acid is about all you will need to be added. On sandy lands very often all three ingredients are needed, particularly for potatoes, sugar beets, beans and truck crops. In nearly all cases however, the percentage of phosphoric acid should be highest.

Sufficient manure is not produced today to meet the plant food requirements. In one year, manure only returns 50 per cent of the nitrogen removed by the crop, 35 per cent of the phosphoric acid, and around 50 per cent of the potash. It is true that good crop rotations, including the turning under of leguminous crops will take care of the nitrogen, but the other two will have to be returned in commercial fertilizer.

Nitrogen is called a one year fertilizer as usually succeeding crops do not get much from its application, for it leaches very easily and is quickly used up. Nitrogen shows good results when soil is sweet, but not so much with acid soil conditions.

Potash is not a very important consideration where plenty of manure is available. However, it is very often advisable to use fertilizers carrying as high as 30 per cent potash on potatoes, sugar beets, truck crops, beans, alfalfa, sweet clover and some of the other clovers.

Phosphoric acid is very important and should contain a higher percentage than potash, or of nitrogen for that matter, on potatoes and potash, are retained in the soil and furnish food for many succeeding crops, hence are reasonable to buy. Of the three plant elements, phosphorus in the form of acid phosphate will make the best dividend when only one element is used in the fertilizer.

When considering the analysis of fertilizers you must take into consideration the units of plant food present, the ratio of these units and the cost of each unit, remembering that one unit means 1 per cent or 20 lbs. For instance 1-8-2 contains 12 units of plant food, a 3-12-4 contains 19 units and 15 per cent acid phosphate contains 16 units. The prices of these units remain about the same each year, or at least have for the last three years as follows: Nitrogen per unit as expressed in ammonia is 23 65; phosphoric acid 85c per unit and potash 85c. This is on the mixed goods basis. So if you bought a 3-12-4 fertilizer the three units of nitrogen would be 3x$3.65, the 13 units of phosphorus 12 x85c and the 4 units of potash 4x85c. If nitrogen can be furnished in any other way than commercial fertilizer, that is the cheapest, if it is by far the highest of the three elements.

The high analysis fertilizers are the cheapest per pound of plant food and should always be purchased in preference to fertilizers containing less than 14 total units. Last year, fertilizers that contained only 10 units of plant food, cost the farmer on an average of $29.50 per ton or 14.7c per pound of plant food. 15 units cost $32.90 per ton or 10.9c per pound of plant food. 20 units cost $39.95 per ton or 9c per pound of plant food. As the price per ton goes up the price per pound of plant food went down, so be sure that you get high analysis fertilizers as they are cheaper than the cheap fertilizers. A high analysis fertilizer is one that contains at least 14 units.

The buyer of commercial goods should learn to buy by analysis and use only high grade materials. Some of the worst kinds of fertilizers than you imagine in Michigan today, but there are only 14 standard, which are: 2-12-2, 2-16-3, 2-12-6, 0-12-6, 3-12-4, 4-12-0, 4-8-6, 2-8-16, 0-12-12, 0-8-24, and phosphate, nitrate of soda, sulphate of ammonia and muriate of potash. These will meet the requirements of any system of farming in Michigan.

Almost any farm presents an individual problem, but in general the 2-12-2 and 1-16-2 are used for all grain crops and sometimes beans and beets. The 2-12-6 or 0-12-6 are used on grain when alfalfa or sweet clover is seeded with it, as these two legumes thrive on a higher potash content. The 3-12-4, 2-12-6, 4-8 6, or 0-16-0 are good for potatoes, beets, beans, etc. The 4-8-6 is chiefly used on truck crops. The 2-8-16, 0-12-12 and 0-8-24 are used on muck soils. Many times acid phosphate is used alone with the potatoes. No certain rule can be laid down, but in general using these analysis, you cannot go far wrong.

Your agent has several copies of a fertilizer bulletin, which gives recommendations for all soils and crops and other information that will help you with your problems. Send your name and address and one will be forwarded to you.

As a summary of points:

1 Buy fertilizer by analysis and not by brand name.

2 Buy only high analyses goods, they are cheaper per unit plant food.

3 Insist on high percentage of phosphorus.

4 Buy nitrogen only when it cannot be supplied by manures and legumes.

5 Buy potash when your soil test shows that phosphoric acid is higher than potash.

6 Buy only fertilizers that are mixed properly for the particular crop or crops.

Has Odd Occupation

"Nomenclature" is a profession of which a woman, Miss Laura Lee Hoge, res, Elizabeth, N. J., is believed to have a monopoly. For twenty years Miss Hogera has given names for houses, boats and commercial products. Some of the names suggested by her for prepared foods and similar products have become known throughout America.

Bird Importation

According to records recently made public by the American Game Protective association the total game and song bird importations from foreign countries into the United States last year reached 450,000 individual birds valued at millions of dollars. The custom duties were more than $200,000. This included Mexican quail, Hungarian partridge, canary birds, parrots and ornamental species from Asiatic countries.

Germany's Many Dogs

On the average one German in every fifteen possesses a dog. In Berlin the proportion is one in seventeen and in Cologne one in nineteen. For licenses for these dogs large sums are paid. Of Germany's 4,000,000 canines, 3,333,334 live in the country and presumably earn their bread while 620,000 belong to lonpaire, who turns her loose when she promises to go straight. How she becomes a dressmaker's apprentice, her romance with a society chap and the sensational developments that follow which lead her to commit "the splendid crime" form the largest and most exciting part of the picture.

Neil Hamilton is happily cast as the gallant who loses his money and is tempted to turn crooked.

Jack Wood's Male Quartet and Bell Ringers

Jack Wood's Male Quartet Bell Ringers

Jack Wood, organizer of Jack Wood's Male Quartet and Bell Ringers, who will appear here on the Lyceum Course, on Thursday evening, March 18th, is a versatile and clever entertainer, long known as one of the leading bell ringers of the country. With him in his company are three other entertainers of experience and attainments.

The bell ringing selections are always wonderfully received by the audience, numbers presented are unusually varied and the effect is novel and unique. A descriptive number, Sunday Morning in London, is one of the favorites of the company's program. All four members of the company are excellent singers and put into their songs an infectious enthusiasm and verve. A feature of the program is a group of ballads sung to the accompaniment of the bells.

Instrumental numbers played on violin, cello, banjo and piano, and humorous readings are also to be found on the big program given by this company.

Mail-Plane Service

The emergency landing fields of the New York to San Francisco air mail route are now equipped with long distance telephones so that pilots who have to make forced landings may in most cases without delay report to the regular landing stations.

These mail planes fly on schedule, and when weather conditions or other troubles force pilots to land at other than regular stops the long-distance phone is used immediately to report slight delays or summon a relief plane if one is necessary. Thus the cost to coast air mail is kept on schedule and many delays are obviated.

Hopeless Case

David Starr Jordan was bemoaning the tendency of young America to fall in the respect and obedience due to parents. "Why, only the other day," he said, "as I stopped to hear two little friends of mine on the corner one said:

"'I understand you have a new horse girl at your house. Do you like her?'

"To which the elder of the boys replied:

"'Naw. She don't mind us kids any better than ya and me.'"

Dogs' Beauty Parlors Are Opened in London

London.—Fashionable Bond street has added to the seven-teen thousand eleven hundred and twenty-seven luxuries of London's smart world. Now it is beauty shops and rest rooms for dogs. Lend-ing libraries advertise they will wash, curl and perfume dogs while mistresses are shopping.

Experts are provided to care for the pets and see they are properly fed if their mistresses want to leave them all day. Special diet kitchens have been set up to prepare any sort of special food the owners may specify.

Mr. C. A. Barry of Central Lake, was a business visitor here for a day or two this week.

Joseph Howard is spending a few days with Mrs. Howard and other relations at Sault Ste. Marie.

Members of the Busy Bee Circle meet with Mrs. Grover Genesitt, 209 Burns street, Friday (tomorrow) afternoon.

Richard Hall left for Chicago last Monday, where he intends to spend ten days or two weeks before returning to this city.

Mrs. Richard Ryan went to Traverse City early this week where she will visit her brother, E. W. Wood for several days.

Miss Edith C. Harris, for nearly a month a guest of friends in this city, returned to hen home, Oak Park, Ill., last Saturday.

Mr. and Mrs. George Brown, of Petoskey, are spending a few days here with Mrs. Brown's parents, Mr. and Mrs. Fred Hull.

Firemen's dance Wednesday evening, March 17th, at Lakeside pavilion. The public invited. 75c per couple with extra ladies 25c each.

Thermometers in the city at an early hour this morning registered from 4 to 10 degrees below zero, all depending on location of the various instruments.

A complete car built every twelve seconds for each working day in the year, is the claim made by the manufacturers of the Chevrolet machines.

The Congregational Woman's Missionary Society meets Wednesday, March 17th, with Mrs. B. L. Harrington. Mrs. Watson, leader. Topic, "The Slav in America."

D. F. Meech considerably indisposed for the past two weeks, has so far recovered as to be able to attend to business matters of clients and his own personal affairs.

The Rebekahs will serve supper to the public Friday evening, March 12th, at I. O. O. F. Temple, commencing at 5:30 and continuing until all are served. Price 50c per plate.

Joseph Howard, called to Grand Rapids early last week, returned on the following Tuesday, having finished his duties as a member of the Grand Jury called to serve in the federal court.

Members of the Charlevoix Fire department will entertain with a dancing party at Lakeside pavilion, Wednesday evening, March 17th, St. Patrick's day. Bill 75c per couple, extra ladies 25c each.

Mr. and Mrs. E. E. Croke, for about three weeks visitors in the south part of the state and northern Indiana, returned from their trip last Thursday and reopened their Petoskey avenue home.

Captain James H. Gallagher, of Boyne City, is making frequent trips by automobile to Charlevoix and will continue such trips until the season of navigation opens and his ship, the Griffin, goes into commission.

Mr. and Mrs. James H. Parsons, for several weeks past visitors in Alma and Detroit, returned to Charlevoix last Monday, reopened their Belvedere avenue residence and again feel like permanent Charlevoix residents.

A letter just received from Dr. R. B. Armstrong gives the information that he is visiting his daughter, Mrs. George Wantz and family at Indianapolis, Ind., and that he will soon return to Charlevoix—sometime within the next week.

Mr. and Mrs. William Ives visitors in Gloucester, Mass., for several months, returned to their home here Wednesday. Their return trip as far as Atwood was made by automobile; and from Atwood to Charlevoix, about 70 miles, by sleigh.

Fred G. Bellinger of Grand Rapids, spent the past Tuesday and Wednesday in this city attending to personal business interests and visiting his parents, Mr. and Mrs. C. R. Bellinger. He returned to Grand Rapids Wednesday afternoon.

The regular meeting of the Woman's Missionary Society of the Congregational Church will be held at the home of Mrs. Harrington, 106 Clinton St., Wednesday, March 17, at 2:30 p. m. Topic, "The Slav in America," Leader, Mrs. Matteson.

Prof. O. P. North, principal and assistant to Prof. Coverdale in the Charlevoix high school, has been confined to his home this week with an exceptionally bad case of tonsilitis. He is somewhat improved over earlier condition and no doubt will resume his duties and school work in a few days.

The Women's Christian Temperance Union meets Friday afternoon, March 12th, with Mrs. H. S. Harsha. This is Dues Paying Day and there will be a reception service for new members. The program topic is "The Common Defense and the General Welfare." Leader, Mrs. A. J. Usher.

There is a some prospect of the governor of the several states holding their 1926 annual conference in Michigan, with the place of meeting at Mackinac Island. This question was not been fully settled as Cheyenne, Wyoming, is also under consideration by the committee having the matter in charge.

The banquet to be given at the Hotel Charlevoix Wednesday, March 17th, St. Patrick's Day, by ladies of the Altar Society, St. Mary's church, bids fair at this time for a most succesful and well patronized event. The banquet will be served at 5:30 with the price fixed at 50c. each. Everybody is invited.

Mrs. William C. Taylor left for Cleveland, Ohio, last Saturday, where she will visit her son, Leon and family. Incidentally a new baby grandchild, a girl, at the Leon Taylor home constitutes a great drawing card and chief attraction for the grand parents, Captain and Mrs. W. C. Taylor, of Charlevoix, just at this time.

Guy Squier, of Boyne City, has taken the place as Chief Engineer of the J. B. John for the 1926 season. Mr. Squier arrived here early this week and has completed such work as will be necessary on the ship in his department. For several seasons past Mr. Squier has been the Griffin in the same capacity as he now holds on the J. B. John.

Chief of Police Donald McKenzie of Alpena, was shot and dangerously wounded last Tuesday by an alleged bandit, from Norwalk, Ohio, where he wanted to answer a charge of killing Frank McGrath. The gunman's name is James Lyons, who, it is said, admits shooting McGrath and the shooting of McKenzie took place in Alpena when Chief McKenzie was questioning the desperado. Lyon is being held at the Alpena county jail awaiting identification by Norwalk officials who are making the trip to Alpena with the view of taking the prisoner to Ohio for trial. It is probable that Lyon will be held by Alpena officials until the seriousness of the police chief's wound is accurately determined.

THINKS GOOD TIMES WILL BE PERMANENT

Student of Economics Has No Fear of Future.

The American standard of living gives folks in the United States more of the joys of life than are bestowed in any other nation in the world. The big question is:What is America doing about making this a permanent state of affairs?

Are hard times gone forever?

The big story is in the answer, for it shows the practical way America is going about making it perfectly safe for her to be as happy as she wants without worrying too much about the future.

It makes it look as if old-fashioned national hard times of the more violent kind have been permanently aired; that is, the business nightmares that used to grip the entire country periodically during the last century. Factories would be shut down by thousands. Armies of unemployed would be wandering in all directions. Uncertainty hung a pall of fear over the country from coast to coast. And then often things were made all the more terrifying by a Presidential election in which the party in power was turned out of office, and scores of political job holders with it, increasing gloom and unemployment.

There is reason to hope that all these are things of the past.

The nation is producing more than it consumes and thriftily saving the surplus.

It has equipped itself out of those savings with vast mechanical enterprises enabling the individual worker to so multiply his skill and strength as to produce goods in such ample quantities that there is an abundant share for everyone.

It is economic-minded enough to put into effect great nation-wide plans to produce with the maximum efficiency and the minimum waste.

It is perfecting its financial machinery to prevent currency and credit panics.

Its people have established a more equable distribution of wealth under the capitalistic system by widespread participation in the benefits of ownership of its corporations.

Its people in these many ways are consistently providing out of the abundance of today against the needs of the future.

It is because of all these things that the United States can afford to indulge itself in more joys than any nation in the world today—and to feel sure that it is perfectly safe for it to do so.—John Oakwood in Forbes Magazine.

Trade Follows Wales

London.—Trade follows the prince of Wales. Four trainloads of British window frames have just been bought in Argentina, which before the prince's visit purchased such goods in the United States and Germany.

Regular Convocation

Members of Charlevoix Chapter No. 141 R.A.M. will hold a regular convocation at the Masonic temple, Monday evening, March 16th, and aside from the usual duties in connection with a regular meeting, will exemplify the work in the M. M. degree. All members are urged to be present.

Missionary Tells of Cold Spells in Alaska

Watching the thermometer, shoveling coal, and listening to one's breath crack as he breathes are the exciting current events in the life of Rev. Robert B. Marquis, a missionary at Nenana, Alaska, according to a report received by the Presbyterian board of national missions.

Mr. Marquis had been a Sunday school missionary in Wyoming, but took his wife and child to Alaska last summer, and now tells the board he likes his new work, despite the Arctic conditions.

"We are experiencing some real Alaska weather," he writes. "It went down to 72 degrees below last night and has only warmed up to 60 below in the middle of the day, so we are spending most of our spare time carrying coal. When it goes down to between 40 and 50 below zero, a fog develops; that is, every bit of moisture freezes, and the colder it gets, the more fog, so that at night one can hardly see a light a block away. On the higher elevations they do not have the fog.

"The sled trail has drifted a good deal. On the last trip the mail stages had to break trail first, with one horse and then another, and then take the sled, which made slow going. On the outgoing trip they had a school teacher, a middle-aged married woman. She froze her nose. She was determined, however, to go to the next road camp; even though the driver wanted to return to the one he had left.

"On the return trip he brought a young woman with a three-months-old baby. While the driver was breaking trail she would go along with a flashlight to show him where the trail was. She had the baby wrapped up in a rabbit-skin bag in the sled over a footwarmer, but it became too warm, so that she had to take some of its wraps off."

Something Very Wrong

"Dear," remarked Mrs. Roberts to her husband as he came in from business, mopping a heated brow, "I think you waste a terrible amount of money."

Roberts spun round and regarded his wife with a look of deepest suspicion, while a gleam came into his eyes.

"I waste money, my dear?" he queried. "Why, I have never wasted a cent in my life!"

"Oh, yes, you have," answered his wife, while all the time Roberts' brow grew blacker. "That envelopeful you bought on the installment plan last month is no good at all."

"Oh, that!" laughed the husband, as his frowns vanished. "Well, what's wrong with it?"

"I'll tell you," came his wife's confiding reply. "This morning I wanted to find out why it rains when there's a new moon."

"Oh, and where did you look for that?" asked Roberts, a smile hovering round his mouth.

"I looked under 'Why,' of course, and I didn't even find the word there at all."

Will Study Odd Race

Strange midget people who live in the Kalahari desert, Bechuanaland, are the objective of a scientific expedition which has started from New York. The expedition consists of three Colorado anthropologists, who explain that as "the lowest people on earth the natives of the Kalahari make offer a subject for study peculiarly fitting. Though these natives do not actually swing from trees, their remarkably well developed apes is remarkable They are the only race on earth that have failed to acquire a single habit from white men,". The anthropologists propose to spend a year among the small people, studying their customs, religion and daily life. Their practical immunity from western civilization the experts ascribe to the fact that in the vast waterless regions and insects swarm, the desert is very difficult of access, while in the dry season water is almost impossible to obtain.

Elocutionist's Finish

Llewellyn Leggs, chief game proctor of New York, was condemning the brutes who poisoned thousands of fish in Congress lake.

"Did give those fellows," he said, "what Mrs. Malaprop proposed to give her daughter.

"'Your daughter recited "The May Queen" real well,' the minister's wife said to Mrs. Malaprop at a strawberry festival.

"'Yes,' said Mrs. Malaprop, with a pleased titter. 'Yes, I'm goin' to give her a course of elocutionlun.'

"Then she waved her hand and added:

"'Kind o' finish her off, ye know.'"

Warning to Writers

All reading demands an effort. The energy, the good will which a reader brings to the book is, and must be partly expended in the labor of reading, marking, earning, inwardly digesting what the author means. The more difficulties, then, we authors obtrude on him by obscure or careless writing, the more we blunt the edge of his attention: so that if only in our own interest—though I had rather keep it on the ground of courtesy—we should study to anticipate his comfort.—A. Quiller-Couch.

Mexican Drummers Favored

Commercial travelers in Mexico are now being given a 25 per cent discount in railroad rates.

Quite Likely.

Howell—"My wife never keeps me waiting while she gets ready for church." Powell—"She would if you were."—New York Sun.

Japanese Travelers.

More than 200 Japanese travelers a month pass through New York.

A NEW ONE ON HER

Hubby (reading)—"Merciful heavens, here's four more persons killed in a feud!" Wife—"Why, I never heard of that make of car."

Limited Optimism

"Let's see; you're an optimist, aren't you?"

"A tiger of one. I believe the world is getting better every day; but I'm not so sure about the nights."

All swan songs do not have the same words, but the music is practically the same.

BORN THAT WAY

"No wonder he cut turn somer—a breek."

Mistress—Well, if you're going, I suppose you want a "character."

Cook—Yes mum; but, Oi wish ye'd sign a fictitious name to it. Oi don't loike to have it known that Oi liver worked for such people.

"At last," signed Humpty Dumpty as he fell off the wall, "I am getting results at last."

HOT JOB OF ORCHESTRA

Johson—"Gad, that drummer's just steaming at his work." Jones—"He's right over the kettle drums—don't you see?"

In Addition

Policeman—You've lost five parcels and three hat boxes! Anything else, ma'am?

Lady—Yes—yes—my husband was with me at the time!

To determine the authenticity of the reputed antique, tilt back in the same. If it collapses, it is.

Where Orchids Are Pests

Orchids, so prized by the flower connoisseur, and in almost all sections of the United States comparatively expensive, are a little short of costly pests in some parts of Porto Rico. In this island there are two species that have proved destructive to the citrus groves, growing like weeds and entangling their enormous roots over the branches of the citrus trees with a strangulation effect.

Copper Finds New Uses

One of the developments of the last year in the large consumption of copper in the manufacture of electrical refrigeration installation. It is estimated that electric refrigeration units in 1929 will require approximately 90,000,000 pounds of copper, and the industry shows signs of steadily increasing expansion.

Women, Why Not Enjoy Health?

Racine, Wis.—"I used Dr. Pierce's Favorite Prescription and it was a most wonderful benefit to me, because it gave me health and strength. CHAPTER XI—Continued

—16—

"By gar! You not drown een Ce Frying Pan, Darveed? . . . We t'ot you dead meh. By dam! I glad to see you, Darveed, and you, mebbe, all right, hot' you two, heeg an' strong jes de same? The delighted Michel repeatedly wrung the hands of his amused, but perplexed friends. Then St. Onge reached Steele.

"Mon Dieu! Mon Dieu! Monsieur Steele! Welcome to Walling River," he exclaimed in a voice, strained—unnatural. "Doubly welcome, my dear Steele! We, thought we looked at the dead when you entered that door —Michel and I. An Indian brought word that you were lost in the Jackfish rapids, last month. We were hopeless—and now we are overjoyed."

"Thank you, sir, I am glad to be back. We ran, the rapids—it's a long tale, colonel."

St. Onge suddenly started, turning in bewilderment from Steele to Michel.

"What was that?"

David doubled with laughter at the surprise of the Iroquois. Again, to the bewilderment of the Frenchman and his head-man, the bloodhound, outside, raised a deep-throated protest at the cold and his empty stomach, which initiated a medium of howls from the blankets.

"Why, that's Windigo; he's hungry!" laughed Steele. "You'd better look after them, David, before the house dogs start to fight."

"That, a dog? It sounded more like a Hoik."

"I've brought a bloodhound to track the Windigo; also to give him a bit of his own medicine. His name is Pere, but David and I call him 'Windigo.' If we'd had him last fall, it might have been different. But Mademoiselle St. Onge? Is she well?" Steele hastened to ask.

The face of the elder man sobered. "She has not been well," he said, pointedly, "since the news came from Quebec."

"You mean?"

"The news of your drowning in the Frying Pan, monsieur."

Steele thrilled at the words. Then the realization of what it had meant to Denise St. Onge—this blow to her hopes—swiftly saddened him.

"I will go to her at once," said St. Onge. "The shock would be too great —and the joy," he added. "If you will follow shortly, you will find your old room, such as it is, ready."

In the living room of the factor's quarters Denise St. Onge waited for the man returned from the dead.

Entering, Steele went to her and took both her hands.

"I have come back, Denise St. Onge, as I promised," he said, as her dark eyes bravely met his, but the convulsive movement of her lips betrayed the imminence of tears.

"We are—so glad—so glad you are here!" Then she struck the table and she turned from him to hide her emotion.

"It is a happy night for Walling River, monsieur," broke in St. Onge, as Steele turned to the factor to permit his daughter to regain her self-control.

"A happier one for me, colonel!" replied the man who yearned to take the girl, who had walked to the end of the room, in his arms and comfort her—because her that all should be right in the end.

At supper St. Onge insisted on hearing of Steele's new home.

"Before I begin, tell me if Laflamme has shown his hand?"

"No, we have heard nothing. One of his Indians on the way to Albany with a letter told Michel you had been drowned. That is all."

"When I met him," continued Steele, "he acted cold and suspicious, wanted to know my business, but warmed later, asking me to dine with him and the woman who passes as Rose Laflamme. He became so polite that I was under the impression that he believed my story. After dinner he was suddenly called to the trade-house. One of his men had started to bother David, who, of course, had his eyes open, which they evidently resented, and David broke some of his fingers. This worried me considerably; it meant leaving on the jump in the morning before there was trouble."

"And this Rose Laflamme, what is she like?" asked Denise.

Steele felt the blood in his face. In spite of the legitimate ends for which he had worked, the episode with Rose had left an unsavory taste.

"She is a striking-looking woman, with, I am confident, a strain of Indian blood. It was very evident that she and Laflamme were not on good terms—that she desired to leave Ogoke; in fact, she asked if we would take her to the railroad."

"She asked you, a stranger?" demanded Denise.

"You mean she is held there against her will?" broke in St. Onge.

"Absolutely! But Laflamme, from what she told me, fears she would tell what she knows—inform the authorities."

"What a situation for a woman!" deprecated Denise.

"Yes, she evidently hates him—hinted vaguely at many things, when Laflamme was absent at the trade-house. But the only information I succeeded in getting was that Pierre, the Indian, who came here in September, was sent down river partly to spread Windigo rumors."

"He talked with Tete-Houle, and left shortly after," nodded St. Onge.

"Oh, by the way, is Tete-Houle, the great sorcerer, still here?"

"Yes, although something happened when Michel came back. They had a long talk one night in Tete-Houle's shack. I heard the trouble from the beach and found Michel threatening to cut his throat."

"Why did you interfere?" laughed Steele.

"He's been useful as a hunter, and I'm so short-handed. But I am interested to hear how you left Ogoke, monsieur, and why you were so reckless as to attempt to run the Frying Pan."

"When I returned to the shack where we had left our logs, I found David regarding some of the stuff Laflamme had had our baggage searched."

"Did you accuse him of it?"

"I never had the opportunity. Rose Laflamme came to the shack and offered to tell all she knew about Laflamme's activities if I would take her that night to the railroad." Steele boldly answered, ignoring the inferences which might be drawn from the statement.

"And you refused, monsieur, to aid a beautiful woman in distress? Ah, that was not gallant." Although the smile was facetious, the eyes of Denise St. Onge were grave. Steele felt that he had been put on the defensive.

"I told her that we needed food—would starve if we left that night. At them voluntarily, but evidently he'd ordered his Indians to capture and throw us in. Then, if our bodies or canoe were ever found, it would appear like a straight case of drowning. But David's shot stampeded the survivor into firing at us."

"And you went through that whitewater they say has never been run?"

"Yes, somehow we got through, with a foot of water in her and a few leaks where we scraped some sharp ones."

They had left the supper table and were in the living room, and as Steele finished he realized that Denise, who sat with eyes on the rug at her feet, had been listening. Was it the old depression, he wondered, or—

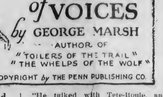
"And without sheila for your guns, you traveled clear to the Nelgeon on short rations?" broke in St. Onge.

"Worse than that. We got but few fish and before we reached Nelgeon House, were down to one meal a day."

Denise looked up. "I am very tired, monsieur. You will pardon me? Good night!" And she left the room.

That day Steele had traveled forty miles to avoid escaping another night on the snow before seeing Denise St. Onge. He was tired from the hard day on the river ice, and disturbed and mystified by the mood of the factor's daughter.

Once he knew beyond all peradventure that this harassed girl cared for him; bound though she was, once she unreservedly placed her future in his hands and rent the veil of her former reticence—her strange aloofness, then the fight for the fortunes of Walling River would be a battle of joy; and at last, when they met, it seemed that his dream had come true—that he had won. But her air of incredulity, the irony of her comment on his story of that night at Ogoke, sent him to his bed mystified, troubled, stung with the injustice of her attitude. Was it jealousy? He had held Denise St. Onge on too high a plane for such a descent. Had she been merely facetious, or had she, without benefit of the doubt, drawn a sinister inference from the coming to the shack of Rose, and their surprise by Laflamme? But he had frankly told the full details, he argued. That, of itself, was proof enough of the singlemindedness of his actions at Ogoke. It seemed so foreign to his conception of the character of Denise St. Onge, that, when his tired body finally drew him into the oblivion of sleep, he had attributed her manner and her silence to the strain of overtaxed nerves.



"Laflamme Had Had Our Luggage Searched."

CHAPTER XII

The following morning the council of war met in the shack of Michel where, as the Iroquois was unmarried, there would be no interruption.

"Now, Michel," said Steele, "I've kept my word and come back on the first snow and I've brought a hound that will help us if we have the luck to hear that Windigo again. I've also brought three."

The speaker stripped the lashings from a canvas-covered bundle, which David had carried in from the sled the night previous, to reveal to the curious eyes of Michel two massive engines of torture, their steel jaws bristling with teeth.

"By gar! How trap!" exclaimed the Iroquois, black eyes glittering.

"Beauties, aren't they? God help the brute they close on!"

Then Steele lifted six smaller but no less wicked-looking devices, designed to snap on and hold in vise-like grip the paw of the unwary prowler which stepped in them.

"These are the strongest wolf-traps made, and I doubt if any Windigo could get out of one, unless he gnawed his leg off."

"Now, Michel, before making any plans, I am ready to hear what you promised to tell me when I returned—what you told David and feared to have me know."

"Just ees right, m'sieu. You keep de word an' cum back to fight wid us, I believe?"

Michel filled his pipe, lit it, and hastily opening the door, circled the cabin to assure himself of absolute privacy. Then he began.

"You t'ink de tam you meet m'sieu below at de rapids dat she was alone?"

"When David and I were packing up to the post?"

"Ah-hah! Well, Michel was dere."

"What d'you mean?" asked Steele, puzzled. "You were inking care of her?"

"Yes."

"Did she know it?"

The Iroquois shook his head. "She no know."

"What were you afraid of, so near the post?"

"Dere Antoine?"

Steele stared in amazement at the speaker. "His Antoine! You mean Laflamme's man—the one with the scar on his face?"

The half-breed nodded.

(TO BE CONTINUED.)

Expected Gifts Listed

In China, a betrothal takes the form of a bridal contract, and a category of expected wedding presents is solemnly inserted in the contract that binds the engagement; but the Chinese would very much resent having this stipulation considered a "price." In Japan, it is the custom for the bride to give gifts to the bridegroom's family—and there are many other interesting forms of intermarital exchange of presents.

EAT YEAST FOAM *for Boils and Pimples*

Don't endure an unsightly skin with this simple, effective remedy available!

Yeast Foam not only clears the skin but it overcomes constipation, relieves indigestion and most astonishingly builds up weight, strength and energy in run-down sickly people.

Drop a cake of Yeast Foam in a glass of water; let stand for five minutes; stir, let settle and drink the milky water, including the white precipitate. Or, if you prefer, eat the yeast with a cracker or a piece of butter.

NORTHWESTERN YEAST CO.

We want you to make this test

We want every weak, puny, run-down man and woman in America to make this test: buy one bottle of Tanlac at your druggist's, take it according to directions for one week and see how quickly you get started back to full strength and vigor.

We know what we are talking about. Tanlac has helped millions. In our files are more than 100,000 letters of praise from grateful users.

Don't confuse Tanlac with ordinary patent nostrums. It is Nature's own tonic and builder, compounded from roots, barks, and herbs that we gather at great expense from the four corners of the earth.

Tanlac goes straight to the seat of your trouble; cleanses and purifies the blood stream; puts your digestion in proper shape. First thing you know you have an appetite like a starved child. You rest at night and your whole body begins to feel the stir of strength and energy.

Don't you be discouraged. Don't put off testing Tanlac another day. Get a bottle now and in a week you should notice signs of real improvement. Then you will feel like your old self again. Take Tanlac Vegetable Pills for constipation.

Still Hale and Hearty at 76

"By a months ago I was just suffering from nerves, my stomach was too nervous to keep. I had bumbago pains and rheumatism. "Tanlac has cured all my aches and put me to eating, sleeping and feeling like a school boy. "I am 76 years old."

Gained Lasting Fame as a Builder of Roads

The first macadam road ever constructed was editorially tested and approved in Scotland more than a century ago. The inventor was John Loiden Macadam, a native of Ayr, Scotland, where he was born in 1756. Macadam went to New York in 1770, entered his uncle's counting house, and became a successful merchant.

In 1783 he returned to Scotland and purchased a luxurious estate. In 1810 Macadam began his experiments in highway construction which have made his name immortal.

The great road builder was thoroughly versed in his methods, and as he wanted nothing flimsy, he investigated road building methods in a score of countries, traveling 30,000 miles.

His preliminary trials of "macadamizing" were so successful that in 1816 he was appointed surveyor to the United Turnpike trust and remade the roads there cheaply and well. The house of commons investigated his system, and he was voted $26,000 and appointed surveyor general of metropolitan roads. He declined knighthood.—Chicago Journal.

Fast Travel by Dogs

In the dog derby, the great annual event in Alaska, the famous "musher," Ikaszuy, did 51 miles with his team of dogs in 5 hours 14 minutes, and this was only the first stage of a 400-mile race.

NO STANDARD OF BEAUTY FOR NOSE

Many Varieties on Faces of World's Great Men.

Although the lips, the eyes, the cheek, and the brow have all received the praise and homage of writers, the nose is undoubtedly the most striking feature of the human face.

Whether it be the huge beak of the Abbe Dimont, of whom they used to make fun at the court of Louis XIV, or whether it be the little button which Gibbons was pleased to call his nose, this organ is the first thing our eyes light upon when we meet anyone. Rostand could actually build a fine play round the great nose of Cyrano de Bergerac.

And then, again, what is the standard of beauty for noses; is it the aquiline, the straight, the "tip-tilted like the petal of a flower, or is it the pierced nose of the, natives of Melnesia?

Although the nose is apparently the most despised feature, it is the most important. Pascal once said that "if Cleopatra's nose had been shorter the whole face of the world would have been changed," which is only another way of saying that the beauty of the face depends upon the symmetry and shape of the nose.

Many famous men have had prominent noses. Lycurgus and Colon had noses which were said to be six inches long, and amongst other possessors of great noses must be included Cardinal Wolsey and Cardinal Richelieu.

Both Ovid, who bore the name of Naso (Latin nasus—a nose), and the Roman statesman, Scipio Nasica derived their names from their very prominent noses, and Nasua's nose was so long that he received the name of Publius, as being the owner of a superlative nose.

Another ruler who was given a nickname on account of this organ was Antiochus VIII, who was called "Grypus" because his nose was as big and as hooked as a vulture's beak.

In the medals of Cyrus and Artaxerxes the tips of their noses come clear out to the rim of the coin; Mohammed's was so curved that the point seemed to be endeavoring to insert itself between his lips, and Lavater offered to wager his reputation that he could, blindfolded, distinguish Frederick the Great's buze nose out of 10,000 others merely by taking it between his thumb and forefinger.

As opposed to these, Washington's nose was a true aquiline, indicative of great firmness, patience and intrepidity. Julius Cesar's was also of the same type, characteristic of patient courage and heroic firmness.

The noses of Shakespeare, Bacon, Franklin and Doctor Johnson had wide nostrils, betokening strength of thought and love of serious meditation, while Napoleon's was exquisitely chiseled, sculpturesque in mold, form and expression.

Napoleon, indeed, is supposed to have said: "When I want any particular brain work done, I always choose a man, if suitable otherwise, with a long nose."

Time to Take Stock

At the approach of a twenty-fifth birthday, a century, as well as a man, may be expected to have established a character and let fall definite hints as to the future. What is to be said of the twentieth? If a balance-sheet were drawn up, would it show sufficient better or worse off as a result of the last two and a half decades of war, pestilence, crusades, reactions, discoveries, artistic and literary experiments, new philosophies? If a poll man had to choose, would he return to that remote world of 1900, as quaint, almost, and surveil, as though half a dozen generations had strewn it with their dust, or would he cling to this amazing universe he finds reflected in the morning's newspapers?—Montreal Family Herald.

United States Patents

Protection under a United States patent extends throughout continental United States, Alaska, Hawaii, the Virgin isles, Guam and the Canal zone, and, upon compliance with certain regulations, to Porto Rico and the Philippine islands. Protection under a British patent extends only throughout the United Kingdom and the Isle of Man. British colonies and dependencies, respectively, have their own patent systems. Practically every civilized country has such a system accepting China; in the case of the latter, however, provision exists for the registration of patents granted in other countries.

Don't Live by Pen Alone

In the Paris Almanach for 1926 is a list of writers who do not live by the pen alone. They include a city hall employee, a publisher, a naval officer, a pig dealer, a bank employee, two farmers, a barrister, two engineers, two functionaries, a judge of the Seine court, a doctor and an inspector of forests. The names of several well known writers figure in the list. It appears that Maurois, author of "Les Silences du Colonel Bramble," and an excellent life of Shelley, is a master driver. Jean de Pierrefeu is a manufacturer of perfumes, Pierre Hamp is an engineer and Jean Giraudoux is a diplomat.

Hen's Own Egg Factory Is Run Like Real Plant

THE whole egg or none for the hen, according to the Lawrence institute of animal biometrics. Being an animal manufacturer she does not make half an egg. Her egg "factory" is run like a real plant. When the yolk is made it is then passed into another department where it is surrounded by white, then into a third where it is encased by a layer of the purest form of carbonate of lime, forming the egg shell, after which it is ready to greet a hungry world.

The average hen lays about 72 eggs a year, mostly during warm weather. She should manufacture more than that number, state the institute's experts who, in experimenting with hundreds of laying hens, discovered surprising differences in the number of eggs produced by various poultry nations. If the hen's egg-making apparatus fails to work up to a standard of efficiency it is probably not the hen's fault, but rather that of the poultryman who unwisely does not provide her with the food material the hen requires, to keep all three egg-making departments working full time. When the hen is fed sound grains and an efficient ration containing egg-making nutrients that make for the greatest efficiency in her chief work, she not only help but helps eggs. Feed is the most important single factor in egg production. It is also the biggest item of cost. Profitable results cannot be secured with poor rations.

In addition to providing the best rations for egg production the wise poultryman will watch his flock, to continuously cull out the naturally poor layers, thus building up a flock of heavy-laying fowls. Every effort should also be made to see that the hens are comfortably housed, especially in winter, because dark, damp, dirty quarters may nullify all the advantages resulting from culling and better feeding.

LIVED AND WORKED IN BEAUTIFUL HOME

Lord Leighton's Abode Well Termed Dream House.

The home of a great man—the home where he lived and worked—is always fascinating and of the few places of this kind in London Leighton house stands alone.

It was the home of Lord Leighton, for many years president of the Royal academy and one of the greatest figures in Britain's art.

In addition to a wonderful series of drawings and sketches, which show, as nothing else could show, Leighton's methods of work, the house contains the famous Arab hall, a wonderful piece of eastern architecture, carried out to Leighton's own designs.

Here, says a visitor, we can hardly imagine ourselves in London, can hardly believe that only a minute or two ago we were in Kensington High street. We are in another world, a realm of enchantment and romance of the purest and most exquisite beauty. The scene does not remind us of the East—it is the East.

This effect has been obtained partly by the use of an unrivaled collection of Saracenic tiles, many of which were acquired by Leighton during visits to Rhodes, Cairo and Damascus. Panels, stained glass and lattice work were also obtained from Damascus, that white city of mystery. In these pieces, it is the harmony of the whole, the triumph of design and of lighting that most impresses the visitor.

It was in the house, which he lived, and where he died, that Leighton did the finest of his paintings. Of these the most beautiful is "The Mother's Love," about twenty little people of the Missionary department of the church, and the wonderful pageant, "Building the Kings Highway," given by about forty people of the Women's Foreign Missionary Society.

In his sermon this pastor said that the greatest editor of the Methodist Episcopal Advocate makes the statement that the three most noteworthy ships of history are Noah's Ark, The Mayflower and the Prairie Schooner. A point of similiarity in each of these is that each carried the best of the old world over into the new. The pastor stated that the church should be included in this list of ships, because it also carried the best of the past over into the new worlds it is discovering.

He insisted that world diplomacy is a process rather than an event. That the church is seeking to discover a united world, a sober world, an intelligent world and a Christian world. He congratulated the Women Missionary Societies on the fact that they are helping to find these better world's for human society.

The climax of the afternoons program was the Pageant. It was well rendered and reflected great credit on Mrs. Adah Beeman and her loyal assistants who had it in charge. It was a telling moment when the great founders and leaders of the Womans Foreign Missionary Society who were impersonated by members of the local society, were introduced to the church of today. Their quaint costumes of the olden times, and the historic allusions to their sacrificial lives and valuable service to the world, were matters of more than passing interest.

12,000 Laws Passed

State legislatures during their most recent sessions passed 12,000 laws of all kinds, despite the protests against so much legislation that are constantly being filed by civic bodies. North Carolina alone passed 1,173 new laws; New York, 980; Tennessee, 812, and Indiana 218. Many of these laws, of course, are regulations governing the routine administering of the states, but there are many limiting and prescribing human conduct.

Deadly Golf Stroke

Playing with a pupil, James Bandrigan, professional of the Chester Canyon park golf links, England, made a long drive from the seventh tee. After his ball had traveled about seventy-five yards it killed a bird known as a water-wagtail. Its speed apparently unlessened, the ball continued on and 50 yards further it struck and killed a second wagtail. This time the ball dropped to the earth with its victim.

STATE OF MICHIGAN—The Circuit Court for the County of Charlevoix—In Chancery.
James L. Tunath, Plaintiff
vs.
Joseph Graham, or his unknown heirs, devisees, legatees and assigns; Lester Cobb, or his unknown heirs, devisees, legatees and assigns; Julian S. Wheeler, or his unknown heirs, devisees, legatees and assigns; William Green, or his unknown heirs, devisees legatees and assigns; and the Smalley Manufacturing Company, a Wisconsin corporation, Defendants.

Suit pending in the Circuit Court for the County of Charlevoix, in Chancery at the City of Charlevoix, on the 5th day of January, 1926.

In this cause it appearing that it is not known whether the said Joseph Graham, or the said Lester Cobb, or the said Julian M. Wheeler, or the said William Green, each or any of them is living or dead, or where each or any of them does reside, if living; therefore on motion of Leslie Shanahan, attorney for the said plaintiff, it is ordered, that the said defendants, Joseph Graham, Lester Cobb, Julian M. Wheeler and William Green, or each of their unknown heirs, devisees, legatees and assigns, enter each, his or their appearance in said cause, on or before three months from date of this order; and that in case of appearing that the said Smalley Manufacturing Company, a Wisconsin corporation entered its appearance in said cause on or before three months from date of this order; and that within twenty days the plaintiff cause this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in the said county of Charlevoix, said publication to be continued once in each week for six weeks in succession, or that said plaintiff cause a copy of this order to be personally served on said defendants at least twenty days before the time above prescribed for their appearance. The above cause is for the purpose of clearing and quieting the title to the northeast quarter of the northeast quarter of section twenty six in township thirty three, north, range seven west in said plaintiff.

Order Issued by Authority of Act 230 of the Public Acts of 1925, closing the streams of the State to Brook Trout Fishing for a period of Five Years Commencing on the First day of May, 1926.

STATE OF MICHIGAN, County of Ingham, ss.

The Director of Conservation having made a thorough investigation of conditions relative to brook trout fishing, recommends the closing of the streams for a specified period.

Therefore, The Conservation Commission by authority of Act 230 of the Public Acts of 1925 hereby orders that for a period of five years from the 1st day of May, 1926, it shall be unlawful for any person to take, catch, or kill, or attempt to take, catch, or kill any brook trout in the rivers and streams of the State, excepting those rivers and streams designated or to be designated by the Conservation Commission, under penalties provided by Section 5 of Act 230 of the Public Acts of 1925.

Signed, sealed and ordered published this 21st day of September, 1925.

Order Modifying Order issued by the Conservation Commission on the Twenty First Day of September, 1925, Prohibiting Trolling from a Motor Boat on the Inland Lakes of this State for a Period of Five Years from the First day of January, 1926.

An order was issued by the Conservation Commission on the twenty first day of September, 1925, prohibiting trolling from a motor boat on the inland lakes of the State for a period of five years from the first day of January, 1926.

It now appears after a thorough investigation by the Director of Conservation of the conditions prevailing in certain inland lakes that the order should be modified as it affects the following lakes: Elk and Torch in the counties of Antrim and Grand Traverse; Pine and Round, Charlevoix; Black, Ottawa county; Pine and Manistee county; White and Muskegon, Muskegon county and St. Clair and any other lakes directly tributary to the Great Lakes.

Therefore, the above mentioned order is hereby rescinded as it affects trolling on the lakes named. In all other respects the order issued on the twenty first day of September, 1925, shall be and remain in full force and effect, for the period of five years from April 1, 1926.

JOHN BAIRD, Director

Edgar Cochran, Secretary. 46-3t

Order Issued by Authority of act 230 of the Public Acts of 1925, Regulating the Taking of Large and Small Mouthed Bass from the Inland Waters of the Lower Peninsula of the State for a period of Five Years Commencing June 16th, 1926.

STATE OF MICHIGAN, County of Ingham, ss.

The Director of Conservation having made a thorough investigation of conditions relative to bass fishing in the inland waters of the State, recommends certain regulations.

Therefore, The Conservation Commission by authority of Act 230 of the Public Acts of 1925, hereby orders that for a period of five years from the 16th day of June, 1926, it shall be unlawful for any person to take, catch or kill, or attempt to take, catch, or kill any large or small mouthed bass in the inland waters of the Lower Peninsula of the State, of a less length than 12 inches, or to take in any day in excess of five, of these fish, or to have in possession more than 10 of these fish at any time, under penalties prescribed by Section 5 of Act 230 of the Public Acts of 1925.

Signed, sealed and ordered published this 21st day of September, 1925.

GREAT VESPER SERVICE

Last Sunday Afternoon at Methodist Episcopal Church

Another very successful monthly vesper service was carried out last Sunday afternoon at the Methodist Episcopal church. The theme was "Discovering the World." Several interesting features held the attention of a crowded church of people for the entire vesper period. Among them should be mentioned the instrumental music, the prayer hymn in which the entire company participated, a vocal solo, "O Divine Redeemer," excellently well sung by Mrs. Ira O. Adams, a sermon on the subject, "Discovering the World," two special songs by "The Mothers Jewels," about twenty little people of the Missionary department of the church, and the wonderful pageant, "Building the Kings Highway," given by about forty people of the Women's Foreign Missionary Society.

In his sermon this pastor said that the greatest editor of the Methodist Episcopal Advocate makes the statement that the three most noteworthy ships of history are Noah's Ark, The Mayflower and the Prairie Schooner. A point of similiarity in each of these is that each carried the best of the old world over into the new. The pastor stated that the church should be included in this list of ships, because it also carried the best of the past over into the new worlds it is discovering.

He insisted that world diplomacy is a process rather than an event. That the church is seeking to discover a united world, a sober world, an intelligent world and a Christian world. He congratulated the Women Missionary Societies on the fact that they are helping to find these better world's for human society.

The climax of the afternoons program was the Pageant. It was well rendered and reflected great credit on Mrs. Adah Beeman and her loyal assistants who had it in charge. It was a telling moment when the great founders and leaders of the Womans Foreign Missionary Society who were impersonated by members of the local society, were introduced to the church of today. Their quaint costumes of the olden times, and the historic allusions to their sacrificial lives and valuable service to the world, were matters of more than passing interest.

Faithful but Fractious

Some of these young women treat love as though it was a naughty boy who should be made to stand in a corner except as a great treat once in six weeks. Women can be very tiresome. Wives can be intolerable. England and America are strewn with good men suffering from their wives' virtues.—Rebecca West.

CLOTHING PROJECT MEETING AT BOYNE

To be Held at Library Building on Friday, March 26th, 1:30 Slow Time

This meeting is for the purpose of organizing the entire county into groups, who wish to take advantage of the opportunity to have free instruction in advanced Clothing work. The project will be carried on in the same manner as was the instruction last year, with local leadership.

If you have been a leader, or a member of a class, or would like to carry the work back to your community, by all means attend this meeting. Remember this project is open to all ladies in the county, whether enrolled in last years classes or not. We want a class for all to get instruction, for last years results have proven its benefits and value to those who took it.

Miss Brekke of the Home Economics dept. of M.S.C. will be present to organize the groups and give the details and outline the work to be given.

Remember the time, place and date and be sure and attend.

Ancient Industry Is That of Bread Baking

Baking is probably the very oldest industry ever engaged in. Wheat and barley, the oldest cereals known to have been found, together with the prevalent fashioned of wood and the stone hand mill consisting of a hollowed stone and a stone ball-shaped crusher, among the remains left by prehistoric men. The oldest bread was made in the form of cakes or fritters simply prepared by mixing wheat or barley to a batter with water and milk and baking those batter cakes of meal on the slate and form of our present day griddle cakes on hot ashes or over red-hot coals, or a hot stone, which represented the first bread pan and oven combined. Salt was probably the only other ingredient used besides the milk and water, as even the ball leaving powder and yeast was not used until browning knew to bred the beginning of the Christian era.

Cave Discovered When Quarry Bottom Falls

Hagerstown, Md.—Collapse of the bottom of a stone quarry during blasting operations, in the vicinity of Boonesville, south of Hagerstown, revealed a cave of rare beauty.

The cave is on the farm of C. C. Keedy. The walls are of many colors, as revealed when lanterns played upon them. The cave was filled with many stalagmites and stalactites.

Several years ago farm workers fell into a hole on the farm of E. E. Hutzell, between Boonsboro and Keedyville, and were running nearly a mile into the earth was found, with many wonderful formations.

Death Claims Harvey L. Brimmer, Burial at Lakeview Saturday

Harvey L. Brimmer, for several years past and until recently a director and cashier of the First State Bank of Petoskey, died in Battle Creek a few days ago, with funeral service and burial at his old home, Lakeview, Michigan, last Saturday. He was thirty-four years of age, a veteran of the World War; Past Exalted Ruler of Petoskey Lodge No. 629 B.P.O.E.; a member of Durand Lodge No. 344 F. & A. M. and Emmet Chapter No. 104 R. A. M. of Petoskey. He is survived by his wife and a daughter, the latter seven months old, his mother and one brother.

SUMMER OUTING, PLANS UNDERWAY

Michigan Press Association Will Gather at Harbor Springs

Harbor Springs, March 16.—Following the acceptance by the Michigan Press Association of the invitation extended by Harbor Springs citizens at the annual meeting of the association in East Lansing, to be host to the association at the time of their Summer Outing in June, the forces of Harbor Springs are organizing to make the event the most successful ever undertaken. E. J. Hanna, publisher of The Emmet County Graphic, at Harbor Springs, extended the invitation and was made chairman of the Summer Outing committee. He was also made chairman of the Harbor Springs entertainment committee, and states that a program is being arranged that will make the publishers of the state glad they are members of the association. This is where the guests will roam. Hamona Park Hotel, thru the owner, Fritz Cremer, has offered a dinner dance, including the orchestra. Forest Beach Inn, Sager and Reeves, proprietors, will provide a banquet and Mr. Simpson, owner of the Emmet Hotel, another. The Methodist and Presbyterian churches have each offered to provide a meal, Canada Tree Sanitarium will take in with cigars and ice cream. Other attractions will be furnished. The Chamber of Commerce will pay the incidental expenses.

Three golf links, an indoor golf course, tennis courts, boats, bathing facilities, autos, etc. will be available. Those who make the trip here for the first time will be astounded at the thousands of beautiful summer homes, the wonderful Little Traverse Bay, the sunsets, the pure artesian water, the virgin trees and sandy beaches, in this—the center of the Playground of a Nation.

The Fate of a Certain Rich Young Man

The conviction and immediate sentence to life imprisonment of Arthur Rich, son of a wealthy Battle Creek manufacturer, should come as a similar warning to young society wives of certain of their numbers (a very small percent) have been inclined to ape some of the mannerisms and practices that seemed to become popular as an aftermath to changed social conditions following the trial of the World War. It is a solemn warning our young people should heed. Although it may be aping the ultra to indulge in flask-toting and petting parties, there is always in such actions the harm that may result from what, at first appeared to be only a pleasant and exciting experience. Young Rich had all the advantages that wealth could offer. He was a pampered son who chose to disregard the splendid advice given him by upright parenthood, and sought instead the fleshpots of what he believed a higher life.

Today he languishes in a prison cell, while his misdeeds have crushed the declining years of an aged father and mother who loved him most. The expense he bought and will now have to pay for with his liberty is too gruesome a lesson to be overlooked by a single boy or girl in Michigan.

Growth of Hair

Hair grows much faster in the summer than in any other season of the year. This is due partly to the heat of the sun and partly to the opening of the pores of the skin, and the escape, in the form of perspiration, of body poisons which, unexpelled, arrest the growth of the hair. It has been noticed that those whose work induces perspiration nearly always have luxuriant hair.

MR. ALVA L. COULTER PASSES

Monday Evening at His Park Avenue Home After Long Illness

Following a long and serious illness that has been presented and continuous over a period of several months Mr. Alva L. Coulter passed away at the family residence, 602 Park Avenue, last Monday about 6:30 p. m. That Mr. Coulter's illness was of such a nature as to practically preclude hope for complete physical recovery was generally understood by family members and friends, but that the victim was fast approaching the end of life's journey was not a matter of immediate concern, that was something inevitable, something not for the present, but for the future.

Last Monday and for several days preceding Mr. Coulter was fully as well as usual, confined to his bed all of the time, able to take nourishment as usual, able to sit up in bed and peruse the daily paper and it was while thus engaged with his evening paper that death suddenly entered and life passed out, with the victim of the grim reaper, maintaining a sitting posture the daily paper held in control position for reading.

Mrs. Coulter who was with him at the time noted a slight change in her husband's appearance, immediately telephoned their medical advisor and Mr. Coulter's brother, Emmet, both of whom responded promptly arriving only to find that life was extinct and that death was probably instantaneous, due to some heart derangement.

Alva Lincoln Coulter was born in Richland county, Ohio, October 8, 1864, therefore at the time of his death in his 62nd year.

He came to Antrim county with his parents when he was about six years of age, locating at Atwood where his father was engaged in religious work acting for some years as Congressional Home Missionary in this region.

When a young man Mr. Coulter came to Charlevoix where in the early days with the exception of a few years spent in Detroit, Indianapolis and Columbus, he maintained his residence.

For upwards of twenty-five years he was connected with the federal or State departments in official capacity, performing his duty in each position with exceptional zeal and fidelity and highly satisfactory to his superiors.

Upon his retirement from government service he became interested in Fidelity and Casualty Insurance business in which he continued until on account of failing health, he came to Charlevoix to regain his earlier physical condition.

During the years of his activities in the insurance business he had offices in Indianapolis, Ind., for five years; Columbus, Ohio for one year and in Detroit for upwards of two years, coming from the latter city to Charlevoix in May 1925, broken in health and suffering from the effects of a nervous break down, this being more or less aggravated by a complication of ailments, the most serious being a heart trouble, the final as well as direct cause of death.

April 5, 1906 he was united in marriage with Miss Cora Birr of Ypsilanti manufacturer, should come as a similar warning to young society wives of certain of their numbers (a very small percent) have been inclined to ape some of the mannerisms and practices that seemed to become popular as an aftermath to changed social conditions following the trial of the World War. It is a solemn warning our young people should heed. Although it may be aping the ultra to indulge in flask-toting and petting parties, there is always in such actions the harm that may result from what, at first appeared to be only a pleasant and exciting experience. Young Rich had all the advantages that wealth could offer. He was a pampered son who chose to disregard the splendid advice given him by upright parenthood, and sought instead the fleshpots of what he believed a higher life.

Today he languishes in a prison cell, while his misdeeds have crushed the declining years of an aged father and mother who loved him most. The expense he bought and will now have to pay for with his liberty is too gruesome a lesson to be overlooked by a single boy or girl in Michigan.

Paper Out of Date

What once was known as "butcher paper," the dark, heavy brown paper used to wrap up meats, is no longer manufactured in any great quantity in the United States. It has been replaced by what is known as "bogus manilla." The old butcher paper was made from straw.

Land of Little Value

Bad lands is a name applied to various arid regions of the West. The Big Bad lands of western South Dakota embrace an area of about 2,000 square miles.

Good Time Reported at Dance Party—Saturday

The Old Time dancing party at the Lakeside pavilion, March 10, under the auspices of the Royal Neighbors of America, was a success. Good management directed by W. T. Driggett and James Bigger, and good music provided by four high school students. Everyone had an enjoyable time. The R. N's have not undertaken to give any dances for some time as their members skip is small, but feel encouraged over the success of the Old Time party and may venture to give another before long.—A Member.

THE CHARLEVOIX COUNTY NORMAL

Extended Invitation to Attend Eighth Annual Normal Day

Charlevoix County Normal has been extended a special invitation to attend Central Michigan Normal's Eighth Annual County Normal Day, which will take place at Mt. Pleasant Friday, April 2nd. Last year approximately five hundred county normal students and teachers attended this annual program.

For those who arrive in Mt. Pleasant Thursday, April 29th, there will be the opportunity of inspecting the Training School at the Mt. Pleasant Normal and attending a physical education demonstration in the gymnasium in the evening. A tentative program announced by President E. C. Warriner for Friday is as follows:

9:00 a. m.—Demonstration teaching at the Training School.

11:00 a. m.—General Assembly.

1:30 p. m.—Address by Miss Jessie McLean, Assistant Superintendent of Schools at Saginaw.

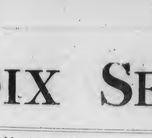
2:30 p. m.—Address by Dr. E. S. Evenden, Teachers' College, Columbia University.

8:00 p. m.—Informal social gather. ing at Masonic Temple.

All meals will be served free in Central Normal's new cafeteria. Rooms for the visitors will be provided in the private residences of Mt. Pleasant.

The 29 county normals which are being invited Antrim at Mancelona; Benzie at Frankfort; Charlevoix at Charlevoix; Cheboygan at Cheboygan; Grand Traverse at Traverse City; Wexford at Cadillac; Kalkaska at Kalkaska are included in the list from this part of the state.

L. J. FLAHERTY



Lawrence J. Flaherty is the new member of congress from San Francisco, Cal. he succeeded Mrs. Mae E. Nolan, who refused to run for re-election.

Pasturage in Marsh

Romney marsh in Kent, England, is protected by a seawall of great thickness and the guardianship and drainage of the sewage is in the hands of a special sanitary corporation. The level lands afford pasturage for vast flocks of sheep which form the principal industry of this section.

Wed 60 Years, Still Live in Same Cabin

Marion, Ill.—Just east of Williamson county live Mr. and Mrs. J. W. Absher, in a log house constructed before the Civil war. They recently celebrated their sixtieth wedding anniversary and are now beginning their sixty-first year of married life in the same house.

Mr. Absher is one of the few men now living who accompanied General Sherman on his march to the sea in the Civil war, and the incidents which he says results of that four years of strife include his capture by the Confederate forces and long weeks passed in the Libby and Sallsbury prisons.

This veteran has been a farmer all of his life and is still an unusually active man for his eighty-two years.

Historic Settlement to Get "Long Distance"

Where once the smoke signals of the aborigines passed messages from peak to crag, the humping copper strands threading the canyons and vales now bring distant points closer together and make easy of access the ancient, mystic and romantic settlement of Taos, New Mexico, in the southern Rockies.

In Taos the prehistoric past is strangely associated with the unromantic, but efficient present. First seen by white man in 1541 when Corondago was searching the land for the elven mythical cities of fabulous wealth, a telephone office has now been established in this historic village and is being equipped with modern long distance apparatus which will put it in direct communication with the rest of the country.

Farm Home Burned In Norwood Township Last Sunday Afternoon

Fire last Sunday afternoon destroyed the house occupied by Mrs. Henry Bettens, in Norwood township, together with a part of the household furniture and fittings, practically all of the personal effects except such as were on the first floor, being burned with the dwelling. Practically all of the household effects on the lower floor of the structure were consumed, pieces of safety, but due to extreme heat and inaccessibility personal effects in the upper floor could not be reached with any degree of safety, therefore met the same fate as did the residence.

Fights Right of Dogs to Destroy Unpunished

Oklahoma City.—A result against dogs' rights—acquired during the feudal days of England—is in progress in Oklahoma.

The common law principle of asterior, which was established when the game pets of Norman oppressors were protected with impunity to wreak destruction on Saxon flocks, has been passed down later to the statute books of Oklahoma—a state of twenty years old. The principle means simply that the dog owner is not responsible for the depredation of his animals if he is not aware of their mischievous natures.

It was one thing, declare assailants of canine perogative, for dogs to destroy feudal flocks which were mere articles of exchange, and something else for them to slaughter mother turkeys that have a commercial value of around 30 cents a pound during the holiday season.

With the aim of curtailing some of an Oklahoma dog's privileges, C. C. McDonald of Wagoner county is seeking to have the state Supreme Court pass for the third time on a case involving this principle.

The litigation started in 1920 when fifteen turkeys belonging to McDonald, were killed by dogs.

Angry Boy Blows Up Companion With Bomb

Minot, N. Dak.—Because he called fifteen-year-old boy to send an "infernal machine" to his fellow high school boy, Leo Chartier, 16, was killed when it resulted in an explosion which severely injured the latter. The boy was held by the

HOW TO SOLVE A CROSS-WORD PUZZLE

When the correct letters are placed in the white spaces this puzzle will spell words both vertically and horizontally. The first letter in each word is indicated by a number, which refers to the definition listed below the puzzle. Thus No. 1 under the column headed "horizontal" defines a word which will fill the white spaces up to the first black square to the right, and a number under "vertical" defines a word which will fill the white squares to the next black one below. No letters go in the black squares. All words used are dictionary words, except proper names. Abbreviations, slang, initials, technical terms and obsolete forms are indicated in the definitions.

NURSERY RHYME PUZZLE

JACK and Jill went up a hill,
To fetch a pail of water;
They carried it back
Without spilling a drop,
In just the way they ought'er.

Find two other water carriers. Both upper side down, along hair.

Pugnacious Crayfish

Crayfish are so pugnacious that if two of them are put into the same crate or open pen one will kill the other, or, like the farmer's dog, die barking at the hole. That is why, when the University of Washington shipped a dozen rare specimens from its aquarium in Seattle to the fish pool in New York, the shippers wound up each crayfish in yards of wet cheesecloth. The consignment came through whole and healthy.—Youth's Companion.

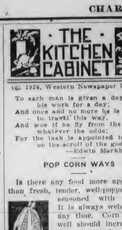
Foreigners in Yokohama

The destruction of Yokohama by the 1923 earthquake drove many foreigners from that port. There were only a few hundred left after the catastrophe. The progress of construction work caused many to return and at the end of October, 1925, there were estimated there were more than 3,500 foreigners living in Yokohama. This is less than one-half of the number who resided there at the time of the earthquake.

(©, 1926, Western Newspaper Union.)

To each man is given a day, and
his work for a day.
And once and no more is he given
to travel this way.
And woe if he fly from the task,
whatever the odds;
For the task is appointed to him
on the scroll of the gods.
—Edwin Markham.

POP CORN WAYS



Is there any food more appetizing than fresh, tender, well-popped corn seasoned with butter? It is always welcome at any time. Corn to pop well should increase its bulk twenty times. If a wire popper is used for popping hold it far enough away from the heat to avoid burning. The right degree of heat should make good corn pop in a minute and a half. Do not throw away old bachelors (those that won't pop)—they can be put through a grinder or mill and will make a good breakfast cereal served with top milk. Parched sweet corn is delicious ground and served with milk.

Pop corn is used as a garnish for corn soup. Pop corn with milk makes a delightful supper dish. For those who like chocolate the following will be enjoyed: To two cupfuls of sugar, add one-half cupful of corn syrup, two squares of chocolate grated and one cupful of water. Cook until the syrup hardens in water then pour while hot over four cups of freshly popped corn; stir well to insure the uniform coating of the kernels.

For parched corn make a syrup by boiling two cupfuls of sugar and one cupful of water until the syrup hardens in cold water; pour this syrup over six quarts of corn and stir until the grains are well coated.

Pop Corn Jack.—This is home-made cracker Jack: Take a cupful of molasses, two tablespoonfuls of water, one teaspoonful of vinegar, cook until nearly brittle when tried in water, then add a tablespoonful of butter and a pinch of soda. Stir into four cupfuls of pop corn, adding a handful of shelled peanuts. Stir until all are well covered with the syrup. Puffed rice may be used in place of corn; pour out into a buttered tin to cool, break into squares when cold.

Pop Corn Balls.—Take a pint of molasses, a pint of water, two tablespoonfuls of butter and a teaspoonful of vinegar. Cook till the syrup will harden in cold water, add half teaspoonful of soda dissolved in a teaspoonful of water. Pour over four quarts of popped corn. Stir until the kernels are well covered, then press into hot buttered with buttered hands.

Maple Sugar Pop Corn Balls.—Prepare the syrup using maple syrup or maple sugar just as for pop corn balls; the flavor is especially delightful. Served with maple wax, the children will have a rare treat.

What to Eat.

This is the time of year when waffles for breakfast, waffles for luncheon and waffles for supper are a welcome food.

Waffles.—Of the diversity of waffle recipes which are all good, this is the best, by far: Sift together and mix one-fourth cupfuls of flour, one-fourth teaspoonful of salt, one-half teaspoonful of soda. Separate the whites and yolks of two eggs, beat well, add the egg yolks to one cupful of thick sour milk, stir in the sifted flour and other ingredients, add three tablespoonfuls of melted butter and fold in the stiffly beaten whites. Cook on a hot, well-greased waffle iron.

Imitation Pate de Foie Gras.—Cook in separate saucepans in enough water to cover one calf's tongue and one calf's liver and let stand a day in a refrigerator to become cold and firm. Cut the tongue into small triangular pieces to look like truffles. Put the liver through a meat grinder, using the finest knife; repeat the process. Into a large mixing bowl put the chopped liver and add one-fourth its volume in softened butter, working them together until smooth. Now add to the liver paste one tablespoonful of onion juice, one teaspoonful each of made mustard and worcestershire sauce, one-fourth of a teaspoonful each of ground cloves, cayenne pepper, one-half of a nutmeg grated, and salt to taste. Butter the glasses and pack the paste as firmly as possible, mixing the bits of calf's tongue with it. Cover with melted butter and set in the ice box. This will keep for two weeks.

Ribbon Salad.—Place a slice of pineapple for each service on lettuce. On the pineapple place sections of orange and grapefruit with membrane removed, in alternating colors, with a strip of red apple impaled, between. Serve with any desired dressing.

Corn Dishes.—If we are to be loyal Americans we should at this time try to serve as much corn as possible. Make corn bread, corn gems, corn griddle cakes and corn meal mush. A bottle of well-cooked mush served with good rich milk is a dish which is both wholesome and satisfying. Serve with a few bits of griddled salt fish for an appetizer and feel that you are pleasantly doing your duty by the corn crop that we are asked to help consume.

Nellie Maxwell

Onions Get Hot

"She used to peel onions just before I arrived, home at night so that I would think she was crying and then I would buy her a new hat or dress," was the testimony of a man in court in London in answer to his wife's divorce suit charging him with neglect.

Deadliest Wound

A wound from a tongue is worse than a wound from the sword; the latter affects only the body—the former, the spirit, the soul.—Pythagoras

SPRING TOGS FOR JUNIORS; NOVEL WOOLENS IN FAVOR

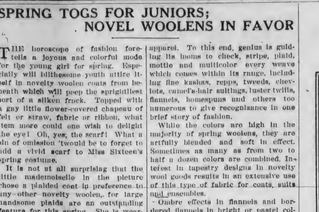
THE horoscope of fashion foretells a joyous and colorful mode for the young girl for spring. Especially will kittenish youth attire itself in novelty woolen coats from beneath which will peep the sprightliest sort of a silken frock. Topped with a gay little flower-covered chaperon of felt or straw, fabric or ribbon, what item more could one wish to delight the eye! Oh, yes, the scarf! What a sin of omission 'twould be to forget to add a vivid scarf to Miss Sixteen's spring costume.

It is not at all surprising that the little mademoiselle in the picture chose a plaided coat in preference to any other novelty woolen, for large handsome plaids are an outstanding feature for this spring. She is wearing a phantom red crepe de chine scarf although a bright green one would be just as stylish.

Very handsome coats of hair coatings carry out the paramount idea of novelty in that they depart from the general idea of camel's hair materials by featuring plaids, stripes and gay patterns, maintaining the usual soft fuzzy texture yet smartly bespeaking the vogue in their colorings. Included in these are large-sized plaids in several colors on tan or gray background while others show solid tones with odd border effects.

Clever straightline coats made of woolen fabric which is plaided at the top portion developing into a border of colorful tapestry design, bount carpets which stem from the border section and which extend only across the back.

The popular plaid coat is as apt to be single-breasted as double and it



PLAID COAT WITH GAY SCARF

FROCK AND ENSEMBLE

is marvelously colorful, also extremely lightweight, which is a special characteristic of all the new woolens which are being shown.

The dress to the left is of plaided kasha cloth, in colors which recall the mellow tones and tints of an Arabian tent covering. The scarf worn with it is of gay colored crepe, for in the majority of cases a scarf accompanies the dress or suit. Notice the buttons on the skirt. Buttons are a popular trim this spring.

JULIA BOTTOMLEY.

(©, 1926, Western Newspaper Union.)

New Gloves From France

Gloves from France for the season include all shades of tan from parchment to toast and deep brown. Very few black and white models are shown. Color in some form and fancy tops are new notes in these gloves.

The Campus Scarf

The campus scarf in its many colors reveals upon close view tall trees, laid-out walks and flower beds, and what appears in the distance to be the top of the school. This scarf is two yards long, made of chiffon and is washable, a fact that makes it altogether suitable for almost any school occasion.

Grays in Two Classes

Grays fall in two classes, the warm shades of dove, shadow and taupe and the cold or cool tones, which include crimson, pearl and steel. In place of the wood tans and browns of past seasons, there is a variety running all the way from ashes of roses to the new bois rose.

Don't Risk Neglect!

To Ignore the Early Warnings of Kidney Trouble Is Serious and Often Fatal

ONE'S health depends upon one's kidneys. The kidneys must filter every drop of blood. If they fail to properly do this work, there's a poisoning of the whole system. Then comes backache, dizzy spells, bladder irregularities and loss of vitality. *Why wait?* Why not use *Doan's Pills? Doan's* have helped thousands. *Ask your neighbor!*

An Illinois Case

Wm. Heisler, prop. of shoe store, 521 Main St., Savanna, Ill., says: "My kidneys troubled me and the secretions contained sediment. My back ached severely and a steady pain across my kidneys sapped my strength. I felt out of sorts in general. I used Doan's Pills and they drove away all signs of kidney complaint."

The VALLEY of VOICES

by GEORGE MARSH

AUTHOR OF "TOILERS OF THE TRAIL" "THE WHELPS OF THE WOLF"

COPYRIGHT by THE PENN PUBLISHING CO.

CHAPTER XII—Continued —19—

"What would he be doing at Walling River?" But Steele already had guessed.

"He cum once sen de summer—he cum wid 'noder man to tak' her to Ogoke."

"What? You meam to say that Laflamme was crazy enough to try to take her by force? Nonsense, Michel! St. Onge would have had the police at Ogoke within a month."

"Yes, he tried. He try—but he try—but he try set."

"Sh. Onge never told me this," said the provoked American. "It explains her fear when she saw me that day."

"She never know Henry Antoine try to get her, but she have fear."

"So you have always taken care of her since the visit of Big Antoine? Tell me about it."

"Yet was last June, after dat Indian carry letter from Laflamme. He tell me Laflamme was goin' to get marry sella, someum. So de gal' ten she go to play at de rapide, Michel een dere. After long tam I hear someting een de night, I t'ink I hear an' see dis Henry Antoine—he watch her but she don' know—she play de feedle. I don' wan' to scare her so I walk on de portage wid de breg whizzle so dey hear me an' get out. I follow dem try' de bush an' een little tam on de stripes 'bove de pool, see Henry Antoine talk to 'noder fellet."

Michel stopped, relit his pipe, and smiled tantalizingly at the interested Steele.

"For heaven's sake, go on! What did you do? Why didn't you drill both of them?"

Michel blew a cloud of smoke before he said:

"Yes—dis Henry Antoine at Ogoke?"

"Yes."

"Wal, he move hees head which I shoot. Eet, was bad shot."

"So it was you who gave him that scar?"

"Ah-hah."

"What happened to the other man?"

"He did not move," said the Iroquois, grimly.

"You hit him?"

"Henry Antoine go back to Ogoke alone."

"And they never came again?"

"No, but we had fear."

"We? Who is the other man?"

"David lifted his wide shoulders. His feenish dat job sometime, heem."

* * * * *

As Steele had "foreseen, the running down of a horse patrolling a country ,of the size of the Walling River valley was clearly a matter of chance.

It was decided that Steele and David, with the bloodhounds, which they were anxious to test on the snow at once, should work over to the Medicine Hills and Phantom Lakes district with the purpose of quieting the Indians if possible, and holding them in the country, as well as of waiting the possible reappearance of the night walker. Michel, with Little Jacques, a French-Cree, sent from Albany to work on the east of the line of the fur canoe, and the sole Indian to volunteer for such dread duty, were to portage the Portage Lake country as far as the traplines on the Little Current and the Drowning. Then they were to report back at Walling River in two weeks. In the meantime, a jack pine at the junction of the Stooping with the main stream was chosen as the message center to which a man from each party was to return in a week for news of the other, and whither St. Onge would send any information from the post down river. In this manner they could cover a great area of the lower Walling.

The plan of campaign settled with the hearty approval of St. Onge, the traps were divided between the sleds, loaded with supplies for two weeks. If the beast, imitating that terror of the northern timber, the wolverine, continued robbing the trap-lines, some night relentless jaws would yawn under the snow for his weary feet—jaws, which, if once shut, would hold their victim in grip of steel until the freezing death brought swift relief.

Before he started, Steele returned to the lone house. At breakfast he had been gracious, affable, but impersonal, and the latter fact that the mood of the previous evening still possessed her. So, justly hurt, he made no attempt to speak to her once or correct the impression she had patently suffered herself to nourish—the latter point as he slightly gone from her revelation of the secret places of her heart, that day on the beach, to a low intrigue at Ogoke; under the pretense of seeking information, had met Rose Laflamme secretly, only to be surprise and detection by the alertness of his watch-dog, David. Thus the situation shaped itself in the mind of the smarting Steele; and, as it is ever with the unjustly suspected, he had, with a brave show of indifference, hardened his sore heart to the suffering girl whose burden was already sufficiently great.

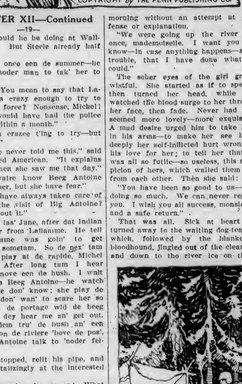
But her welfare demanded his early departure from the post and the man whose thoughts she filled, left her that morning without an attempt at defense or explanation.

"We were going up the river at once, nudemoiselle. I want you to know—in case anything happens—and trouble, that I have done what I could."

The sober eyes of the girl grew wistful. She started as if to speak, then turned her head, while he watched the blood-surge to her throat, her face, then fade. Never had she seemed more lovely—more exquisite. A mad desire urged him to take her in his arms—to make her see how deeply her self-inflicted hurt wronged his love for her; to tell her that it was all so futile—so useless, this suspicion of hers, which walled them off from each other. Then she said:

"You have been so good to us—are doing so much. We can never repay you. I wish you all success, monsieur, and a safe return."

"That was all. Sick at heart he turned away to the waiting dog-teams, which, followed by the blanketed bloodhounds, plunged out of the clearing and down to the river ice on their



"If the Old Boy Is Loose Now, He'll Appear and Sing Again Somewhere."

strange quest. And, until the bend shut them from sight, a knot of post Indians in red sweaters watched the sleds speeding south. For that men should thus calmly set out in search of a horrible death was a matter beyond their ken.

One morning, a week later, Steele was frying moose steak in his camp in the spruce, on the Little Medicine River, three days before, David had started with the dogs for the rendezvous of a bend at Big Feather, but the Portage lake hunters had refused to listen to an Indian who claimed that he had heard the Windigo, in September, on the ridge across from Walling River post.

"Dat Pierre, he try do good job."

"It was Pierre, was it?"

"Yes, he try hard to scare dem on de Little Current', too."

"But, in spite of Michel, he returned to Portage lake to find a camp of hunters he had left but two days before, wild with fear and preparing to leave the country. For, in his absence, the Windigo had filled the night with horror from a neighboring ridge. Michel had lost no time in hunting the trail and removing it down to a creek where he lost it on the ice, and although he followed the stream for miles, failed again to pick it up. Then he sent Little Jacques with the message which David found at the rendezvous.

"Well, he's in this country and we'll keep after him," said Steele, when the headman had finished his story.

"There was nothing to do but patrol the country, following the trappers' camps, in the hope that some night luck would strike them, and they should wake from their warm robes to hear the voice.

As Steele rolled himself in his blankets under the shed-tent by the fire he wondered if the girl at Walling River, who had so lightly weighed him and found him wanting, had paused to consider whether the choice of a winter of toil with the dogs, on the snow of the Hudson's Bay watershed, rather than the alternative of the soft life of the city, bore any indication of the singleness of his heart.

Relieves that feeling of having eaten unwisely. 30c and 90c bottles. AT ALL DRUGGISTS.

Missions, a Debt or a Charity?

By REV. R. H. GLOVER, M. D. Director of Missionary Courses, Moody Bible Institute, Chicago.

TEXT—I am debtor both to the Greeks and to the barbarians.... So as much as in me is, I am ready to preach the gospel to you that are at Rome also.—Rom. 1:14, 15.

In these forcible words the great Apostle Paul expresses his own personal missionary convictions and resolve. He confesses himself the heathen's debtor. He owns them the gospel. Even though he has already done more than any dozen other men of his time, he lays no claims to merit on that account, nor does he consider that he is conferring any favor on the Heathen in

Dr. R. H. Glover.

making an added effort to take to them the gospel. It is his duty, his debt, and he only claims to be an honest man trying to discharge that duty and to pay that debt.

Now if it was for Paul a debt, can it be something less for the rest of us? Yet how few appear to realize and treat it so! The majority of professing Christians regard missions with utter indifference. They appear to wonder by what strange freak of nature a few plain people choose to go and bury themselves among yellow or black folk in other lands rather than to stay at home. They seem to think that missionaries go out to a task which is wholly something of their own predilection.

Moreover, it is to be feared that very many even of those who profess a degree of interest in this work consider of it at most as a philanthropy, a charity.

Is there any essential difference between regarding missions as a charity and regarding missions as a debt?

Missions viewed as a charity become a matter of secondary importance, purely optional, calling forth little concern or prayer or effort, and only spasmodic and insignificant giving. On the other hand, missions viewed as a debt become a primary, obligatory matter, calling for earnest concern and prayer and effort, and for systematic and sacrificing giving.

Charity puts the list of your expenditures and claims your spare cash. Debt heads the list, if you are honest, and cuts out everything unessential, until it is fully met. You give a little of the interest on your money to charity, but you dip deep down into your principal and give it all, if need be, to pay your debts.

I visited a church and met a number of its leading members, all earning liberal salaries. They possessed real interest in missions and appeared to be well informed. But on inquiry I found that that church was giving the magnificent sum of $25 a year to the missionary cause. I am certain that there is a convention, where on missions, the secretary of a mission would be able to get, from any one of those men, offering for missions $200 in cash, every cent of it counted out over the washbills. I asked myself the question: What makes the difference between these two standards of giving? I came to the conclusion that it was simply different viewpoints. The church treated missions as a charity, the women as a debt, and both gave accordingly. To the church it was only one among a score of equally important (or unimportant!) things; to the washerwoman it was the one supreme thing. They prayed at missions as a sort of diversion; she worked at missions as the big job of her life.

Christian reader, in which light have you regarded this work—as expressed not by your creed, nor by your subscription to some stirring missionary address, but rather by your actual prayers, and gifts, and efforts to go? Has your conscience been convicted of a debt which you owe to this cause? Or have only your emotions been stirred at times with a weak feeling of pity for them?

May God convict His children of their debt, and make them ready as much as in them is to meet it! There, at last, will there be no lack of missionaries to go, or increasers to pray, or money to send.

And may this conviction begin with you!

Have Faith

Learn those two things never be discouraged because good things get on so slowly here, and never fail daily to do that good which lies next to your hand. Do not be in a hurry, but be diligent. Enter into the sublime patience of the Lord. Be charitable in view of it. God can afford to wait; why cannot we, since we have Him to wait for? Let patience have her perfect work, and bring forth her celestial fruits. Trust to God to weave your little thread into a web, though the patterns show it not yet.—George MacDonald.

Sufficient to the Day

Do not look forward to what might happen tomorrow; the same everlasting Father who cares for you today will take care of you tomorrow and every day. Either He will shield you from suffering, or He will give you unfailing strength to bear it. Be at peace then, and put aside all anxious thoughts and imaginations.—Francis de Sales.

God's Opportunities

Never fancy you can do something if only you had a different lot and sphere assigned to you. . . . Wait for God's providences, for circumstances are probably God's opportunities.—Horace Bushnell.

We Invite Our Miseries

We invite our own miseries. God does not send them. The evils and sorrows that afflict mankind are of mankind's own making.—Marie Corelli.

Soy Beans Best Planted in Rows

Make More Seed and Hay Per Acre Than Drilled or Broadcast.

In many sections where soy beans are not well known and are not grown extensively, many farmers have asked for information about how to plant the beans for best results. E. C. Blair, extension agronomist at the North Carolina State college, states that the beans will do better if planted in rows. Grown this way, the beans make more seed and more hay per acre than when drilled or broadcast.

Contain Much Weed Seed.

At the Montain Branch station near Swannanoa, the hay from soy beans planted broadcast contained 50 per cent or more of weeds, while there were no weeds in the hay where the beans were cultivated in rows. Planting in rows also requires only half as much seed.

"Land to be planted in soy beans should be well broken and worked into a good seed bed," says Mr. Blair. "This careful preparation will pay better for soy beans than for most other crops. Run the rows three feet apart and place the fertilizer in the rows. The best fertilizer is 800 to 400 pounds per acre of 12-0-4 or the same amount of a 12-2-4 on poor soils. Mix the fertilizer in the soil to avoid burning the seed. Forty pounds of Manmoth Yellow, 15 pounds of Virginia or ten pounds of Lodero will plant an acre in rows three feet apart. Plant the beans with a corn planter, using a plate that drops a seed every six inches. For the small seeded varieties, use a plate with small holes. Plant the beans level and cover lightly. They will not come up if covered deeply, nor will they come through a hard crust."

Three Cultivations.

Mr. Blair states that cultivation should begin when the plants are from five to six inches high. Three cultivations are usually enough but more should be given if necessary to control grass and weeds. By following these suggestions, Mr. Blair believes that the grower can have success with the soy bean crop.

Orchardists Prepare to Fight Armies of Pests

Farmers are making ready for the annual defense against the onslaught of great armies of pests which attack fruit trees.

In their preparation they are heeding the two mistakes which heretofore have been most commonly made in spraying, that of failing to spray at the proper time and lack of thorough work. They are planning to do the job up right this year.

While it is difficult to lay down any hard and fast rules with regard to spraying, James G. Moore, horticulturist of the Wisconsin College of Agriculture, points out a few fundamental facts which can be followed. The spray commonly used for apple trees is made up by mixing five quarts of lime sulphur and one pound of arsenate of lead in fifty gallons, of water.

Lime sulphur is the time of the year when both the garden and orchard should be covered with barnyard manure. It is hunted out and distributed as it is made about the barns and sheds, the soil will absorb nearly all of the plant nutrients contained in it. Twenty tons per acre for the vegetable garden and bramble patch and five to ten tons per acre for the orchard make a fair application.

Handling Seed Corn

Seed corn should be carefully sorted and prepared for planting during the slack winter months. It is an excellent plan before this is done to take kernels from 100 or 200 representative ears for a germination test. This will frequently give valuable indications as to how much sorting must be done. The state seed laboratory at Manhattan, Kan., will germinate the samples free of charge.

GLAD TO SPREAD GOOD NEWS

Helped by Lydia E. Pinkham's Vegetable Compound

Cleveland, Ohio.—The friends of Mrs. Helen M. Kowalczyk of 6819 Hope

Avenue were glad to hear that she has regained her health. For quite some time Mrs. Kowalczyk was quite ill and it was impossible for her to work. She took Lydia E. Pinkham's Vegetable Compound. I feel stronger already and sleep sounder. I am very glad to spread the good news of how it has helped me."

Detroit, Michigan.—"I heard of this medicine through an advertisement in the 'Detroit News' and wrote to Mrs. Grace Gillette, whose letter was published. Then I started taking the Vegetable Compound and got the best results. I used the Sanative Wash, too. I am simply happy if I can advise women to take your medicines." —Mrs. M. E. Weaver, 12165 Washburn Ave., Detroit, Mich.

Lydia E. Pinkham's Vegetable Compound has been in use by women for over fifty years. It is a vegetable tonic made from root and herbs and is sold at all druggists.

SPOHN'S DISTEMPER COMPOUND

Keep your horses working with SPOHN'S. Used and endorsed by 32 years for Distemper, Shipping Fever, Influenza, Colds. Give to sick and those exposed. Helps others not. Safe. Cheap. Sold by your druggist. Write for free booklet. SPOHN MEDICAL CO.Dept. GOSHEN, IND.

END BUNION PAIN FOREVER

No Need to Suffer Another Day Those Agonizing Torturing Pains.

There is one simple yet inexpensive way to reduce inflamed, swollen toe joints and put them down to normal and that is to apply Moone's Emerald Oil night and morning and people who suffer from such outargements would be wise to reduce them before they reach a more or less chronic stage.

Ask any Moone's Emerald Oil for an original two-ounce bottle of Moone's Emerald Oil (full strength) and refuse to accept anything in its place. It is such a highly concentrated product that ten drops is more than a long time and, furthermore, if this wonderful discovery does not give you complete satisfaction you can have your money refunded.

Special note: People who want to reduce swollen or varicose veins should get a bottle of Emerald Oil at once. Applied night and morning as directed they will quickly notice an improvement which will continue until the veins and bunches are reduced to normal.

Garfield Tea

Was Your Grandmother's Remedy

For every stomach and intestinal ill. This good old-fashioned herb home remedy for constipation, stomach ills and other derangements of the system of real worth in control of any country on earth.—Washington Post.

Disease Control

Disease control and sanitation are most important in poultry management. Lack of knowledge of the presence of disease and the method of combating it or the non-application of this knowledge has caused many flocks to be destroyed in a very short time. The loss is enormous and yet is preventable.

There is one absolute rule in poultry sanitation and disease control.

Time to Apply Manure

Midwinter is the time of the year when both the garden and orchard should be covered with barnyard manure. It is hunted out and distributed as it is made about the barns and sheds, the soil will absorb nearly all of the plant nutrients contained in it. Twenty tons per acre for the vegetable garden and bramble patch and five to ten tons per acre for the orchard make a fair application.

Flowers in Desert

It was late February in Arizona, but on the mountainside bloomed several strange and beautiful wild flowers, a yellow lupine, the common golden poe or buck bean of the West, another like pretty blue cowslip or bluebinea, also uncomplimentarily known as loco, the greenish flower of all was a Japanese plant suggesting milmosa, says Nature Magazine, recounting the American botanist Darrow's expedition. The cultyx and corolla of the blossoms were so small that the flowers appeared to be merely a group of many stamens about an inch long, while at the base, and shading to bright pink. Some one thus called it the bird of paradise flower, but its more common name is fairy.

Toolmaker to the World

The United States exports of hardware and allied products have increased in the first seven months of 1925 about 10 per cent over 1924 with a total export of $50,000,000. Exports of abrasives, tools and cutlery showed considerable increases.—Good Hardware.

DEMOCRATIC SITUATION

Political leaders of all sorts in Washington are somewhat interested now in watching the course of those who have the fortunes of the Democratic party in charge and it is admitted that path of the lieutenants of the party of Jefferson is not an easy one.

For the Democrats are having more difficulty in getting hold of a live issue than they have experienced in some years. The record of the Democrats in Congress up to this time has not been conducive of good issues. This is admitted by such staunch Democratic organs as the New York World and Senator Jim Reed, the brilliant and caustic Missourian recently charged his Democratic compatriots in the Senate with having joined the Republican party.

Up to this time the session of Congress and more especially the Senate where issues are generally made, has been busy with two principle subjects—the tax bill and the World Court. In both of these measures the Democrats joined almost solidly with the majority in putting over the administration program. Therefore the Democrats can make no issue out of the World Court. And they are no better off so far as the tax bill is concerned, because most of them lined up for the administration measure. It is now planned to adjourn Congress in May or June and if this is done little time remains for the making of issues.

Some of the Democratic leaders hope to make an issue out of the tariff, but even this is embarrassing to them. For protective tariff sentiment is growing surprisingly in the south in Democratic strongholds and is not nearly so much of a party issue as it was a few years ago.

The Democrats will enter the Senatorial campaign, of course, with a decided advantage in the fact that in all close states where Senator bent is a Republican. This means that the Democrats have several chances to gain Senators, but are in no danger of losing any. But this advantage is somewhat offset by the lack of issues. Senatorial campaigns, however, are more or less personal, and issues do not always count so much. But the election of 1928 is looming ahead and up to this time the Democrats have made no preparation for it in the way of issues. Unless they can repair the situation materially within the next two years the chances will remain decidedly favorable to the Republicans. At least this is the general opinion of nearly all impartial observers.

Interesting figures just compiled by the Federal land bank, have inspired the bankers of the Twin Cities to ask this question: What would agriculture have done without the Federal land bank?

Of the 647 local loan associations, which each borrower is required to negotiate his loan, North Dakota leads with 196; Minnesota is second with 181; Wisconsin third with 136 and Michigan fourth with 134.

Through these 647 associations, 32,664 farmers have been enabled to borrow a total of $123,636,300.00. North Dakota farmers to the number of 9,631 have borrowed $38,724,300; Michigan farmers are second in number, 8,203, but lowest in the amount borrowed with $21,534,000; Minnesota has 8,003 farmers who have borrowed $35,850,500, while 6,827 Wisconsin farmers have been loaned $27,527,400.

FREE SPEECH

Free speech means the right of every man to express his opinion as to our government and its Constitution and its laws, but does not mean the right to advocate the overthrow of the government by violence according to George B. Lockwood, who writes editorially in the current number of the National Republic under the caption: "What Free Speech Means." Mr. Lockwood says in part:

"But what does 'free speech' mean? Freedom does not mean that each man shall do as he pleases regardless of the welfare and safety or rights of others. It means that he shall be free to do what he pleases, up to the point where he does not invade the freedom of others or the general interests of society. Freedom cannot be the monopoly of any one individual or group. It must be limited by the right of others to similar freedom.

We have here a government by public opinion. Under our form of government public opinion can change both the Constitution and the laws. The means are provided by which this can be accomplished. There can be no complete change in the personnel of government and in the laws which govern the American people within a period of six years; for within that period every executive and legislative officer must return to the people for a grant of authority.

Free speech means the right of every citizen to express his own views with regard to our officials, our laws, our institutions, and even our government itself. Any limitation of that right would represent a departure from the spirit of Americanism.

The 'right' to advocate the violent overthrow of our government does not exist more than the right of the individual to publicly advocate the lynching of his neighbor and to incite a mob to that end. When that 'right' is demanded in behalf of agitators who publicly acknowledge their loyalty to an alien political party dominating a government which makes no concealment of its purpose to overthrow this government by revolution, it is invoked in behalf of treason, which the Constitution defines as giving aid and comfort to this nation's enemies."

COMMENT.

—It being the fashion to coin new words to define various types of discourtesy or lawlessness, why not have one for the motorist who gaily splashes pedestrians with street debris at every opportunity? He soon will be abroad in all his glory once more and a proper cuss word for him might relieve a good many boiling tempers.—Portland Express.

—We don't see how a conscientious athlenist can enjoy a winter vacation in Florida, knowing that some poor murderer back in Chicago or New York or even nearer home than that is in danger of losing his life for lack of expert testimony.—Kansas City Star.

—Often and often have we thought of President Coolidge's remark about his Vermont farmer neighbor: "My people are happy and contented. They belong to themselves, live within their incomes and fear no man."—Progressive Farmer.

—Florida's invitation seems to be pretty well summed up in Numbers, 10th chapter, 29th verse: "Come thou with us and we will do thee good."—Norwalk Pilot.

—Mussolini would seem to be in need of a reminder that the sun of Austerlitz was followed by the gloom of St. Helena.—Boston Transcript.

—Henry Ford is said to deplore the passing of the barn dance. And who, pray, planted garages where barns used to be.—Indianapolis News.

—Rockefeller and Ford may support a polar flight but its understood that neither of them is anxious to go along.—Indianapolis News.

—Some states are worried over a surplus of crops, while this state is troubled by a shortage of voters.— Milwaukee Journal.

—The trouble with the average man is that he never tries to mend his ways till he finds himself broke.—Los Angeles Times.

Don't Buy From Peddlers

A school principal taking up a collection for flowers from the faculty walked into the kindergarten of the school. The principal had just successfully solicited a donation from the kindergarten teacher and was passing out, when Johnny piped: "Teacher, I wouldn't buy anything from that man. Mother always says to buy in the stores and not from those peddlers."

Power of Vibrations

A Boston violinist says he can put out a flame with the vibration of his fiddle. But that's nothing. A saxophone slightly off key can put out an entire orchestra.—Cleveland Plain Dealer.

—Friday and Saturday 25 per cent discount on all beads, also many stamped goods at Holley Gift Shop. 48-3t

Col. William Mitchell was found guilty by the court-martial after a trial lasting more than seven weeks and was sentenced to suspension from rank, command and duty for five years, with forfeiture of pay and allowances for the same period.

COL. WILLIAM MITCHELL

THEATRE

Dixie Merchant.

The historic old race course at Pleasanton, Cal., was selected as the ideal spot to shoot the thrilling racing scenes in Fox films. "The Dixie Merchant" a delightful story of a philosophical old character of the south in which J. Farrell MacDonald is featured. The picture will be shown at the Palace theatre for two days' starting March 26th.

Here, in the late nineties the society of San Francisco and the Bay Cities gathered for the opening of the races; all fabulous sums of money changed hands in the end of each day.

The history of harness racing in America is contemporaneous with the history of the country itself. Until the revolution most of the racing was confined to England, but after this the gentlemen of the colonies began to import stock and plot out courses for this sport. At first running horses were the only ones considered, but with the importation of the great "Imported Messenger," trotters became more and more popular, particularly with the wealthier classes.

This great horse who established one of the first records for trotters in America shortly after his arrival in this country, was a gray, 15 hands three inches high. He is usually to be found among the direct ancestors of most of the blooded racing stock of the country today.

Messenger, however, in spite of the fact that he was a trotter, was raced with a saddle. It was not until 1806 when the roads were better built that the horse "Yankee" established the first record in America with the sulky in Harlem Lane in New York, then one of the most fashionable gathering places for sportsmen and horsemen.

Since then, with the invention of the ball bearing, rubber-tired sulky in 1892, records have continued to be broken each year.

"Cherryblossom," the little mare who is cast as "Marseillaise" in "The Dixie Merchant," holds many records for speed at the various state fairs in California. She is seven years old, fifteen and two-fifths hands high, weighs an even thousand pounds.

Madge Bellamy and Jack Mulhall head the all-star cast in the picture which was made under the direction of Frank Borzage.

DID YOU EVER STOP TO THINK

By Edson R. Waste, Secretary
Shawnee, Okla., Board of Commerce

That some cities are satisfied with just marking time.

That a city is only as progressive as its citizens.

That some cities seem to delegate to professional politicians the building and development of business for the home city.

That often the people also delegate to the politician the power of thinking and acting for the cities best business interest.

That it takes better business to build cities and it must be done by business men who should have the united support of all.

That every effort should be made to expand the trade territory of the home city.

That every dollar brought into the home city brings new money into circulation. Cooperative effort will attract business to any city.

Citizens can attract favorable attention by boosting.

If the home folks don't boost the home city, nobody else will do it for them.

Everybody should boost the home city, praise it, talk about it, speak well of its citizens and its industries.

—Easter Cards and Gifts for all your friends at Holley Gift Shop. 48-3t

Order For Publication.

STATE OF MICHIGAN — The Probate Court for the County of Charlevoix.

At a session of said court, held at the probate office in the City of Charlevoix, in said county, on the 17th day of March, A. D. 1926.

Present: Hon. Servetus A. Correll, Judge of Probate.

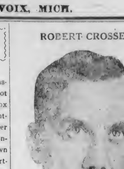
In the Matter of the Estate of James D. McKee, deceased

Robert Bridge having filed in said court his petition, praying for license to sell the interest of said estate in certain real estate therein described.

It is Ordered, that the 7th day of April, A.D. 1926, at ten o'clock a.m. at said Probate Office be and is hereby appointed for hearing said petition, and that all persons interested in said estate appear before said court, at said time and place, to show cause why a license to sell the interest of said estate in said real estate should not be granted.

It is further ordered, that public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Charlevoix Sentinel a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
48-3t Judge of Probate.



Representative Robert Crosser of Ohio announced his intention of reintroducing his bill which would provide for government loans to citizens for the construction of homes. Mr. Crosser is a member of the house committee on interstate and foreign commerce.

ROBERT CROSSER

BEAVER ISLAND

The death of Lawrence McDonough on the 4th inst., removes from our midst one of the island's most highly respected and honorable citizens.

The esteem and respect by which he was held in this community was manifested by the large concourse of people that followed the remains to their last resting place, notwithstanding the severe snow storm that prevailed during the day.

Lawrence McDonough or "Larry" as he was familiarly known by his friends, a son of the late Sylvester and Ellen Carey McDonough, was born on the McDonough homestead at Sand Bay on the east side of Beaver Island about 58 years ago, and it was here he grew to manhood.

In 1899 he was united in marriage to Bridget Cunningham, occupying the Cunningham farm until 1904 when he moved to St. James where he entered the employ of Capt. John McLean as shore hand. In 1914 he resigned and took a similar position with Mike Call, continuing in his employ until about a year ago, when he developed what was thought at the time a slight stomach trouble, which later on proved to be of cancerous nature which later on created his death.

His fortitude under the trying ordeal he has passed through for the past year was marvelous to behold. At times he suffered untold agonies, and still with all he never lost heart always contending with the will power of a giant.

His wife and children, Mrs. C. Gallagher of Green Bay, Mrs. Wess Ransbotn of Escanaba, Mrs. Edw. L. Santos and Mrs. C. N. Melville of Chicago, Mrs. V. V. McDonough, Mrs. Mike Call and Mr. Hugh Cornaghan of St. James. Interment took place at Holy Cross cemetery, Rev. Father McMannon officiating.

A sublime incident in connection with the obsequies which is also noticeable to all present was the presence of six nephews of the deceased who acted as pall bearers. Mr. McDonough was a quiet, peaceable, law-abiding citizen, beloved by all with whom he came in contact and we trust that on the last pages of his life the "angels" have written peace.

First English Almanac

The first almanac printed in England was "The Kalendar of Shepherdes," which appeared in 1497, and from that time forward almanacs were numerous, "issues and prognostications" being added in most cases to calendar information.

Notice of the Annual City Election.

To the Electors of the City of Charlevoix, State of Michigan.

Notice is Hereby Given, That the next ensuing annual City Election will be held on Monday, April 5th, A.D. 1926, in the Council Rooms, corner of State and Clinton streets, in said city, at which election the following officers are to be elected, viz: One Mayor, one Clerk, one Treasurer; one Justice of the Peace and one Park Commissioner, full term. Also one Supervisor, one Alderman and one Constable for each of the three wards.

Notice is Further Given, That the polls of said election will be open at 7 o'clock a.m. and will remain open until 5 o'clock p.m. on said day of election. 48-3t

CHARLES H. LAMPHEAR,
By D. S. Payton, Deputy. City Clerk.

REGISTRATION NOTICE

For the Election to be Held April 5th, 1926

To the Qualified Electors of the City of Charlevoix:

Notice is hereby given that in conformity with the Michigan Election Law, I, the undersigned City Clerk, will, upon any day except Sunday and A.D. 1926, at ten o'clock a.m. at said Probate Office be and is hereby appointed for hearing said petition, and that all persons interested in said estate appear before said court, at said time and place, to show cause why a license to sell the interest of said estate in said real estate should not be granted.

It is further ordered, that public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Charlevoix Sentinel a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
48-3t Judge of Probate.

CHARLEVOIX COUNTY FARMERS INTERESTED

Co-operative Extension Work In Agriculture and Home Economics

(B. C. Mellencamp, Agr'l Agent)

Boyne City, March 10th, 1926

Dear Farmer:

Spring will soon be here, therefore it is the proper time to get your program outlined for your farm needs. Having sent out no circulars thus far, the enclosed will contain many subjects and announcements that will be of interest to you and please spare the time to read carefully and keep for reference:

Dairy

Figures from 18,011 cows who have completed yearly records, give us the surprising information that cows producing only 150 pounds of butterfat a year cost $40.55 for feed and leaves an income over cost of feed $27.95; cows of 200 pounds fat cost of feed $47.27 and $42.45 net profit; 250 pounds fat cost of feed $53.79 and $57.82 net profit; 300 pounds fat cost of feed $59.28 and net profit of $73.34; 400 pounds fat cost of feed $89.35 and $105.07 net profit over cost of feed. Based on 4¢ cream for entire year.

This table proves that the more production from the cow the greater the net profit, and hence feeding and culling are important factors. As a farmer, you can be more efficient in both—feed a balanced ration! It pays better! It increases production and production means more money—sell the poor cows! They never will make money. They take profits from good cows. Lastly breeding increases ability of cow for added production, so why not use a good Purebred Sire and raise the Scrub where he belongs. If you want to buy better cows to improve your herd, or are interested in buying a better Sire or co-operate with some of your neighbors, drop a line to County Agent Mellencamp at Boyne City and he will gladly lend his assistance. An effort will be made this spring to line up the men interested in the various breed for trips to buy dairy stock, male or female. Also if wishing to get a correct record of your cows, join the Charlevoix Cow-Testing Association, costs little, means money for you. Are you interested?

Calf Club.

Is your boy or girl interested in your farm and farm home? What wouldn't you take to interest him or her? Why don't you let him join the Calf Club! Let him feel the pride of ownership, let him have a calf of his own to feed and care for. Your boy or girl is eager to gain knowledge and help themselves. They want to learn about livestock and help themselves. They want to learn about livestock and are anxious to train themselves to be efficient. This spring plans are laid to organize clubs throughout the county, so let the County Agent know you are interested. Last year three boys were given a free trip to the State Fair in recognition of their Calf Club work.

Clothing Project.

Last year 395 families availed themselves of the opportunity of learning many helpful and time y suggestions in sewing. Due to the splendid results, an advanced course in Clothing will be given this year, starting about the middle of April and carried on in the same way as formerly, which was to select a leader from each locality, who received the instruction from the specialist, then gave the lesson to the local group as their representative. Glad to state sew groups can be organized to take the advanced work, whether they received last years project or not, so now is your opportunity to get this excellent course free of charge. Be sure your community is represented this year, either by you or another lady, as your representative and the safest way is to drop a line to the County Agent. Sixteen ladies are the maximum to be taught in each of the two groups and that is not many. Remember this is for everyone, city or rural, so decide now.

Lime.

Did you ever test your soil for acidity? Do you realize that lime is your best fertilizer, if soil is sour, and can be purchased from $1.00 per ton in bulk, 40 tons minimum. Also your Agent can sell you a Soiltex outfit for only 25c. You can use same any day of the week but Sunday and will last for two years. Limestone applied at the rate of from one-half ton per acre, will increase your yields and give you alfalfa and sweet clover; the two best friends you have on the farm. Get your neighbors interested ad with you and get orders for a carload. If interested see your Agent for Co-op manager about this new Gold Mine.

Tyrotol.

Just received word from Otsego county stating they plan on sending for another carload of Pyrotol, the government explosive, for April or May delivery. Less than 10c a pound and with every two hundred pounds you get one hundred caps. Get those pesty stumps and stones out of your way. Get your orders in at once or you will be too late.

Hang me up for future use, but before that let your seed corn! It tests low! A stitch in time save nine.

Might Have Been Worse

A man respectfully asked because he proposed to two girls and both of them rejected him. Well, look how much worse off he is now if both had accepted him.—New York American.

Wednesday, March 24th

"THE ONLY THING," is a new Metro-Goldwyn-Mayer picture. Full of clean and wholesome entertainment. Come see this picture and forget the problems of the every day.

Also a Fox News Reel. Travel the world with the News Reels. The very best form of travel.

IN HIS NEW UNIFORM

Harry Olmstead
Chosen Manager
Central Trust Co.

The Central Trust Company an organization of recent creation of Lansing, Michigan, with its place of business and offices in that city, has placed the management of the company affairs in the hands of Mr. Harry Olmstead, a former Charlevoix citizen well and favorably known in banking and financial circles throughout Michigan, Illinois, Indiana, Wisconsin, Minnesota and other states with which he has been closely allied for some years in conjunction with his position with the Federal Reserve bank.

Mr. Olmstead comes to the new position after a thorough experience in financial institutions. He is a native of Michigan and was attracted by the opportunity to return to activities among his old friends. He began his banking experience with the McPhail chain of banks in Northern Michigan, and gradually rose to the position of cashier of the Central Lake bank. He then joined the state banking dept. as an examiner, serving in that capacity for about five years. Upon the reorganization of the securities commission he left the banking department to become examiner with the Michigan securities commission.

Two years later he left the state employ to participate in the organization of the First Bond and Mortgage company of Lansing, acting in the capacity of secretary. These varied experiences led to an opportunity with the Federal Reserve bank of Chicago, with whom he now holds the position of examiner, which position he has held for five years.

Considerable of his work as examiner, both with the banking department of Michigan and with the Federal Reserve bank, has brought him into a thorough study of trust companies and trust departments in various states and under almost every conceivable surrounding.

Mr. Olmstead said: "I am delighted at the invitation to return to Lansing. During my residence here I learned to love the city and to appreciate the splendid people in it. The very idea of the local banks consolidating their efforts along the trust line into one trust company in order that it may better serve the community, made a great appeal to me.

It is a most unusual situation and I am confident that the new company will start away under most auspicious circumstances. The opportunities of trust companies to render real service has been growing tremendously throughout the nation and now that Lansing has reached its present stage of prosperity and stability, there is a manifest need for a company fully equipped to serve in all trust capacities.

I am delighted with the plans of the organization committee in so planning the company that it can well serve central Michigan and carry out the thought conveyed by the name—Central Trust Company."

SUMMER VISITORS

WILL BUY YOU A HOME

Neighbors of yours have paid for their homes largely out of summer rentals. It is a good way to acquire a home; and can be done with some houses I have listed for sale. Perhaps you want to figure with me.

PERSONALS

Ralph Newman spent Thursday and Friday of last week in Bellaire.

John L. A. Galster of Petoskey, was a business visitor in the city last Monday

Mrs. L. A. Moon spent the early part of the week here attending to business interests.

County Agent, B. C. Mellencamp, spent a little time in this part of the county early this week.

Attorney Thomas D. Meggison of Traverse City, spent a day or two early this week in this city on business.

Mrs. Edward Hapner, of Shepard, Mich., is spending a few days in this community. Last night she was entertained at the home of Mrs. Sterritt for work.

The young people of the Congregational church were invited to the Fessenden home for a social evening last Monday.

Clair C. Coulter, of Detroit, son of the late A. L. Coulter, arrived here last Tuesday and is spending a few days in Charlevoix.

Mrs. Hertha Mowe, of Chicago, is spending a few days here with her parents, Mr. and Mrs. William Heise and other relatives.

Miss Eva Adams, for the past two or three months a visitor in Grand Rapids, Ann Arbor and Chicago, returned to Charlevoix last Friday.

Miss Catherine E. MacDonald spent two or three days with her parents, Mr. and Mrs. Robert MacDonald, 310 Dixon avenue, last week.

Attorney J. M. Harris of Boyne City, is here on legal business this week, representing clients having cases in circuit court for the county now in session.

T. G. Winder of the Hotel Charlevoix, is away on business and will spend some time in Eaton Rapids and other points south before returning to Charlevoix.

Messrs. R. F. Sloan Sr. and R. F. Sloan Jr. motored to Grand Haven early this week on a business trip connected with their road construction projects

The official school census for Charlevoix is in charge of Dar F. Meech, was commenced last Monday and will continue until completed, probably in about ten days.

Mrs. R. B. Armstrong, for the past month with her daughters, Miss Helen of Chicago, and Mrs. George Wantz, Indianapolis, returned to Charlevoix last Monday.

Mr. Charles R. Bellinger spent several days recently with his daughter, Mrs. Ellsworth Dutton and family at Saginaw. He returned from his visiting trip last Tuesday.

Attorney E. N. Clink of East Jordan, is making frequent trips to Charlevoix this week on account of legal interests of clients having actions in the Charlevoix county circuit court.

Mr. and Mrs. L. D. Coulter arrived here from Detroit Wednesday to attend the funeral service of Mrs. former's brother the late A. L. Coulter who passed away last Monday.

The Fowler bus line is making its regular trips practically on schedule time, connecting with north and southbound trains of the Pennsylvania line at Petoskey, with the exception of the early morning north bound.

Members of Charlevoix Lodge No. 282 F. & A. M. will hold a special communication at the Masonic temple Tuesday evening, March 23rd, for the purpose of conferring degree work. A general attendance is desired.

Expert Accountants from the office of Ernst & Ernst are making an audit of the business affairs of the city. They commenced their work here early this week and will continue until a complete check is made in the various departments and city offices.

Fire at the home of Frank Prekale, on May street, yesterday afternoon damaged the residence to some minor extent, one hundred dollars or perhaps a little more. The loss was fully covered by insurance policies written by the Charlevoix Abstract and Insurance Company.

About one dozen of Albert Cook's Charlevoix friends surprised him at the home of his parents, Mr. and Mrs. James Cook of Marion township, last Saturday night, when they enjoyed an evening of splendid entertainment, a potluck supper and a nice sleigh ride to and from the farm home.

George R. Johnston, an employee in the store of Martin Block, had the misfortune to catch one of his hands in a meat grinding machine that he was operating last Monday and as a result of the accident lost the second finger on the hand caught in the mechanism, the finger being so badly mangled that amputation was necessary.

Tomorrow, Friday, March 19th, the Betty Shop, 110 Bridge St., will be formally opened by Mrs. R. A. Emrey with a showing of Easter hats and other new Goods. Heretofore the Betty Shop has opened earlier in the season, the opening this year being the latest since the Betty Shop was established.

—Easter Baskets and Candies for the Kiddies at the Holley Gift Shop. 48-3

Members of the local fire department were called to the home of Mr. W. J. Stevenson, 921 State St., last Tuesday, when a fire, due to a defective flue, threatened to destroy the residence. The damage will amount to a moderate sum and this mainly to the roof of the structure.

Dr. Frank H. Wilkinson has a supply, application blanks for parties desirous of attending the M. T. C. during the 1926 season. If you are interested would suggest that you communicate with Dr. Wilkinson who can furnish not only blanks in question but authentic information relative to M. T. C. activities, advantages and benefits.

The St. Patrick's Day dance, sponsored by members of the local fire department at Lakeside Pavilion Wednesday night, was exceptionally well patronized, the dance program all that could be desired while the music furnished for the occasion was of a superior order. The affair passed off pleasantly with all patrons getting a full measure of enjoyment out of the evening entertainment.

Friends of Mrs. Mary Illinett surprised her Monday evening, bringing a potluck supper with them for her celebration her birthday anniversary. So a liberal serving was carried to her home. Also a beautiful black silk, fifteen gate as a gift from the Union. The remembrance was very much appreciated by the dear lady who was for so many years the leader in the work and who still retains her interest though her husband's sickness and her own poor health prevents her active participation.

Mrs. Charles Novak entertained the 7th graders of the East Jordan school and the 9th graders of the Charlevoix schools at her home last Tuesday night. Various forms of entertainment were indulged in during the evening, and of the plays played last week was what produced the same of enjoyment for the youngsters. Refreshments served later in the evening proved another pleasant feature of the occasion, came in for no modest amount of attention and was pronounced a most satisfactory part of the program.

Several Charlevoix radio fans were greatly surprised last Tuesday evening when they picked up Detroit and heard the announcer name "Raymond Faulkner of Charlevoix, piano accompanist" in a program being put on the air by station W.W.J. Friends here had not been apprised of the young pianist's intention of appearing on the program, being the evening of Family Religion. The beautiful hymn slides for the hymn, "Saviour Thy Dying Love" will also be used.

Wednesday evening will be announced in the Church Bulletin.

Thursday evening the Epworthians, their young friends and the pastor will lunch together at the church at 6:15. A brief program of short talks and music will follow the supper. Then all will go to the church auditorium, where everyone is invited to an evening with "Pictures That Preach." Every person who attends will be given a copy of a great religious masterpiece of art to take home with them for keeps. The sermon will be brief and built around the theme of this picture.

On Friday evening the remarkable pageant, "The Challenge of the Crosses" will be presented. Don't miss this and the other features that go with it, because the programs given here is only an outline of the good things for those who will spend a happy, thoughtful hour four evenings of the week at church.

There are no strings tied to these meetings. No collections will be taken during the week evenings. No embarrassing situations will be forced upon anyone. Just come and worship according to your understanding of these matters.

Church of God

Wm. Eldridge, Pastor

Preaching services Sundays at 10:30 a. m. and 7:30 p. m.

Sunday School at 12:00. Subject for next Sunday, "The Atonement of Christ."

Prayer meeting each Wednesday evening at 7:30.

St. Mary's Catholic Church

Low Mass 8:00 a. m.
High Mass 10:00 a. m.
Saturday and Monday 7:00 a. m.
Rev. Knute Lowenski, Pastor.

CHURCHES

Methodist Church.

C. B. Pollock, Pastor.

Services next Sunday—

Morning Worship	10:30
Junior Church	10:30
Sunday School	12:00
Epworth League	6:00
Evening Worship	7:00

A great feature service next Sunday evening will be of special interest and helpfulness in the following features: Choral singing, echo singing, special music, pulpit editorial, "Which is the Ohi-at Church? Drama season, "The Terrible Meek." The sermon will be built around that wonderful drama of the Crucifixion, written by Kennedy. This book has just been added to our city library and is worth the earnest consideration of all. The public is invited to participate in this unusually evening of worship.

Next week will be an eventful week in this church. The pastor and his people have carefully planned two weeks of special feature services for the observance of the Passion Weeks thought of devotion and service. Those services are for all. The idea of the church is to keep fresh in the minds of all the fine, glad Christian sentiment that is associated with the ministry of Jesus Christ.

Monday evening will be rest evening. There will be no church service.

Tuesday evening will be Family night —about sixty special slides from the District Area office will be used to show the meaning of Family Religion. The beautiful hymn slides for the hymn, "Saviour Thy Dying Love" will also be used.

Wednesday evening will be announced in the Church Bulletin.

Thursday evening the Epworthians, their young friends and the pastor will lunch together at the church at 6:15. A brief program of short talks and music will follow the supper. Then all will go to the church auditorium, where everyone is invited to an evening with "Pictures That Preach." Every person who attends will be given a copy of a great religious masterpiece of art to

STATE OF MICHIGAN—County of Charlevoix—In Chancery

Dated March 15th, 1926.

Samuel Rowley, Plaintiff

vs.

Mary Routley, Defendant

Suit pending in the Circuit Court for the County of Charlevoix, in the City of Charlevoix, on the 18th day of March A. D. 1926.

In this cause it appearing from affidavit on file, that the Defendant, Mary Routley is not a resident of this state, but resides in the State of Illinois, on motion of R. L. Lewis, complainant's solicitor, it is ordered that the said Defendant, Mary Routley, cause her appearance to be entered herein, within three months from the date of this order, and in case of her appearance that she cause her answer to the complainant's bill of complaint to be filed, and a copy thereof to be served on said complainant's solicitor, within fifteen days after service on her of a copy of said bill, and notice of this order; and that in default thereof, said bill to be taken as confessed by the said non-resident Defendant.

And it is further ordered, that within twenty days the said complainant cause a notice of this order, to be published in the Charlevoix Sentinel a newspaper printed, published and circulating in said county, and that such publication be continued there at least once in each week, for six weeks in succession, or that he cause a copy of this order to be personally served on said non-resident Defendant, at least twenty days before the time above prescribed for her appearance.

PARM C. GILBERT,
R. L. Lewis, Circuit Judge.
Complainant's Solicitor. 48-3t
Business Address, Charlevoix, Mich.

STATE OF MICHIGAN—County of Charlevoix—In Chancery.

Dated March 18th, 1926.

Martha J. Ayers Westen, Plaintiff

vs.

Albert Weston, Defendant

Suit pending in the Circuit Court for the County of Charlevoix in Chancery, at Charlevoix, on the 18th day of March, A. D. 1926.

In this cause it appearing from affidavit on file, that the Defendant Albert Weston is not a resident of this state, and his residence is unknown, on motion of R. L. Lewis, complainant's solicitor, it is ordered that the said defendant, Albert Weston, cause his appearance to be entered herein, within three months from the date of this order, and in case of his appearance that he cause his answer to the complainant's Bill of Complaint to be filed, and a copy thereof to be served on said complainant's solicitor, within fifteen days after service on him of a copy of said bill, and notice of this order; and that in default thereof, said bill be taken as confessed by said non-resident Defendant.

And it is further ordered, that within twenty days the complainant cause a notice of this order, to be published in the Charlevoix Sentinel a newspaper printed, published and circulating in said county, and that such publication be continued there at least once in each week, for six weeks in succession, or that she cause a copy of this order to be personally served on said non-resident Defendant, at least twenty days before the time above prescribed for his appearance.

PARM C. GILBERT,
R. L. Lewis, Circuit Judge
Complainant's Solicitor. 48-3t
Business Address, Charlevoix, Mich.

Lillian Manley, 14-year old girl, of Charlevoix, is one of the prize winners in the word contest conducted by the Blue Valley Creamery Company. Over 8,000 boys and girls participated in this novel contest.

The aim of the contest, which closed February 15, was to discover how many English words, excluding proper names, could be made from the words "Blue Valley Creamery Company." Miss Manley was diligent enough to compile a list of 1,026 words. The grand prize of fifty dollars went to Myrtle Furrberg, of Fargo, N. D., who had 2,968 words. The second prize of twenty-five dollars was paid to Della L. Brown, of Oakford, Ill., who had 2,830 words, and the third prize of fifteen dollars went to Helen J. Minnie, of Sharpsburg, Ill., who found 2,821 words. The fourth prize of ten dollars was won by David C. Overman, of Charlottesville, Indiana.

W. C. T. U. Meeting

The Woman's Christian Temperance Union met last Friday afternoon at the home of Mrs. Harsha's with about thirty in attendance.

Several new members were received and plans made for continuing the membership campaign until May 14th—on so enlarged scale.

A short biography of Neal Dow, the father of Prohibition, was read by Mrs. Reinhart.

In the absence from the city of the leader scheduled for the day, the June topic was substituted, namely, "The Common Defense, and the General Welfare." The leader, Mrs. A. J. Usher, called for readings on the National Defense Act and the Shepard Towner Bill and followed these with an instructive paper using as sub-topics "The World Court, Needed Prohibition Legislation" "The Opium Question," "The International Bill," "Deportation of Undesirable Aliens" and "National Film Censorship."

Refreshments were served by the social department, including a fine cake prepared in honor of the birthday of Mrs. S. J. Alcox, Honorary President. To the regret of all, Mrs. Alcox was ill and unable to be present.

The April meeting will be held with Mrs. S. A. Correll.

—Holley Gift Shop has received new stamped goods, including Ladies' dresses to be embroidered, pillow cases, buffet sets, scarfs and luncheon sets. 48-3t

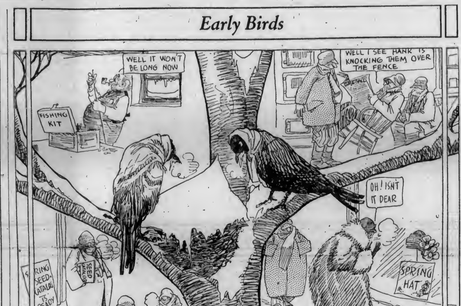
Morning worship at 10:30 with a sermon on "Questioning Jesus."

12:00 Sunday school.

6:00 Young Peoples' meetings; the Senior Christian Endeavor meeting will have a talk by Mrs. Sterritt on "Light Houses." The topic will be of unusual interest and should be enjoyed by a full attendance. The Juniors meet in the church dining room led by Mr. Alexander. Both societies enjoyed social events the past week, a sleigh ride for each. The Seniors met after the ride for a delightful evening in the home of Mr. and M



Nature's own body builder

"Six months ago life was unbearable. I was nervous and rundown. No sleep, no appetite. Since taking Tanlac I enjoy steaks, pastries, etc., sleep like a log, gained 10 lbs." Miss Helen Ferry, 1701 N. Broadway, Indianapolis, Ind.

Tanlac is Nature's greatest tonic and builder. Made from roots, barks and herbs after the Tanlac formula, it revitalizes the blood, tones up the digestive organs and puts the whole system in fighting trim.

Don't go about your work sickly and discouraged. Take the example of millions who have been helped by Tanlac. Step at your druggist's today and get this wonderful tonic. You'll be surprised how quickly you improve. For constipation take Tanlac Vegetable Pills.

Piles Disappear
Peterson's Ointment

"Please let me tell you," says Peterson, "that for instant relief from the misery of blind, bleeding or itching piles, there is nothing so good as Peterson's Ointment, as thousands have testified." Best for old sores and itching skin. All druggists, 60 cents.

The New Freely-Lathering Cuticura Shaving Stick For Tender Faces
EMOLLIENT MEDICINAL ANTISEPTIC

Measuring Time

In a wholesale test made at Johns Hopkins university men and women were requested to sit at ease for a definite time—two minutes was the actual period. They were then asked to estimate how long they had been seated. The males all measured the time as being within half a minute and three minutes. The calculations of the women ranged all the way from ten seconds to twelve minutes.—Los Angeles Times.

DEMAND "BAYER" ASPIRIN

Aspirin Marked With "Bayer Cross" Has Been Proved Safe by Millions.

Warning! Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer Aspirin proved safe by millions and prescribed by physicians for 25 years.

Say "Bayer" when you buy Aspirin. Imitations may prove dangerous.—Adv.

Cannot Be Transplanted

Buchu, an African drug plant, is one of the herbs which have thus far failed to survive transplantation to America. The drug must still be procured from its native country, where it is carried to market by bullock carts.

FOR CROUP
What Would You Do?

Here is a physician's prescription used in millions of homes for 25 years which relieves croup without vomiting in 15 minutes. Also the quickest relief known for Coughs, Colds and Whooping Cough. If there are little ones in your home, you should keep this recipe handy. Mix a bottle of this inexpensive, time-tried remedy, recommended by the best children's specialists. Ask your druggist now for 1½ Drake's Glessco. Full directions.—Adv.

Youth's Handicap

Young men are fitter to invent than to judge; fitter for execution than for counsel; and fitter for new projects than for settled business.—Bacon.

Don't Be Disfigured.
Keep Cole's Carbolsalve in the house. It soon relieves burn or cut quickly and heals without scars. At all good druggists. 30c and 60c. or J. W. Cole Co., Rockford, Ill.—Advertisement.

His Word

Teacher (to parent)—Do you know your son spells mischief?

Parent—Does he? Well, it's about the only word he can spell.—Comic Cuts.

Don't Fuss With Mustard Plasters!
Musterole Works Without the Blister—Easier, Quicker
Don't mix a mess of mustard, flour and water when you can relieve pains, soreness or stiffness with a little clean, white Musterole.
Musterole is made of pure oil of mustard and other helpful ingredients, in the form of a white ointment. It takes the place of mustard plasters, and will not blister.
Musterole usually gives prompt relief from sore throat, bronchitis, tonsilitis, croup, stiff neck, asthma, neuralgia, headache, congestion, pleurisy, rheumatism, lumbago, pains and aches of the back or joints, sprains, sore muscles, bruises, chilblains, frosted feet, colds of the chest (it may prevent pneumonia).

Seemed to Be Having Trouble With Phone

Letter received by telephone company: "Gentlemen: I now take the steps to inform you that I have no prosperity at present time with the restaurant which I keep so must take cheaper rate phone.—My nearly by neighbor has got a phone also which is a nickel kind. It like to get the phone as him but another one. I make two requestids of the recent dates for to have sent up a man to do it for me and further I wait all last week expect per him to come but not."

"Here I also complain against operator on my fone is very bad, she say hello what number you want and I say the number and she says questions after questions again for the same number and call aldideo aldion every time I make requests for numbers. I wish you to please kindly make a stop to prevent some more as this. Please sent up a man as before requests, and do much to get service as better what is possible and I am obliged.—Much truly."—Pathfinder Magazine.

Lightning Rod's Value

When a lightning stroke occurs on a radio building, thunder will follow. However, at least 98 per cent of the value of a system of lightning rods in the function of shunting the electrical energy to the ends of the points of the lightning rods, thus preventing the high electrical stress between cloud and earth, and when this is prevented the stroke is prevented. Lightning rods allow the current to pass or fuse off from the points, leaving the building in a normal electrical condition, yet there is a possibility of a lightning stroke which if it should occur would be much lighter than without any means of protection, and the rods should carry this stroke to the ground.

Maybes are no better bets.

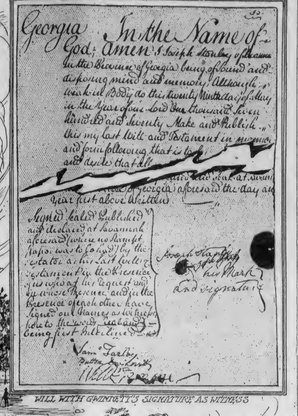
Button Gwinnett



WILL WITH GWINNETT'S SIGNATURE AS WITness

Record Price of $22,500 for "Signer's" Signature Recalls Romance of "Man of Mystery"

By JOHN DICKINSON SHERMAN

TWENTY-TWO thousand five hundred dollars paid for the signature of Button Gwinnett sets a new world record for autographs. This most valuable of all autographs was purchased by A. S. W. Rosenbach of New York at the recent sale of Part 1 of the famous collection of the late James H. Manning (1854-1925) of Albany, N. Y.

Have you ever heard of Button Gwinnett? No? Well, you need not feel lonesome. Who was he? Well, he was one of the three delegates from the Colony of Georgia to the Second Continental Congress in Philadelphia in 1776 and as such delegate affixed his signature to the Declaration of Independence.

There is nothing sentimental about this record-breaking price. It is strictly in accord with the universal law of supply and demand—which obtains in autographs just as it does in pork or potatoes. There are only twenty-odd known signatures of Gwinnett in existence. There are probably ten times that number of rich men in the country who want his signature.

This demand comes especially from men who are ambitious to own a complete set of the signatures of the Signers of the Declaration of Independence. A census made last year by Charles F. Jenkins of Philadelphia showed twenty-seven of these complete sets, seventeen of which are permanently in public institutions and ten in private hands.

Most of the Gwinnett autographs in these sets are either documents signed, or cut signatures. The J. Pierpont Morgan collection No. 14, has the draft of a will in Gwinnett's handwriting. The Henry E. Huntington set No. 16 has a letter signed, dated March 21, 1777, less than two months before his tragic death. The Louis Bamberger set No. 24 has a note written by Gwinnett in the third person, beginning as follows: "Mrs. Gwinnett's compliments to Mr. and Mrs. Sheftel, hopes Mrs. Sheftel is recovered," and so on. Mr. Jenkins, owner of set No. 26, paid $14,000 in 1924 for Gwinnett's signature on an indenture of a mortgage on St. Catherine's Island, Ga., April 25, 1770.

This record-breaking autograph is Button Gwinnett's signature as witness on the original will of Joseph Sinking of Savannah, Ga., May 25, 1776, as seen by the reproduction. Mr. Manning paid $4,900 for this document at the Danforth sale in Philadelphia in 1912.

How inexorably the law of supply and demand obtains in autographs is shown by the following list of the prices brought at the Manning sale for the other signatures of the set. Doubtless it will also elicit expressions of surprise from students of American history. The list:

NEW HAMPSHIRE

Josiah Bartlett, June 19, 1774, $460.
William Whipple, March 17, 1776, $460.
Matthew Thornton, 1777, $565.

MASSACHUSETTS

Samuel Adams, 1775, $275.
John Adams, March 30, 1776, $315.
Robert Treat Paine, 1785, $65.
Elbridge Gerry, 1795, $45.

RHODE ISLAND

Stephen Hopkins, 1744, $7.50.
William Ellery, September 21, 1775, to General Milter, denying that he had voted against Washington for commander in chief, $165. (At the Dreyfuss sale, December 6-7, 1912, this identical MS. brought $95. Others now, $17.50.

CONNECTICUT

Roger Sherman, 1775, to W. Williams, on news of the battle of Lexington, $500.
Samuel Huntington, 1777, $50.
William Williams, 1776, one of Delegates to congress, September, 1776, $90.
Oliver Wolcott, July 26, 1777, $230.

NEW YORK

William Floyd, 1777, $250.
Philip Livingston, 1774, $210.
Francis Lewis, December 28, 1776, $530.
Lewis Morris, 1776, to Governor Clinton, $430.

NEW JERSEY

Richard Stockton, 1763, $55.
John Witherspoon, July 29, 1776, $700.
Francis Hopkinson, 1769, $185.
John Hart, September 1, 1775, $525.
Abraham Clark, 1776, $625.

DELAWARE

Caesar Rodney, July 4, 1776, to Capt. Thomas Rodney (describing his ride through heavy thunderstorm to aid the Declaration), $1,600. This MS. sold for $950 in the Henkels Rodney sale, June 13, 1919.

George Read, November 4, 1776, to Morris, upholding ship Cicero, $375.

James Smith, 1775, August 23, 1933, to Oscar Loomis Rodney, (nephew of the signer), giving an account of the adoption and the signing (not until long after July Fourth) of the Declaration, brought $3,600. This MS. sold at the Henkels Rodney sale, June 13, 1919, for $675. The report, signed by McLean as speaker, of the Delaware resolutions, May 9, 1775, on the Declaration, sold for $375.

PENNSYLVANIA

Robert Morris, 1777, $27.50.
Benjamin Rush, 1778, $210.
Benjamin Franklin, May 31, 1777, to his nephew, Jon. Williams (on the future of the U. S., etc.), $1,050 (others $700, $160, $60). L. S. $750.
John Morton, 1767, $3.
George Clymer, November 28, 1776, $210.
James Smith, and others, 1775, $625.
George Taylor, 1765, $475.
James Wilson, December 26, 1776, $530.
George Ross, 1772, $200.

MARYLAND

Samuel Chase, 1778, $85.
William Paca, 1783, $55.
Thomas Stone, 1744, $160.
Charles Carroll of Carrollton, June 14, 1776, $940.

VIRGINIA

George Wythe, 1777, $300.
Richard Henry Lee, December 24, 1776, $125.
Thomas Jefferson, 1781, $260.
Benjamin Harrison, September 15, 1776, $650.
Thomas Nelson, Jr., 1777, $235.
Francis Lightfoot Lee, September 30, 1776, $375.
Carter Braxton, 1777, $485.

NORTH CAROLINA

William Hooper, November 1, 1776, $400.
Joseph Hewes, 1775, $900.
John Penn, 1775, to Hewes, $450.

SOUTH CAROLINA

Edward Rutledge, 1776, $390.
Thomas Heyward, Jr., August 3, 1801, introducing John Hagre to Jefferson, $300. This MS. brought $195 in the Danforth sale in 1912.
Thomas Lynch, Jr., cut signature only, attested by Teffi (to 1840), sold for $2,800. This signature was bought by Mr. Manning, November 12, 1917, at the Philadelphia sale of the collection of Joshua B. Cohen of Baltimore for $160. On January 15, 1908, a similar signature was sold at the Anderson-Henry Goldsmith sale for $75. At the Danforth sale, December, 1912, a similar signature brought $100. Another sold at the Parke-Bernet sale, November 1924, except of John Morton's handwriting. Dr. Virgil Loddon, 1744, with Lynch's signature, sold for $2,600.

Arthur Middleton, document, January 22, 1782, signed by him and others, to note for 200 Spanish milled dollars, $475. Also a letter signed by him and seven other Signers, October 13, 1776, $1,450.

GEORGIA

Button Gwinnett, $22,500.
Lyman Hall, May 17, 1775, $225.
George Walton, 1781, $50.
Button Gwinnett has been called the "Man of Mystery." It seems to fit. He slept up into prominence like a meteor and fell like one. And outside of those two years of prominence little is known of him.

He was an Englishman and was born about 1732, possibly at Bristol. As to circumstance of birth, family, schooling and business nothing definite is known. Was his christian name "Button," or was Button a corruption of Burton or Bouton. The name of Gwinnett is rare in England today. He is believed to have been married, but no one knows when or whom he married. "We know of none among the living in this state," writes a Georgia historian, "in whose veins courses a drop of blood inherited from or kindred with that of Button Gwinnett."

He arrived about 1762 at Charlestown, S. C. What he did there is not known. About 1765 he engaged in general trading at Savannah, Ga. About 1770 he bought the Island of St. Catherine from Hector Beaunworth and his Indian wife. The price is said to have been 5,250 English pounds. Thereupon he took up the life of a planter.

Is there an authentic portrait of Gwinnett in existence? Only one seems to have any sort of claim to being genuine. This is or was in the possession of Hampton L. Carson of Philadelphia. It has this merit: It shows a face which corresponds fairly well with Gwinnett's known characteristics.

Where lies the body of Gwinnett? This seems an open question. His burial may have taken place in the old Colonial cemetery at Savannah. Or his remains may lie on the island of St. Catherine. Gwinnett's name is on the monument erected in Augusta in 1888 with those of Lyman Hall and George Walton. The bodies of Hall and Walton lie under the monument, but there is no pretense that the memorial marks Gwinnett's last resting place. What lies beyond of the letters and documents that Gwinnett must have written and signed in his career as a business man and public official?

Georgia, when the troublous times of the Revolution drew near, was far from unanimous. In fact the Tories were strong enough to prevent the sending of a state delegation to the First Continental Congress, though the Parish of St. John sent its own delegate—Dr. Lyman Hall, a former Connecticut man who was a leader among the Sons of Liberty. Gwinnett seems to have kept aloof until 1776. Then at Savannah January 20 he was appointed a delegate to the Second Continental Congress, with Doctor Hall and George Walton. In October of the same year he was reappointed. He was also made a member of the Georgia Council of Safety. In February of 1777 he became an official of the state government and probably had a hand in the drafting of the state constitution later adopted. March 4, 1777, Gwinnett was made president of the Provincial Council. May of 1777 he was defeated in the legislature for the governorship by John Adams Treutlen.

So a little more than a year saw the political rise and fall of Button Gwinnett. Hugh McCall, a Georgia historian, thus accounts for his meteoric character:

"Native-born Englishmen were in the habit of regarding the colonists as inferior to themselves, and they were apt to assume a bearing toward them highly offensive. In some degree Mr. Gwinnett was chargeable to this charge, and he looked upon his rapid elevation in public life as an acknowledgment of his superiority. These feelings were further increased when he was made president of the council, and soon succeeded among the natives a jealousy that was foolishly reciprocated by him. This was doubtless the prime cause of all the difficulties which surrounded him toward the close of his life and brought him to his tragic death."

The duel which brought about the death of Gwinnett soon afterward is passed over lightly by the historians. But here is the true inwardness of the situation which brought about the encounter:

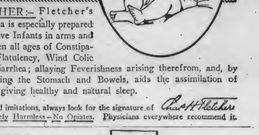
August 28, 1776, Gwinnett arrived at Savannah from Congress with a letter from John Hancock recommending the raising of Georgia troops. Evidently Gwinnett was ambitious to command them. The coveted epaulets fell to Lachlan McIntosh.

St. Andrew's Parish was full of McIntoshes, who had come over from Scotland by one of Oglethorpe's companies. Lachlan McIntosh and Gwinnett were soon to clash in the Council of Safety. Gwinnett's election as President of the Council and Commander-in-chief gave him opportunity to get after the McIntoshes. He accused George McIntosh (a brother of Lachlan) of disloyalty, impounded his estate and sent him under guard to congress at Philadelphia—where he was cleared after Gwinnett's death.

Gwinnett sent an expedition against East Florida and gave the command to a subaltern of McIntosh. The expedition was a rank failure, Gwinnett's defeat for the governorship followed, and the Clan McIntosh went about chortling with satisfaction. Finally Lachlan McIntosh declared publicly that Button Gwinnett was a scoundrel. That, of course, meant but one thing—a duel.

An account of the duel is preserved in a document sold at the Manning sale for $350. It is an undated and unsigned deposition made in May of 1777 by George Wells, a witness of the duel, before John Wereat, one of the judges for Georgia. The duel was fought before sunrise May 16, 1777, in Sir James Wright's pasture behind Colonel Martin's home. The distance was but twelve feet, both fired together. Each hit the other in the thigh. McIntosh stood. Gwinnett fell. McIntosh recovered to serve his country in the Revolution. Button Gwinnett died from his wound May 27, 1777.

Children Cry for
Fletcher's CASTORIA
MOTHER:— Fletcher's Castoria is especially prepared to relieve Infants in arms and Children all ages of Constipation, Flatulency, Wind Colic and Diarrhea; allaying Feverishness arising therefrom, and, by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep.
To avoid imitations, always look for the signature of Chas. H. Fletcher
Absolutely Harmless—No Opiates. Physicians everywhere recommend it.



"Those bilious headaches can be prevented"
"I know how agonizing they are. For years I was a chronic sufferer.
"And the headaches were not the worst part of it. The strong drugs I used to take to relieve the pain upset my stomach and slowly but surely undermined my general health.
"Finally I found out that my headaches were due to constipation. My doctor advised Nujol. After taking it regularly a few weeks the trouble disappeared.
"Since then I have never had another headache. There is no reason why I should, for the cause has been corrected."
Nujol Corrects Constipation in Nature's Way
Constipation is dangerous for anybody. Nujol is safe for everybody. Nujol simply softens the waste matter and thus permits regular and thorough elimination without overtaxing the intestinal muscles. Medical authorities approve Nujol because it is gentle, safe and natural in its action.
You can take Nujol for any length of time without ill effects. To insure internal cleanliness, it should be taken regularly. Unlike laxatives, it does not form a habit and can be discontinued at any time.
Ask your druggist for Nujol today and begin to enjoy the perfect health that is possible only when elimination is normal and regular.
Nujol
THE INTERNAL LUBRICANT
For Constipation

Says His Prescription Completely Banishes All Rheumatic Pain and Twinges---Is Guaranteed
Deep Seated Uric Acid Deposits Are Dissolved and the Rheumatic Poison Starts to Leave the System Within Twenty-four Hours.
Every druggist in this country is authorized to say to every rheumatic sufferer in this vicinity that if ALLENRHU, the sure conqueror of rheumatism, does not stop all agony, reduce swollen joints and do away with even the slightest twinge of rheumatic pain; he will gladly return your money without comment.
ALLENRHU has been tried and tested for years, and really marvelous results have been accomplished even in the most severe cases where the suffering and agony was intense and piteous and where the patient was helpless.
Mr. James H. Allen of 25 Forbes St., Rochester, N. Y., the discoverer of ALLENRHU, who for many years suffered the torments of acute rheumatism, desires all sufferers to know that he does not want a cent of anyone's money unless ALLENRHU definitely conquers this worst of all diseases; and he has instructed druggists everywhere to guarantee it as above in every instance.

Bill—"Are you out with your girl much?" Will—"Well, I really don't know. I haven't looked at my bank book this month."

What a Relief!

Sweet-Young Thing (to oculist)—I've just broken my glasses. Do I have to be examined all over again?

Oculist—No, just your eyes.

While You Wait

"Waiter, the service is terrible."

"Yes, sir, we have an efficiency man now and his system is being tried, sir."

She (singing an old song)—Won't you walk into my parlor—" He—"I'm so deeply entangled now that I really can't take another step."

Nuff Said!

Wife—John, did you see the way those men stared at that flapper when she got on the street car?

Husband—What men?

They're All Alike

Mr. Wilkes—Isn't that the new maid I hear singing at her work?

Mrs. Wilkes—Yes, and I'll wager that's all she is doing at it.

"We've got a dog at home, Marie,

Dad says he came from 'cross the sea.

One day I heard my dad remark,

He sailed the ocean in his bark."

Athletic Announcement

"How's your boy Josh doing at school?"

"He's doin' pretty good with this three R's," answered Farmer Cornfoot.

"Readin', Ritin' and 'Rithmetic?"

"No: Runnin', Rasslin' an' Ragtime."

FIND 'BLIND SPOT' IN SOUTH AFRICA

Hitherto Unknown People Discovered in Bechuanaland Protectorate.

Washington.—All of the world's "blind spots" are not within the polar regions. A South African government expedition lately returned from the Kalahari desert in Bechuanaland protectorate, reports the discovery of several large towns, stretches of fertile land, and thriving nations which have hitherto been unknown.

"Bechuanaland protectorate sprawls over a great portion of central Africa, a tableland of geographic extremes ranging from vast deserts to almost impenetrable swamps," says a bulletin from the Washington (D. C.) headquarters of the National Geographic society. "With an area greater than that of the state of Texas it has fewer than 2,000 European inhabitants. In light of recent discoveries, however, the native population must exceed 200,000.

"Safety Zone" for Natives.

"The march of the white man's civilization in South Africa has seldom touched or affected this great region. To the east is prosperous and populous Transvaal and southern Rhodesia; on the north are the rich forests of northern Rhodesia and of the Portuguese colony of Angola; to the west is the former German province of Southwest Africa, now under a Union of South Africa mandate; and to the south are the Cape provinces, richest and most developed of all.

"With railroads, cities and other landmarks of civilization on every side, Bechuanaland protectorate has apparently spelled 'detour' to adventurer and homeseeker alike. The latest maps do not list a permanent settlement in its great, largely unexplored, interior. Tribes are known to inhabit this region that are extremely primitive. Many of them are believed yet to be of African origin. The protectorate is, therefore, a sort of geographic and ethnological 'safety zone,' where the native blacks can watch the rush and whirl of progress on every hand, but can safely remain in blissful ignorance and leisure within.

"In climate, as usually is the case, rests the explanation for this seeming oversight on the part of European entrepreneurs. Bechuanaland protectorate, which should not be confused with Bechuanaland, a part of the province of the Cape of Good Hope to the south, is divided into two zones. These can be roughly classified as the wet and the dry. The wet, called Ngamiland, is a region of sluggish rivers and swamps, in which tropical vegetation grows in profusion. It covers the entire northern part of the protectorate. The central and southern sections comprise a great sand belt, largely desert, the meeting place of the surrounding provinces cut off the rain.

"In some respects, however, it is a mistake to call this dry section a desert, for it has little in common with such regions as the Libyan or the Nubian or the Arabian deserts. Although the scant rainfall is usually absorbed by the sand, or quickly evaporated, where it collects it pools or watercourses there is a good water ground flow, not far below the surface, throughout the district.

"The long dunes are covered with thick grass and bush, so destructive sandstorms are rare. The soil is not rich enough to support any considerable amount of agriculture, but cattle raising is carried on to a limited extent.

Governed From Without.

"For administrative purposes Bechuanaland protectorate is divided into eleven districts, each under a resident magistrate. A resident commissioner or overlord, for the protectorate resides at Mafeking, in the territory of Bechuanaland, south of the protectorate, and his assistant is stationed at Francistown, in the northeastern part of the protectorate. Each native chief, however, rules his own people. The protectorate is governed as a whole on the lines of a British crown colony.

"Chief of the native towns is Serowe, with more than 20,000 inhabitants, the capital of the Bamangwato district. Just north of it is the great salt lake of the region, Lake Makarikari. Here for vast wastes of salt marshes and sand live a people who have called the most backward in Africa. The desert and marshes have been their protection from the white man and other negro tribes, on fortresses whose walls are the want of fresh water.

"The protectorate has at least one claim to world consideration, however, for just within its eastern boundary runs a section of the Cape-to-Cairo main line, or at least what will be the Cape-to-Cairo main line when Cecil Rhodes' dream finally materializes. Parallel with it also are the trunk telegraph lines to the north. Within 200 miles of the eastern border is Pretoria, the new capital of the union, and Johannesburg, the metropolis of the southern part of the continent. Near the northeast corner is Victoria falls. Extensive deposits of asbestos have been found in the protectorate, including gold, silver and coal. They have not been developed due to the inhospitable living conditions and the lack of roads and railways."

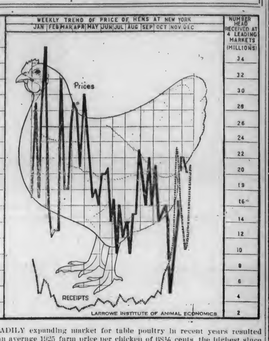
Chicken Prices in 1925 Highest in Four Years



A STEADILY expanding market for table poultry in recent years resulted in an average 1925 farm price per chicken of 19½ cents, the highest since 1921, according to the 1925 market review of the Larrowe Institute of Animal Economics. Prices for fowls on the New York market during the year were highest in late January when extra quality reselled 37 cents a pound. Since then they have ranged between 35 cents and 24 cents until early November when the usual heavy receipts of this time of the year began to be felt. Prices then dropped to 21½ cents a pound, but recovered rapidly as the colder holiday season came on.

Increased demand for poultry in 1925 over the previous year is due in some measure to a lesser consumption in 1924, caused by a widespread poultry epidemic in that year. Storage stocks of poultry did not accumulate as rapidly during the past year as they did in 1924, which is an indication of continued good prices during the spring months when this poultry is taken from storage.

Comparatively lower feed costs since 1920 have made poultry profits in recent years the highest in thirty years. Present market demands and industrial conditions in general point to good prices for poultry and poultry products for another two years at least.

RUSSIAN PALACES ARE NOW MUSEUMS

Mansions of the Romanoffs Opened to Proletariat.

Leningrad.—Russia has become a nation of museums. All over the country former imperial palaces, private residences, churches, monasteries and stately homes have been appropriated by the state and converted into museums for the "proletariat."

By commandeering private collections of works of art, the government has added enormously to the newest exhibits at the museums. At the Hermitage fine arts gallery in one of the greatest collections of Romanoffiana, Van Dykes, Rubens and other Dutch and Flemish masters in the world.

The sumptuous winter palace, where all the czars for the last 150 years guided the destinies of state, is now a national museum.

The great "white hall," the scene of so many brilliant festivities in the past, now has been transformed into the museum of the revolution.

The former living rooms of the late Czar Nicholas II and his family, including the boudoir of the empress and the nursery room of the children, have been preserved in their original condition for public inspection.

The former imperial palaces at Tsarskoe and Tsarskoye-Selo also are carefully preserved and are in much the same state as when occupied by their former tenants.

This is particularly noticeable in the case of the Tsarskoye-Selo palace, which was the favorite residence of the late emperor. Here every detail connected with the life of the imperial family is laid bare, and the public, which all over the world has an insatiable curiosity to know how royal personages live, can gratify its desire to the full.

All the furniture, clothing and personal belongings of the ex-czar and his family and—more pathetic than anything else—even the toys of the little murdered czarevitch, including a miniature telegraph slide and an American teddy bear, remain intact and undisturbed.

Providence the Scapegoat

Bishop Walter Taylor Sumner said in an after-dinner speech in New Orleans:

"We are too prone to lay the blame on Providence for misfortunes that are really our own fault. Providence, in fact, is getting a bad name.

"An old colored woman was fattening a Christmas turkey, but it got drenched just before Christmas in Kinsley hutch, and in a few days pneumonia carried it off. So the old woman's pastor called to console her in her grief, tone.

"He laid the blame, of course, on Providence.

"'Doubtless all is for the best,' he said, 'Providence, you know. Here we see the hand of Providence.'

"The old colored woman gave the table a whack with her fist.

"'Drat it!' said she. 'Providence hetnah look out, dass all. Dere's one whose wow'let dat Providence go too fah!'"

Small Treasure Trove

In 1920 a London dealer in antique furniture bought an old writing desk and sent it to his workshop for renovation. In the course of the work the secret drawer, always supposed to lurk there, was discovered, and in it were a number of part sheets of unused English stamps of early date. These had been the owner's private letter stamps, probably kept in this secret place to prevent "borrowing" by other members of the household, but every passing year had added to their value, and they produced a handsome sum at a sale.

CALIFORNIA BIG COTTON PRODUCER

Harvests Greater Crop Now Than Virginia.

Sacramento, Cal.—For 75 years the Golden state has been trying to become known as the land of cotton, and at last its efforts are meeting with a success as striking as were some of its early failures.

Figures of the federal Department of Agriculture disclose that for several years California has produced more cotton than Virginia, the oldest cotton-producing state; that California's average yield per acre is the highest of any cotton-producing state, and that California acala cotton sells at a premium on the cotton markets of the United States.

It was not always thus.

In 1851, when farmers were still throwing away their plows to join the rush for California gold, T. O. Selby received some cottonseed from Mississippi and planted it on his ranch just outside the city of Sacramento. Three years later the Sacramento Union acknowledged on its editorial page the receipt of "a lot of beautiful cotton" grown on the Selby ranch. It quoted Mr. Selby as saying that only the high price of labor prevented California from becoming within a few years "one of the heaviest cotton-producing states in the republic."

Under the lash of world-war development imperial valley's cotton production expanded prodigiously and inspired other districts to try growing on a commercial scale. The first important San Joaquin valley production was in 1918 and expansion was so rapid that in 1925 more than half the state's cotton acreage was in this region. Last year the state had an acreage of 172,000, the average yield being estimated at 351 pounds per acre as against 162.3 pounds for the United States at large. The estimated total production was 125,000 bales.

State legislation has set aside certain counties where only acala cotton may be grown, to protect growers from the seed stock deterioration that comes from intercrossing. A rigid and persistent quarantine is preserved against the boll weevil.

Fate of Los Angeles Harbor Sentry Sealed

Los Angeles, Cal.—Deserted a bleak, lonely sentinel of clay, at the mouth of the port, and one of the few remaining landmarks which guided early day mariners safely in and out of Los Angeles harbor, is doomed before the relentless march of progress, according to harbor improvement plans. The main channel will be widened to 1,000 feet and the island washed in the way. Two big waters will wash and deep ships pass over the spot, where stands the historic monument of clay today.

The island's passing is contingent on two things, both expected this year, the voting by congress of funds for the widening and deepening of the channel to 35 feet, and the ceding by Los Angeles electors of 25.6 acres to the federal government to equal the land tract lost to the city by the government in the widening.

Fights and Sings

London.—Joop Lelt is a Dutch heavyweight boxer who sings from the ring. After forcing Billy Pessage, an Englishman, to quit in two rounds, Joop sang from Pagliacci. It seems as if it would have been more appropriate for Billy to warble from that opera, but presumably he can't sing any better than he fights.

Royal Tennis Player

Henry VIII was the first man to lay down hard tennis courts in Europe.

New One

Here is a news item that somewhere in Los Angeles can probably get away with—once.

It was to blow out a match that John Heffetz speeded his automobile through North Broadway, Yonkers, at 35 miles an hour.

"I had three girls in my car and one of them tried to light a cigarette," he explained to the judge, adding: "I guess I'm a bit old-fashioned. I don't want my girl to smoke, so I stepped on the gas. The breeze blew out every match she tried to light."

And the judge smilingly said that that was a new one, and suspended sentence.

STATE OF MICHIGAN— The Circuit for the County of Charlevoix—In Chancery.
James L. Tumath, Plaintiff

vs.

Joseph Graham, or his unknown heirs, devisees, legatees and assigns; Lester Cobleniz, or his unknown heirs, devisees, legatees and assigns; Julian M. Wheeler, or his unknown heirs, devisees, legatees and assigns; William Green, or his unknown heirs, devisees, legatees and assigns, Defendants.

Suit pending in the Circuit Court for the County of Charlevoix, Chancery at the City of Charlevoix on the 27th February, 1926.

In this cause it appearing that it is not known whether or not Joseph Graham, or the said Lester Coblentz, or the said Julian M. Wheeler, or the said William Green, each or any of them is living or dead, or where each or any of them may be residing, therefore on motion of the said Plaintiff, it is ordered, that the said defendants, Joseph Graham, Lester Coblentz, Julian M. Wheeler and William Green, or each of their unknown heirs, devisees, legatees and assigns, enter and cause their appearance in said cause on or before three months from date of this order; and it appearing that the said Smalley Manufacturing Company, a Wisconsin corporation has no office or offices within the State of Michigan, therefore on motion of Lisle Shahahan, attorney for the said plaintiff, it is ordered that the said Smalley Manufacturing Company, a Wisconsin Corporation enter its appearance in said cause on or before three months from the date of this order; and that within twenty days after the entry of this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in the said county of Charlevoix, said publication to be continued once in each week for six weeks in succession, or that said plaintiff cause a copy of this order to be personally served on said defendants at least twenty days before the time above prescribed for their appearance. The above cause is for the purpose of clearing and quieting the title to the northeast quarter of the northeast quarter of section twenty six in township thirty three north, range seven west in said plaintiff.

PARM C. GILBERT,
Circuit Judge
LISLE SHANAHAN,
Attorney for Plaintiff.
Business Address, Charlevoix, Mich. 46-7t

Order issued by Authority of Act 230 of the Public Acts of 1925, closing the streams of the State to Brook Trout Fishing for a period of Five Years Commencing on the First day of May, 1926.

STATE OF MICHIGAN, County of Ingham, ss.

The Director of Conservation having made a thorough investigation of conditions relative to brook trout fishing, recommends the closing of the trout streams for a specified period.

Therefore, The Conservation Commission by authority of Act 230 of the Public Acts of 1925, hereby orders that for a period of five years from the 1st day of May, 1926, it shall be unlawful for any person to take, catch, or kill, or attempt to take, catch, or kill any brook trout in the rivers and streams of the State, excepting those rivers and streams designated or to be designated by the Conservation Commission, under penalties provided by Section 5 of Act 230 of the Public Acts of 1925.

Signed, sealed and ordered published this 21st day of September, 1925.

JOHN BAIRD,
Director of Department of Conservation.
Conservation Commission by:
W. H. Wallace, Chairman.
Edgar Cochrun, Secretary. 46-3t

Order Modifying Order issued by the Conservation Commission on the Twenty First Day of September, 1925, Prohibiting Trolling from a Motor Boat on the Inland Lakes of this State for a Period of Five Years from the First day of January, 1926.

An order was issued by the Conservation Commission on the twenty first day of September, 1925, prohibiting trolling from a motor boat on the inland lakes of the State for a period of five years from the first day of January, 1926.

It now appears after a thorough investigation by the Director of Conservation of the conditions prevailing in certain inland lakes that the order should be modified as it affects the following lakes: Elk and Torch in the counties of Antrim and Grand Traverse; Pine and Round, Charlevoix; Black, Ottawa county; Portage, Manistee county; White and Muskegon, Muskegon county and St. Clair and any other lakes directly tributary to the Great Lakes.

Therefore, the above mentioned order is hereby rescinded as it affects trolling on the lakes named. In all other respects the order issued on the twenty first day of September, 1925 shall be and remain in full force and effect, for the period of time therein mentioned.

Dated, Lansing, Mich., February 7,1926
JOHN HEAD, Director
Conservation Commission by
W. H. Wallace, Chairman
Edgar Cochran, Secretary. 46-3t

Order issued by Authority of Act 230 of the Public Acts of 1925, Regulating the Taking of Large and Small Mouthed Black Bass from Inland Waters of the Lower Peninsula of the State for a period of Five Years Commencing June 16th, 1926.

STATE OF MICHIGAN, County of Ingham, ss.

The Director of Conservation having made a thorough investigation of conditions relative to bass fishing in the inland waters of the State, recommends certain regulations.

Therefore, The Conservation Commission by authority of Act 230 of the Public Acts of 1925, hereby orders that for a period of five years from the 16th day of June, 1926, it shall be unlawful for any person to take, catch or kill, or attempt to take, catch, or kill any large or small mouthed black bass in any manner except by the use of hook and line, under the provisions of Section 5 of Act 230 of the Public Acts of 1925.

Signed, sealed and ordered published this 21st day of September, 1925.

Edgar Cochrun, Secretary. 46-3t

Order Prohibiting the Taking of Fish from the Charlevoix County Inland Waters of Lake Michigan for a Period of Five Years from April 1, 1926.

STATE OF MICHIGAN—County of Ingham—ss.

The Director of Conservation, after an investigation relative to the taking of fish from the rivers and streams of Charlevoix county, recommends a restricting order.

Therefore, The Conservation Commission, by authority of Act 230 of the P. A. of 1925, does hereby order that for a period of five years from the first day of April, 1926, fish may not be taken from the rivers and streams of Charlevoix county at any season of the year in any manner except by the use of hook and line, under the provisions provided by Section 5 of Act 230 of the Public Acts of 1925.

Signed, sealed and ordered published this 26th day of October, 1925.

JOHN BAIRD, Director
Dept. of Conservation
Conservation Commission by:
W. H. Wallace, Chairman
Edgar Cochran, Secretary 46-3t

Presidential Abode

Following the attack upon the executive mansion in 1814, it was painted white, to obliterate the damage done by fire. In popular parlance it was soon called by its now familiar name, although officially it was known as the executive mansion until Theodore Roosevelt put the stamp of his approval on the name "the White House."

WILL BELLINGER

Couldn't Make the Grade

Jamie had been taken to the house for the first time, and his doctor's examination proved her merely subnormal, so she was sent back to the orphan's home. "Well, Mamie Jo Anna in a burst of confidence, "Janie was sent away to be an idiot, but she couldn't pass and had to come back."

Something Fresh in Fruit

A delicious fruit, hitherto unknown to the civilized world, has been discovered in the Tres Marias Islands, off the west coast of Mexico. The fruit somewhat resembles the ordinary olive in size and color.

YOU READ the Other Fellow's Ad

You are reading this one. That should convince you that advertising in these columns is a profitable proposition; that it will bring business to your store. The fact that the other fellow advertises probably the reason he is getting more business than is falling to you. Would it not be well to give the other fellow a chance

To Read Your Ad in These Columns?

Two Boys Take a Swim in the River Last Sunday

Talk about your summer bathing beaches in July and August, our summer people have nothing on Donald Swinton and Charles Bellinger, so far as taking a plunge is concerned.

On Sunday, March 28th, with the river boiling, therefore on motion of the two boys decided they would not take a dare, and rolled themselves into bathing suits and in a wink just below the bridge.

They appeared none the worse for their plunge on Monday, and report the water fine.

Remarkable Linguist

Lisle Shahahan, Emmet Hamilton, the celebrated English mathematician, who died recently, was a wonderful extraordinary faculty for learning languages, and is said at the age of twelve to have mastered 13 languages, besides English.

Entertained Her Friends (14) with a "Thimble" Party

Mrs. Charles E. Arnold entertained fourteen of her friends at her home on Dixon avenue, with a "Thimble" party, Monday evening. Each one of the ladies brought some sewing or fancy work, and the evening was pleasantly spent in visiting. After dainty refreshments were served, the hostess announced that each one of her guests should tell a story (not necessarily a true one) or sing a song or propound at least two riddles. Two or three of the ladies refused to "come across," but the majority of them did, in splendid style. Much merriment followed the telling of the stories and riddles.

At a late hour, the party adjourned and all agreed that they had spent a most enjoyable evening.

REMEMBER MOTHER MOTHERS' DAY

Every Officer and Enlisted Man Directed to Write a Letter Home May 9

Every officer and enlisted man in the regular army on duty in the Sixth Corps Area, composed of the states of Michigan, Illinois and Wisconsin, has been directed to write to his mother on Mother's Day, May 9th, by Major General William S. Graves, corps area commander.

"The request comes direct from Secretary of War Davis and has been sent to every corps area commander in the United States. The request to all officers and enlisted men says:

"You are directed to bring to the attention of every officer and enlisted man in your command, the desire of the secretary of war that each officer and enlisted man write a letter to his home on Mother's Day, May 9, 1926, as an expression of the love and reverence we owe to the mothers of our country."

Not Quite Sure

The deacon's young son once signed her name in the hotel register "Mrs. T. Brown," and asked the clerk confidentially, "Is my letter for her?

"I don't suppose," he said, taking one from the rack, "that this could be meant for you." And he handed her a letter addressed "Mrs. T. Browne."

"Oh, yes," said the young woman, eagerly, "that's mine. I recognize the writing."

"Did you spell your name differently," said the clerk. "You spelt it 'B-r-o-w-n,' while the name on the letter has a final 'e'?"

"That's all right," she replied. "I've never quite sure how he spells it."

"Who?"

"My husband, of course. You see, we've been married only two days!"

Indian Romance

When you see a little Indian boy on the Glacier National Park reservation sitting by a stream contemplating he is not playing hookey from school. No, he's in love with a Blackfoot maiden and he is there by the stream romantically vowing his truth so that the rushing waters will carry to his sweetheart the fervor of his soul's desire.

She, of course, lives a few miles down the course of the stream and he hopes, in at this very moment seated somewhere in the best thinking the same thoughts that absorb him. Love making is just as queer among the Indians as it is when it takes possession of the pale-face youth.

FARM CROPS MEETINGS--3

Plan for Series to be Conducted in Charlevoix Co.

Plans have been completed to conduct a series of three meetings in the county for assistance to farmers in their problems concerning their choice of crops to raise; the proper kind of crop rotations to use, and the future of the alfalfa and clover seed industry.

C. E. Skiver, specialist in Farm Crops, will be the speaker, and is particularly fitted to discuss your crop problems with you. The first meeting will be held at the Charlevoix court house on April 5th, at 8:00 in the evening; second at East Jordan Armory, April 6th at 9:30 a.m.; third meeting at Boyne Falls town hall, April 6th, at 1:30 p.m.

Many farmers are making a success with certain alfalfa and sweet clover seed, with seed potatoes, beans and cereal crops; let's hear how they do it and possibly your conditions are such that you can probably do likewise. Many are having difficulty in getting a good stand of alfalfa and clover. Here are a few of the crops we can best suited for this county and many other problems.

By all means plan to attend your nearest meeting. It will mean dollars and cents to you.—County Agent.

Early Peoples Passed Up Delicious Clams

Dr. Edward S. Morse of Salem, who spent 45 years sorting over the shell heaps that are found along the New England shore, found them composed largely of oysters and clams. But when he went to Europe to consult with Professor Steenstrup, the Danish expert on European shell heaps, he was amazed to learn that no clam shells were found among the oysters, says Edwin E. Slosson, director of science service, writing in Collier's Magazine.

Although clams abounded in the Baltic, the prehistoric people never ate them. It was the same in England. The clam had never been eaten, even in ancient times. We learned the same thing about the clam from the North American Indians, to whom we are indebted for tobacco.

Now we are accustomed to think of these surly monsters of sea as rather undiscriminating in their diet, having no prejudices against beast, bird, fish, or mollusk. Even the most delightful creatures had lived for 25,000 years on the seashore up to the time on the shell as a free lunch at every tide, and they wouldn't touch 'em.

Old Yuletide Custom Passing in England

An old custom, now almost extinct, existing only in certain portions of rural England, was that of the Christmas "waits" who went from house to house, singing carols, or discoursing music from various instruments, not infrequently violins, and under the solemn impression of the season the wild clamorously rang out upon the frosty midnight air and fell upon the listening ear with pleasure. Not more than forty years ago in Great Britain, it was a common thing for these singers to parade the streets, to pass along the streets, pausing here and there to render some song appropriate to the season. The origin of this custom may undoubtedly be traced to the Gloria in Excelsis, the song which the angels sang at the birth of the Redeemer near Bethlehem.

Fox Changes Color

The blue fox is a color phase of the Arctic, or white fox, which is circumpolar in range, being found particularly along the seacoast of Arctic and subarctic regions. Its normal winter coat is white, while the summer pelage is brown and tawny. The blue fox is dark brown to lustrous black and color of brownish in summer. There are intermediate phases in which the coat may be spatted blue and white, or the blue and white may be blended, producing a dingy or smoky-blue appearance.

Leading Languages

French is possibly the simplest language to learn. The German grammar is extremely complicated and English pronunciation is difficult for certain foreigners, the English language also contains a great number of colloquialisms used in everyday speech, which makes some of its sentences quaint. All languages do not contain the same number of words. The English language contains approximately 700,000 words; German dictionaries contain about 300,000 words; French, 210,000 words.

Lignite Valuable

Lignite is a brownish black coal in which the alteration of vegetable material is produced further than in peat, but not so far as subbituminous coal. It is found principally in Arkansas, Louisiana, Massachusetts, Minnesota, Mississippi, Montana, North Carolina, North Dakota, South Carolina, South Dakota, Tennessee and Texas. Lignite may be used for fuel in the lump form as mined, provided it is consumed near the point of production. If this is not done, it is desirable, if not important, to use it in briquettes or in a gas producer.

Represents New Firm in this Part of North Michigan

Rufus Ihoer, representing A. E. Kusterer & Co.'s investment bankers, of Grand Rapids, was a Charlevoix visitor on last Thursday and hereafter will make regular monthly visits here in the interest of the company.

Mr. Ihoer has an extensive acquaintance in this region gained in the past thirty years as traveling representative for Grand Rapids wholesale business houses. During this period he has made many personal friends particularly with business managers with whom he has been closely associated. This acquaintance and his familiarity with men and conditions in this region will prove a valuable asset to him and the firm he represents in his present work.

INDIANS BURROW FOR QUICKSILVER

Live in Silent Villages Deserted Years Ago.

Alpine, Texas.—Burrowing in the rugged mountains of southwest Texas, stolid Indians today are mining for its treasure of quicksilver, the bloodred ore their forefathers used as war paint.

The miners live in villages that are silent as the tomb. Far beneath the surface they spend their waking hours taking from the hills a heritage which civilization discovered and claims as its own.

Terlingue and Waldron, 90 miles from a railroad, are the center of a district where the expected opening of a new mine may give Texas first rank in the United States' production of quicksilver, the state now ranks second.

For thirty years hardy men have been undermining the mountains for the cinnabar ore from which mercury is extracted. One company has produced $10,000,000 worth of shimmering metal during the last quarter of a century.

The miners are Indians and Mexicans and the villages are of adobe huts. During the day, while the men are in the ground, the women remain in the houses and silence is rarely broken. The streets between the rows of squat dwellings are deserted except for the occasional appearance of an Indian woman carrying home in two rawhide buckets suspended from a pole across her shoulder, in primitive fashion.

One of the mines contains an immense cavern, which is reached by a 50-foot ladder, placed there years ago by the primitive tribes. The surrounding bluffs are decorated with primitive paintings, which are supposed to have some religious significance.

One of the mines contains an immense cavern, which is reached by a 50-foot ladder, placed there years ago by the primitive tribes. The surrounding bluffs are decorated with primitive paintings, which are supposed to have some religious significance.

Bears 24th Child in 24 Years as Wife

Yuma, Ariz.—Mrs. Jose Sanches of Yuma has borne her twenty-fourth child in twenty-four years of married life. She is thirty-eight and her husband fifty-one.

The twenty-fourth child is a healthy girl. The mother is pursuing her usual household duties. Only seven of the twenty-four children are living. All were born singly in consecutive years.

ASSOCIATION OF COMMERCE

Enthusiastic Gathering at Banquet, Thursday Night

An overflow and enthusiastic gathering welcomed Lee H. Bierce, secretary of the Grand Rapids Association of Commerce, at an informal banquet held under the auspices of our active Association of Commerce, in Masonic Temple Thursday night of last week. Mr. Bierce covered the subject of selling your region to yourself before attempting to interest outsiders, and his talk was very convincing and enjoyable, coming as it did at a time when there is a strong feeling locally that much of the Florida boom, involving thousands who are not used to hot summers, may prove a boomerang in the form of a genuine realty boom for northern Michigan.

Mrs. A. L. Fitch proved conclusively that oratorical heights are not limited to male members in the Fitch household. Her address on civic pride was very able and most cordially received, leaving little doubt in the minds of the boosting spirit.

Dr. R. H. Armstrong, just returned from the north, gave a rip-roaring account of his trip that fairly teemed with local color. Mayor Bergeon's short, comprehensive talk on pending improvements and their financial aspect was well received.

Musical numbers were rendered by Mrs. A. J. Stetler and Mrs. Archie Livingston.

The ladies of the Eastern Star served the banquet, at the conclusion of which President Fred Chartier was warmly congratulated on the success of same and particularly on the great progress shown by the local organization under his militarily diplomatic, unselfishly devoted efforts in behalf of our home city he knows so well.

Evidence Shows Dates Were Man's First Food

Before the time of man, the date palm flourished on earth, and the fruit was the first food of man. Many references in early Arabian and Christian records speak of the date palm as "the tree of life."

Over 90 per cent of all dates are grown in Mesopotamia.

The United States Department of Agriculture has been experimenting with dates, and believes a number of species must be developed before dates can be produced abundantly in this country.

Date trees begin to bear at the age of six or eight years. Trees twenty years old often yield from 150 to 200 pounds. Only the female tree bears fruit and it is necessary to fertilize the blossoms with the pollen of the male tree.

Last year there were 23,000,000 pounds of dates imported to the United States on which a duty of $2,750,000 was paid.

An Arab eats six pounds of dates a day. The report issued by the United States show that only about six ounces of dates per person are consumed annually in the United States.—Progressive Grocer.

Louisiana Only State Which Grows Perique

In the parish of St. James, a short way from New Orleans, is a historic and picturesque industry, intimately and in comparison with many of the other beautiful agricultural crops of the state, but which is peculiarly Louisianian, says a press dispatch from Baton Rouge. This is the perique tobacco industry, alone in the world.

Tried grown many years ago by an Acadian whose name the tobacco now bears, its cultivation has been kept up continuously ever since by direct lineal descendants of the original St. Perique. Cultivation is confined to a very small area on the banks of the Mississippi, where a favorable combination of soil and climate is particularly adapted to its growth. This tobacco, which finds its chief use as a steamer for intricates, is exceedingly strong, and while a dollar buys many cigars, few many more than 500 never are given over to its growth.

South American Countries

Origin of the names of the various countries in South America have been accepted as follows: Argentina —Spanish, Silver Republic. Brazil—from the Portuguese, a dye wood, coal, from the color of its dyewoods. Chile—probably from the Quechua "churi," meaning cold. Colombia—named from Christopher Columbus. Peru—probably from Biru, a noted Indian chief of that part of the country. Venezuela—so named on account of its supposed resemblance to the city of Venice. The early explorer discovered an Indian village in which the houses were built on piles. Bolivia —named for Simon Bolivar, a South American patriot. Ecuador—the full name is Republica del Ecuador meaning Republic of the Equator. Paraguay and Uruguay—both named for rivers; the former means "the golden water"; the latter "river of winters," referring to the numerous tributaries.

Volume 56 Charlevoix, Michigan, Thursday, April 1, 1926 Number 50

Dr. Johnson Famous for Sharp Retorts

Dr. Samuel Johnson used a blindfish rather than a rapier in his repartee, as some anecdotes about him by Charles Hopkins Clark in the North American Review show. On one occasion, on a Sunday, a pompous acquaintance, whom he did not like, came up to him with, "Doctor Johnson, we have had an excellent sermon today." "That may be so," said the doctor, "but it is impossible that you should know it."

After a heated argument, which, by the way, was the kind he held he enjoyed, he finished his opponent with, "If I have said anything you understand, I beg the pardon of the rest of the company."

Mr. Cholmondely stopped the carriage in which Johnson was riding and attempted to speak to him, but got no attention. Someone said, "Here is Mr. Cholmondely." "What if it is?" said Johnson, and went on reading a book.

Someone attempted to introduce a friend: "Here is my friend, Mr. Vesey, Doctor Johnson." "I see him," said the doctor and turned away.

Sir Lynch Cotton asked Doctor Johnson what he thought of a neighboring peer. "A dull, commonplace sort of man," he answered, "just like you and your brother."

Doctor Bernard, president of Jesus college, Oxford, accidentally offended him with a passing jest, and, by way of apology said at once, "I meant nothing, Doctor Johnson." To which polite remark Johnson answered, "If you mean nothing, say nothing, sir!"

Women in Business in Ancient Babylon

Modern times have a remarkable counterpart 4,000 years ago in ancient Babylon, says Pearson's Weekly. Women in business were by no means rare then. Tablets exhumed by Edward Chiera, American Assyriologist, show they worked in factories and engaged in trade on their own account. They had a monopoly of the saloon business, but the saloons of ancient times were even less respectable than the modern institution, consequently the women barkeepers were not held in high esteem. There were stenographers then, most of them women. The so-called cuneiform writing was so complicated it took many years to learn it, consequently almost everyone simply dictated letters to a scribe, who sat at tables near the gates of cities. These ancient stenographers held positions of influence and responsibility, as they were lawyers as well, and were called upon to draw legally worded documents.

We greatly underrate the knowledge and culture of the ancients.

Boys Take Swim in Ice Cold Water

Two boys, Joseph Bellinger and Donald Swinton, decided to take a swim in the river, Saturday afternoon, and proceeded to the bridge where they stripped and plunged in. The water was ice cold, and they were in but a few minutes when they were out and dressed. Both boys say they enjoyed the swim, but that the water was very cold.

Couple Married Here Sunday

Rev. Father Kelly officiated at the marriage of Miss Mary Ann Kotowicz and Mr. Joseph Kotowicz, both of Boyne City, which took place at the Catholic church in this city, Sunday morning, March 28th, at 10:30 o'clock.

The bride was attended by Miss Mary Kotowicz, sister of the groom, and Mr. Joseph Kotowicz, brother of the groom, was best man.

The bride was dressed in a navy blue suit with hat to match, and the groom wore the conventional black.

Following the ceremony the couple motored to Boyne City, where they will make their home.

Township Rewards Paid on April 1st —County to Wait

In compliance with act of the legislature, checks will be mailed April 1st to township treasurers covering all state road rewards due, the total amount is fixed by the highway department at $218,674.

County rewards will not be paid until June 1st, when an installment of $1,000,000 falls due. After this date counties will receive $1,000,000 on account every April 1 and June 1 until the total estimated $9,000,000 paid.

In Boston Keep Going

Persons who visit Boston are often perplexed by its name of streets. A visitor was complaining to a resident that he was constantly getting lost. "Never mind" said the Bostonian. "Just keep on going straight ahead and you will always come out where you went in."—Exchange.

Fond of Their Coffee

The native of Algeria takes strong black coffee in the street, purchasing the beverage from venders who hawk over pastable stoves.

A Common Feeling

"Some of us wouldn't mind reforming," remarked the Man on the Farm, "but we wouldn't like to have a reformer reform us."—Toledo Blade.

Thorns Without the Rose.

Hell is all with its pleasure gone and only the sting left.

The Oldest Bank in Charlevoix County
42nd Year in Business

New health in Tanlac

"Lung fevers broke me to health; I was physically "down and out." In constant pain from chest down, could not eat or sleep. Tanlac gave me new health, made me a new man." Earl W. Gindeon, Indianapolis, Ind.
This statement merely backs up what over one hundred thousand grateful users have said about Tanlac. Our files are packed with such testimony.
If your system is run down, if you can't seem to eat or sleep, have but weight or suffer from trying pain, why not let Tanlac put you back to vigorous strength and health.
No long, wretched wait to get results! Tanlac starts right in to build you up. It cleans the blood, revitalizes digestive organs, fixes up the liver and makes you feed like a new person. For constipation take Tanlac Vegetable Pills.

Too Weak To Work
LeRoy, Mich.—"I was troubled with a pain in my right side and in the small of my back. I could not sleep soundly and had no appetite—seemed that nothing looked good to eat. I was so weak I could scarcely do any work. I wrote to Dr. Pierce, and upon his advice, took three bottles of 'Golden Medical Discovery,' two of 'Anuric Tablets,' and occasionally a 'Pleasant Pellet' at bedtime, and I gained nine pounds"—Mrs. Arthur Ruppert, Route 1, Box 15a.
Send 10c to Dr. Pierce, Buffalo, N. Y., for a trial pkg. of any of his medicines in tablet form.

CHAPTER XIII—Continued

—21—

"I have nothing to say," she answered, sitting with chin cupped in hand, face averted.

"Oh, do you mean to say that you prefer selling yourself to that storekeeper, Lascelles, to living in luxury in Montreal, Winnipeg—?"

"You may insult me, monsieur. I have no means of defending myself," she broke in, coldly.

Then Laflamme lost all self-control, and stormed:

"Insult you? Oh, yes! But that is the truth, is it not? You do not love this man, do you? To save your father's future you have agreed to marry him—this man you despise! Oh, I know! He's not fit to look at you—you beauty!"

White-faced, the girl sat with eyes on the floor—silent, as if she did not hear.

"True, you think you hate me now, but you would, change," he ran on, talking as if to himself. "You may have heard hard things said of me, but I swear to you, if you will marry me, Denise St. Onge, I'll show you what love is. I'll make your father independent—make you," his voice broke with emotion, "me, make you happy! I've loved you ever since you played for us that night at Albany—years ago."

Laflamme stopped and looked down with a gesture of helplessness at the woman of stone in the chair. Then he heard the low words: "You forget, monsieur, someone who is still at Ogoke."

"I know how that looks to you," he defended, "but that was over, years ago—years. I've given her a home—couldn't turn her out. But she hated me, tried to knife me, wanted to run away with that American, Steele, this October! She put on black the day she heard he had been drowned on the way home."

There was a long silence, then: "Why were you afraid to have him reach Neiglon?"

Laflamme started, then laughed. "Afraid to have him reach Neiglon! That's funny! He got some supplies and went on. What do you mean?"

Then the girl countered: "Your Indians are not faithful to their masters, monsieur. We learned that you had Monsieur Steele ambushed after stealing his ammunition, and forced him to go to his death."

"Do you believe that?" demanded Laflamme, puzzled.

"Is it true?"

"No!"

The room was again silent while the man, fanned by his cold nerves, his resource, bit his lips in impotency before the icy calm of this strange girl who so stressed him. Then he played his trump card.

"So you insist on casting your lot with that rat at Albany? Then it is for me to save you from yourself. I have brought an extra sled. Pack your clothes at once!"

The girl rose to her full height and met his cynical look with resolute eyes, but in her heart was fear.

"You do not dare!" she cried. "They would hunt you from Fort Hope, from Albany, from Neiglon House. In three weeks the police would be at Ogoke. But before the police teams arrived, do you know what they would do to you? They would burn you in your trade-house! You do not dare!"

With open admiration Laflamme watched the play of color and emotion in the face of the frightened girl who confronted him.

"If you'd flush that way when I say I love you," he cried, "I'd give all I have in the world. Why, girl, I'd sell my soul, if you'd look at me, just once, and say you loved me!"

"I despise you!"

The sting of the words cut like the lash of a whip. His self-control, already at the breaking point, crumbled.

"Despise me, do you?" he snarled. "Dare me to do my worst? Suppose I take you at your word? Mon Dieu! I'm mad enough about you to do anything! Who it is, then, you love? He thrust his passionate face close to hers. "You hate me—you don't want Lascelles! I must be that d—d dead American you're moaning about! Well, he's at the bottom of the Jacobsi, and he forgot you before he had been at Ogoke two hours—forgot even your name when he saw Rose!"

She faced his anger proudly, contempt in her bloodless face, until he mentioned Steele, then slowly her knees gave way and she sank in a chair.

"It was that American!" he stormed. "Pity I didn't finish him myself!"

Then something on the table caught his eye—held it! His face went dark with his sinister purpose when, with a quick movement, he seized the violin, raised it above his head, and brought it down with a crash on the table, then dropped it to the floor and trampled it under his feet.

With a groan the girl fell to her knees and, gathering the splintered shell of the violin to her breast, moaned over it as a mother over a stricken child.

At last he had reached her.

At the sound there was a guttural exclamation from the door, and with lifted knife, a wild-eyed Ojibway woman threw herself upon the surprised Laflamme, Leaping back, he caught and parried the thrust with his forearm, then, with his uninjured hand, wrenched the knife from the maddened squaw and buried her across the room to the floor."

Seizing his coat, he stood for an instant over the kneeling girl, clasping her beloved violin, and touched her hair—then left the room.

The dazed Ojibway crawled to the pitiful figure on the floor, and circled her with her arms.

"De music gone—all gone," she crooned. "Poor m'm'selle!"

While they huddled there on the floor—the girl, the light of whose life had been ruthlessly snuffed out, and the woman of the dark skin, who understood—dog-bells jingled in the clearing as two sleds took up the river trail.

* * * * * * *

Late that afternoon, St. Onge reached the fork of the Sleeping river, but the spruce, already blue with shadow, gave back his call, unanswered. He turned into the mouth of the stream and took the Portage lake trail, searching the silent shores for the camp of Michel, but the headman was not there.

"This is very strange," he said, and cut his wood to camp alone.

Deep in the night, St. Onge waked in his blankets as his dogs gave back the husky challenge to creatures, whose scent the freezing air had carried to their nostrils. But the drowsy man did not know that two sled teams were passing below him on the Walling River trail.

CHAPTER XIV

On the night of Little Jacques' return to Portage like the four men sent by the fire planning their future movements. It had been a week since the beast had howled or visited the traplines in the district, for David had arranged with the upake hunters to relay the news of his appearance immediately.

"I'd give ten years of my life if that old bird would sing up there on that ridge this evening," said Steele.

"I got pleaty shell ees de bag," added David. "I get tree 'wolfs' to shoot dat little gun or mine."

"You'll get your chance before we're done, don't worry. How would you like to draw a bead on your friend Laflamme this evening?"

The Ojibway shook his head. "Wen I tak' Laflamme's trail I feex heem wid de hart. I use no gun on heem. Eef I got hol' dat Black Baptiste, too, I break somet'ing more dan lees flag—"

"Leesten!" interrupted Michel.

Out over the silent forest drifted a faint call like the voice of some furred night hunter. The four figures at the fire stiffened. Again the call, louder now, rose on the biting air.

"Where is it?" asked Steele, in doubt of the direction.

"On de beeg ridge," replied Michel. "Dat not sound like beest—"

But the men at the fire sat with ears alert, hoping that at last their waiting was over.

Then, when they were convinced that yet another night they were to roll into their blankets, disappointed, baffled, a long wail from the ridge behind the camp brought them to their feet; every nerve alive.

There was a swift stepping into the frozen thongs of snow-shoes and drawing of rifles from skin cases, then taking the bloodhound on the leash, Steele started with his men for the ridge. The leash, though among fighters, were left chained to trees, as at night they would cut off on the first game trail and the hunter bent of yelping would prevent David and Michel from making the still-hunt decided on. Steele with the hound was to circle and pick up the trail of the beast if they missed him.

As they swung through the blue gloom of spruce and fir, the voice shifted from its wailing to the hunting screams of the great cats, then as swiftly dropped to the yowling and mewing of the mating season, climaxing, as at Walling River and Big Feather lake, in shrieks of agony, in sions of a creature terrified beyond endurance of blood and flesh and nerve.

Three of the men who hunted the voice on the ridge had toiled long and suffered much for this moment, but at their heels moved a short figure whose flesh was cold with the chill of fear. Little Jacques gripped his rifle grimly and followed, thinking of the wife and children back at Walling River.

At the foot of the ridge Michel and David left Steele to make their stand from two directions while he worked to the rear with the dog and Little Jacques. Once on a fresh trail the hound would bang until he run down his quarry. In the soft snow his pace would be slow, so the men on shoes in time would come up with him. And he would need them if the thing turned and waited at bay—how great would be his necessity the torn body at Sloping river only too well indicated.

They had traveled for an hour when the hound abruptly stopped, sniffed the snow at his feet, and excitedly strained at his leash. To Steele's eyes the flat floor of the narrow lay unbroken in the darkness, but the Indian on his knees whispered in terror: "Eet ees beeg trail!"

"Good!" And the hound free, plunged ahead into the snare. Shortly, his deep voice boomed through the forest and the hunt was on.

As they swung through, the blue gloom of spruce was less deep, the great dog left them. Again, as they followed; the voice on the shoulder of the hill defiled the night. As it rose in crescendo, a rifle shot sliced it short off. Far above, the hound gave voice. Then silence fell on the forest.

"They've seen him!" said Steele. "He may back track; keep a lookout. Don't shoot too quick or we'll turn him!"

There was no reply. He looked for his companions, but Little Jacques had gone.

Throwing the bolt of his Mannlicher to clear it of frost and ease the action, Steele kept on up the ridge. For minutes now, he had not heard the voice of the hound, when again the resonant bass boomed through the silence above him. The dog had turned. The thing was headed back. Loosing his skinning-knife in its sheath, the man cocked his rifle and waited, kneeling on a shoe, his eyes boring into the blackness.

Near him, and below, was an opening in the timber. Again, the hound bayed—closer now. The beast was taking his back tracks. Then Steele saw it.

Bounding from the cover of the scrub on the edge of the opening, a dark shape stopped, and reared upright, as if listening—when the Mannlicher spat.

The beast leaped back into the black wall of spruce. Again, the rifle flamed into the murk.

Still crouched on a knee, the man listened, rifle rigid. Sights useless, he had fired by lastinct. There had been no thud of bullet in flesh. Could he have missed?

Slipping two shells into the magazine, he circled in the timber, lifting his shoes to avoid the click. Blind now, for the moon was masked, he listened for heavy breathing in the scrub he faced—then the hound plunged past and he knew he had missed.

Following the dog, Steele turned down the ridge, but in an hour was distanced. So he stopped in a cedar swamp, cut wood with his belt ax, and scooping out the snow with his shoe, lighted a fire.

In the cover of the thick cedar the hot fire soon warmed him and with back against a trunk he dozed, only to waken with a start as a hand touched his shoulder. He blinked into the face of David and Michel.

"Fooled us again!" groaned the disheartened Steele.

"At daylight we take de trail and see heem soon. De dog weet tree heem."

Heaping up the fire the three men dozed until daylight, then took the trail of the beast and his pursuer through the snow.

Somewhere ahead, Steele felt that the pursuit was over. Somewhere, miles away, the beast had tired in the black hours and turned at bay to battle in the snow with his relentless foe; or else in terror of the voice of the thunder which he could not shake from his heels, had treed.

Up over ridges and into creek bottoms traveled the anxious men, stopping to listen for the voice of the dog. But the cold silence of sunrise gripped the forest...

At last the tracks led into a heavy stand of young spruce. The men separated, and cautiously made their way through the close growth.

Suddenly the blood of Steele chilled as he heard the voice of Michel. "Hy gar! Poor ol' Pete!"

Forcing his way through the saplings, he found the Iroquois bending over a blood-smeared shape, stiff in death. The hide of the dog hung in strips from the slashes of terrible claws, while a torn throat marked the death grip of the fangs of the Windigo.

(TO BE CONTINUED.)

Novel Nest

At the last meeting of the British Ornithologists' club, Mr. A. L. Butler exhibited a "nest" from Trinidad, which was merely a hollow formed by the rotting out of the soft pith at the top of a broken-off sapling. The breadth of the top of the stump was only just sufficient to contain the single egg, and the egg, on the cup-and-ball principle, fitted the cavity so neatly that it could not be lifted out with the fingers. The bird incubates in a perfectly erect position with its head and neck stretched stiffly upwards, and its tail pressed to the side of the stump, of which its upright figure seems to form a part. The species have adopted the habit of sitting bolt upright on similar stumps whether incubating or not.

UNITED STATES AND THE LEAGUE

British newspapers are editorially expressing the opinion that the squabble over the council seats in the League of Nations will delay the adherence of the United States to the League and damage League sentiment in the United States. What Europeans seem unable to grasp is that Uncle Sam is not contemplating joining the League of Nations. Few people in America will begrudge any godli that the League can do toward keeping the peace in Europe. But there is little or no sentiment in any political party in America which looks toward the United States joining the League of Nations.

Doubtless the way League politics has been handled at Geneva during the past few weeks will make Americans all the more thankful that the United States is not a League member but it will not postpone our ratification of the League covenant because no such ratification is contemplated by any considerable following of the League in the United States.

Doubtless European hopes of our entering the maelstorm were magnified by our joining the World Court with reservations and our agreement to attend the disarmament conference. But this did not mean that the United States was contemplating joining the League of Nations. It is reported at Washington, that one reason for the delay of the arms conference was that the European nations desired to find out whether the United States was not ready to join in a closer participation in international affairs. Commenting on the Boston Transcript, a newspaper more than friendly to the administration says:

"The European countries anxious to get the United States into the League will be sorely disappointed if they really believe, as reported, that recent events mean this country has changed its opinion regarding joining the League. Sentiment in Washington and apparently throughout the country is as strong against membership in the League as it ever was. Possibly this might be true for a brief period of time, until the American sugar growers were put out of business, and the farmers of several states thereby impoverished. But the foreign sugar industry is now pretty much of a trust, just as the rubber growing industry is a trust. So when American competition was killed off, there would be nothing to prevent the foreign sugar monopoly from doing exactly what the rubber trust has done—namely boost the price to a figure that would remind us again of war time prizes.

Rubber manufacturers are now telling us that the way for American rubber users to protect themselves from foreign monopoly is to grow their own. What is true of rubber is true of sugar. If we want to protect ourselves from a foreign sugar monopoly we want to provide it with competition by continuing to grow our own. Not only will this help the beet sugar farmer. It will eventually assist the corn farmer too, because corn sugar is going to become an important American commodity in the near future.

SCHOOL PROPAGANDA

An effort is to be made to break down American nationalism thru the schools, according to the National Republic, which quotes a speaker at the recent convention in Washington of the National Educational Association, as declaring that a fund of ten million dollars is being raised to teach school children in America and throughout the world that nationalism means war and internationalism means peace. The Republic continues:

"An excess of the national spirit has not led this nation into any one of the wars in which it has been engaged, although the lack of it has more than once brought about a degree of military unpreparedness which has invited attack and endangered the country when war has been forced upon us. There is no reason to believe that outside influences will be permitted to carry on political propaganda in the schools of any country other than the United States, so that this highly financed internationalist program, in the opinion of many, will only mean an effort to denationalize the United States. Who is willing to continue ten million dollars to use the schools of America as a means of denationalization, and why? How is this money to be spent? Not in the purchase of text books, not in the employment of teachers or in meeting any of the other ordinary expenses of operating the schools. Is it the idea to influence the preparation of text books? Already some history text books are in use in the schools in which the achievements of the Baltimore Sun, a newspaper so rabidly Democratic that it buys even its ink from Democratic sources. Frank, who met some of these sun-dodgers in Washington, broke into print the other day to again advise them that even if they were the whole Senate, their prospects in 1928 would not be improved.

The truth is, says Frank, all over the country there are thousands of men who will vote for every Democratic candidate except for President, in which case they always pick a Republican. The explanation is the extraordinary success of the Republican party in solidifying the business interests and "selling the idea." He could truthfully have said, proving it, that prosperity would be destroyed should a Republican President be defeated. The hard thing for the Democrats to face in statements like this is that Kent does not even leave them the hope that they may get sunshine out of the cucumber.

COMMENT.

This paper commented recently on the statement of Senator Borah that the people are paying roundly seven billion dollars of taxes yearly, combining state, district and municipal requirements with those of the federal government. Later on in another connection the Telegram noted that this grand total was nearer eight billions than seven.

Comes now a set of figures from the National Industrial Conference Board which shows this aggregate sum to be no less than $10,252,000,000 for the year 1924 It is also shown that while there was a decrease of $385,000,000 or 10.6 per cent in federal taxes for that year, state and local governments increased their taxes by $462,000,000 or 7.6 per cent. So there was a net increase of $107,000,000. The figures for 1925 will probably show a similar result, except, perhaps, that the net increase has been larger. And this year federal taxes are going down again.

As before stated, the real task before the American people today in helping along national prosperity is to check this increase in state and local taxes every where and turn it into a decrease as the national government has been doing. It is something that affects business and industry everywhere in the country.—Clarksburg, W.Va., Telegram.

Ours

Ours is a government of liberty by, thru and under the law. No man is above it, and no man is below it. The crime of cunning, the crime of greed, the crime of violence, are all equally crimes, and against them all alike the law must set its face. We have the right to ask every decent American citizen to rally to the support of the law if it is ever broken against the interest of the rich man; and we have the same right to ask that rich men cheerfully and gladly acquiesce in the interest of the law, if it is the law. Incidentally, whether he acquiesces or not the law will be enforced; and this whoever it may be, great or small, and which ever end of the social scale he may be.—Theodore Roosevelt.

WHY WE PROSPER

Representatives of British labor have been sent to America to investigate conditions and to find out, if possible, just why wages and living conditions in the United States for the working people, are so much higher and better than in Europe. In America the working man for the most part have comfortable homes, plenty of nourishing food, and in many instances automobiles to go to and from their daily work. Conditions such as these are unheard of in Europe.

It is said that British workers are finding out that our workmen prosper because of their efficiency, the greater output of their efforts, through the practice of mass production. This is doubtless true, but might it not be worth while, also to inquire as to why conditions have come about which make possible the present situation with regard to our labor.

Of course the American worker is intelligent and efficient, but some of this intelligence and efficiency is the result of his improved conditions rather than the cause. It is the fact that he has a good home, plenty of food, and a savings account which makes him efficient and intelligent. And the mass production which improves his output is due to a steady market. This steady market is furnished principally by the people of the United States. It is a home market, and the home market is preserved, and a great steady production made possible, by the protective tariff.

If we were on a free trade basis we would be competing with European nations in our great home market as well as in the world markets. Our manufacturers would be up against European dumping, and our working men would be competing with a European wage scale which does not take into account comfortable homes, good food and bank accounts. Mass production would not be possible under such conditions and we would soon be on an economic level with Europe.

Any investigation of our prosperity, and the improved condition of our workers eventually brings the investigator to the fact that it is our immense home market which makes the present enviable situation possible, and that this home market is fostered principally by the protective tariff.

RESPECT FOR LAW

A physician returning from Africa, it is said, as he approached New York, and saw his native land, wept from joy, because he shortly would be enjoying the privileges and comforts of his home land. After a few weeks in the United States, he noted the growing disrespect for law and for American institutions, among many of our citizens, and he wished some of those who do not show proper respect for our land could be without these blessings for a period as he had been, and perhaps they would appreciate them more.

This growing disrespect for law is a national menace assuming alarming proportions. It is reflected in the newspapers of crime news and too often we read of people sworn to uphold the laws being found guilty of helping break them.

The only remedy is an awakened national consciousness. A feeling on the part of citizens that laws are made to be obeyed, whether they suit the individual or not. A law should be enforced so long as it is a law, and if not a satisfactory law to the majority, it should be repealed in a constitutional manner. Our citizens should place men in charge of law enforcement who will enforce the law without fear or favor.

A common amount of housecleaning should be done by our courts. There is too much delay in law administration, too much laxity in passing sentence on men proven guilty of crime. Punishment under the law is primarily to protect society; secondarily to punish the guilty. But we are too often backwards in assuring accused he shall have a fair trial. We allow maudlin sentiment to affect us as jurors, and in the courts permit too much quibbling, law technalities and other delays thwart justice. A man accused of a crime should be proven guilty or innocent under the law without delay, rather than in any case be given "reasonable doubt" by a jury.—Clarence Ellington, Bee-Nugget, Chetopa, Kansas.

"The Good That Men Do"

Many of the world's good men become slow on others is not so much by reason of the wrong will of admonition or encouragement, or by any lofty example, as in the abiding tenor of their inward lives. There are many whose hands give forth no helpful deeds, whose lips yet cannot reach that which gives a rarer and finer delight still. For there are those whose words and looks are a blessing—whom to look upon is to feel new courage, to whom in hours of depression, cares; to think hopefully of man; to believe all noble achievement possible. Of course responsibility is a quality that deserves to succeed; to see a more glorious aim, and feel inspired to follow the eternal hills where God's own night abides.—Samuel Johnson, in "The Joys of Delight."

Knew His Stuff

Mrs. Brady was unable to take little Sallie to school the first day, so the little boy was intrusted to the escort of his older boy, who left him in the line of little beginners at the school building.

Seated at last in the strange room, he was so absorbed in his surroundings that it was hard to keep his mind on the things his mother had told him he must or must not do.

When his teacher called him, the very first one, "What is your name, please?" he was taken by surprise and rather frightened.

"Mr. Brady," he quavered politely. —Los Angeles Times.

Good Looks

The mind is the way to receive and also steer to safety their channels in which we allow our thoughts to run. It isn't altogether what a woman does or says as the days and years go by that affects her appearance, it is the feelings and emotions behind her acts and words in daily reaction to people and things, which mark themselves upon her face and radiate in her personality.

Fans in History

"Customs of Mankind" says that "fans have an interesting history. The first fan was probably a palm leaf or some other natural device appropriated by man to keep away flies or gnats, perhaps even to cool the fevered brow in tropical climates. We know that in Egypt, 2,000 years ago, fashionable hosts had special servants to stand behind dinner guests and fan them with huge papyrus fans. . . . In France the fan reached the height of its development under Louis XIV. We read that 'Fans are invariably accompaniments of feminine costume, and that they are of rare beauty, exquisitely painted and mounted on sticks of carved or painted wood, mother-of-pearl, carved ivory or gold. There are over 500 makers of fans in Paris and they enjoy special privileges accorded to them by the king."

Rainfall in Palestine

Palestine is essentially an agricultural country. Its rainfall averages 21 inches a year, which is about as much as California receives, Palestine has really only two seasons in its year—a dry one, in the summer, and the rainy one in winter season. The latter begins in October or November with the "early rain," and thereafter rain is frequent, with occasional showers in the mountains, until February. In that month the planting takes place. Then, in March and April, the "latter rains" occur and start the crops along.

Making It Worse

A ladies' ready-to-wear shop in which I was working was having its spring opening. There were many wax models dressed up and standing around. Crowds had been coming all afternoon. I was standing in back of a woman and all of a sudden saw her hand forward. I thought it was one of the wax models falling, so made a sudden grab at her. My action was so abrupt and I was so embarrassed, that I made it worse, by saying, "Oh, excuse me, I thought you were a dummy."—M. L. W. in Chicago Tribune.

Bismarck's Interview

You recall that Bismarck lost his job as chancellor because he called Wilhelm down for talking too much. I was in a beer garden in Berlin, the Bismarck sported in solitary grandeur at another table, sipping a glass of beer. With Yankee temerity, I walked over and asked him for an interview. The old man looked at me angrily, rose in majestic wrath, drew his military cloak around him and hissed to be stalked out: "I do not give interviews. Ask the kaiser; he talks."—William H. Crawford.

Two Varieties of Stars

The words "giant" and "dwarf" have reference to intensive brightness rather than to mass, though different names for stars are due to the theory of star evolution is that in the beginning they are shining in extraordinarily low density and of low temperature and surface brightness, which are the red stars. They contract, grow continually hotter and pass through successive stages toward the white hot state, although not all stars reach that state. The stars undergoing these changes in the evolving branch are chiefly "giants." Afterward, the stars begin to fall off in temperature and luminosity, and gradually pass to the red stage and then to invisibility. The stars on this descending branch are termed "dwarfs."

Tact

Tact, so the lexicographer tells us, is nice discernment and delicate skill in speech and behavior. What could be a greater recommendation for one whom you wish to employ? In many business conferences, when a position is open or vacancy is mentioned for promotion to be "responsible," somebody some one will say: "Undoubtedly capable. A whiz for work! But will never do. Has no tact." Or, "Will get along with people. Has no tact."

Remember, when writing to or excel in snap and verve, that no one likes to be pricked. In building your character and business ability you must include a generous supply of tact and not too much tack!

Cheap Place to Live

In Tahiti, in the South seas, land can be had almost for the asking. Rents are ridiculously low. James Norman Hall tells in the Atlantic Monthly of having rented a small house on a two-acre lot for $3 a month. The lot was infested with land crabs, which are considered a delicacy when cooked with a common variety of ants. The crabs are so numerous that the work of catching enough for a day's rations takes only a few minutes. The fruits also are plentiful. There a man can live in comparative luxury on a few dollars a month. And the climate compares favorably with that of Florida.

One Truthful Man

A new story about the French actor-author, Sacha Guitry, recently came to Paris. It was during the war when Paris was being bombarded. Everybody who could afford to was flying the city. M. Guitry met several organizations, each of whom had a different excuse for quitting Paris. "The doctor says my children must go south," said one. "My wife needs a change," said another—and so on. "Why are you going?" one asked M. Guitry after explaining his own reasons. "Because," was his reply, "I'm frightened to death."

THE THEATRE

Has Powerful Climax

Two seen love the same woman. One offers her companionship, understanding, sympathy. But he is married and his wife will not free him. The other offers her protection, a home, his name and his love—when his business doesn't claim him. This latter man she marries.

After her marriage, Leonore comes to understand what loneliness is. Her husband means well, but he is a big business man and must spend much time at his office. Leonore begins to long for the companionship of Val, whom she had known and loved as a pal before her marriage, but who had upon last seeing him shown that his friendship for her had given away to a passionate desire. Leonore had been hurt, humiliated, bewildered as this new Val had run away from him—but, having learned the full meaning of love, she is now ready to forgive him. In her mind she compares the two. She realizes that neither one of the men can give her all that she demands. One can only give companionship the other only love. To Leonore, life as Harry's wife and Val's friend would be the ideal existence, but Harry is jealous of his wife—and Val is too much in love with Leonore to go on being a pal to her.

The "Enticement" Leonore's problem is solved in in a very unusual manner. This is a picture full of dramatic moments that lead up to a powerful climax. "Enticement" will be shown at the Palace theatre next Saturday and Sunday.

The Mannequin

Fannie Hurst, author of "Mannequin" which comes to the Palace theatre next Wednesday, sees writing for the screen as a new art of the future. She says:

"The movies have taken us unprepared. We are still struggling with the established forms of art, trying to adopt new ones. I do not think the average writer realizes the gulf that separates the screen from fiction writing unless he has had the entertaining and instructive experience of writing a screen story and then working side by side with the technical experts during its translation into a workable script.

When I wrote the synopsis of "Mannequin" for the Liberty $50,000 prize contest, I saw it in my mind as a photoplay. That was the first time I ever wrote any thing from this point of view. Later when I started the novel itself, I wrote it, as I usually do, with my essential emphasis on the development and growth of character. Then I came to Hollywood to help in its translation to screen material.

In 'Mannequin' I saw some of the difficulties from the inside. I found James Cruze perfectly splendid in his insistence that the story be followed with fidelity. Yet the story was not adapted without the greatest amount of technical effort and ingenuity."

Saturday and Sunday.

Mary Aster and Olive Brook in "ENTICEMENT." Enticement! A magic power for the woman who has it. King's fall for it—it has swayed the destinies of empires and homes—and what of it? This is a love drama; a drama of an enticing beauty who swayed hearts, and in her own circle swayed a kingdom of love.

The comedy is entitled, "Cupid a la Cart." We will also have an educational picture, "The Conductor." These educational pictures are worth seeing. Your children should see them.

Tuesday and Wednesday

Alice Joyce and Warner Baxter in "Mannequin." A beautiful cloak model striving for love and happiness but always it is the jazz pitfalls of a great city. See her heart gripping story revealed on the screen by the master-director, James Cruze. The $50,000 prize winner of the Liberty magazine.

Also a Fox News Reel. Travel the world with the News Reels. The very best form of travel.

Trial by Water Law Costly Than Lawsuits

Among the tribes of the hilly regions of Orissa, in India, trial by water is still employed to settle disputes.

A sacred tank called Phatbani is used in such trials, and its waters are considered holy. At a trial by water the defendants of two or three villages all round the tank, and the two contesting parties, accompanied by their seconds, each armed with a long pole, wait a short distance away. The priest then chants this prayer to the sun: "Thy the giver of Light and Strength, the face of Truth has been covered by a mist of gold; send down your shafts of Wisdom and remove the Veil obscuring the reality."

To ensure the maintenance of decorum of the spectators who may be lurking in the food beneath the holy waters, a chicken is fed and watered and offered to the demons. This done, the contesting parties walk into the water, followed by their seconds. When the water reaches their armpits they take the poles and, having fixed them in the bed of the tank, stand holding them for a minute whilst they turn to the east and mutter a prayer to the sun. Then slowly their heads are immersed in water. The man whose head comes up first is the loser.

This good custom has also had a hold on the foundation of the natives that often the party who knows he is in the wrong will come up first of his own accord, for he knows that the pain of cramp or drowning is done to him by the powers concealed in the water.

Had Solid Grounds for Her Objection

"I'll bet you," said Henry Parker, "that by the time Tom Taylor's wife got through with him for taking that $4,000 out of the savin's bank an' goin' an' spendin' it for them $5,000 shares of fake oil stock old Tom wished he hadn't tried to be a high flunketer."

"Oh, Tom's wife didn't raise any fuss over that transaction," said young Paul Perkins, who is a distant relative of the Taylors and lodges in their home.

"But my wife heard her!" asserted Henry. "She went to call on her last evenin', an' while she was standin' in the vestibule waitin' to ring the bell she heard Tom gettin' the lowin' of his life."

"But that lawing wasn't being given because Tom had bought the oil stock," explained the young man. "It was because Tom was paying $5 a year for a box in a safe-deposit vault to keep the oil stock in."—Kansas City Star.

His Son Was Smart

"Yes," said the busy banker, never too busy to talk, "my son is smart; I tell you. He won't work steady but he learns quick. I sent him to high school and he learned so fast that at the end of the first year the superintendent told him he need not attend any more. Then I got him into the army. He enlisted for three years but learned so fast he didn't have to stay but two years. It says right on his discharge papers, 'For good of the service.'"—Forbes Magazine.

Butler Didn't Linger

James Agate, in his "Secrets of a Butler," tells the story about a butler, one Holland, employed by the late Richard Mansfield, the actor. "In the heart of hearts," writes Agate, "Holland felt he was rather belittling himself by being in the service of an actor. He had never seen Mansfield on the stage; but I finally persuaded him to accept seats for a performance of 'Richard III.' At the first interval I met him in the vestibule, and his countenance was transfigured. 'He is a great artist!' In the middle of the Dream scene I saw Holland seize his hat, coat and umbrella and rush down the aisle. 'Where are you going?' I said. 'This is the great scene.' 'I know,' he said; 'he is a great butler all right, but he's spotting me, and he's carrying on something awful. Just like he did once at home when I smashed one of his precious antics!' (antiques)."

Couldn't Sell Her a Ticket

A Western woman called the town ticket agent on the telephone and asked him to route her to Boston to secure place in a remote Southern state. The agent had never heard of the place but he went through the railroad guide and figured out a route necessitating numerous changes and connections. Armed with all this information he returned to the telephone, gave it to the inquiring and then heard her say: "Well, do you suppose a letter would make it in the same time? I was writing one to that town and I wanted to know how long it would take it to get there."—Cupper's Weekly.

Perky Laughs at Cold

Perky takes to the trees. The colder it gets the higher he climbs. You will see him in the upper tips of great hemlocks, a hundred or more feet above the drifts.

How does he keep warm up there in a 10-below-zero wind? Why does he not freeze to death as any man, and most other creatures, would?

He has no great coat of fur like the beaver, or the otter. He is just a bag of skin and bones all covered over with loose quills.

Why the intense cold of northern winters doesn't kill him, as he rolls up in a ball, motionless in the highest branches, is one of nature's mysteries.

When Chairs Were Scarce

Chairs, which, with few exceptions, differed designs and efficient aids to comfort and movement, typify civilization as much as does anything else, only became popular in England toward the end of the Jacobean period, according to Walter Rendell Storey, writing in the Antiquarian Magazine.

"An inventory," he says, "taken in 1624 at Gilling castle, Yorkshire, mentioned only two chairs, although there were 35 stools listed. Even in 1639, when Charles II entertained Cosmo the Third, grand duke of Tuscany, at dinner, the only chair was that provided for the guest of honor."

—Holley Gift Shop has received new stamped goods, including Ladies Dresses to be embroidered, pillow cases, buffet sets, scarfs and luncheon sets. 48-3

This Boom in Lake Frontage

It will make a few people rich. The same boom will send city property values kiting. Witness the Florida towns.

Let's Not Overlook That.

Money making city property is to be had now, cheaply. Never again will there be such a chance.

Just Mark That.

Tel. 113 CHARLEVOIX

—) PERSONALS (—

Born, to Mr. and Mrs. Dan McSaubs, a son, Sunday night.

John Wagner was a visitor in East Jordan last Sunday.

Harry Porter is confined to his home with a severe case of "Flu."

Walt Yeomans is confined to his home this week on account of illness.

Joseph Locke of Boyne Falls, was a business visitor in this city last Friday.

Jess Smith has been confined to his home the past two weeks on account of illness.

Miss Caroline Geiken of Boyne City, is visiting at the home of her father, G. C. Geiken.

Senator Wm. J. Pearson of Boyne Falls, made his friends a short visit here last Friday.

Mrs. Rita Siminaw returned to Charlevoix Saturday, after spending several weeks in Detroit.

James Gaskin has been compelled to spend his time in the house on account of a severe cold.

Dr. A. Lawrence Baxter of Central Lake, was a business visitor here Thursday and Friday last.

Harley Smith of Mancelona, arrived here Monday on account of the illness of his brother, Jess.

Mrs. P. R. Ross left Monday for Chicago, where she will visit her sister-in-law, Mrs. Wm. H. Loy.

Mrs. Earl Johnston and daughter, left last Saturday for Manistique, for a weeks' visit with relatives.

Attorney Michael C. Birnkrant of Detroit was a business visitor here for a day or two late last week.

Citizens wishing a copy of the booklet of Charlevoix, may obtain same by calling at the city clerk's office.

Geo H. Coverdale, superintendent of schools, is in Detroit this week at a meeting of the State Teachers.

Miss Beneta Bellinger of Saginaw, is spending a week with her grandparents Mr. and Mrs. Chas. R Bellinger.

Mrs. M. H. Gilbert of Detroit, arrived Saturday, called here by the illness of her mother, Mrs. Herman Burns.

Mrs. Harold McCann left for White Lake last Saturday, where she will spend a few months be hind husband.

Mr. Everzz A. Nordrum of Detroit, spent Saturday and Sunday with his parents, Mr. and Mrs. Olaf Nordrum.

During the month of March there has been a decrease in deliveries made to local citizens by the Northern Auto Co.

Our idea of a prominent citizen is the fellow who can convince his wife that it is too early to begin spring cleaning.

Mr. and Mrs. W. S. Richardson returned home Saturday from Anaheim, Cal., where Mrs. Richardson spent the winter.

Ira A. Adams was taken ill last Friday and has been confined to the house since that time. At present he is much improved.

John S. Baker left Monday for Detroit. He will visit a few weeks with his daughter, Mrs. von Dulcke, before returning.

Mr. and Mrs. Amos O'Neill motored to Flint last Saturday morning, where they will spend a week with relatives and friends.

Miss Helen Mason arrived home Saturday from Ypsilanti to spend the spring vacation with her parents, Mr. and Mrs. A. E. Mason.

Miss Freda McMillian has been chosen to represent Charlevoix High School at the Oratorical Contest held at Cheboygan April 8th.

A card from B. A. Herman mailed at Ft. Lauderdale, Fla., states that he is enjoying his vacation and will be back some time in April.

"Val" Scroggie, of Detroit, motored in last Saturday and is spending the week with his grandparents, Mr. and Mrs. Wm. Scroggie.

Walker-Miles and wife and two children, left Monday for Grand Rapids and Muskegon. They were accompanied by Mrs. Philip Lemieur.

Miss Mary Lemieur, a student at the Sacred Heart Academy, Grand Rapids, is spending a two weeks vacation with her father, Joseph Lemieur.

Tom Finucen, son of Mr. and Mrs. George Finucen, Grand Rapids, is visiting at the home of his grandparents, Mr. and Mrs. George Weaver.

John Tuley arrived in Charlevoix last Wednesday from St. James. Mr. Tuley will be employed as engineer on the tug Venus, Capt. John McCann.

Miss Catherine MacDonald, a teacher in the Central Lake schools, spent the past week here with her parents, Mr. and Mrs. Robert MacDonald.

The Charlevoix Fire department are to have a dance at the Lakeside Pavilion, on Wednesday, April 7th. The public is cordially invited to attend.

Mr. and Mrs. Joseph Foster will move to their new home, known as the "Boulder Farm" next Monday, where they will receive their friends with a glad-hand.

The school children's essay contest conducted by the W.C.T.U. cannot be completed until the return of the teachers, as the names of the contestants cannot be learned.

Mr. and Mrs. Sam. Brock of Ionia, are guests at the home of Mrs. Brock's mother, Mrs. Delia Martin of Hayes. They motored up and expect to remain until after Easter.

Geo. Bacon, employed by the W. U. T. Co., arrived home last Wednesday from Sarasota, Fla. He left Saturday for Jackson, where he will continue in the employ of the company.

Mrs. E. C. Ryseil and daughter, Edna, of Traverse City, are visitors at the home of Mr. and Mrs. C. E. Sterritt, for a week or ten days. Mrs. Ryseil and Mrs. Sterritt are sisters.

Mrs. Swinton's cottage at 210 Dixon avenue, has been leased for the summer by Mr. L. B Lowenstein of Memphis, Tenn. Mr. Lowenstein has spent four or five seasons in Charlevoix.

Mr. and Mrs. Eddie O'Neill left last Saturday morning for Detroit, where they will spend ten days with Mr. O'Neill's mother, Mrs. Louis Mercereau. The trip was made by auto.

Albert Cook of Marion, an employee of the Standard Oil Company, and who has been ill for several months, made his appearance on our streets last Friday, very much improved in health.

Mr. and Mrs. Samuel M. Rife, formerly residents of Manitou, Canada, arrived here last Friday and will reside permanently. Mrs. Rife is a sister of Mrs. Thomas Milner of this city.

Mr. and Mrs. Fred Bellinger, recently of Grand Rapids, but now of Saginaw, have purchased a grocery store in the latter city. Mr. Bellinger will continue to do jewelry repairing along with the other line.

Mr. and Mrs. Jones Durance who have spent the past few months in Seattle, Wash., with their son, returned home last week, and report having a pleasant trip, both being satisfied to be back in Charlevoix "The Beautiful."

Robert R. Bonthron received a telegram last Friday from Asst. Chief Engineer Tuttle, that he had been awarded the contract for doing the work at The Inn, which will consist of several new bath rooms and other plumbing work.

Mr. and Mrs. Ray W. Faulkner were called to Chicago last Friday to attend funeral service of C. W. Faulkner, an uncle of Ray W., and brother of R. N. Faulkner of this city. Announcement of whose death was received here soon after his passing.

Nat Burns returned home from Plainwell last Tuesday, where Mr. Burns and son Bernard, are owners and operators of a garage and filling station. Nat will remain here about two weeks and will return to Plainwell until the opening of the resort season here.

A real estate transfer was made last week whereby Joseph Foster and Charles Hamlin became owners of the property formerly owned by Norwood, known as the VanPelt and Pubelo Lake frontage. There is one hundred acres in the piece and has a lake frontage of 2640 feet.

Will Martin and wife and Earl Frye drove over from Indian River Sunday, and were the guests of Dr. and Mrs. McMillan until Monday, when Mr. Martin underwent an operation at Charlevoix hospital. Mr. Frye was accompanied on his return home by the McMillan children, who will visit relatives at Indian River for a few days.

A population of nearly six million for Michigan in 1950 is predicted by the engineers who have published a survey of the electrical situation in this state. The rapid growth of population will come from the congested cities where thousands are awaiting the opportunity to get back into what is termed the rural districts, just as soon as they are assured of city conveniences in country life.

A Sour Note

In a certain midwestern university letter grades are used. A, B, C, D and E, the latter standing for complete failure. A student recently appended the following brief note to his poorly written paper:

"Dear Professor: I know this is pretty bad; but I have been awfully busy leading the campus sings and have had little time for study."

When the paper was returned, it bore a short annotation. The professor of Xarentherg," but the fact remains that in Europe Nuremberg is more famous for its cake known as the Lebkuchen. The cake is made from a remarkable old recipe, and furthermore is made in animal shapes or, as is the case of the more ambitious bakers, in human poses, one of the best known being that of a country squire out walking. The cakes are shipped to all parts of the world.

Contentment Needed

A little less grumbling about what we haven't got, and a little more appreciation of what we have got will make a wonderful difference in our disposition, for we are, after all, about as well off as the average.—Orfi.

To Entertain at Castle Hall April 9

Pine Lake Lodge No. 122, Knights of Pythias, are planning for a big time to be held at the Castle Hall on Friday

CHARLES HITCHCOCK

evening, April 9. There will be a banquet at 6:30 o'clock, followed by a program on which Charles Hitchcock, humorist and impersonator, will be the chief entertainer.

Cause and Effect

There are no special days of jubilence that have reference to you and to me, to-day as we are alive. Days, years, many more than the fourth one was placed there for the gratitude of mothers, or that anything in nature was made for the use of man. Was water made to splash about? No, we have tried because there is water. Were the beauties and harmonies of nature made to delight the eye and for edification? No, we have the sense of the beautiful because beauty exists. The beneficial forces of nature brought us forth and sustain us therefore we love justice. The loving kindness and the tender mercies of God of which we hear so much are such not because there are those read to us, but because they are direct to all—because the laws of the universe are so and not otherwise.—John Burroughs.

"Art for Art's Sake"

Art for art's sake does not mean that art is more important than people or is to be pursued to the exclusion of every other interest. It simply means that art is a region free and autonomous. It cannot be bent to ends of moral edification or practical propaganda without coarsening, warping and cheapening it, any more than a church steeple can be turned into a silo. And even the most practical farmer would hardly dare to suggest that the church trustee ask the architect to plan a church without a steeple, on the ground that it serves no practical purpose. — Llewellyn Jones, in "First Impressions."

CHURCHES

Congregational Church

Rev. B. G. Mattson, D.D., Minister

The First Congregational church announces the following meetings and programs for Holy Week and Easter Sunday:

On Thursday at six p. m. the church families and their friends are asked to assemble promptly for the last of the series of monthly fellowship suppers for the season. The program following the supper will be a pageant presented by the Woman's Missionary Society entitled "Women of Destiny," interspersed with musical numbers and interpreted by a reader. The supper is on the potluck plan, each family bringing sandwiches, dishes and one article of prepared food.

On April Second a special Good Friday service with reception of members into the church and the celebration of the Lord's Supper will be held at 7:30 p. m. and will be about one hour in length. A musical composition of great solemnity and beauty will be rendered by a double quartette, to a series of numbers interspersed with the pastor's leadership of the devotions. The composition is by Jambs Percival Ilavis and is entitled "The Office for the Holy Communion" to music in the key of G. The following is the order of service:

1. Doxology—Invocation—Gloria.
2. Commandments, "Kyrie Eleison"—response.
3. Invitation and Promises—"Gloria tibi."
4. Witness and Thanksgiving—"Gratias tibi."
5. Confession of Faith—"Credo."
6. Vows of the Covenant—"Sursum Corda."
7. Story of the Last Supper—"Sanctus."
8. Distribution of Bread—"Benedictus."
9. Distribution of Wine—"Angus Dei."
10. The Pathway of Christian Experience—"Gloria in Excelsis."

This service is for the general public as well as for all the members of the church and will be a tender and impressive presentation of the great realities of Christian experience. Everyone interested is cordially invited.

Easter Sunday services will begin with the Christian Endeavor meeting at 7:00 a. m.

At the morning church service at 10:30 there will special Easter music by the choir and the Easter Sermon by the pastor on the theme, "The Sequel of Life's Continued Story."

The climax of the Easter celebration will be the Vesper music service at 4:30 at which will be rendered the cantata, "The Living Christ," a composition by Henry Wildermere. The church choir has been largely increased by the addition of other singers from Charlevoix and East Jordan, the presentation directed by Mrs. A. J. Sleiter. The following order of the numbers will indicate the development of the noble theme:

1. "The Night of Sorrow"—Prelude and Chorus.
2. "Let Thy Will Be Done"—Contralto Solo.
3. "Christ Has Risen"— Soprano Solo and Chorus.
4. "The World Is Not Thy Goal."—Chorus.
5. "Thou Who Knowest Sorrow."—Soprano and Contralto Duet.
6. "He Knows His Own."—Chorus for Women's voices.
7. "Love Is The Greatest Of All."—Contralto and Tenor Duet. Chorus and Tenor solo.
8. "Lo, I Am With You Always."—Tenor solo.
9. "The Living Christ."—Quartet of solo voices.
10. "We Come To Thee."—Soprano and Bass Duet; Soprano, Tenor and Bass Trio.
11. "We Shall Behold Him."—Baritone Solo.
12. "Hear Us, Father,"—Soprano, Alto and Tenor Trio; Chorus. Finale.

A repetition of the above program will be given in East Jordan at the First Presbyterian church the following Sunday evening, April 11th, by the same chorus and orchestra. These interchanges of church courtesies and expressions of fellowship are a most appropriate observance of the joy of the Easter time and will be appreciated by the large congregations which will enjoy these presentations of the Easter message in sacred music.

Methodist Church.

C. F. Pollock, Pastor.

This Thursday evening there will be a great service of fellowship. One feature of the evening will be the presentation of the Passion Week and Easter lesson with beautiful scenes thrown on the screen. A sermon on the subject, "It is Finished" will be given by the pastor of the church.

Friday evening, which is Good Friday, a unique service, suited to the occasion will be presented. Each person who attends will be given a beautiful copy of Hoffman's "Christ In The Garden." The sermon will be built around the lesson of the picture, and its subject will be "Father:" Don't miss this service.

Easter Sunday will be fittingly observed. At the morning watch service, which comes at 6 a. m. there will be Holy Communion and choral singing. Ilaglams and preliminary church receptions may also be cared for at this h

U. S. LOST SIXTY-FOUR DOLLARS

By CHARLES FORT

(©, by Short Story Pub. Co.)

SIMON BOBBLES had ways of his own, so you must not be astonished at anything done by him.

Said Simon: "Ain't I the straight feller, though! I'm that set on travelling! I'd like to be in Denver, just to say I was there. I'd like to go out to see Budd Lobe in San Francisco. I ain't got any use for Budd and he ain't any for me, but I'd like to go out just to say I was there. I'd like to go to Washington. Don't care about the capitol and wouldn't be both ered with the monument; don't care about generals and senators, but just want to say I was there."

Simon made a discovery. Said he: "It costs money to travel!"

Simon was given to wisdom. Said he: "There's always ways of doing things." And this was his way:

The postman hastened from corner to corner, collecting mail. And there on a letter-box sat Simon Bobbles, perched comfortably, swinging his legs.

"Hey, young fellow," said the indignant postman. "You mustn't do your lounging there! The government ain't in the furniture business. Do you hear?"—for Simon said nothing, but swung his legs ludicrously—"You mustn't loaf there, so take a jump for yourself."

"But I can't," answered Simon. "I can't move, and by rights, I can't talk, either. You see, I'm mail. See?"

MR. BUDD LOBE, 234 Pearl Street, San Francisco, Cal.

Upon the letter's forehead was a postage stamp. Upon his coat was marked in huge letters the above address.

"Don't talk nonsense," said the impatient postman. "And you'd better quit interfering with the government at a loss of sixty-four dollars, he was forwarded to the dead letter office.

A clerk rudely tore off his coat. It was the "envelope" of the "dead letter." In a vest pocket was a card bearing the name and home address of Simon Bobbles.

They sent him home from the dead letter office.

Says Simon: "There's always ways of doin' things. Been everywhere; Didn't see many places, but just the same can say I was there."

TWO-PIECE FROCKS IN VARIETY; CIRCULAR FLARE IN NEW FROCKS

IN THE rendition of the two-piece frock the Parisian couturier is playing the theme in many key and with charming variations. In these two-piece interpretations godtus is introducing a medley of interesting ideas, placing special emphasis on clever plaitings for the skirt and ingeniously knotted ties for the blouse.

The accompanying sketches convey in full detail the new and exquisite of creative art which enter into the styling of French two-piece modes.

TWO OF THE PARIS MODES

The youthful jumper dress to the left carries "atmosphere" of the sea, in that it is made of marine blue serge with a necktie knotted in sailor fashion. There are discreet white braid rings on sleeves and pockets. The skirt emphasizes a youthful all-around plaiting.

There are many important style points which invite a careful study in the two-piece dress sketched to the right in the picture. The first thrilling bit of information in regard to this model is that black crepe de chine is selected as the medium for its development. Which is to confirm the report that black is returning to favor not only for evening but for daytime wear as well. Another effective touch is the clever introduction of godets in the lower section of the skirt and in the sleeves as well. The vogue for necktie effects is expressed in a most interesting treatment. White, black, in fact, any color that is in vogue may be worn in this model, which would perhaps find more immediate favor with some, were it in a more colorful mood, say bois de rose, or in a new wine shade, or perhaps charmeuse green or Nopoleon blue. For of a truth French fabrics are presenting a maze of superb colorings, with names which add to their picturesque glory, such as, for instance, mountain mist, sea spray, moonlight, sandalwood, peach, orchid, tangerine, bordeaux, chartreuse and opal gray. Other colors of which in Parisienne is very fond include bois de rose, nacarat, field poppy, geranium, and the list might be continued ad infinitum.

To interpret fashion in its smartest phase, one's spring street frock should be of handsome woolen fabric. It may be as colorful as one could wish or not with a vestige of trimming save perhaps a plain row of buttons at either the center, back or front of the gown lend an austere aspect which if not becoming to every type of figure, is at least tremendously stylish. Very handsome suits and wool capes are liked for these smart frocks.

Quite a few circular flares are expressed through panels of set-on gored effects. These are frequently of contrasting shade or may be self-colored as fancy dictates. Another interesting idea for cloth as well as silk frocks is the scalloping of the circular flounce. The scallops are perhaps lined, bound with braid or piped with self-colored or contrasting fabric.

Circular flounces arranged in tiers also express a new trend in dress design.

JULIA BOTTOMLEY.

(©, 1926, Western Newspaper Union.)

SPRING FROCKS OF CLOTH

The youthful silhouette is expressed in flouncings, plaitings and similar inventions to attain a flare that will flare to unlimited fulness.

Another important item is the relaxed-at-the-front waistline. The model to the right in the picture demonstrates the new movement. The circular skirt, the three-quarter-length sleeve and vestee confirm this dress as being of latest style inspiration.

White braid on a black twill cloth, accents the circular lines of the dress to the left. There is broadise for an extensive wearing of black and white combinations this spring and summer.

Many of the leading French couturiers are according favor to princess lines for the cloth frock, a pronounced flare developing 30% below the waistline. This may be accomplished by a circular cut or by means of inset gores. Long sleeves and a high neck flouncings, plaitings and similar inventions to attain a flare that will flare to unlimited fulness.

(©, 1926, Western Newspaper Union.)

"In men whom men condemn as ill
I find so much of goodness still;
In men whom men pronounce divine
I find so much of sin and blot,
I hesitate to draw the line
Where God has not."

CHOCOLATE

Chocolate and cocoa are almost universally well liked. They may be served in various ways.

Adding a tablespoonful or two of cocoa to a cake or pudding will give a different flavor. One-fourth cupful of cocoa added to an angel food recipe will make a most tasty chocolate cake.

Cocoa Tutti-Frutti Cream.—Use the following recipe for cocoa cream, adding one cupful of macaroons which have been dried and pounded, one cupful of candied cherries, cut into small pieces, one-half dozen marshmallows cut into bits, one-half dozen raisins, one tablespoonful of citron and the same of orange peel chopped fine; add the last just before putting into molds.

Cocoa Cream.—Mix one-half cupful of cocoa with one-half cupful of sugar and the yolks of two eggs, beaten; add two cupfuls of cream and one-fourth-inch of cinnamon; cook in a double boiler until thick. Add two tablespoonfuls of gelatin softened in cold water. Pour into cold water, and stir until dissolved; over hot water bring another cupful of cream to a boil. Pour a little of the hot cream over the beaten eggs, then add to the remainder of the cream and cook one minute. Add the dissolved gelatin and cool. When it begins to thicken fold in the whipped cream, flavor with vanilla and pour into a mold which has been dipped in cold water. Set on ice to harden.

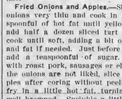
Chestnuts With Chocolate Cream.—Boil one quart of large chestnuts, remove the shells and press through a ricer; add four tablespoonfuls of powdered sugar, one-half teaspoonful of salt, four tablespoonfuls of cream and three tablespoonfuls of vanilla sugar syrup. Whip one cupful of heavy cream, add two tablespoonfuls of maraschino syrup, three of powdered sugar and four of melted chocolate. Fill molds with the blended mixture; chill and serve with a garnish of chopped nuts.

A chocolate sauce to serve on ice cream seems to be especially well liked. Here is a good one:

Good Things to Eat.

Salads are always acceptable and those a little out of the ordinary will never lack a welcome.

Italian Salad.—Cut one carrot and one turnip into slices and cook in boiling broth until tender. When cold add two cold boiled potatoes and one cooked beet cut into strips. Mix all together with a tablespoonful of scraped onion and pour over the buttered mixture.



Lombardy Sauce.—Cook one-fourth of a cupful of flour in one-fourth of a cupful of butter, add one-half teaspoonful of salt, one-fourth teaspoonful of paprika and one cupful of boiled dressing; mix well and fold in one cupful of thick tomato sauce. When cold add ends to use, add one teaspoonful of finely chopped parsley.

Fried Onions and Apples.—Slice two onions very thin and cook in a tablespoonful of hot fat until yellow, then add half a dozen apples cut in quarters, cook until soft, adding a bit of water and fat if needed. Just before serving add a teaspoonful of sugar. Serve with roast pork, sausages or chops. In the onions are not liked, slice the apples after coring without peeling and fry. In a little hot fat, turning until well browned. Sprinkle a little sugar over them—that helps to make a nice brown. Serve the apples around or around the platter of meat.

Dinner Dishes.—Remove the sections from grapefruit and take off the connection tissue. Arrange on crisp lettuce, dressing with a mayonnaise dressing and serve with mayonnaise. Dressing for a good, well-seasoned French dressing.

A delicious cake filling is prepared with a cupful of maple sirup stirred thick with powdered sugar and used between the layers—for the cake add a few chopped nuts.

Fruit Fish Salad.—Flake baked or boiled fish while hot. For a pint of fish cut six olives very thin lengthwise; to them add a tablespoonful of capers, a teaspoonful of the pulp of an onion, half a teaspoonful of salt, a tablespoonful of lemon juice, and two tablespoonfuls of olive oil. Mix and pour over the fish; add with a fork to avoid crushing; let stand in a cool place until ready to serve. Serve on lettuce leaves with mayonnaise, passed in a bowl. Garnish with pickled beets.

Raisin Fruit Cake.—Pour one cupful of boiling water over one pound of raisins, let stand for twenty minutes and then drain. To one cupful of sugar add one-fourth cupful of butter, one egg, one teaspoonful each of soda, nutmeg and baking powder. Add one-half cupful of sour milk, then flour to make a batter, adding the raisins last. Bake in a loaf in a slow oven.

Nellie Maxwell

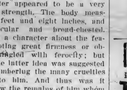
Money Well Defined

Strictly speaking, money is neither good nor ill. It is force, like water or wind or electricity, and is itself is, therefore, without moral quality. It is a force made good or bad by its use.—Dr. N. Dwight Hillis.

Sage's Bitter Reflection

There are four good mothers, of whom are often born four unhappy daughters. Truth begets Hatred; Happiness, Pride; Security, Danger, and Familiarity, Contempt.—Steel.

SOLUTION OF LAST WEEK'S PUZZLE



Many-Tiled Monarch Regal Even in Death

A few unarmed Abyssinians, attracted by the clamor of music and shouting, mustered courage enough to approach the standard which waved so gayly in the mountain gale, and on beholding one of their countrymen on the ground, they bent over the body, but quickly recoiled with dismay on their faces, exclaiming, "Tedros!" "Tedros!"

The words attracted the attention of every one, and together they rode toward the body, jostling each other in the endeavor to obtain a glimpse of him the natives styled "Tedros, Negus Negasti of Ethiopia."

And what did they see? The body of a native seemingly half famished, clad in coarse upper garments, dingy with wear and ragged with tear, covering undergarments of clean linen, says the London Chronicle.

The face of deep brown was the most remarkable one in Abyssinia; it bore the appearance of one who had passed through many anxious hours. His eyes, now overspread with a deathly film, gave evidence yet of the fire which only a few days before they were celebrated. The mouth was well defined and thin-lipped. The lower lip was well adapted to express scorn, and a trace of it was still visible. As the features peered into the open and teeth were disclosed. Over his mouth two strong lines settled to a slightly spiteful mien. The nostrils expanded widely as he struggled to relieve the lungs of the blood that was rapidly leaving him. The face was broad, high cheek-boned, with a high, prominent forehead and overhanging eyebrows. The hair was divided into three large plaits extending from the forehead to the back of the neck, which latter appeared to be a very tower of strength. The body possessed five feet and eight inches, and was muscular and broad-chested. There was a character about the features denoting great firmness or obstinacy, although evidently not; but perhaps the latter idea was suggested upon remembering the many qualities ascribed to him. And thus was it that we saw the remains of him whom men called Theodore, emperor of Abyssinia, the descendant of Menelik; Solomon, king of kings, lord of earth, conqueror of Ethiopia, the generator of Africa and savior of Christianity, now lying dead by his own hand!

Truth Destroys Romance

A story that went the rounds in connection with "Stir Loin," an education-al film produced by the Department of Agriculture, was to the effect that King Arthur, on seeing his favorite cut of beef placed on a stand to which he came hungry from the hunt, rose in the midst of his three-fourths sword, and dubbed the meat Sir Loin. Commenting on this in a letter to the New York Times, Ernest P. Herrin of Hunter college wrote: "Nuonce spring from illusion. Of course the etymology whereon the legend is founded is utterly absurd. The first syllable of the disputed word is French, sur; Latin, super. In the Fourteenth century the French termed the upper part of the loin of beef surloinge, whence our sirloin."

Guards Pupils' Health

Portable scales occupying the rear seat of its automobile accompany the superintendent of Grant county (Wash.) schools on all his tours of the county. He plans to weigh every grade child in the county twice every year. He has found 25 per cent of the pupils to be underweight. A meal-planning chart presented to each teacher, and health meetings for parents held at school centers, were parts of the health program. It extends visited the second time the underweight percentage had been reduced or eliminated entirely, and in some of the high schools the teeth of the pupils have been attended to and diseased gums and adenoids removed.

Turning Over His Money

"Sam, is your master a good farmer?"

"Oh, yes, fuss-rate farmer; he makes two crops in one year."

"How is that, Sam?"

"Why, he sell all his hay in de autumn, same money once, den in de spring he turn de ashes of de cattle dat die for want of de hay, and make money twice."

A Change

Nine weddings out of ten the society editor can guess correctly the selections that will be played and sung at the ceremony following the ceremony. However, the other day she found a new one. Along with the program of the usual bridal affair that the nature-lover is most apt to resolve, "I will." Many a high ideal has been found amid lofty mountain peaks.

It is because the nature-lover so universally sees God in Nature that Luther Burbank's recent public declaration that he is an "infidel" is evoking so much discussion. Everyone knows that the "plant wizard" has achieved seeming miracles in creating new plants, flowers and fruits. And nearly everyone is surprised at the conclusions he has now come to. He says, in part:

I do recognize the existence of a great universal power—a power which we can't even begin to comprehend and might as well not attempt to. It may be a conscious mind and it may not. I don't know. As a scientist I would like to know but as a man I am not so vitally concerned.

As for Christ—well, He has been most outrageously belied. His followers have so garbled His words and contorted that many of them no longer apply to present life. . . . He was an infidel of His day, because He refused to accept the prevailing religion and government.

So the vital meaning of the Easter message of today is that it is possible for every man to live in such

FIND DIRECTORY SET UP BY MARK TWAIN

Author Listed Self as "Antiquarian" in 1856.

Keokuk, Iowa.—A rare piece of Americana—a copy of the Keokuk city directory of 1856, part of which was hand set by Mark Twain and in which he listed himself as an "antiquarian"—recently was found and subsequently lost in a curious manner.

The Iowa State Insurance company acquired and incorporated in its office building an adjoining structure in which Orion Clemens, brother of the humorist, conducted a printing establishment in Keokuk in the late '50s. In making alterations a copy of the directory was found beneath the floor of the room in which the youthful Samuel Clemens worked.

The find was made by a workman, who, not knowing of the book's sentimental and bibliophilic value, examined it casually, and then tossed it aside in a pile of rubbish. Later, news of the discovery became known, but by that time the book had disappeared. The only other known copy of the directory is in the Keokuk public library.

Interesting Relics.

Although the building that housed the old Clemens printing shop virtually has been rebuilt, the room in which Mark Twain worked has been left untouched. It has been set aside as a museum and library for the display of his souvenirs, one of the most interesting being the old printing establishment. Other objects include an oil painting of the writer at twenty-one, a later portrait, first editions and autographed copies of Twain's books.

The Mark Twain tradition thrives lustily in this Mississippi river town, where he made his first afternoon speech and received pay for his first newspaper writing. In addition to the printing shop, the old Twain home stead still stands.

While still in his teens, Mark left Hannibal, Mo., where he had been working on Orion's newspaper, for a tour of the East, rejoining the family at Muscatine, Iowa. There Orion had started a newspaper after his Hannibal venture had fulled. Samuel presently left Muscatine for St. Louis, where the printing trade offered better prospects, Orion moved to Keokuk, later to be visited by Samuel, who was prevailed upon to remain for a promised $5 a week.

Cures for Brazil.

Clemens was just approaching his majority, and with the urge of youth, he wanted to see the world. He thought a fortune was to be made in Brazil, so he prepared to depart. Dashing down to St. Louis to bid good-by to his mother, he rushed back here with an idea that apparently had much to do with his later career.

The idea was to write travel letters of his journey for the Keokuk Daily Post, George Ives, editor, offered him $5 each for the articles. Samuel, much pleased, made a fresh start and got as far as Cincinnati, which became the terminus of the projected South American trip.

Clemens contributed three letters to the Post, couched in the exaggerated dialect considered humorous in that day, speaking of one of them of a plan to write a book of his journey. Ten years or so later he did make a journey around the world, and from this came "The Innocents Abroad" and a secure fame.

Message Undelivered, Couple Sues for $1,801

Beaumont, Texas.—Mr. and Mrs. B. E. Mulford joined in a suit against the Western Union Telegraph company to collect $1,801, of which $1,800 represents exemplary damages because of the defendant's asserted failure to deliver a birthday message from Mulford to his wife.

The message, it is asserted, was filed at Waxahachie, Texas, on July 20, 1925. It was charged in the petition that upon his arrival home a few days afterward he found his wife tearful, dejected, despondent and brooding, contrary to her usual sunny, cheerful nature, and uncharacteristic nature and disposition," and that she had dark suspicions and doubts and crept into her mind as to whether the failure to receive the message was due to neglect and lack of thoughtfulness on the part of her husband, which, in turn, indicated to her a waning affection on his part, all of which caused her deep mental anguish.

Alcohol Given as Cause of Leaves Turning Red

New York.—Alcohol, which long has been blamed for coloring the human nose with a rosette tint, is now put forth by sober scientists as the reason why leaves turn red in the autumn.

R. G. Hibben, expert of the Westinghouse Lamp company, who has been delving into the effects of light on plants, said that the old theory that foliage changed color and dropped off because of winter's chill touch was erroneous. He has discovered that similar reactions in the leaves of plants at certain periods in their life cycle cause them to reject sunlight, regardless of the weather.

With the shutting out of the sunlight growth is retarded, food is stored in the roots and trunk and fermentation finally begins to take place in the leaves. In the process of fermentation alcohol is produced in the leaves, changing the color.

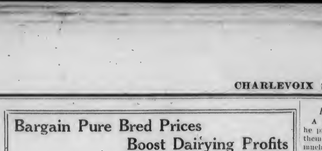
Bargain Pure Bred Prices Boost Dairying Profits



A PURE-BRED sire is the first step to profitable dairying, according to the Lansing Institute of Animal Economics, which is urging farmers to take advantage of prevailing low prices of good breeding stock to organize their herds for greater production. A purebred bull and cow which three years ago sold for an average of $433 at auction may now be obtained for only $295, statistics show.

"Sire profits" may make all the difference between a farmer's labor income of $500 a year and another farmer's income that is twice that amount. In one agricultural college survey it was found that wherever the average labor income on farms feeding their herds with pure-bred bulls was $837, in a year, farms using grade bulls returned a labor income for the year of only $400. But even as he breeds up better cows, the farmer can realize a greater profit from the cows on hand if he will but give more attention to proper feeding. The average cow under ordinary farm conditions is not producing profitably because her grain ration lacks milk-making elements or because she is underfed or overstuffed with poorly balanced food.

There are "poor" pure breds as well as "good." "Pedigree" alone only guarantees pure blood, not results. It takes a good cow, a good dairy ration and good management to harvest. Records of performances and the actual test are what need to be watched in these days of business farming.

Pessimistic View of Life Not Warranted

"Not to be born is best, and next to die as soon as possible." This was the pessimistic view of life expressed by Sophocles. Most philosophers and intellectuals of ancient times agreed with him. Life was looked upon as an enigmatic affliction rather than a divine dispensation.

"These dispositions were based upon a mere consideration of symptoms. They were made in almost complete ignorance of the underlying physical causes of human misery," is the assertion made by Dr. Eugene Lyman Fisk in Forbes Magazine.

"Many years of experience in sifting and sorting human types, in searching for the causes of physical failure, have convinced me of the falsity of this pessimistic philosophy. No one would wish to live in a world absolutely devoid of struggle, pain, grief or suffering.

"The world is as we view it. If we view it through bilious colored spectacles it is a bilious world. I have seen a man with big brain and dominant personality, fundamentally capable of a joyous, self-confident existence, wholly transformed into a pessimistic and wailing misanthrope by an crude a thing as flat foot. Others have been similarly affected by poisoned or infected physical states, while sometimes the reverse is true and the body suffers because they are unhappy; others are unhappy because they suffer."

Mr. Pooh Waited Long, but Opportunity Came

Mr. Waldemar N. Pooh, inventor and manufacturer of the "Double-Action" bucket for catching lambs, writes as follows: "I was just a clerk when my opportunity came. I had brought some papers to the president of the company—he was in conference, as usual—when the third vice president, the best-dressed man I ever saw before he took to stripes, said: 'Let us ask Pooh.' The directors took one look at me and laughed: but the third vice president hushed their mirth.

"'We are in desperate straits,' he said gravely. 'Everything else has failed. What have we to lose?'

"Then he turned to me and in the tone of one who is almost beaten, inquired: 'Pooh, what word of five letters means a cold dwelling-place? We can only think of n New York apartment.'

"For a moment the circle of worn, coarse faces upset me, but I pulled myself together, 'Igloo,' I cried, and as the room rocked I knew that my chance had come."—Kansas City Star.

Beloved Old Gossip

For 100 years the world has enjoyed the indiscreet and delightful confidences of Samuel Pepys, a writer in the Mentor remarks. There is a marvelous array of women in the diary; women of station and artisans' wives and serving maids and titles and actresses, and the wife who was only fifteen when she married him. He loved them all, including his wife, of whose beauty he was proud—and jealous, too. He was stingy with her till shortly before she died, along toward the end of the diary; but Pepys shows his pride in such an entry as this: "My wife extraordinarily fine today in her Bonen tabby suit . . . everybody in love with it, and indeed she is very fine and handsome in it."

Writer's Tribute to Chivalry of Women

I am convinced that, in their relations with men, women are the most generous sex. In fact, I cannot understand how the reverse idea ever came to be accepted. It must have been a superpowerful Crusader who first enforced it with his mace.

How many times have I noticed some woman, in the very climax of a quarrel, will not refrain from saying the one small, last thing of all that will cut nearest to the place where a man keeps his "wince." And I have heard men talk of "playing the game."

"Playing the game," "Letting down one's side," "It isn't done." The good old code, phrased in schoolboy jargon, that I have had to bear so very often, too often, from the lips of a husband who is, perhaps, nearer to the schoolboy than I always remember.—G. B. Stern, in Hearst's International-Cosmopolitan.

Mule Colt to Replace Texas' Old Gray Mare

Brownwood, Texas.—A small brown mule may take the place of the old gray mare in the affections of Texas Legislemmires. Sarah, for five years mascot of the Old Gray Mare band, died suddenly and left as her heir and offspring a mule colt.

The old gray mare attended the American Legion conventions in San Francisco and St. Paul, besides numerous conventions in Texas. She reached the climax in her career when she bore Mrs. Peterson, former prima donna of the Metropolitan Grand Opera company, up the steps of the Texas capitol at Gov. Miriam A. Ferguson's inauguration.

Sarah was one of the most traveled animals in America. She usually rode in a specially constructed box car. Once while on route to San Francisco the band stopped at Denver for a rest, leaving Sarah loose in the car. The band struck up the "Old Gray Mare" time but outside the car, and Sarah, thinking it was her cue, jumped from the car and placed herself in her customary position at the head of the band.

Perfect Substitute for Mercury Found, Claim

Boston.—Announcement of the discovery of a perfect substitute for mercury, of which there are but limited quantities in the world, was made here at a meeting of the Alumni association of the Massachusetts Institute of Technology.

Dr. Charles H. Herty declared that the finding of the new chemical will stand out as one of the most important discoveries of the age. He refused to divulge the name of the substitute or reveal the place where the experiments leading to its discovery have taken place.

Bans Sojourn Abroad

Philadelphia.—Any of the three daughters of Dr. Isaac Mials Hayes who remains abroad more than seven months will lose her inheritance, his will stipulates. They must be living in America and residents of Philadelphia.

Beautiful Redbird

Another name for the redbird is the cardinal grosbeak. They are a pride-ful lot, these grosbeaks, and with reason. The cardinal grosbeak is first cousin to the blue grosbeak, the azure-wing grosbeak, the orange, white and black evening grosbeaks and to others of the birdly tribe. In all the genus of bird life they stand separated from the common herd. Nature lavished his colors upon them, and the gift of music was not forgotten. James Lane Allen pays a tribute of praise to the beauty of the cardinal beside which all other tributes are and must be futile.

"Old" and "Young" Nick

The use of the name "Old Nick" applied to Satan originated in the comparison drawn between the machinations of his satanic majesty and those of Nicolo Machiavelli, one of the greatest Florentine statesmen, born 1469. He was crafty and disenabling, a firm believer in "the end justifies the means." Samuel Butler in his "Hudibras" in writing of Machiavelli says: "Nick Machiavelli had no'er a trick though he gave his name to old Nick."

Old Christmas "Dance"

One beautiful feature of the "Mesa de Gallo" in the great cathedral of Seville is a strange mystical dance on "interwesting the steps" by the choir boys, who thus dance before the high-altar. This reverent dance, which is given but twice a year, is marked by the chanting of the choir boys, who carry tall lighted candles as they cross and recross up and down the wide choir steps. One of the occasions is the celebration of midnight mass on Christmas eve.

Put Life Work First

The hours will come, and come to every man, when task work quivers and palpitates with life; but perhaps they only come because we have been fitful, fat, with a certain grimness, through the days of gloom. Let a man hold to his life work through mood and mediocrity. Let him hold to it through headache and through heartache. For he that observeth the wind will never sow; and he that regardeth the clouds will never reap.—G. H. Morrison.

Might Have Been Worse

A man committed suicide because he proposed to two girls and both of them rejected him. Well, look how much worse off he'd be now if both had accepted him.—New York American.

Notice of the Annual City Election.

To the Electors of the City of Charlevoix, State of Michigan:

Notice is Hereby Given, That the next ensuing annual City Election will be held on Monday, April 5th, A.D. 1926, in the Council Rooms, corner of State and Clinton streets, in said city, at which election the following officers are to be elected, viz: City—One Mayor, one Clerk, one Treasurer, one Justice of the Peace and one Park Commissioner, full term. Also one Supervisor, one Alderman and one Constable for each of the three wards.

Notice is Further Given, That the polls of said election will be open at 7 o'clock a.m. and will remain open until 5 o'clock p.m. on said day of election.

CHARLES H. LAMPHEAR,
By D. S. Payton, Deputy. City Clerk.

LEGAL NOTICES

STATE OF MICHIGAN—The Circuit Court for the County of Charlevoix—In Chancery.
James L. Tunath, Plaintiff
vs.
Joseph Graham, or his unknown heirs, devisees, legatees and assigns; Lester Coblentz, or his unknown heirs, devisees, legatees and assigns; Julian S. Wheeler, or his unknown heirs, devisees, legatees and assigns; William Green, or his unknown heirs, devisees legatees and assigns; and the Smalley Manufacturing Company, a Wisconsin corporation, Defendants.

Suit pending in the Circuit Court for the County of Charlevoix, in Chancery at the City of Charlevoix on the 27th February, 1926.

In this cause it appearing that it is not known whether the said Joseph Graham, or the said Lester Coblentz, or the said Julian M. Wheeler, or the said William Green, each or any of them are living or dead, or where each or any of them may reside, if living; therefore on motion of Lisle Shanahan, attorney for the said plaintiff, it is ordered, that the said Joseph Graham, Lester Coblentz, Julian M. Wheeler and William Green, or each of their unknown heirs, devisees, legatees and assigns, enter each, his or their appearance in said cause on or before three months from date of this order; and it is ordered that the said Smalley Manufacturing Company, a Wisconsin corporation has no office or office within the State of Michigan; therefore on motion of Lisle Shahahan, attorney for the said plaintiff, it is ordered that the said Smalley Manufacturing Company, a Wisconsin Corporation enter its appearance in said cause on or before three months from date of this order; and that within twenty days from the date of this order a copy of this order be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in the said county of Charlevoix, said publication to be continued once in each week for six weeks in succession, or that said plaintiff cause a copy of this order to be personally served on said defendants at least twenty days before the time above prescribed for their appearance.

Order For Publication.

STATE OF MICHIGAN—The Probate Court for the County of Charlevoix

At a session of said court, held at the probate office in the City of Charlevoix, in said County, on the 17th day of March, A. D. 1926.

Present: Hon. Servetus A. Correll, Judge of Probate.

In the Matter of the Estate of James D. McKee, deceased

Robert Hughes having filed in said court his petition, praying for license to sell the interest of said estate in certain real estate therein described.

It is Ordered, that the 7th day of April, A.D. 1926, at 10 o'clock a.m., at said Probate Office, be and is hereby appointed for hearing said petition, and that all persons interested in said estate appear before said court, at said time and place, to show cause why a license to sell the interest of said estate in the real estate described in said petition should not be granted.

And it is further ordered, that public notice thereof be given by publication of a copy of this order, for three successive weeks previous to said day of hearing, in the Charlevoix Sentinel a newspaper printed and circulated in said county.

SERVETUS A. CORRELL,
48-3t Judge of Probate.

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by Frederick Yahr and Sophia Yahr, his wife, of Hayes township, Charlevoix county, Michigan, unto Mary Zipp of the city of Petoskey, Michigan, dated January 26th, 1921, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on the 26th day of January, 1921, in Liber 68 of mortgages on page 579, on which mortgage there is claimed to be due at date of this notice the sum of One Thousand Three Hundred Seventeen and 06-100 Dollars, including the principal sum due with interest; and a further sum of Four Hundred and Eighty Nine and 17-100 Dollars, being taxes and interest thereon paid by the mortgagee on the land and premises herein described, together with an attorney fee of Thirty-Five Dollars as provided for by the said mortgage, and no proceedings at law or equity having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas, the taxes required by the statute to be paid on said mortgage was duly paid prior to the recording thereof.

Now Therefore, notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due thereon together with the costs and expenses of the foreclosing including the attorney fee provided by said mortgage, and also including the taxes paid by the mortgagee, at Public Auction, to the highest bidder therefor, at the front door of the Court house in the city of Charlevoix, Charlevoix county, Michigan, (that being the place where the circuit court for the county of Charlevoix is held), on Friday, the 25th day of June, 1926, at ten o'clock in the forenoon on that date.

The premises described in said mortgage being the lands and premises situated in the Township of Hayes, county of Charlevoix, state of Michigan, viz: The east one-half of the Southeast quarter of section Eleven in township Thirty-four, North, Range seven west, containing eighty acres of land, more or less, according to the government survey thereof.

Dated March 19th, 1926.

THE CHARLEVOIX SENTINEL

Volume 56 — Charlevoix, Michigan, Thursday, April 8, 1926 — Number 51

RESULTS OF CITY BALLOTS

Two Aldermen, Regulars Defeated, Gelken and Howe Winners

Election Monday passed off quietly with but a moderate amount of interest taken in the proceedings by electors generally notwithstanding the fact that several candidates following the nominating primary entered the field as aspirants for city office made their campaign and solicited the support of their friends and provided slips for use in order to further their claims. In this some of the candidates were successful winning over the regular nominees. In the two wards were two winners, Ernest Howe defeating Robt. J. Madill for alderman in the second ward by a narrow margin and Geik C. Gelken walking off with the aldermanic election in the third ward, defeating William E. Parmelee by two votes, the total vote cast in this ward for alderman being 136, of which Mr. Gelken received 70 and Mr. Parmelee 68. Vote by wards:—

FIRST WARD.

Mayor, Arthur Bergeon 26.
Clerk, Charles Lamphear 26.
Treasurer, Elma H. Cook 26.
Justice, Carlton S. Dodge 26.
Park Com'r., John Zeltler 20.
Park Com'r., Robert C. Mitchell 8.
Supervisor, Harry A. Craig 26.
Alderman, Robert Bridge 26.
Constable, Joseph Howard 25.

SECOND WARD.

Mayor, Arthur Bergeon 156.
Clerk, Charles Lamphear 158.
Treasurer, Elma H. Cook 156.
Justice, Carlton S. Dodge 154.
Park Com'r., Jouli Zeltler 89.
Park Com'r., Robert C. Mitchell 85.
Supervisor, Jas. Hughes 103.
Supervisor, Simon H. Rose 84.
Alderman, Robert J. Madill 93.
Alderman, Ernest Howe 97.
Constable, Elmer Johnson 160.

THIRD WARD.

Mayor, Arthur Bergeon 134.
Clerk, Charles Lamphear 137.
Treasurer, Elma H. Cook 134.
Park Com'r., Robert C. Madill 50.
Supervisor, Archie Alcox 128.
Alderman, William E. Parmelee 68.
Alderman, Geik C. Gelken 70.
Constable, William J. Welkel 126.

Both of the elected candidates for aldermen were regular nominees and for the past two years have been members of the city council and so far as we have been able to learn have labored diligently and efficiently in their respective capacities in the full interest of the city. However, this did not carry them safely through, both losing by a small margin. The majority of the electors in the respective wards for a change.

Mr. Gelken has served the city in past years in a like capacity, hence has had experience in city affairs. Mr. Howe enters upon his new duties with a desire to familiarize himself with the duties imposed and will make a strenuous effort to make a showing that will meet with full approval of his supporters in the ensuing term.

Sentinel $2.00 per year.

Odd Mixture of Races Found in Madagascar

The peoples of Madagascar have long furnished a fascinating mystery for ethnologists and archeologists, says the Detroit News. They are of extremely mixed cultures, inclusive of three apparently main elements—Bantu negroes from Africa; the Horas of Malay stock, and a fringe of Arabs all along the coasts, the descendants of the Patiente caliphs, who were driven out of Arabia and Egypt in the Eighth century.

These three elements are subdivided into fifteen or more main tribes, which in turn are divided again into smaller partially distinctive groups. There are also hints of a pygmy element among the populations.

Madagascar, incidentally, is the only spot in the world where lemurs, believed by evolutionists to be the parent stock of both monkey and man, are still numerous.

NEW RADIO NOISE REMOVER FOUND

Research Experts Perfect Non-Inductive High Resistant Fitament

Another step forward in eliminating noise in radio receiving sets is reported by research workers in the University of Pennsylvania. Harold Pender, dean of the Moore School of Electrical Engineering, and that of collaboration with J. H. Muller, assistant professor of theministry, he had perfected a new noninductive, high-resistance filament to take the place of impregnated paper used widely as a grid leak.

These filaments are mounted in glass tubes. A coating of metal a thousandth of an inch thick upon a glass core gives a grid leak of uniform resistance which does not vary with weather conditions, whereas the impregnated grid leak varies as much as 100 per cent, throwing the receiving set out of correct adjustment. A well adjusted grid leak prevents the tubes from "splitting over", draining of the plate, thus changing gradually and without noise.—G. R. Press.

DR. ERICH KOCH

EASTER VESPER SERVICE

At Methodist Episcopal Church Well Attended.

Probably one of the largest congregations that ever filled the Methodist Episcopal church crowded it to the limit of its seating capacity last Sunday afternoon for the Easter Vesper Service. It was a service of song, instrumental music and sacred song.

Features of the service were an instrumental trio, "The Ninety-First Psalm" arranged by Jas. G. Macfarlane for violin, saxaphone and piano; a sermon "Something New Under the Sun," based upon the new experiences of Mr. and Mrs. Chester and their sunday afternoon journey from Jerusalem to Emmans. The pastor quoted the ancient man who wrote "There is nothing new under the sun," and said, This is generally true, but specifically it does not obtain in every case.

Each person lives his own particular life, and the experiences through which he passes are entirely his own and new to him when they first arrive. These two disciples whose "hearts burned within" them, were having just such new experiences. Among those that came to them were, a new vision, a new sympathy, a new energy, a new eloquence. The aim of the sermon was to show the application of this old lesson of new Christian experiences to the lives of modern homes and individuals. The sermon closed with the assertion that the facts of the first Easter day were filling the world with light and song. This was served as an introduction to the final special feature, an Easter Cantata, in nine parts, "The Crucified," as follows:

1 Chorus.....The upper room where the Lord's Supper was instituted.
2 Baritone Solo, and'chorus of women's voices.....Assurance
3 Baritone Solo.....Benediction
4 Chorus.....Gethsemane
5 Chorus for men's voices.....Betrayal
6 Alto Solo.....Judgment
7 Chorus.....Calvary
8 Soprano Solo & chorus, Resurrection
9 Chorus.....Live again Our Lord

The choruses, solos and instrumental parts were all well rendered by local musicians, and reflected great credit to all who participated. The Cantata was a fitting close to what was considered by all "A beautiful day in the church."

Heavy Shipping Loss

Nearly 4,855 vessels were lost during the World war.

TAKE OVER BOAT LINE

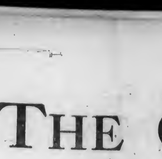
Steamer James E. Sanford Sold—Capt. Chambers

By a recent transfer the S. S. James E. Sanford, for some years on the Charlevoix-St. James route changes ownership and with the transfer is included the government contract for carrying the mail between the points mentioned, with the transfer taking immediate effect and the entering upon the route and mail contract as soon as the season of navigation opens, which from the present outlook, will be some days in the future.

Heretofore this Charlevoix-St. James route has been operated by the Beaver Island Transportation company, a corporation managed by Capt. James Sanford, of this city. That the corporate name will be continued in the future is altogether probable, but of course, under a new manager, Captain John Chambers who for a long term of years associated with the Michigan Transit Company, and more recently with the old Northern Michigan line as chief mate on the S. S. Manitou.

He is one of the heavy stockholders in the recent purchase and has an extended acquaintance with both watershippers and the general public throughout the entire lakes region with all of whom he is held in high regard. Associated with him will be his nephew Tom Chambers, who will be chief engineer of the line and with the management will have charge of the affairs of the Beaver Island Transportation Co. in the future for the stockholders.

Captain Sanford, the retiring manager, has given his undivided attention since its first inception to building up and perfecting this popular line and the same on a very substantial financial basis and in retiring lies the satisfaction of knowing that his entire service has been of a high order and enjoyed by the public in his business associates and stockholders.



ANGELO ANNINOS

Angelo Anninos, the new counselor of the Greek legation in Washington has succeeded Constantin D. Xanthopoulos.

NEW RADIO NOISE REMOVER FOUND

Research Experts Perfect Non-Inductive High Resistant Fitament

Another step forward in eliminating noise in radio receiving sets is reported by research workers in the University of Pennsylvania. Harold Pender, dean of the Moore School of Electrical Engineering, and that of collaboration with J. H. Muller, assistant professor of theministry, he had perfected a new noninductive, high-resistance filament to take the place of impregnated paper used widely as a grid leak.

These filaments are mounted in glass tubes. A coating of metal a thousandth of an inch thick upon a glass core gives a grid leak of uniform resistance which does not vary with weather conditions, whereas the impregnated grid leak varies as much as 100 per cent, throwing the receiving set out of correct adjustment. A well adjusted grid leak prevents the tubes from "splitting over", draining of the plate, thus changing gradually and without noise.—G. R. Press.

DR. ERICH KOCH

Dr. Erich Koch, chairman of the Democratic party of Germany, who undertook to form a coalition cabinet, failed when the Social Democrats refused to accept the post of burgomaster of Cassel and minister of the interior.

WHAT MAKES THE BELL RING

Simple Though it Seems, It Requires Much Apparatus

What makes the telephone bell ring? Every telephone call requires the ringing of a telephone bell. The electric current for ringing the bell is generated by a ringing generator. The kind of ringing genator depends upon the type of central office.

In thinly populated areas telephone service is usually given thru what is known as a local battery central office because the batteries consisting of dry cells for furnishing talk current, are installed locally in a box at the bottom of the subscriber's telephone. The current for signalling the operator is generated with a small hand-generator fitted with a crank and located in a box on the side or back of the subscriber's set. It is so arranged that the generator is not connected to the line until the crank is turned. Also at the small central office a local battery is used to ring the subscriber's telephone.

In comparatively thickly populated areas, service is given through what is known as a common battery central office. All battery current supply for talking to customers and for furnishing the bell ringing current is furnished by means of a storage battery located in the central office. The operator in this case signals by the subscriber lifting his receiver from the hook and thereby lighting a lamp in the central office.

The ringing current for this type of central office is usually generated from the storage battery by means of a vibrating device so connected that the electric current from the battery at 24 volts will flow first in one direction and then in the other through the primary of an induction coil or transformer.

In a central office area where there are more than 30,000 local calls a day, the ringing current load cannot be furnished by the hand-generator or the vibrating device known as the ringing interrupter, in such offices ringing motor-generators are installed.

In all central offices reserve equipment is installed for furnishing ringing current to guard against an interruption to telephone service.

GET A LICENSE FOR GRASS FIRES

Heavy Penalty for Lighting Fires Without Having Legal Permit.

State department of conservation officials are directing attention of farmers to an act of the 1925 legislature, effective for the first time this season, requiring permits to build spring clearing fires.

Written permission to burn grass or brush must be obtained from fire wardens or township supervisors.

The act is designed to lessen the number of forest fires started by careless running. beyond control. Violation of the act is punishable by a maximum penalty of $100 fine and 90 days in jail.

Far From Weasel

Fulmar fur is obtained from an animal of the weasel family, found in central China. It has a heavy pelt of light yellow underfur, with top hair of grayish brown. A white line runs down the back from the neck to the tail. It is improperly known under the name of Chinese stone marten and gray mormot.

Divine Tree

The evergreen tree of Asia is considered divine. It is the Bo tree, or pepul. This is the sacred fig tree. Ficus religiu, under which Buddha sat during the night in which he received supreme enlightenment.

GET MAIL BY AN AIRPLANE

To St. James and Beaver Island—First Trip Monday

St. James and Beaver Island once more attracted the attention of the public and for several days in succession last week was carried on the front page of the daily papers in Michigan, Illinois and Indiana due to the effort of the postal authorities to deliver mail by airplane to the Island residents.

With the ice formation in condition to make crossing from St. James to the mainland dangerous and practically impossible by ordinary methods and a desire on the part of the government to continue service an airplane was requisitioned and sent up from Chicago, through the effort of Postmaster George W. Weaver, to take up the interrupted mail service on the Charlevoix-St. James route.

The transfer and flight of the mail line from Chicago to this point was not without difficulty, several days being required to negotiate the distance, which under normal conditions can be covered in a few hours.

With the arrival of the airplane on Sunday about six o'clock p.m. plans were made for loading the machine with a vast amount of delayed mail preparatory to making the flight to St. James on Monday. There was but little delay in this part of the program. The mail was delivered to the aviatrine at the landing on Pine Lake, loaded and held for a short time awaiting an order from postal authorities to proceed to their destination.

The airplane placed at the disposal of the local office is owned by the National Airways Corporation; in charge of Captain J. F. Donaldson, with Alvin Kelder, mechanician, who made the first trip to St. James, accompanied by Capt. John McClean acting as guide for the party.

The airplane left for St. James about one o'clock p. m., made a successful landing, took on a load of return mail and made the trip back to Charlevoix in about two and one half hours. The flight back was made direct from St. James to Charlevoix with the distance covered in twenty minutes actual flying time. Nothing out of the ordinary for the pilot, but full of thrill for Captain McCann, this being his first air trip.

DEATH DUE TO ACCIDENT

Frank Harvey at Waller Farm on Monday Last.

Mr. Frank Harvey an employee at the Waller farm met with an accident about four o'clock p.m. last Monday, that caused his death about seven hours later.

The manner of his death is at this time, and probably will remain a matter of speculation or conjecture on the part of his friends and the public as he was alone at the time and was found some time following the accident in an unconscious condition and failed to regain consciousness.

At the time of the accident he was engaged in handling some bales of hay on the second floor in the barn, lowering same through a trap door to the first floor, a process in which he was using an iron hook to handle the heavy bales. Appearances and a study of conditions and surroundings lead to the conclusion that the victim of the accident was dragging one of the bales on the upper floor toward the opening and in so doing was walking with his back toward the trap door when the iron hook failed to hold, and with the momentum of the load, he very apparently fell across the opening and plunged headlong to the floor of the building; where he was found later and as before stated in an unconscious condition.

Mr. Harvey has been employed at the Waller farm for a term of years, continuously since July, 1923 and is well spoken of by his employer and associates.

He was born May 15th, 1865, hence nearly 61 years of age. Members of the immediate family surviving are Mrs. Harvey and five children all of mature years. Three daughters, Mrs. Otto West, Traverse City, Mrs. Crane, Charlevoix, Mrs. Harry Phillips, Boyne City and two sons, Edgar of Grand Rapids and Walter of this city.

Funeral services will be held at the farm this morning at 10 o'clock, with Rev. Herman Burns D.D., pastor of the local Baptist society, officiating.

Winners in the Prize Essay Contest

The prizes in the Anti-Cigaret Essay contest have been awarded by the W. C. T. U. as follows:

St. Mary's School—7th and 8th grades, first prize to Rex Sugerman, $2.00; 5th and 6th grades, first prize to Esther Brady, $2.00; second to Betty Jane Cartier, $1.00.

Public Schools—7th and 8th grades, first prize to Betty O'Neill, $2.00; second prize to Angie Scott, $1.00. 5th and 6th grades, first prize to Stanley Heise $2.00; 2nd Ruth Smith, $1.00.

FIND STATE PIONEERS IN ALFALFA CULTURE

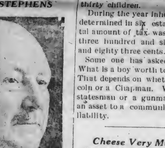
H. F. Probert of Jackson, Tells Rndio Audience of Field 28 Years Old

East Lansing, April 7th.—Early chapters in the romance of alfalfa's development in a question of crop importance in Michigan have been brought to light recently in connection with work of the Farm Crops department at the Michigan State College.

H. F. Probert, leading farmer of Jackson county and a famous cattle man, told the story of the other day of his 26 years experience with alfalfa. Mr. Probert was talking over the college radio station during a radio school program, and his "alfalfa pointers" proved particularly interesting to those who have watched the great increase in acreage of this crop during recent years.

There are records of successful alfalfa culture in the state long before Mr. Probert's start a quarter of a century ago, but the Jackson man tells a story of alfalfa worth which is hard to beat.

Fields 25 years old which are still producing are to be found on the Probert farm, and these are authentic records there of production of eight tons of hay to the acre during a single season. Mr. Probert is also said to be the first man in the state to use ground limestone to correct soil acidity.



A. E. B. STEPHENS

An approved portrait of Representative A. E. B. Stephens, Republican, of Ohio, who is now serving his third term in congress. Prominent in politics Mr. Stephens was prominent as an officer in the Spanish-American war and was national commander in chief of the Sons of Veterans. He is a member of the house committee on naval affairs.

THE INEVITABLE CIRCLE

By HARVEY FERGUSSON

(© by Short Story Pub. Co.)

FROM the crest of the slope where Guadelupe lay in wait, the German peddler and his burro coming across the desert looked like a large insect and a small one creeping slowly over a small floor. There was no other living thing in sight except the wheeling buzzards above them.

Guadelupe flattened himself behind the scant cover of a small Spanish bayonet plant and cocked the hammer of his Winchester. His swarthy cheek nestled against the stock; he threw a careful aim, and the copper bead of the rifle sight covered the breast of the unsuspecting peddler. Guadelupe knew that he could kill his man with certainty at two-hundred yards, but he resolved to wait until the peddler had crossed the dry, shallow arroyo at the foot of the slope. There was neither trail nor road across that part of the desert; the peddler was taking a short cut. In the little gulch his body would be meat for the coyotes and buzzards, and no man would ever find it.

The peddler's pack contained a bracelet in the form of a heavy silver circle set with turquoise, which had fascinated the great black eyes of the Senorita Catalina Marchant in the town of Las Llanas, twelve miles to the south. Those same black eyes had thrilled Guadelupe with the strongest passion which belongs to Latin blood. He would dare anything to satisfy that passion hereafter fulfillment. And he had no money with which to buy the bracelet.

The peddler and his burro disappeared for a moment in the arroyo, Guadelupe rose to his knees and crossed himself, then settled back into his ambush. First the head of the peddler and then half of his body came slowly in sight as he toiled up the bank. Again the copper head covered the man's breast, and this time the rifle cracked.

The peddler clasped his arms across his chest, coughed and fell forward. In his death struggle he rolled to the bottom of the dry waterway and brought up, sitting, against the bank. His head lolled forward; his eyes were wide and staring. So he died.

Guadelupe came to the top of the bank and peered over. He felt a shudder of terror as he saw the ghastly result of his shot. The broad, sunburned visage of the dead man had turned a pale yellow, while the blood made a dark red pool between his knees. The burro was quietly cropping the dry grass a few yards away. With nervous, fumbling fingers Guadelupe ripped the pack off the animal and found the bracelet. He took also a hidden revolver and a gaudy red silk handkerchief. These he thrust into his shirt front, kicked the rest of the pack into the arroyo, turned the dry grass a few yards away. With nervous, fumbling fingers Guadelupe ripped the pack off the animal and found the bracelet. He took also a hidden revolver and a gaudy red silk handkerchief. These he thrust into his shirt front, kicked the rest of the pack into the arroyo and turned toward the town.

The sun was going down behind far mountains in a glowing mass of cloud. All afternoon the soft cumulus, edged with a dark promise of storm, had been piling up on the crest of the range. Now it was lit with colored fire and loomed immense and terrible. As the sun went lower the cloud mass rose and spread, arching across the sky, so that when dusk came the familiar outline of the mountains was hidden.

Before Guadelupe had gone a mile darkness had fallen and he cursed the peddler for having been so slow. Straight overhead a few stars twinkled, and one great golden star shone directly before him. Toward this he laid his course and hurried onward. In the still heat of the desert night his breath came hard, while he slipped in the sand and stumbled over low, ground-clinging cacti.

The gulping star disappeared suddenly, like the light of a snuffed candle. He looked up and the last star overhead was also gone from view. The clouds had completely covered the sky and the desert was a black emptiness without mark of fixity.

A small, black form, with arms outstretched arms, loomed before him, and a quiver of terror shot through his body. For a moment he stood shivering, then drew nearer. The startling form proved to be that of a great tree cactus, a bulbous, branching thing without leaves or fruit, and by its presence Guadelupe knew that he had lost his way. He had never seen the great cactus cross before and had no idea in what part of the desert it grew; but he was certain that it was not on the way to Las Llanas. For several minutes his bewilderment was complete; for he had lost sure of the direction. But he did not acknowledge to himself that he was lost. A moment of concentration, and he felt sure which way led homeward. Then he started off again.

In a little while his breath was coming in gasps and he was trembling and drenched with sweat; but still he did not spare himself. Thirst had begun to torture his mouth and throat, and with it had come fear, for he knew that thirst in the desert soon became madness. Already there were dancing forms and colors before his eyes, and vague, disturbing images that peered at him from the darkness.

For hours he rushed ahead, spending the last of his energy; sometimes running to escape the fearful shapes in the darkness, and still he failed to see the far, scattered lights of the town. His mind was becoming confused and all things seemed remote, but he clung desperately to the belief that he was holding a straight course homeward. His knees were shaking, and every time he slipped and fell it was harder to rise. Finally he was staggering, tracing a zig-zag trail in the sand, and he knew that his next fall would be the last one. He prayed that his efforts had carried him near the town, that the boys driving out the goats in the morning would find him. Suddenly he plunged over a low bank; his head struck a rock and consciousness went out in a shower of splintering lights.

The sun burning his face brought him back to his senses. He lay flat upon his back. His broken head was throbbing with pain, his swollen tongue filled his mouth, and his whole body was inert with weakness. High above him half a dozen buzzards wheeled in patient circles, waiting for the sun to finish its work.

Gradually his memory brought back the images and sensations of the night before; the mad rush across the desert, the choking thirst and the dead man back there in the arroyo.

Stirring to move his legs, he found himself almost helpless and knew that he could scarcely creep. For some minutes he strove in vain to call out loud, knowing that what met his eyes would be life or death. He prayed that he might see the green fields of the valley shot through with its silver thread of blessed water. The image was so vivid that he felt almost sure the reality was near. He fancied that he heard the faint trills of goat bells and the singing of a girl. The imaginary sound brought before his mind the face of Catalina with her deep eyes and eager mouth. By a mighty effort he raised himself upon an elbow.

His eyes met the glassy stare, the drawn yellow face of the dead peddler. He had traveled in the inevitable circle of the lost.

Daddy Evidently Rotund

A teacher was trying to give her small son a mental picture of a barrel, without disclosing the name of the article.

"The object I have in mind," she explained, "is large and round, being thicker in the middle than any other way as the other, and if laid on its side and started at the top of a hill, it would roll to the bottom. Now, can you tell me what it is?"

A little hand went up, and the teacher said: "All right, Marjorie; that do you think I was describing?"

"My daddy," came the reply.

New Use for Sound Waves

The use of sound waves as fire extinguishers and a weapon in warfare is hailed a possibility by Howard Coonley, civilian director for the chemical warfare service. The tone wave to every building in a great city could be ascertained and a central fire station a tuning fork would be set up. In case of fire the tuning fork would be sounded and in a few minutes the fire would be extinguished.—New York Times.

Those Were Parrots

A dear old lady was showing her new parrot to her gardener. "You know, Joseph, that this parrot comes from the Congo, and the Congo parrots are so intelligent they seem almost human. This bird whistles 'Home, Sweet Home' so beautifully that the tears run down his beak!"

"Yes, mum," commented Joseph, "I used to own one that whistled 'The Village Blacksmith' so beautifully that ants used to fly from it to blossom till."—Dry Goods Economist.

Seeds From Big Acreage

In one county alone in Wyoming 1,500 acres of pest are grown yearly to provide seed pens to one of the big seed concerns. This is only one of several tracts serving this concern, which gives an idea of the tremendous acreage necessary to provide the seeds used by the nation each year.

Easy to Harden Copper

The bureau of standards says that hardening of copper is no secret from present-day metallurgists, any of whom can produce an edged tool of hardened copper as good as any made in prehistoric times. Copper is not used for such tools because of the great superiority of steel.

Uncle Eben

"I's heard 'bout a 'gentlemen's agreement,'" said Uncle Eben, "and I has been wondering why religion and science can't make some such-like arrangement."—Washington Star.

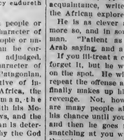
Table Provided for Attendants at Court

King Henry VIII maintained the good old English custom of the wives of the inhabitants in a great establishment dining together in the hall. In "The Ordinances of Eltham," drawn up by Cardinal Wolsey with elaborate precision for the regulation of the king's household, we find, among many other analogous rules a very stringent one, enacting that there should always be in the palace a public table to which those at court should, without fail, repair. This rule was especially aimed at "sundry noblemen, gentlemen and others, who do much delight and use to dyne in corners and secret places . . . not repairing to the king's chamber nor hall, by reason whereof the good of the king's household and chamber is greatly impaired, and the said officers oftentimes destitute of company at their boards." By the same "Ordinances of Eltham," the diet allowance, or "Boultie of Court," as it was termed, to which any person resident in the palace was entitled, was accurately fixed according to his rank or position. Thus a duke or duchess was allowed in the morning one clet loaf, one manchet, and one gallon of ale; and for after supper one clet loaf, one manchet, one gallon of ale, and a pitcher of wine, besides torches, faggots, and other necessaries. But a countess was allowed nothing after supper, and a gentleman usher had no allowance for the morning or afternoon. As, however, "Boultie of Court" was in addition to the excellent meals provided for everybody at the king's table, no one, Mr. Ernest Law tells us in his book on Hampton court, had cause to complain.

Banishing Fruit Bruises

In orchards near Portland, ore., a novel fruit gatherer is being used to catch all the fruit without bruising it. The device is mounted on wheels like a wheelbarrow, and when the tree is shaken the fruit falls on a stout sheet of canvas and rolls through an opening into a canvas container.

A God of Goodness



J. H. Ralston, D.D.

By REV. J. H. RALSTON, D. D. Temple Bible Institute, Moody Bible Institute, Chicago.

TEXT—O give thanks unto the Lord, for he is good; for His mercy endureth forever.—Psa. 107:1.

Given the kind of god a people or nation worships and the character of that people or nation can be correctly adjudged. The character of the Patagonian, the native of Interior Africa, the Chinaman, the Japanese, the Jew with his Mosaic laws, and the Christian is determined by the God he serves.

No man can properly evaluate God unless he can fully discern, on the one hand, the perfect excellence and glory and righteousness of God, or on the other hand the iniquity and heinousness of sin. A man may say that the idea of a god that would send people to a burning hell is utterly damnable to him, but he nor anyone else, has a right to put any valuation on the acts of God unless he has practically infinite knowledge of both good and evil. Probably one of the points of weakness in much of the preaching in our day is in the failure to properly portray the heinousness of sin. The Bible furnishes the data for a proper evaluation of sin, and among the other writers on sin we find a more illiberal evaluation of it than with modern writers. In the old books, "The Marrow of Divinity," or "Boston's Fourfold Estate," we find the simple teaching of the Word of God, but these books are not read in these days.

It may be admitted that the aspects of God's character that should be well emphasized in this day are His holiness, justice and wrath. Modern shun refinement forbids the plain study of certain portions of the Bible. Even the death of Jesus Christ on the cross is the stark reality, where the sinful and heinousness of sin is presented in its most hideous form, is not inculcated. But with all the teaching of the Bible as to holiness, justice and wrath of God, there is abundant teaching as to His goodness. But we might ask, in what light does His goodness first appear? Only in the light of His holiness, His justice and possibly His wrath. As we learn from Romans 2:4, man despised the goodness, forbearance and longsuffering of God, not knowing that these things are intended to lead him to repentance.

We might ask in what does God show His love? First, in His general providence. "Oh, that men would praise the Lord for His goodness, and for His wonderful works to the children of men!" Secondly, God shows His love in making us just what we have—men and women—created in the image and likeness of God. Evolution has not made us what we are as superior to the animal world about us, but it was God, in the exercise of His loving will and purpose.

Thirdly, God shows His love in giving us favorable environment. Every one of us rejoices that he is an American. With all our defects America probably offers the finest opportunity of any land on the earth for the development of the best that God has for us. Especially is this true if any of us are born and reared in Christian homes and surrounded with Christian influences. Fourthly, God shows His love in certain compulsions of men, as in the choosing of Abraham to be the father of the most favored race on the earth, the Jews. What blessing the Huguenots, the Anglo-Saxons and the Puritans possess!

Fifthly, the greatest mark of the goodness of God was provision for man's redemption through a Savior who was not less than the Son of His own love. For God so loved the world, that He gave His only begotten Son, that whosoever believeth in Him should not perish, but have everlasting life" (John 3:16). But God commendeth His love toward us, in that, while we were yet sinners Christ died for us (Rom. 5:8).

In the light of these considerations and in the light of daily experience men may well say, The Lord is good and His mercy endureth forever.

Reward of Service

I do not think that anything can be more comforting to you who are serving the Lord than to see what comes of your service. You, who have been going forth weeping, bearing precious seed, just wipe your eyes, and look above, and begin to anticipate the time when you shall come again with rejoicing, bringing your sheaves with you; for, up yonder they are shouting, "Harvest home" with great delight.—Spurgeon.

Doing Things for God

Nothing is eternal but that which is done for, God and for others. That which is done for self, dies. Perhaps it is not wrong, but it perishes. You say it is pleasure—well, enjoy it. But joyous recollection is no longer joy. That which ends in self is sordid. That alone which goes out of self into God lasts for ever.—F. W. Robertson.

Going the Right Way

The strength and the happiness of a man consists in finding out the way in which God is going, and going that way too.

The Reward

Jesus does not hesitate to teach that love to God and love to man are not merely rewarded by life, but are in fact life itself, and that until one thus obeys the ancient commandment he does not truly live.—Frances Greenwood Peabody.

Make Our Abode With Him

"If a man love me, he will keep my word; and my Father will love him, and we will come unto him and make our abode with him," said Jesus.

CAMEL WILL WAIT LONG FOR REVENGE

Vindictiveness Trait of "Ship of the Desert."

The qualities of the camel are seldom, if ever, appreciated on a slight acquaintance, writes Hassenein Bey, the African explorer.

He is as clever as a horse, if not more so, and in some ways more human. "Patient as a camel," is an Arab saying, and a very true one.

If you ill-treat a camel he will never forget it, but he will not attack you on the spot. He will wait, and if you repeat the offense again and again, he finally makes up his mind to get his revenge. Not, however, when there are many people about. He watches his chance until you and he are alone, and then he goes for you, either by snatching at you with his mouth and throwing you to the ground, or by kicking you and then trampling upon you.

There is a case known where a camel trampled a man and then sat on him, refusing even to move after punishment from the men who ran up to the rescue. He wanted to make sure that he had finished his man, and indeed, he had.

People imagine that to the desert a camel has to be reared and fed. As a matter of fact, it is very hard to keep a camel away from the rest of the caravan, for he knows instinctively that to be left behind means death, and he keeps as near the bulk of the caravan as he can. It is a sad sight to see a sick camel straggling along behind a caravan.

The camel also displays his intelligence when he is taken from the coast and pushed into the waterless trek. Instinctively he rests at night, even three or four days after the start, to go back to the coasts. There have been several instances when the camels have deserted the men at night, either on the outward or the homecoming journey, when the caravan was still a few days from its destination.

In the event of some accident befalling a caravan camels which have provided a certain food for years will often complete the journey alone.

Fighting Prairie Dogs

Prairie dogs, when they are allowed to lead their normal lives, always bury their dead by filling up the holes in which death has occurred. The majority of these little denizens of the plains die from old age, and their habit of sealing the openings with dirt is nature's way of preventing the spread of disease from the dead bodies. Prairie dogs are looked upon as pests by ranchers and homesteaders, for they instil on a clear view of the surrounding plain for their enemies or outlooks as they are called. Now, the coyote, or prairie wolf, is a ravenous and accomplished meat eater. It was no novel experience for him, for at one time he was a member of the Los Angeles fire department.

Woodchucks Spread and Do Big Damage

Rodents Have Invaded Areas Devoted to Crops.

(Prepared by the United States Department of Agriculture.)

Woodchuck control was an important part of the work of the biological survey of the United States Department of Agriculture during the past year. Originally confined chiefly to rough, stony land, where they did relatively little damage, woodchucks have invaded areas devoted to orchards and grain and root crops and have established themselves along levees, hedgerows, and other favorable retreats. By girdling orchard trees and feeding upon the products of the farm, these rodents have become a pest of considerable importance. In the banks of levees their burrows frequently make costly breaks in time of high water and flood adjacent farms and destroy crops. They are responsible also for serious washouts in roads at bridge abutments and along culverts.

Practical methods of fumigating woodchuck burrows with carbon bisulfide or calcium cyanide have been worked out. In Indiana, Illinois, New York and Maryland 329 demonstrations were attended by approximately 5,000 landowners. In 24 counties in Indiana the demonstrations were attended by more than 2,000 farmers, and as a result 20,000 pounds of calcium cyanide were used in poisoning campaigns against the pests.

In the Rocky mountain and Pacific coast states woodchucks consume considerable quantities of forage about mountain meadows, and locally invade orchards, alfalfa, and other farm tracts, but gardens are the favorite feeding resort. Three or four days after the start, they go back to the oasis. There have been several instances when the camels have deserted the men at night, either on the outward or the homecoming journey, when the caravan was still a few days from its destination.

In the event of some accident befalling a caravan camels which have provided a certain food for years will often complete the journey alone.

Poison Bait Is Useful in Killing Off Gophers

Gophers increase at the rate of 250 per cent annually if unhampered by poisoning or trapping, declares A. E. Oman of the Kansas State agricultural college, state leader of rodent control work. In spite of this immense breeding rate of the pests, the increase of gophers by trapping or other means for which bounty is paid, is but one gopher per acre, or about 25 per cent of the total number of animals, he explains.

"To make the bounty plan of killing gophers adequate to thoroughly wipe out the animals, the bounty probably would be increased five to ten times, which would increase the bounty tax from $10,000 to $20,000 for a year or two in many of the counties in the state. Now, the cost of poisoning a section of gophers is far better and cheaper, Mr. Oman believes, at several hundred yards of their towns. This precaution is taken on account of the danger to other quiet-footed enemy may be entering time for the poisons to be scattered in into their homes. Government rangers have been trained in the methods of using them by the use of gas and poison.

Hydrophobia Kills Wolves

Hydrophobia is spreading among the wolf packs of Russia, according to an announcement of the Moscow sky institute of Moscow. It may have been originally started in the dog ravagers whose number heretofore has been increasing rapidly. Twelve people in the town of Yasnaya Volianskaya district, northeast of Moscow, are in hospitals being treated for hydrophobia. They were in a party which believed that its numbers would provide safety from attack by the wolves and attempted to walk to a neighboring village. One peasant was killed by the wolves and five died from hydrophobia and wounds before they could be transported to Moscow.

Only on Three Stamps

Only three stamps bore the image or the late queen dowager, notwithstanding her long connection with England. In the Newfoundland issue of 1897 the portraits of which included the four reigning queens of the family, Queen Alexandrin appeared on the three-cent orange, a finely executed stamp. In the Canadian issue of the same colony she was portrayed on the green ten-cent stamp. In the Quebec tercentenary issue of 1908 she shares the two-cent carmine stamp with King Edward, but it is the finest of her three philatelic portrayals.

Firemen Handicapped

Because the fire department of Cedreds, W. Va., was misplaced, the business district of that town was threatened with destruction when a blaze started in a poolroom spread to adjoining buildings. The village fire apparatus had been destroyed by fire recently, and a call 500 feet of hose were bought and stored in a private garage, but the firemen did not know where. After an hour's search the apparatus was found. Meanwhile the Kenova department had extinguished the blaze.

Took Time to Fight Fire

At a fire in Brunswick, Maine, one of the leading business men was Bill Armour, a marathon walker from Los Angeles. He was on his fourth trip from Los Angeles to New York and had just reached Lewiston when the alarm came in. He went to Brunswick and acted as nozzle man for several hours. It was no novel experience for him, for at one time he was a member of the Los Angeles fire department.

"No, she said she was tired of having to stop right in the middle of a sentence."—Life.

Liberal Application of Manure Best for Garden

Soil must be much richer for successful gardening than for general farming. Liberal application of manure therefore will be beneficial. Stable manure should be applied broadcast at the rate of 40 tons an acre. When the garden is plowed in the fall the manure is more incorporated in the soil, the land can be worked earlier in the spring, the plowing is done and operations may start just as soon as spring opens. The manure adds plant food and organic matter to the soil and thus improves both its chemical and mechanical condition.

When manure is not available, organic matter may be added to the soil by growing and turning under a cover crop. When legumes are used for this, nitrogen also is added to the soil. If the ground is poor, commercial fertilizer may be applied just after working the soil next spring.

Improving Hen Flock

Although the average poultryman cannot afford to trap-nest his hens, he can greatly improve his flock by making a special breeding pen of his best mated birds and by saving eggs from pullets. In choosing those breeders both egg-producing and standard qualities should be kept in mind. By leg-marking or banding the chicks hatched from the eggs from this pen will be superior to those from the general flock.

Clover Helps Dairyman

Sweet clover pasture has been found to be a practical help to dairymen in sections where the soil conditions are suitable. It will not do well on soils deficient in lime. Records of a good many dairymen show that they have been able to carry more cows per acre on sweet clover pasture than on blue grass pasture. Sweet clover seedings usually grow fast enough so that they make good fall pasture the first year of seeding.

Sudan Grass Useful

Sudan grass is widely grown in Kansas, both as a hay crop and for pasture. Of rapid growth and thriving best in the hot months when other pastures are short, this newly introduced crop is proving itself one of the most valuable of the sorghums, and is the best summer pasture known to a large portion of the state, supporting more animals than any other on a similar acreage.—Kansas State Board of Agriculture Report.

NEED THE MARINE

The importance of the American marine and the necessity of its maintenance in order that our trade with the world may not be discriminated against, was emphasized recently by Secretary of Commerce Hoover in an address in New York on "The Future of Our Foreign Trade."

"After discussing the problem of foreign monopolies and the way to combat them through an independent supply of the monopolized commodity of our own, the Secretary said:

"We need to visualize our overseas transportation not as a lot of ships but as about twenty important sea routes which are the extensions to our own inland trade routes. There is only one protection of our commerce from discrimination and combinations which would tax those overseas freight rates. That is to maintain upon these trade routes the regular operation of very substantial shipping under the American flag.

We will never have a real or satisfactory merchant marine until it is owned and maintained by private enterprise. The government cannot operate cheaply. It cannot avoid the interminable difficulties and wastes of bureaucracy and above all, the extreme indirect political pressures. Some of the lines on important trade routes are today successfully operated under the American flag by private enterprise. With the growth of the volume of trade most of the lines can, I believe, be ultimately disposed of to successful private operation."

With the necessity of our maintenance of an American merchant marine every patriotic American will agree. American ships are necessary for two reasons, first that our shippers may not be discriminated against, and second for protection in case of war. Now that foreign governments have gone into the business of forming monopolies to fix prices it is all the more important that we have a merchant marine of our own. It is as easy to gouge and forth at Geneva is abundant proof of this. If the United States were in the League of nations we we would have been compelled to take some part in this, to favor one combination or another.

German delegates claimed that at Locarno they were given to understand that Germany would get into the council "as is" without the introduction of other members at the same time, which they characterized a "breach of faith." France on the other hand maintained that she had no such understanding and that Poland, as an ally of France, interested in the Locarno pact, with much at stake, ought to be in the council as a permanent member.

It was on this rock that the council split. True it was Brazil which finally broke up the meeting but nobody seriously believes that Brazil acted on her own accord. The kindliness with which she has been treated by the European powers since is to say the least significant. But if the United States had been in the League we would have had to do one thing or another. We would have had to stand by France and insist on the admission of Poland to the council or to adopt the German view that she was the victim of a breach of faith and should have gone into the Council alone. But France and Germany were not standing alone. There were other nations supporting each viewpoint and in making our decision we would have offended one group of powers or another. And the political questions involved were questions in which we have no concern.

The United States is a nation apart. We have drawn our citizens from all countries in Europe, and it is peculiarly necessary that we refrain from taking sides in purely European questions.

—Why worry so much about disarmament when we have Mr. Edward Bok's peace plan to fall back on.

SEES PROSPERITY

A continuation of American prosperity has been pretty generally predicted by the heads of various industries in the country for some time. Prosperity statements have now been given support by James M. Lynch, president of the International Typographical Union and one of the leading labor leaders in the country.

In a recent statement Mr. Lynch declared that the printing trade is always sensitive to business fluctuations, and has in the past year escaped the slump which might naturally have been expected following a period of general prosperity.

"The old cycle of business boom, slump and recovery seems to be a thing of the past," said Lynch. "Prosperity is making a long visit with America, and barring some unforseen development we are going to enjoy flourishing business for many months. Many conditions contribute to this situation, not the least of which has been the continuance of a high wage level. Well-paid working people have provided an unfailing market for all goods produced. If employment in all lines could be more fully established we would be insured against business fluctuations."

There is no apparent reason why the year 1926 should not be a banner one for American business, despite the fact that for a month or two this fall we will be in the midst of a heated political campaign.

—If the League of Nations is going to continue to act up so, it might be a good idea to move it to Mexico.

PROTECTION FIRST

When the thirteen colonies had achieved freedom and set about the establishing of an orderly government through the Constitution, one of the first things this country sought to secure was economic independence by fostering home industry, according to Peter Roman Sterling, who discusses the historical constitutional phases of the protective tariff policy, says:

"Protection by American manufacturers was one of the chief reasons for the formation and adoption of the Constitution of the United States. There is no end of proof of this assertion.

The first bill passed by the First Congress was a tariff bill. While it was being debated, Fisher Ames, said: 'I conceive, sir, that the present Constitution was dictated by commercial necessity, more than any other cause. The want of an efficient government to secure the manufacturing interest, and to advance our commerce, was long seen by men of judgment, and pointed out by patriotic solicitous to promote our general welfare.'

Daniel Webster, student and expounder of the Constitution, in a speech at Buffalo N. Y., in 1833, said: 'The protection of American labor against the injurious competition of foreign labor, so far, at least, as respects general handicraft productions, is known historically to have been one end designed to be obtained by establishing the Constitution.'

Rufus Choate, while discussing the power and duty of Congress to coginate the policy of protecting American labor, in the Senate in 1842, said: 'A whole people, a whole generation of our fathers, had in view, as one grand end and purpose of their new government, the acquisition of the means of restraining, by governmental action the importation of foreign manufactures, for the encouragement of manufactures and labor at home, and desired and meant to do this by founding the new government with this specific power of regulating commerce.'

—Pat Harrison says that President Wilson abolished secret diplomacy during his term, but of course, having Col. House, he didn't need it.

BIG TAX RETURNS

It was estimated by treasury officials that the full income tax returns for the month of March would approximate $400,000,000 and the returns have now been sufficiently canvassed to indicate that the officials will not be disappointed in their estimates. A total of this kind would only fall forty-one millions short of last year's returns, and is regarded as a very satisfactory showing for the new tax law.

The situation is very gratifying to officials who were depending on the $400,000,000 figure in estimating the government receipts for the year. Had the figure fallen greatly below the estimate it would doubtless have caused some embarrassment and might have brought about a serious situation.

If things turn out as now indicated for March collections this year, it also is probable that the collections of incomes and profits taxes for the complete fiscal year 1925-26 will be but a few millions less than for the fiscal year 1924-25, all of which came under the old and higher tax rates. It is considered not improbable that the total collections for the current fiscal year will reach $1,750,000,000 the estimate being made on the basis of the data now at hand.

Such a result would not only be highly satisfactory but would come as further evidence of the soundness and prosperity of business interests. Tax receipts during the fiscal year 1924-25 were larger than has been estimated, principally because the unusual prosperity of business brought greater returns in taxes than otherwise would have been the case, and it now appears that there is to be proof of the continuance of satisfactory earnings by business in the shape of tax payments even under the new and lower rates which will meet the needs of the government and match and exceed the expectations of the officials.

Cows Lungs Cover City Lot

IF THE spongy sacks which form the lung of a cow were spread out that they would cover a city lot 50 by 170 feet, according to an estimate made by experts of the Larrowe Institute of Animal Economics. To keep this mass of flesh functioning normally, over 3,000 cubic feet of fresh air are required each hour, which, served to cows in buckets as is water and grain, would mean 320 three-gallon puffuls every hour for each cow.

A cow needs air (oxygen) to purify her blood, to digest and assimilate feed and turn it into beef, body repairing material and milk. Add to the well ventilated barn a plentiful supply of fresh water, good roughage and a correctly mixed dairy ration, and you have all the essentials for abundant milk making. It is this lack of fresh air, on many farms during the long winter months that is believed by practical farmers to be the underlying cause for much of the sickness among the animals.

COMMENT.

—The Cadillac fire department drove about the town looking for the wrong house number that had been given them, and meanwhile the house burned. It has been suggested that they put out the fire and get the number afterwards.

—Leadfield, the new mining boom town in Nevada, sells water for ten cents a gallon and prohibits the use of it for bathing. What a parallel this town would be for the small boys.

—Teakwood is so durable that beams made of it 2,000 years ago are said to be still strong. Doubtless this is why they never build political platforms out of teakwood.

—Chicago scientists have succeeded in producing a race of one eyed fish. But they won't be popular with fishermen as it will be twice as hard for them to see the bait?

—The way the League of Nations tries to keep the squabby little boys out of its Council would lead one to think that the Council has some kind of a jam closet.

—When telephonic communication becomes firmly established between the United States and England just think of how many new wrong numbers we can get!

—Sixty million bushels of quarters have been planted along the shores of Florida. Maybe they are afraid of running out of shells for their shell games.

—Before we make up our minds just how effective Mussolini is as a dictator we would have to give him tried out on prohibition enforcement.

—Abdel Krim must think that his active days as a soldier and statesman are about over. He has begun writing for the newspapers.

—The cold weather in Vermont has slowed up the maple syrup crop for three weeks. A Senate committee ought to look into this.

—We might forgive Brazil for breaking up the League meeting if she would only put the price of coffee back where it belongs.

—Since the Geneva blow-up the nerves of the League of Nations advocates in America seem to be decidedly "jumpy."

—American football is now being introduced into Russia and it ought to go good with all the long hair over there.

—If the country is as wet as the Wets claim and as dry as the Drys leslie it is, who is inconvenienced?

—This is the season of the year when the public finds out again what a good thing a primary election is.

—It is said that all the lemons obtainable in Florida do not grow on trees.

Growth of Hair

Hair grows much faster in the summer than in any other season of the year. This is due partly to the heat of the sun and partly to the opening of the pores of the skin, and the excuse, in the form of perspiration, of body poisons which, unexpelled, arrest the growth of the hair. It has been noticed that those whose work induces perspiration merrily always have luxuriant hair.

Power of Vibrations

A Boston violinist says he can put a fuzzy with the vibration of his fiddle. But that's nothing. A saxophone slightly off key can put out an entire orchestra.—Cleveland Plain Dealer.

THE THEATRE

Bebe Daniels' newest Paramount starring production at the Palace theatre, Friday, April 9th, "Lovers in Quarantine," is an universal picture—unusual because it is one of the few screen versions of famous Broadway stage success to come up to the legitimate play for entertainment. And "Lovers in Quarantine," adapted by Townsend Martin and Luther Reed from F. Tennyson Jesse's New York hit, "Quarantine," goes even further than that—it surpasses the stage play for fast-moving action, thrills and laughs.

The surprising feature of Pola Negri's latest starring vehicle, "A Woman of the World," which appears at the Palace theatre, Tuesday and Wednesday, April 13-14, is not that it is a stirring, dramatic, wholly modern story with a rural, American setting, but the fact that it reveals the fascinating, emotional actress as a comedienne of considerable definess and ability. As a European Countess, disappointed in love, who comes to America to forget, and turns the mid-western community of Maple Valley, Iowa, topsy-turvy, Miss Negri has ample opportunity to show the alluring, exotic side of her personality.

Revised His Opinion After Fall of Apple

Two Arabian men were visiting on a farm and they sat under a high apple tree.

One of them was complimenting the Creator on His wisdom and the other was disagreeing. After a time the latter said he thought that God did not create things in a balanced manner. And as he said to his friend to confirm him of his side of the argument, a ripe apple fell from a high tree. The fruit that weighs ten or twenty pounds. Now I should think if things are created in a just, equal and harmonious manner than the big tree will produce the large fruit and a small seed or plant will produce a small fruit, long lasting. It is the reverse and things are unbalanced in the human family, in the animal family and the vegetable family, etc."

While he was talking thus, an apple fell from the high tree and hit him on his nose.

He realized his mistake immediately and with eyes raised upward he said, "I think God that it was an apple and not a watermelon, which might have knocked my nose."—Complete Novel Magazine.

Showing it in

A well-known actress was appearing in a play which the critics said was not noted for his irritability. He continued that the woman continually "got his goat" during one of his most important scenes.

At last he wrote her a letter, in which he said: "I am extremely sorry to tell you that it is impossible for me to go on with you in the play. You insist in laughing at me on the stage. May I ask you to change your name or act on the stage by a nom de plume?"

To this the actress replied: "You are quite mistaken. I never laugh at you on the stage. I wait till I get off."

Elephants in America

Pooh! cousins of the American type of elephant or mastodon have been found in the prairie-dog towns of Montana. The vexed question of mammoth remains in America has been disposed, however. In Afton, Okla., there is a sulphur spring from which have been dug the fossil remains of the mammoth and mastodon. In the spring water has formed innumerable phlomuts of pink, basically arrow heads. Prof. J. M. Charke of Albion N. Y., found in a rock in this spring, feel below the surface of the ground and even scales of fish were found at Big Bone Lick in Kentucky.

Statement of Ownership, Management, Circulation, Etc., Required by the Act of Congress of August 24, 1912 of the Charlevoix Sentinel, published weekly at Charlevoix, Michigan, for April 1926.

Before me, a Notary Public, in and for the State and county aforesaid, personally appeared Ira A. Adams, who, having been duly sworn according to law, deposes and says that he is the Editor of the Sentinel and that the following is, to the best of her knowledge and belief, a true statement of the ownership, management (and if a daily paper, the circulation), etc., of the aforesaid publication for the date shown in the above caption required by the Act of August 24, 1912, embodied in section 411, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the names and addresses of the publisher, editor, managing editor, and business managers are: Publisher Ira A. Adams Charlevoix, Mich. Editor Ira A. Adams, Charlevoix, Mich. Managing Editor Ira A. Adams, Charlevoix, Mich. Business Manager Ira A. Adams, Charlevoix, Mich.

2. That the owners are: (Give names and addresses of individual owners, or, if a corporation, give its name and the names and addresses of stockholders owning or holding 1 per cent or more of the total amount of stock.) Nancy M. Smith, Charlevoix, Mich., Peresge No. 1, Charlevoix, Mich.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: (If there are none, so state.) None.

4. That the two paragraphs next above, giving the names of the owners, stockholders, and security holders, if any, contain not only the list of stockholders and security holders as they appear upon the books of the company but also, in cases where the stockholder or security holder appears upon the books of the company as trustee or in any other fiduciary relation, the name of the person or corporation for whom such trustee is acting, is given; also that the said two paragraphs contain statements embracing affiant's full knowledge and belief as to the circumstances and conditions under which stockholders and security holders who do not appear upon the books of the company as trustees, hold stock and securities in a capacity other than that of a bona fide owner; and this affiant has no reason to believe that any other person, association, or corporation has any interest direct or indirect in the said stock, bonds, or other securities than as so stated by him.

FLORENCE ADAMS,
(Owner.)

Sworn to and subscribed before me this 8th day of March, 1926.

Ira A. Adams, Notary Public.
Charlevoix Co., Mich.
My commission expires April 12, 1929

NOT AFRAID TO THINK

By GEORGE BRANSON

Why should I be afraid to think
While reaching through the maze
Of legends, myths, and history
That come from ancient days?
Of heroes and their songs of war,
Of prophets, priests and kings,
Of visions, dreams and miracles,
And saints with robes and wings?

Why should I be afraid to read
The records of the past,
Interpret them by modern light
Upon their pages cast?
I read the struggles of the race
Endowed with nascent souls,
That strove to find the light divine
That leads to higher goals.

Why should I cease to search for truth
Though robed in ancient clothes?
Why should I drink from stagnant pools
While living water flows?

The precious grain must winnowed be,
The chaff fall by the way.
We know and truth are in the Van
We drift not far astray.

God's revelation forward goes—
Grows deeper, wider still
As life unfolds the universe
Directed by His will.
I cannot think He makes mistakes
In aught He does for man,
While working in His countless worlds
By His creative plan.

The creeds and dogmas man has made
His spirit cannot bind,
The tie that binds in love divine
For God and all mankind.
In Harmony with life and love
Our hearts must be aglow;
By wrath and strife and selfishness
Our spirits cannot grow.

Criticising Newspapers

Criticising the home newspaper is the favorite pastime of a large majority of the people.

Like public officials, what it says and what it does are constantly before the public, and its errors are easily detected.

An individual may go through life making one mistake after another, and few will know it, but let your newspaper err in even a small detail, and the critics have a choice morsel to chew.

Newspapers, though mechanical, are human, because they are conceived by human mind and put together by human hands.

They are as liable to error as any man or woman and their opportunities for making mistakes may be found in every line—in every word.

A wrong street address, incorrect spelling of names, little inaccuracies may creep into the newspapers' columns, no matter how earnestly the editor and his assistants may strive to be accurate.

All your home newspaper asks is that you be charitable. Make a few allowances for the difficulties that beset the newspaper publisher, and remember always, that nothing hurts a newspaper editor quite so much as to see his mistakes in print.

He has no chance to cover them up. Don't forget that newspapers are made by human minds and human hands, and to err is human.—Argus-Searchlight.

Possible Reason.

Perhaps the reason history repeats itself is because we are so slow to learn its lessons.

Rock Formation

The term "monadnock" is derived from Mount Monadnock in New Hampshire, and is applied to an isolated mountainlike remnant of hard rock extending above its surroundings in the late stages of a period or cycle of erosion. Stone mountain in Georgia is another instance of this class.

First Sanskrit Book

The first book ever printed in Sanskrit was the Bhagavad Gita, a poem by Kalisoin on the six seasons of India. It was edited by Sir William Jones and printed in Bengali characters at Chicutta in 1792.

WANT COLUMN

FOR SALE—2 choice milch cows. For particulars call G. W. Dennis, phone 7003-F31.

WANTED—To rent by May 1st, house with modern conveniences. A. C. Belding, Charlevoix.

Friday, April 9th

Bebe Daniels and Harrison Ford in "Lovers in Quarantine." Accidents will happen—but the first accident happens to be an elopement with the wrong girl. And the second leaves them stranded on a tropical island. And then—but see this tickling, tangling tale. This picture approved by the National Board of Laughter. See it and try not to laugh. There will also be a good play enacted on the stage. Don't miss the fun.

Saturday and Sunday.

"Sackcloth and Scarlet." This is the play of the great story which was featured in the Red Book magazine some time ago. It is one of the best in it's line. It is a story of love, sacrifice, romance and devotion. A play based on facts and reality. The comedy is full of pep and fun, "The Reporter." We also have another educational picture, "Zoo Daily Bread." Do you know how your bread is made! This picture will show you.

Tuesday and Wednesday

Pola Negri in "A Woman of the World." - For the first time in her career in an American romance that is a mixture of emotional thrill, spirited drama and rollicking humor, laid against a typical small town background. Never has Pola been the sensation she is in "A Woman of the World."

Also a Fox News Reel. Travel the world with the News Reels. The very best form of travel.

HIGH SCHOOL

Free to the Public

—) PERSONALS (—

Richard Finucan left for Northville last Friday.

Fred Hull has been a victim of the flue for the past week but at this time is much better.

Mrs. William C. Cowan has been quite ill for some days but at present shows some improvement.

Mr. and Mrs. Ed. O'Neill, and three children, returned home last Saturday after spending ten days in Detroit.

Mrs. William Taylor returned home Saturday from Detroit after spending a month with her son, Leon and wife.

Mr. and Mrs. Forrest R. Fowler, both flu sufferers, are much better at this time and well on the road to recovery.

Miss Caroline Gelken came over from Boyne City recently and spent several days at the Gelken home, 206 Belvedere avenue.

Dr. and Mrs. F. F. McMillan and family members are spending a few days with relatives and friends at Indian River.

Mr. and Mrs. Frank M. Sears have been seriously ill with the flu for some days past. Both are rapidly improving at this writing.

Mrs. Ada Beaman has been confined to her home for several days with a severe attack of the flu. She is greatly improved at this time.

Fred Bergman, seriously ill for some days with a bad case of the flu is showing splendid improvement in condition for the last day or two.

District Manager W. J. Johnston and Plant Chief H. A. McIntyre, of the Michigan Bell Telephone company, were business visitors here yesterday.

Mr. and Mrs. Alfred F. Iredge, for several weeks past, visitors in Texas and other southern states, returned to Charlevoix Wednesday afternoon.

L. C. Hannah is on the sick list this week. Rheumatism and other disagreeable complications make life more or less unpleasant at this time.

The W. C. T. U. will meet Friday at 2:30 p. m., with Mrs. L. S. Benton, 605 Bridge street. Topic, "Women in Politics." Leader, Mrs. R. B. Armstrong.

Charles Bellinger Jr., sister, for some days past with rheumatic fever shows steady improvement with full prospect of being as well as usual within a very few days.

William R. Paddock who spent the pre-Easter vacation with his family at the Paddock farm, returned to the Michigan State College, East Lansing, last Friday.

"Dick" Hammet motored in from Alabama last Friday and will spend some time with his parents, Mr. and Mrs. R. C. Hammel, 109 Park Avenue, before returning south.

Nearly all members of the family of Mrs. G. Matthews have been ill for some time during the past ten days. At present they are well on the way to a speedy complete recovery.

Mrs. Herbert Fox left last Monday for Lorain, Ohio, in response to a message announcing the serious illness of her mother, Mrs. Lucinda Swails, for many years a resident of this city.

Robert W. Paddock, who has been in Florida for several weeks, has started on his homeward trip and at present is visiting friends in Ohio, where he will remain some days before continuing his trip to Charlevoix.

Benj Brown, who left here early last week for Detroit, for the purpose of bringing back an automobile, was compelled to leave them at Manistee on account of road conditions and return home by rail.

Officers and members of Charlevoix Chapter, No. 151 R. A. M., will hold a special convocation at the Masonic Temple, Monday evening, April 12th, for work in M. E. degree. All members requested to be present.

Mr. and Mrs. S. M. Rose are once more at their Charlevoix residence after spending several months in Florida, the last two months of the time at Sarasota where their son Mason H. Rose and family have located permanently.

Hubert W. Paddock, son of Mr. and Mrs. R. W. Paddock recently passed a rigid examination under government regulations and as a result now ranks as Lieutenant Commander and at present is with the fleet at San Diego, Cali.

Nels Lafreniere, of St. James, made the trip to Charlevoix via the airplane route last Tuesday and expects to remain here attending to personal business affairs the major part of the week, probably making the return trip Saturday.

Miss Marjorie Myers came from Royal Oak last Saturday and is spending a few days with her parents, Mr. and Mrs. F. S. Myers, 104 Park avenue. With the completion of her short vacation here she will resume her duties in the Royal Oak schools.

Fowler's bus line is again operating over the Charlevoix-Petoskey route after an enforced vacation of several days due to storms and deep snows at various points along the way. Snow plows opened the route arriving here from the north during the forenoon yesterday and the big bus was at once placed in commission.

Capt. and Mrs. M. J. Bonner who spent the winter in Grand Rapids, are again at their residence on Michigan avenue in this city. They returned from Grand Rapids Wednesday.

Messrs. W. J. Gallagher of St. James and John W. Green of Pesaise, will represent their townships as supervisors for the current year, they having been elected to the office in question at the election held last Tuesday.

A potluck at the home of Mr. and Mrs. Albon Smith, 304 State street, last Tuesday night, was greatly enjoyed by a score or more of friends who joined in the occasion as well as the pleasure offered the company for the evening by way of special entertainment.

Dr. L. V. Simmons spent the early part of this week at Food da Lac, Wisconsin, where a special sale of blooded cattle was held. Dr. Simmons left for Fond du Lac last Friday, taking with him four head of cattle from Loeb Farms that probably were offered at Wednesday's sale.

A lecture by Prof. Louis M. Eich is scheduled for Monday evening next at the High School building, to which the public is invited and will be admitted gratis. "Rip Van Winkle" will be the subject. The recital and lecture will be given at 8 o'clock. Interested parties will remember the date and time.

The steamship J. B. John and James E. Sanford passed inspection Tuesday and Wednesday, respectively, and are now awaiting the season of navigation to commence operating for the benefit of the owners. Inspectors Mulligan and Johnson, of Grand Haven, performed their annual duties in regard to the ships in question.

Joseph Bassett, of Newaygo, 75 years old, died suddenly of apoplexy last Friday. The body arrived here Monday and was placed in the receiving vault temporarily and will be interred in Brookside later. The deceased was a brother of Freeman Bassett of this city. He is also survived by other relatives in this region.

"Military Patriots of the Revolution" will be shown at the Masonic temple Tuesday evening, April 13th. The slides for the entertainment are furnished and sent out by the Grand Lodge F. & A. M. Commission on Masonic Education for the benefit of the fraternity. The entertainment is free and for members of the fraternity only. Every Mason should be present at this meeting.

Funeral service will be held at the Methodist church Friday afternoon, April 9th, at 2:30 o'clock this afternoon, with Pastor C. E. Pollock officiating.

Mrs. Ada Bassett, of Newaygo, 75 years old, died suddenly of apoplexy last Friday. The body arrived here Monday and was placed in the receiving vault temporarily and will be interred in Brookside later. The deceased was a brother of Freeman Bassett of this city. He is also survived by other relatives in this region.

"Military Patriots of the Revolution" will be shown at the Masonic temple Tuesday evening, April 13th. The slides for the entertainment are furnished and sent out by the Grand Lodge F. & A. M. Commission on Masonic Education for the benefit of the fraternity. The entertainment is free and for members of the fraternity only. Every Mason should be present at this meeting.

Funeral service will be held at the Methodist church Friday afternoon, April 9th, at 2:30 o'clock this afternoon, with Pastor C. E. Pollock officiating.

Why "Grass Widow?"

Authorities have never definitely been able to trace the origin of the term "grass widow." It is to be found in many languages. Some believe that it is a corrupted form of "grace widow"—that is "widow by the grace of circumstances." There are no facts to substantiate this belief, however. According to Doctor Brewer, the modern use of the term seems to have originated among Anglo-Indians, about the middle of the Nineteenth century, from the practice of European husbands sending wives to the hills during the hot season in India. In this section the grass is plentiful. Another suggestion is that it arose in American during the gold rush in California. A man not infrequently put his wife and children to board while he went to the diggings. This he called "putting his wife to grass," as a horse is put to grass when not in use for work.

Royal Stubbornness

George III disliked Franklin's political opinions and was anxious to discredit his selected representative as well, says John o' London's Weekly. He, therefore, ordered the lightning conductors on Kew palace to have blunt instead of pointed ends. When he asked Sir John Pringle, then president of the Royal society, what he thought of the change, Sir John Pringle told him plainly that "the laws of nature are not changeable at the royal pleasure." This annoyed his majesty so much that he suggested Sir John quit better resign his presidency of the royal society. He did so, and the breach between them was never healed. Slides were taken over the quarrel, the court naturally supporting the king, while the wits sympathized with Sir John.

Uses for Gyroscope

When invented, the gyroscope, then called rotascope, was used as a scientific toy to illustrate the dynamics of rotating bodies, the composition of rotations, etc. A delicately mounted form of the above apparatus, invented by M. Foucault, is used to render visible the rotation of the earth on account of the tendency of the rotating wheel to preserve a constant plane of rotation, independently of the earth's motion. This same principle is made use of in an instrument invented by Dr. H. Anschutz-Kampfe, designed to replace the mariner's compass, or to serve as a check upon its accuracy. Other uses of the gyroscope are as a steering apparatus and as a means of giving stability to flying machines, and in a proposed type of monorailway.

Making Sure

A certain financier is a great believer in punctuality, and on a recent occasion, when an early conference was in prospect, which he had to come to town to attend, he so impressed a page boy with the importance of getting him early that the lad decided during the night once or twice needed.

Before, at an unearthly hour there came a prodigious hammering on the financier's bedroom door and a voice called loudly:

"Three! Do you, sir!"

Wondering what the parcel could be, the financier took it in, and, peering over the edge of his bed, downstairs, imagine his indignation upon reading on the neatly printed placard it contained: "Nearly time to get up."

Famous Art Galleries

The Pitti and Uffizi galleries are in Florence. The Pitti is the second largest palace in Italy. Both are now used as art galleries. The Palazzo Pitti was begun by Brunelleschi and completed by Ammanato. It houses a wonderful library as well as a magnificent art collection. The Galleria Degli Uffizi also contains one of the chief collections of the world. It was founded in the Fifteenth century. The River Arno separates the two palaces which are connected by an covered gallery over the Ponti Vecchio.

Expecting Sudden Wealth

Mr. Henshaw is in Charlevoix. He is a staff correspondent of the Detroit News, sent to find out all about real estate.

Why?

Because Michigan expects a boom in real estate.

If it comes, the people who have invested in sound real estate will certainly make money; and the outside world certainly thinks it will come.

Charlevoix real estate values will never again be as low as they are now.

A Hamilton (Ont.) man accustoming her beau, a policeman from a neighboring town, and the maid's young brother thought he would like to put on the handcuffs the cuffer carried in his pocket.

The genial cop'per was willing to oblige and the wristlets were fastened on the youngster, who was confident he could get them off without any aid. But they were obstinate, and finally the courting cop was asked to unlock them. Then the officer began to get chilly and fever. A hunt of one pocket after another failed to locate the key.

As a last resort the flustered officer of the law was obliged to handle the little brother and running him to the home in another town where the boy had been left. All this occupied quite a lot of time and that Sunday evening was practically wasted for the kid's sister.—Brockton Enterprise.

College Glee Club. Friday, April 16th

Charlevoix music lovers will have the opportunity to hear Michigan's Champion Glee Club when the Albion College Men's Glee Club invades this city Friday evening, April 16, to appear in concert at the Methodist Episcopal church.

Under the leadership of Director G. Calvin Ruggenberg the twenty-five singers will present a well balanced program of classical numbers, assisted by a string trio, a quartet, and several entertaining vocalists.

Hailed in more than a dozen cities on its recent midwinter tour by capacity audiences it is estimated that the singers entertained more than fifteen thousand people; one audience of three thousand alone.

This is not the first time the Albion Glee Club has appeared in Charlevoix, but it is the first since the organization was the unanimous winner of the State Championships at Kalamazoo last spring. Hence added interest is being shown and indications are that a record crowd will greet them when they take the platform Friday evening.

The Charlevoix concert is a part of the annual spring tour and is one of the nine appearances that is to be made. This is the club's nineteenth concert season.

Mrs. Eva L. Myrkle Passes Monday Last

Mrs Eva L. Myrkle, a resident here for the past fourteen years, passed away at the family home, 305 West Upright avenue last Monday, her death following an illness of several months duration which until a short time ago, was not considered specially serious.

She was about sixty one years of age and is survived by her husband, Frank Myrkle, to whom she was united in marriage about two years ago. Two children by an earlier marriage, Mrs. Loella Lepper of East Jordan, and son Harry Gee of Ithica, Mich., two sisters Mrs. E. N. Davy of Charlevoix, Mrs. Maud Osterleum of Flint, and one brother Fred Rogert of Portland, Oregon.

Funeral services will be held at the family residence at 2 o'clock this afternoon, with Pastor C. E. Pollock officiating, local M. E. society officiating.

New York City's Water

The boroughs of Manhattan and Bronx, New York city, noise to the inconsiderate of outside water, were supplied entirely from the Croton watershed. The Croton watershed furnishes about half of the water supply, the other half being obtained from the Catskills watershed. The Catskill supply, introduced in 1917, is obtained from the Schoharie and Esopus watersheds, in the Catskills. The water is diverted through the Shandaken tunnel, at the outlet of which a power plant drives diverted into the water of the Bronx creek and finds its way into the Ashokan reservoir, where it is available for the main Catskill aqueduct. This Ashokan reservoir, lying about 11 miles west of the Hudson at Kingston, N. Y. The Croton water shed has 22 miles south of the city line, and has an area of 375 square miles, and a safe yield of 300,000,000 gallons a day. The water from the Croton watershed is collected in 12 reservoirs and 6 lakes and ponds.

Parliamentary Term

The parliamentary clerk of the house of representatives says that as a matter of fact there is no minority passage of a bill in either branch of congress, and the phrase in bill probably refers to the fact that legislation may be passed by a majority vote of the members present, if a quorum is present. Very often a measure will be passed by a majority of the members present, which number is not a majority of the members elected. For example, a majority of the membership of the house is 218, but in the event only 210 members are present during the vote on the passage of the bill the vote could be 153 to 149 and the bill would be passed by a majority. Votes are mean that a minority passes the bill, because it is presumed that those that are absent acquiesce in the action taken by a majority of those present.

Famous Work of Art

A famous painting of Eleanor, duchess of Gloucester, by Edwin Abbey, illustrates an episode in scene 4, act 2, part 2, of King Henry VI. The king had just married Margaret of France, and the duke of Gloucester was the king's protector, and Eleanor dreamed a dream in which "Henry and Dame Margaret kneeled to set and on my head did sit the diadem." She was suddenly told for herself and her husband, and midleton carried her too her. Offending the queen, she placed into the hands of her husband's enemies and was charged with disloyalty, tried and convicted. Because of her noble birth, Eleanor was not put to death, but was oddlged to do three day's open penance and banished to the Isle of Man. Abbey's painting depicts the street scene.

The real cause of bad breath

"You cannot 'cover up' unpleasant breath for any length of time. The only way to rid yourself permanently of it is by removing the cause.

"Sometimes poor teeth are responsible. But the commonest cause of a coated tongue and offensive breath is constipation. You may not realize that your intestines are slow in eliminating waste matter, or that your breath is objectionable. But others will notice it.

"Get rid of constipation, and your breath will become fresh and sweet. Even more important, you will notice an immediate improvement in your health and spirits."

Nujol relieves constipation in Nature's own way

Constipation is dangerous for anybody. Nujol is safe for everybody. It does not affect the stomach and is not absorbed by the body. Medical authorities approve Nujol because it is so safe, so gentle, and so natural in its action.

Nujol simply makes up for a deficiency—temporary or chronic—in the supply of natural lubricant in the intestines. It softens the waste matter and thus permits thorough and regular elimination without overtaxing the intestinal muscles. Nujol can be taken for any length of time without ill effects. To insure internal cleanliness, it should be taken regularly in accordance with the directions on each bottle. Unlike laxatives, it does not form a habit and can be discontinued at any time.

Ask your druggist for Nujol today. Remove the cause of bad breath and begin to enjoy the perfect health that is possible only when elimination is normal and regular.

The Difference

Hardware Dealer (to new clerk)—I suppose you know the difference between a foot and a yard?

Clerk—A yard is usually covered with grass and a foot with dirt.

CHAPTER XIV—Continued

—22—

"He jump on heem from de tree!" Michel pointed to the broken branches of a neighboring spruce.

"That's what limpened!" groaned Steele. "He waited for Pete to come up, and dropped on his back. Gnme old Pete! He gave a good account of himself before he went."

"We not tell de Injun dis," advised David.

"No, but they're stampeded by this time. We can't hope to hold any Portage lake hunters after last night. I guess we're licked."

So, burying his staunch friend in the snow, Steele turned back, bitter with defeat, for his hope of aiding the St. Ongea had lessened as the November days wore on.

On their return Steele and the Indians found the camp of the Ojibways already deserted. On a bisned birch was the message:

"We are going up the valley. You have not driven away the Windigo and we have fear to remain."

They crossed the river to their camp, where David, from whom no calamity, however dire, could banish appetite, was speedily cooking breakfast. There, also, they found Little Jacques, stunned of face, for with the return of the others, his courage had revived.

Eating the warm meal which David had cooked, the tired and sleepy men turned into their blankets. In the afternoon David and Steele waked, to learn from Little Jacques that Michel had taken his rifle and ax and left the camp. As they sat by a huge fire, for the trees were snapping with the strengthening frost, like a shadow, the Iroquois slipped back across the river.

"Any sign of our friend?" asked Steele.

"No track on de ridge w'ere we set de beg trap. Wind shift, eet grow cold."

The men ate in silence, and filled their pipes. For a time they sat and smoked, too dejected for conversation.

David had freshened the fire with a birch log and stood holding a blazing stire to his pipe, when he tilted his head. Steele watched the expression of the furrowed features in the firelight slowly shift from mild curiosity to sudden interest.

"You're not going to start us out again tonight, David?" said Steele.

"I hear someting dog," was the low reply. Steele rose and held his breath, ears straining.

Then from the ridge of the fox sets, hardly a half-mile distant, rose a scream.

"My gar! He's at de trap!" And David leaped for his shoes and rifle, and started for the ridge, followed by Steele and Michel.

As they crossed the river, the scream again lifted on the freezing air. The men had stopped to listen to locate the position of the beast, for the ridge was a long one, when, as the cry rose to its climax, it was cut short off—to leave the night again quiet.

"We go eesee—no scare heem," cautioned Michel.

They were nearing the first fox-set, and still the voice in the night held its silence. Could the beast be waiting to rush them from cover, like a wounded grizzly, wondered Steele.

Separated for safety, with cocked rifles, they advanced to the bear trap marked in the snow beside the bait.

"What you see, Michel?"

"He lim here, but miss de trap!" muttered the Indian, doubled over the snow. Steele and David moved up to look at the tracks. The trail led down the ridge toward the second trap. The loops of the three friends rose. Hut why was the Thing so silent? Was he waiting to leap on them as he had sprung on the hound?

With rifles loose in the crook of the left arm, for the fingers of the right hand would freeze if exposed, and spread like skirmishers, they followed the position of the hidden bear trap.

Through the blue shadows, Steele strove to locate the position of the fox-set beyond them. Then the warning arm of the Iroquois held him tense in his tracks. He slipped his right hand from the mitten to the grip of the Mannlicher. What had Michel seen?

As if crived from stone the Indian kneeled, rifle leveled, while Steele waited breathless for the explosion. Then to the surprise of the man whose right hand was fast stiffening on his gun grip, Michel suddenly rose to his feet. Joining Michel, where the view was unobstructed, Steele gasped in amazement. There in the snow, by the fox-set crouched a black lump.

"Shoot, Michel!" he whispered, leveling his Mannlicher.

"No use," came the muttered answer. "Pete, he rest eesee—tonight."

"What! He's in the trap?"

"Ah—huh! He nevaire move; an' he face de odder way."

David joined them. "Dat Windigo frose stiff! Dis tam de trap stop hees hand quick!" But as they approached, three rifles covered the black shape in the snow.

Steele's heart beat high. Now that the crazed beast with the evil voice lay stiff in death, now that there was hope for Walling River—and for her, the baffled scientist in Steele clamored for the key to the riddle. What breed of beast, mad or normal, could it be?

Michel Had Taken His Rifle and Ax and Left the Camp.

Must have been trained for it by Lafamme! Poor old Pete! We've squared it for you. How did he kill him, Michel?"

"Shoot heem from de tree, den cut heem wid de knife!"

"How he run on de snow wid dem feet beat nat," wondered David.

"He use snowshoe 'till he was' to make Windigo track. He lose de shoe w'en Pete get heem trail."

Then the snowed lays of weeks for the master mind behind this broken tool at their feet—the arch plotter, who with unerring instinct had planned to turn the valley of the lower Walling into forbidden ground, which no hunter dared enter—a land under a taboo, spirit-ridden, shunned; was loosed in death.

"Tint crook at Ogoke shall pay for all this—pay with his skin, with every cent he owns," he stormed. "Give me your hands, you two!"

Slipping off their mitts the three friends gripped over their victim.

"We swear, long and now, that we will run Lafamme and his crowd out of this country, if we stay on the snow until spring, Pierre!"

"No!" objected David, withdrawing his fist. "He ees for me—do odders for you!"

"Right! He belongs to David—the police can't have him!"

And the three half-frozen men left the thing in the trap and snowshoed back to their camp where they found Little Jacques huddled by the fire humming the fate of his misguided friends, who so rashly had followed the voice of the Windigo to their doom.

"What's the matter Jacques? Think you see ghosts?" asked the solicitous if frightened Cree.

"You—you not eat up?" he asked, "You nevaire shoot de gun. I had fear de Windigo get you."

"No, we got him—in the bear trap. In the morning I want you to go up and see him so you can tell the people at Walling River."

"No, no! I weel not look at heem!" protested the little half-breed, his face picturing the horror aroused by Steele's suggestion.

"The Windigo, Jacques, we found to be an old friend of yours, sent by Lafamme to frighten the Indians—Pierre, who was at the post in September. You must have a look at him for yourself before you take the news to St. Onge. In the morning we'll send for all the people in the district to come and see him."

"Pierre, from Ogoke, he .mak' all dis trouble?"

"Yes. He won't scare any more hunters in this valley."

CHAPTER XV

In the morning Steele with difficulty persuaded fearful Little Jacques to accompany him to the bear trap on the ridge. The Cree, with much murmuring and puny misgivings, cast a hurried look at the twisted features of the thing in the trap and turning, led Steele a mad pace back to camp. Then Jacques armed with his digitemn for Walling River with the news of the victory.

Before dawn, Michael and David had left for the scattered camps at the head of the lake to dispatch dog-runners east, south and west with the word that the dreaded Windigo lay frozen in a bear trap at Portage lake for the eyes of all who would journey there to see.

But what, after all, did this victory mean—this thwarting of Lafamme's scheme to terrorize and depopulate the valley—mean to him, Steele mused himself as he sat beside his fire of birch logs that late November morning. There was no doubt that the Indians, once they looked at the body of Pierre and learned that the Ogoke trader was at the bottom of it all—had loosed in their country a madman with orders, not only to drive them from their hereditary hunting grounds, but to kill—would be keen for vengeance. There would be no lack of volunteers among the trappers for a campaign against the free-trader. But there would be no help from the government until spring, and the situation at Walling River demanded immediate action. No, there was nothing to do but pull Lafammie's teeth at once, and notify the government later.

But then the defeat of Lafamme did not mean the extrution of the post—far from it. Lascelles could close the post, even in the face of a profitable future, for the loss of the fur canoe had put the place badly in debt to the company. So, with Lafamme eliminated, Denbe St. Onge seemed no nearer. Whether he kept the post in operation or not, the inspector would never release her from her promise. The only solution was her father's breaking with Revillon Freres—but would he do it? Would she allow him to, knowing the hopeless alternative he would face?

Then the wind-burned features of the man who sat thinking by the fire contracted with pain as he realized the presumption, the futility, so far as he was concerned, of his solicitude for the future of those at Walling River. Already she had thrust him from her. She had condemned him without hearing. In the end, if they won out for St. Onge, and, owing to what had been told the Revillon people at Montreal, Lascelles dared not close the post, he, Steele, would have her gratitude—her gratitude! when once she had come to him with her heart in her eyes—had vibrated like the string of a violin to his touch, had fluttled instinctively to him in her despair!

In two days Michel and David returned with hunters from the head of the lake keen for a look at the body of the masquerader who had left a trail of terror throughout the valley of the Wuffleg. And when they saw the thing which had been sent by Lafiamme to drive them from their traplines to new and strange hunting country in the upper valley where their trade would go to Ogoke, there was a clamor for vengeance. Later when dog teams, from the Little Current to the Medicine hills, had answered the call of runners from Portage lake, Michael marshaled the Ojibways at the door to the ridge and addressed them dramatically in their native tongue.

(TO BE CONTINUED.)

Tides in Inland Seas

There are tides in both the Mediterranean sea and the Gulf of Mexico, in which the ebb and flow are slight as to be almost imperceptible; in the Gulf of Mexico they run from two and a half to four feet. A delta is an alluvial plain formed by a deposit of sand and mud carried down a river. As the stream enters quieter waters the deposit falls to the bottom and increases in area and height until it reaches the surface and is raised by floods and tides above the high-water mark. The delta of the Ganges and the Brahmaputra has an area of 50,000 square miles and that of the Nile is 200 miles wide and 100 miles long. The Mississippi delta, which encroaches at a rate of 200 feet a year, has an area of 12,300 square miles. Great deltas are only found in comparatively tideless seas, because the deposits would not otherwise have a chance of accumulating.

Stars at Distances That Stagger Mind

There are stars so remote that if the news of the victory of Wellington at Waterloo had been flashed to them in 1815 on the celestial telegraph system it would not have reached them yet, even if the message had sped at the rate of 190,000 miles a second, and had been traveling all the time; that if, when William the Conqueror landed in England in 1066, the news of his conquest had been dispatched to them, and if the signal flew over the wire at the speed of light, now that there was a message around the earth in a second of time, the news would not have reached them yet.

—Even if the glad tidings of that first Christmas in Bethlehem, nineteen centuries ago, had thus been disseminated through the universe, there are yet stars of which astronomers could tell us, plunged into space in depths so appalling that even the rays which have elapsed since would not have been long enough for the news to reach them, though it traveled 190,000 miles every second!—Montreal Family Herald.

Motal railway sleepers have to be used in many parts of India. Wooden sleepers would be eaten by insects.

Money amassed either commands or obeys each of us.

WOMEN FIGHT POWERFUL FOE

Struggle Against Ill Health

Find a Faithful Ally in Lydia E. Pinkham's Vegetable Compound

MRS. ADOLPH HANSEN
HOLMQUIST, SOUTH DAKOTA

Holmquist, South Dakota.—"I can not begin to tell you how much good Lydia E. Pinkham's Vegetable Compound has done for me. I was sick for about four years. I could not sleep, and I was always worrying, so one day we saw your advertisement in a paper, and I made up my mind to try the Vegetable Compound. I bought one bottle and did not see any change, so I got another bottle. At the second bottle I began to feel better and I have used the Vegetable Compound ever since, whenever I feel badly. I recommend it and I will answer any letters asking about it."—Mrs. ADOLPH HANSEN, Holmquist, South Dakota.

Could Work Only Two Hours

Encanto, Calif.—"I bless the day I began taking Lydia E. Pinkham's Vegetable Compound. I was so weak and tired all the time I could not work more than two hours each day, then had to go to bed for the rest of the day. I read so much about the Vegetable Compound and I was so weak that I decided to try it. I now do my own housework—washing, scrubbing, and ironing—and then help my husband with his garden. I do not have that tired feeling now. I advise every woman to give your wonderful medicine a trial, and I will answer any letters I receive from women asking about it."—Mrs. SYLVIA LAY, 700 Jamacha Road, Encanto, Calif.

A woman who is fighting for her health and her family's happiness is a valiant soldier. She wages her battle in her own kitchen. She has no thrilling battles to cheer her on, no waving banners.

If you are fighting this battle, let Lydia E. Pinkham's Vegetable Compound be your ally, too.

Making Ice in the Arctic

Though surrounded by ice almost the entire time he was in the Arctic Commander Ewald H. Stockholm used electrical refrigeration to maintain an even temperature for his food supply.

Guessed Wrong on Edison

A well-known explorer tells the story that he asked an Eskimo and later a South Sea Islander, who was President of the United States. Both answered "Edison."

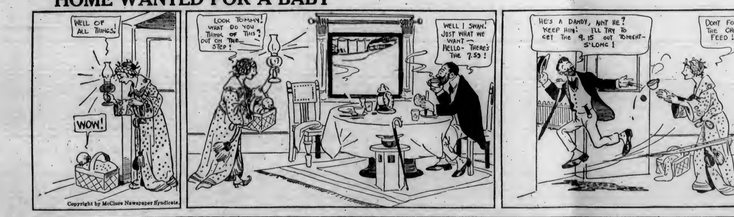
HOME WANTED FOR A BABY



WHAT DID HE MEAN

Visitor—"How do you get the fine complexion of the women in your portraits?" Artist—"Oh, that's no trouble at all; I let the women paint themselves!"

On the Contrary

Retiewer—Yes, I picked up this latest book of yours last night, and I never budged out of my chair until four o'clock this morning.

Author—Goodness! Was it so interesting?

"No; but I didn't wake up until that time!"

THE SUMMER GIRL

"Where are you going, my pretty maide?"

"I'm going to love you, sir," she said.

"Why do you want to, my pretty maide?"

"Oh, I don't want to, sir," she said.

"Then why should you do it, my pretty maide?"

"Simply for practice, sir," she said.

Very Likely

Doctor—Your trouble, madam, seems to be due to an excess of adipose tissue.

Patient—My goodness! I wonder if that isn't what makes me so awfully fat.

THE PIPER

There was a piper had a cow,
And he had nought to give her;

The price of feed had gone so high,
He bade the cow consider.
The cow considered well, and said:
"No milk without the hay, sir!
Raise prices—make your customers.
Dance livelY as you play, sir!"

Equally Divided

Wifey—How many closets are there in the new house, Ted?

Hubby—Six, dear.

Wifey—That isn't enough. You will want part of one for your things, won't you?

PE-RU-NA

—a favorite TONIC since doctors got there in a top buggy

Get Rid of Your Rheumatism

Deep Seated Uric Acid Deposits Are Dissolved and the Rheumatic Pain Starts to Leave the System Within Twenty-four Hours.

Every druggist in this county is authorized to say to every rheumatic sufferer that if a full pint bottle of Allenru, the sure conqueror of rheumatism, does not show the way to stop the agony, reduce the joints and do away with even the slightest twinge of rheumatic pain, he will gladly return your money without comment.

Allenru has been tried and tested for years, and really marvelous results have been accomplished in the most severe cases where the suffering and agony was intense and piteous and where the patient was helpless.

James H. Allen, of 26 Forbes St., Rochester, N. Y., the discoverer of Allenru, who for many years suffered the torments of acute rheumatism, desires all sufferers to know that he has instructed druggists to guarantee it as above in every instance.

Of Interest to Dairy Farmers

A Minute a Day Makes Milking Pay

One more minute per cow per day spent in weighing out the feed consumed and milk produced by each animal, would show the dairyman which of his cows are really working for him and which are loafing on the job.

The majority of dairymen who do not keep records of the feed consumption or milk production of the cows, are working under the delusion that the keeping of such records would take up more time than they could well afford to spare. They are wrong. Actual timing takes only eleven seconds more per cow for each of two feedings to weigh out the exact feed, then it takes where the feed is not weighed. To weigh and record the milk from each cow was found to take only twenty seconds more per milking than it takes to dump over the pail, or forty seconds for the two milkings.

If that extra minute devoted to keeping records for say twenty cows, should reveal that one of them was a typical waster—incapable of producing milk in profitable quantities—the dairyman would not only be saved the countless hours devoted to its feeding and care, but he would find that he is better off at the end of the year with the remaining nineteen cows than he was with the original twenty.

Roughly speaking, there are only three distinct types of cows. The Susies, with good looking, but simply don't the capacity when it comes to the milk pail. All feeds they get beyond the amount required to produce their limited quantities of milk and keep them in condition, are wasted. The Bettles are the thin, rawboned cows that are so much as though they were ready to lie down and quit, but which have no inherited ability to produce milk that will often lead them to take it right off their own backs. Generally they are very much underfed, as they are using only a portion of their capacity. Then there are the Dollies—the army of water cows that simply can't produce milk profitably. They eat and eat and their owners have neither beef nor milk to show for it. They are overdue at the butchers. Such cows are in every herd where the dairyman does not feed in accordance with milk capacity and production. Keeping feed and milk records will show the dairyman how to profit from the Susies, cash in fully on the Bettles, and how to avoid losses on the Dollies.

Some Appetite

Nearly 100 million head of live stock went to appease Uncle Sam's appetite for meat during 1925, according to a statement issued by the National Live Stock and Meat Board. This figure was divided as follows: Cattle, 14,705,986; calves, 10,099,195; sheep and lambs, 15,453,853; hogs, 68,294,297.

The average person ate nearly one half pound of meat per day the figures showed. There was an increase in the use of beef, veal, lamb and mutton, but pork showed a decline due, it was believed, to the prevailing shortage of hogs. More veal was consumed than ever before in the history of the country

DID YOU KNOW

Did you know that roast pork was supposed to have originated in early China when a hut burned down and a pig burned to death in it.

Did you know that American pioneers sewed pigs' eyes closed to keep them under control while droving them thru the country.

Did you know that a whole lamb is served in Arabia, and the diners help themselves by tearing off the meat with their fingers.

Did you know that the lean-popular cuts of meat are just as nourishing and palatable as the so-called choice cuts.

Did you know that ancient people placed the bull, ram, and goat in the stars as deities worthy of worship.

Did you know that the by-products of the live-stock and meat industry play an important part in your daily life.

Did you know that pork and beef were often receivable for taxes during the early settlement of America.]

Did you know that cowboys existed in Egypt 5,000 years ago, and cattle were branded.

Did you know that we have Noah to thank for preserving the livestock industry.

Did you know that man ate meat before agriculture and the cereals were known.

Did you know that Columbus was the first livestock man in the country.

Did you know that meat was the chief diet of ancient athelete.

Warning to Wives

If you expect your marriage to be happy, I warn you to beware of the following:

Trying to "boss" your husband.

Talking too much.

Interrupting serious conversation with banal interpolations.

Jealousy—when there is no cause for it.

Belittling your husband in public.

Overpraising your husband in public.

Talking too much about yourself.

Lying unnecessarily — about the price of things, for instance.—From "The Passion Called Love"—Elinor Glyn.

Pie Specifications

Indianapolis.—Pie crusts on dining cars must be kept an inch apart with filling, the Pennsylvania railroad has decreed.

Found Empty Coffin in "Tomb" of Monarch

One of the most amazing of royal mysteries was recalled by the celebration of the supposed centenary of the Czar Alexander I of Russia.

After Alexander's "death" on November 18, 1825, it was rumored that an empty coffin had been lowered into the earth in the imperial burial place, and that the czar was spending the evening of his days in prayer and contemplation.

Popular belief, indeed, identified a hermit, calling himself Feder Kusmitch, with the late monarch. Kusmitch, whose past life was a complete mystery, appeared about this time in the depths of the Siberian forest. He was frequently visited by the Czar Nicholas I, who treated him with the most profound respect.

If Kusmitch were really Alexander I, he carried his secret with him to the grave. But a new turn was given to speculation on the subject some years ago, when the tombs of the czars were opened by order of the Soviet authorities. The original seals on the coffin of Alexander I were still intact, but when it was opened there was nothing in it but a few lumps of lead.

Two Conflicts Known as "Battle of Spurs"

The Battle of Spurs is a name given to two engagements widely separated in point of time. The first battle was fought at Courtrai, in Flanders in 1302 between the nobles and the burghers. The knights and gentlemen of France were entirely overthrown by the citizens of a Flemish (or Belgian) manufacturing town. The French nobility rode forward with loose bridles and fell headlong into an enormous ditch which lay between them and their enemy. The whole army of these nobles and gentry was annihilated, and when the spoils were gathered, there were found 4,- 000 golden spurs to mark the extent of the knightly slaughter, and give a name to the engagement.

The second engagement to which bad been given the name, the Battle of Spurs, was the affair at Guinegate, near Calais, France, in 1513, in which the English troops under Henry VIII defeated the French forces. The allusion to spurs is said to be to the unusual energy of the beaten troops in riding off the field of battle. They made good use of their spurs.

Newspaper Printing

Rotary presses, which are used by most large newspapers today, print from curved plates fixed on cylinders which are constantly revolving and constantly printing. They are not fed with single sheets, but with a long web of paper, the press itself cutting off the desired length of sheet from the reel, either before or after the printing is completed. Practically all these presses have folding attachments which deliver the paper folded and ready for delivery. The slugfest form has four cylinders, two for the stereo plates and two to give the impression, but as newspapers have grown in size it has been necessary to add one, two or three rows of cylinders above the first set.

How Nice

"Have you any nice young grocers?" inquired a flustered young bride, who had intended to ask for chickens.

"Why—yes," was the answer, surprised reply at the other end of the wire.

"Well, send me two dressed."

"Dressed?" said the grocer, more astonished than ever.

"Well, no," was the reply, after a moment's reflection, "I believe you may send them undressed. My husband's coming home early, and he can bring their necks and the cook and I will dress them."—The Progressive Grocer.

But Few Will Admit It

Papa was an ardent golfer and his every spare moment was spent on the links. One Saturday evening he arrived home later than usual and his greeting to his son, Junior, was not as effusive as other evenings. Junior noted the downcast, hang-dog look that papa wore and his inquisitive nature prompted him to ask:

"Papa, how long does it take to play a game of golf?"

"My son," said papa in solemn tones, glancing at his score card of three figures, "it varies, but some fellows can't play a game in a lifetime."

Indians Burned Coal

Coal, as the advertisement says, may answer the burning question, but here is an oddity about coal known to few, remarks "Gerard" in the Philadelphia Inquirer.

Jesuits traveling westward through Canada as early as 1690 found Indians burning coal, instead of wood. In "The Jesuit Relations," edited by Edna Kenton, I discover the earliest record of coal as a fuel anywhere in America.

Describing the Punaiki nation, which was a fierce and warlike people, the Jesuits made this observation:

"As wood is scanty in supply and small in size in their country, nature has taught them to make fire with coal from the earth."

Criminal Colds

For a jury to acquit a prisoner on the ground that he was suffering from a cold when he committed a crime sounds ridiculous. But before long this may be accepted as a legitimate plea by even the sternest judge.

According to a famous doctor, infection of the nose and cavities of the skull by cold germs often results in confusion and lack of memory. Mental disturbances of this nature cause a person to act abnormally.

A woman stole a ring from a friend's dressing table. Everyone thought she was a common thief. It was proved later that she was suffering from a severe cold and was incapable of distinguishing between her own and other people's property.

American Mind Awake to Value of Beauty

It was only about a decade ago that we prated about periods. Rome must be done in the style of the Italian renaissance, or that of Louis XV, or the Georges, or in that of any other, down through the period that had come and gone. We were rabid on definite and historical data and cared little for the sense of fitness of things. But now in America we are quite different. A more genuine love of beauty has been a mighty leveler, and we cry for homes and beauty therein, whether these homes be as sumptuous as a palace or as unpretentious as a country cottage. Building, too, as we do, that the highest creative art comes from a wise and moderate use of that tax gone before, we are sensitive to the lure of old furniture. There is a subtle fascination that emanates from the revered work of the long ago craftsman that, like a magic wand, the lovers of the beautiful to those shops which treasure the handiwork of several centuries and centuries, and the desire for possession in their homes of the antique treasures found there. Acquisition in this case is the first step toward beauty.—The Antiquarian.

Youngster Earnest in Quest of Information

If small children were all strays, they would be stray, otherwise how would they pick up the extraordinary things they do pick up? Questions! "Please, nurse, why is a baby?" To which nurse wisely answers: "Because it likes to be a little Master Silly." After which the small child has to be kept away from the water for a long time, because it also wishes to be a fish.

"Please, nurse," (terribly polite child, this, and therefore very dangerous), "how will it be in eternity?"

To which nurse (terribly clever, as most nurses are) answers: "To keep them quiet when they are young."

A long sigh, and then: "I wish I was a star. You then I could be out all night."

"Polish your breakfast and say your grace," says nurse.

"TheLordmakeustrulythankfulinmeinanfkoogin!"

And nurse, who has to clear up and look after baby, and iron some very small things, says: "Yes."—From Clayton Calthrop in Punch Annual, London.

Lion Turned the Tables

A Hon's vengeance tersulated the other day when Mr. Alfred Mound big game hunter, in northern Rhodesia. The hunter with a party of natives came upon three lions, and wounded two. Failing to come up with them again that day, he arrived on the following morning and found finally one of the wounded lions. At about fifteen yards distance he fired at it with either missed or did little damage, and the lion sprang at him. He dropped his rifle and tried to climb a tree, but the lion caught him by the thigh and severely mauled him, finally pulling him down and biting his head and shoulders. The injured hunter waved his arm as a signal to the natives that he was alive; unfortunately, the lions were not to be attacked him again. One of the natives shot the lion dead, but the hunter died shortly after in a hospital.

Phantom Ship

Reference has been made on more than one occasion to the mysterious "phantom ship" of the Bay of Fundy. As long ago as fifty years, as a remember, it was believed that the light referred to was caused by phosphorous made by large shoals of fish that send off a phosphorus gas that burns in the air, and the ship seen by sailors is the reflection of their own ship. The state of the air and the time of the year has much to do with it. You will see the same kind of lights on bogs in September on dark, foggy nights. It was the same kind of light that seared Tam o' Shanter, and if he had not been mounted on the best mare in the world he might have been caught.—Montreal Family Herald.

Harmfulness of Fear

Hudson Tear is unnatural, writes ES ward Earle Purinton in Nature's Path. Anything unnatural is unwise and unsafe.

Fear is falsehood. We do not enter into it unless some one has lied to us, or we have lied to ourselves. The truest people are always the most fearless. In this fact is the primary reason for those tormented by fear.

No liar on earth equals the buoyancy created by fear. He makes us look for the worst in what may prove the best, and invites all sorts of ills on ourselves by our sickly, cowardly, weak and foolish state of mind. What we fear we fasten on ourselves, by the law of psycho-mental attraction.

"Gadzooks," Indian Oath

A. Hyatt Verill, a collector for the Museum of American Indians, has discovered that "gadzooks," supposed an oath of the good old Elizabethan days in 10 Dauk, is used commonly by the Panama Indians. The reason is that the oath was carried to the tribe by the English expedition known as Bartholomew Sharp's buccaneers, in 1680. This expedition left also a number of other English words that have been appropriated and corrupted by the Panama tribes which came into contact with the newcomers at the time.

Remarkable Linguist

Sir William Rowan Hamilton, the celebrated English mathematician, who died in 1865, had an extraordinary faculty for learning languages, and is said at the age of twelve to have mastered 13 languages, besides English.

Love Attracts Love

Love and you shall be loved. All love is mathematically just, as much as the two sides of an algebraic equation.—Emerson.

LEGAL NOTICES

STATE OF MICHIGAN— The Circuit for the County of Charlevoix—In Chancery.

James L. Tunath, Plaintiff

vs.

Joseph Graham, or his unknown heirs, devisees, legatees and assigns; Lester Coblentz, or his unknown heirs, devisees, legatees and assigns; Julian M. Wheeler, or his unknown heirs, devisees, legatees and assigns; William Green, or his unknown heirs, devisees legatees and assigns; and the Smaley Manufacturing Company, a Wisconsin corporation, Defendants.

Suit pending in the Circuit Court for the County of Charlevoix, in Chancery at the City of Charlevoix on the 27th February, 1926.

In this cause it appearing that it is not known whether the said Joseph Graham, or the said Lester Coblentz, or the said Julian M. Wheeler, or the said William Green, each or any of them is living or dead, or where each or any of them may reside, if living; therefore on motion of Lisle Shahahan, attorney for the said plaintiff, it is ordered, that the said defendants, Joseph Graham,Lester Coblentz, Julian M. Wheeler and William Green, or each of their unknown heirs, devisees, legatees and assigns, enter each, his or their appearance in said cause on or before three months from date of this order; and it appearing that the said Smalley Manufacturing Company, a Wisconsin corporation has no office or offices within the State of Michigan; therefore on motion of Lisle Shahahan, attorney for the said plaintiff, it is ordered that the said defendant Smalley Manufacturing Company, a Wisconsin corporation, enter its appearance in said cause on or before three months from date of this order; and that within twenty days the plaintiff cause this order to be published in the Charlevoix Sentinel a newspaper printed, published and circulating in the said county of Charlevoix, and that such publication be continued there at least once in each week, for six weeks in succession, or that a copy of this order to be personally served on said non-resident Defendant, at least twenty days before the time above prescribed for their appearance.

MORTG AGE SALE

Default having been made in the conditions of a certain mortgage executed by Hiram Taylor and Sophia Yahr, his wife of Hayes township, Charlevoix county, Michigan, unto Mary Zipp of the city of Petoskey, Michigan, dated January 26th 1921, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on the 26th day of January, 1921, in Liber 48 of mortgages on page 279, on which mortgage there is claimed to be due at date of this notice the sum of One Thousand Three Hundred Seventeen and 06/100 Dollars, including the principal sum due with interest; and a further sum of Four Hundred and Eighty Nine and 17-100 Dollars, being taxes and interest thereon paid by the mortgagee on the land and premises herein described, together with an attorney fee of Thirty Five Dollars as provided for by the said mortgage, and no proceedings at law or equity having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas, the taxes required by the statute to be paid on said mortgage was duly paid prior to the recording thereof;

Now Therefore, notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises therein described, or so much thereof as may be necessary to satisfy the amount then due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided by said mortgage, and also including the taxes paid by the mortgagee, at Public Auction, to the highest bidder therefor, at the front door of the Court house in the city of Charlevoix, Charlevoix county, Michigan, (that being the place where the circuit court for the county of Charlevoix is held), on Friday, the 25th day of June, 1926, at ten o'clock in the forenoon on that date.

The premises described in said mortgage being the lands and premises situated in the Township of Hayes, county of Charlevoix, state of Michigan, viz: The east one-half of the Southeast quarter of section Eleven in township Thirty-four, North, Range seven west, containing eighty acres of land, more or less, according to the government survey thereof.

Dated March 19th, 1926.

EXTENSIVE REAL ESTATE

Operators Interested in Michigan Lake Frontage

Of interest to all who have been watching the unprecedented real estate activity along the western coast of Michigan is the announcement made in Grand Rapids recently of the new firm of Porter, Emery & Healy. This firm has been organized to specialize in lake properties only and involves the control of thirty-three miles of frontages between Grand Haven and the Straits of Mackinac, which holdings are valued at over one and one quarter million dollars.

Glenn M. Porter of Muskegon, is one of the pioneers in the lake frontage business, having been a member of the firm of Porter & Wyman since his resignation from the Land dept. of theAuditor General's office in 1904.

John G. Emery is best known as the developer of the Trail's End Bay colony near Mackinaw, which is the outstanding real estate success on the western coast. Mr. Emery is president of the Emery Realty Corporation and director of the Home State Bank, Grand Rapids. In 1922 he was a candidate for United States Senator.

Gerald F. Healey, a member of the firm of Healey & Casey of Flint, has become known throughout the United States as an expert on real estate sales and has delivered many talks before state and national associations.

The new firm has an intimate knowledge of properties and values in western Michigan and a very wide acquaintanceship in real estate and financial circles. During this period of unusual activity they are in a position to be of material assistance to those who wish to acquire or dispose of properties in this section.

STUDY CLUB MET MONDAY AFTERNOON

The Charlevoix Shakespeare Study Club met with Mrs. H. S. Harsha on Monday afternoon, and after the regular program was carried out, the hostess entertained the Club by serving delicious refreshments.

A beautiful cake bearing twenty lighted candles, in commemoration of the twentieth anniversary of the organization of the Club, was placed in front of the president, Mrs. Saulton, who, after a short talk on the history of the Club, cut and served the cake.

There were twenty members present, including several charter members. It was an eventful occasion and greatly enjoyed by all.

First Sanskrit Book

The first book ever printed in Sanskrit was the Bittsaubhava, a poem by Kalhana in the 8th century, A. D. It was edited by Sir William Jones and printed in Bengali characters at Calcutta in 1792.

Divine Tree

The evergreen tree of Asia is considered divine. It is the Ho tree, or peepul. This is the sacred fig tree, Ficus religiosa, under which Buddha sat during the night in which he received supreme enlightenment.

Mrs. Harriet C. Rew Claimed by Death in Coronada, California

News of the passing of Mrs. Harriet C. Rew, 86 years of age, at Coronada, California, recently reached friends in Charlevoix a few days ago. Mrs. Rew spend several summer seasons in comparatively recent years at Charlevoix and Norwood with her daughter, Mrs. Charles H. Ferguson and therefore leaves many friends here to regret her death. Her remains were brought to her old home, Chicago, for interment in the family lot, accompanied by Mr. and Mrs. C. H. Ferguson from the West coast. Following the service Mr. and Mrs. Ferguson returned to Coronada, their place of residence.

CALL COMPLETED UNDER DIFFICULTY

Long Distance Operator Locates Her Party in Middle of the Mississippi

When the person wanted on a long distance call is aboard a boat somewhere on the Mississippi there would seem but little chance of completing the call, but the story, however, are not easily dampened, and Miss Lou Procter, toll operator, Memphis, Tenn., was asked to place a very important call for a man employed on a boat on the Mississippi river, not only handled the call but succeeded in getting the message through.

The boat was supposed to be somewhere near Caruthersville, Mo., but it turned out that it was not in that vicinity at all. The operator, however, succeeded in locating the boat near Memphis, Tenn., and within fifteen minutes of the time the call was placed the message had been delivered by means of wireless, the boat landed and the party sought had started on his return home by the quickest route.

Two Englishmen Have Evolved Nine Reasons

Two young Englishmen have been making a study of American prosperity, and have evolved nine reasons in explanation:

One—Promotion in America is by merit.

Two—America sticks to small profits and quick returns, on numerous and rapid turnover.

Three—Rapid turnover is secured by simplification and cheapening of processes which necessitates less capital.

Four—America shows endless keenness in devising time-saving and trouble-saving appliances.

Five—The American employer is not hostile to high wages.

Six—American manufacturers cooperate by exchanging ideas.

Seven—American are vigilant and acute in eliminating waste.

Eight—American welfare methods double high wages by surrounding the workers with cleanliness and light.

Nine—Americans encourage research.

Cheese Very Much Alive

"And old story," said a well-known author recently, "tells us how a railway freight agent wrote to a gourmet: 'Dear Sir—We have now held your shipment of Canterbury cheese for three days. If same is not called for immediately, it will be shot.'"

AFTER THE WETS COMES THE DRYS

Prohibition Detate Holds Center of Stage, Law of the Land

The prohibition debate is holding the center of the stage. After the Wets will come the Drys. Then presumably a few Neutrals will be allowed to testify. If the hearing, however, runs the usual course, when it is all over stalemate will have been created in the minds of the people, a stalemate created by the declaration of the Wets that everything is black, and that of the Drys that everything is white. It is to be doubted, however, if the total of our exact knowledge of the right or the wrong of this great issue will be materially increased.

There is still a genuine need for a distinctly statistical and human examination of this matter. Unfortunately there is no Government should undertake such a task, charges would at once be made that it was attempting to either sustain or defeat the Prohibition law. Meanwhile, unless someone of the many fortunes like Rockefeller or Carnegie take the matter in hand, the cost of the investigation would be too heavy as to be prohibitive of any ordinary citizen or group of citizens assuming the expense.

While the press reports lurid readings, what the people of the country and the world would really like to know is how the law has affected our moral and economic life. Has it eliminated the bluenose and the bootlegger, with a decrease in accidents? Has it worked for the increase of savings deposits and the purchase of homes? Has church-membership increased or diminished? Again, what have the life insurance companies to report as to the physical condition of the people taking their examinations since the law went into effect? All this can be established only in a laboratory, not on a street. This is what we need to know. Meanwhile the Administration's attitude continues to be that the law is the law of the land, and that no one has the right to waiver in the enforcement of it because of the possibility that at some future date it may be either amended or repealed.

Spirit Superior to Infirmities of Age

The late Senator Page of Vermont once said at a banquet in Montpelier during his governorship:

"For block give me your Vermont farmer every time. Old Jerome McWade, though seventy-three, was hale and hearty, and one day when his two sons got to bragging about their strength Jerome swore he could lead boy as fast as they could pitch it.

"So down to the fields they went, and Jerome got in a hay wagon with his fork, and the two boys began to pitch the hay up to him fast and furious.

"Jerome worked like a demon, and all the time he kept calling down in a fierce way. More Hay! More hay!

"But after a time, of course, his years began to tell on him. His loading got very shaky. The hay fell better and holler on his back. Still, as a last supreme shout, he kept yelling, 'More hay! More hay!' Then, all of a sudden, he tripped and fell out of the wagon.

"As he picked himself up, very spry, from off the ground, one of the boys gave a laugh and said:

"'What do you want down here, pap?'

"'What do I want?' jeered Jerome. 'Why, more hay, more hay.'"

Samoans Still Fear Old Spirits of Evil

The Samoan's love for ceremony, especially dignified ceremony, and for singing, has not made him a making him a church member and regular service attendant, but even with his acceptance of Christianity he still, in many cases, keeps a weather eye open for the ancient evil (devil) that had the fear and respect of his ancestors. The atta may be a back number, but you never can tell says the Dear-born Independent.

There was the young fellow, for instance, who showed his irreverence a couple of years ago by walking across an old chief's grave. His family and every one else warned him about the atta, but they don't still he walked on the grave. A few days later he had a bad cold, shortly after he was dead. Quick tuberculosis.

How much better it is for a Christian or any one to respect ancient things and thus not arouse the wrath of the atta on guard! So the Samoan gives the atta a wide berth, hoping his slumbers among the holy places he graves will be undisturbed so long that they will become permanent.

One Secret of Success.

I have always been a quarter of an hour before my time, and it has made a man of me.—Lord Nelson.

Will Erect Building on the South Side Round Lake

A new building program is under way by D. J. Eckinger who will re-engage in the handling of fish with the opening of the season. Present plans call for the construction of a building 40x15 two story fire proof construction on concrete foundation to be erected on Lot 2, Newman's addition, located on the south shore of Round Lake.

Work on the new structure will be under way within the next few days. Just as soon as conditions will permit concrete construction work with safety and all work rushed forward as rapidly as possible in order to have same in readiness to take care of the business of local commercial fishermen during the season.

Mr. Eckinger has had years of experience in this branch of the fishing industry an extensive acquaintance with commercial fishermen, understands their requirements as well as handling the product, hence is in a position to render real service in this line and in a position to make the venture a complete success.

EASTER VESPER SERVICE

Congregational Church on Sunday, April 11th

An audience which utilized the entire seating capacity of the First Congregational Church enjoyed in reverent quiet but with deep appreciation the rendering of the Easter Cantata, 'The Living Christ' by Wildermere, under the direction of Mrs. A. J. Sletter, last Sunday afternoon. The chorus and soloists numbered over thirty voices supported by 7 instrumentalists.

The program began with an orchestral introduction followed by the noble processional hymn from Lyra Davidica, "Jesus Christ is Risen Today, Alleluia," during which the cantata proper occupied the entire program with the exception of the orchestral number, furnished as an offertory during the intermission. The numbers were arranged as follows:

1	The Night of Sorrow .....Chorus
2	Let thy Will be Done, contralto solo .....Miss Shaw
3	Christ Has Risen, soprano solo, ...Mrs. Livingston and Chorus
4	Lo, I am With You Always, tenor and soprano, ...Dr. Wilkinson and Mrs. Adams
5	The World is Not Thy Goal, .Chorus
6	Orchestry Offertory, ...
7	Love is the Greatest of All, Mrs. Livingston, Miss Shaw and Chorus
8	The Living Christ, double quartet, Mrs. Livingston, Mrs. Adams, Miss Shaw, Miss Mitchell, Dr. Wilkinson, Mr. Fowler, Mr. .....Gale, Mr. Saltonstall
9	We Shall Behold Him, baritone solo .....Mr. Poole
10	He Knows His Own, Women's Chorus
11	Love is the Greatest of All, duet, Mrs.Livingston and Mrs.Block; solo, ...Mrs. Adams with Chorus
12	We Come to Thee, duet and trio, Mrs. Livingston, Mr. Saltonstall, Mr. Ogden.
13	Hear Ye, O Father! Chorus and finale with soprano obbligato, Mrs. Adams and Mrs. Livingston

The above program is to be repeated at the First Presbyterian church, East Jordan, next Sunday, April 18.

The East Jordan musicians who shared in the presentation last Sunday were as follows: Organist, Mrs. Balsli; soprano, Mrs. Wagner; contralto, Miss Shaw; bassos, Messrs. Balch, Porter and Seiler; violinist, Miss Chadsey; flutist, Mr. Sanderson

Charlevoix instrumentalists were: Cornet, Mr. Livingston; clarinet, Mr. Wagner; saxaphone, Mr. Bellinger; pianist, Mrs. Swinton

The Charlevoix singers were: Sopranos Mrs. adams, Livingston, Ogden, Mitchell, McMillan, Russell; Misses Jessie Allen, Irene McCann, Isabel Cooper; contraltos, Mrs. Lamphear, Block, Mattson, Campbell, Sloan; Misses Isabel Mitchell, Elizabeth Higman, LaRue Higman; tenors Messrs. Wilkinson, Poole, Sterlit, Fowler, Ogden, Smith, Shanahan, Block; basses, Messrs. Gale, Saltonstall,O'Neal, Edwards.

Heartiest praise should be given for the tireless and sympathetic work of Mrs. Sletter in the difficult task of training and direction. Her firm grasp of all parts of the musical movement never faltered and her leadership was an inspiration not only to the singers but to the audience.

Mrs. Balch at the organ also was most accurate and sympathetic in spite of having had but one opportunity for complete rehearsal upon the Charlevoix organ.

At the close of the vesper service, the Music Committee, assisted by members of the Mary Brewster Circle, served a delightful luncheon of sandwiches, coffee, ice cream and cake to the local and visiting musicians and other East Jordan friends who were present.

A Common Feeling

"Some of us wouldn't mind reforming," remarked the Man on the Car, "but we wouldn't like to have a reformer reform us."—Toledo Blade.

Not So Hazardous

It is claimed that 97 per cent of Arctic explorers have returned alive.

ALFALFA BELT MOVING EAST

America's "Alfalfa Belt" is Gradually Shifting Eastward.

An increasing appreciation on the part of the corn belt farmer of the merits of this legume as a soil builder and feed for animals is responsible for the change. There is no good reason why 90 per cent of the alfalfa acreage should remain west of the Mississippi or why farmers should send millions of dollars to the growers of the far west when they not only can grow just as good, but can save money by so doing.

Four things must be borne in mind in planning to plant alfalfa this spring. It will not grow on soil that is acid or sour. If a test proves so, an application of limestone or marl is essential. Poor drainage is another thing that stands in the way.

However, if good drainage does not exist, it should be drained artificially. Alfalfa starts best on a clean, fertile, firm, moist seed bed. Inoculation is very important. It assures a better stand, more healthy plants, less winter killing and heavy yield. With the treatment he will assume management of the American Trust company's financial organization of Detroit, and will also be vice president of the corporation.

During his years of service with the banking commission he has attained an enviable reputation for efficient and faithful service and formed an extensive acquaintance with banking houses throughout the state that will be of exceptional value to him and the corporation with which he will be connected in his future work.

Mr. Mohrmann has many personal friends locally who wish him success in his new position and who will follow his future career with more than ordinary interest and expect to see him make good with his business associates and the public.

Past Four Score Now Telephone Operator in Home

At the age of eighty-six, Mrs. Walter Draper has become a telephone girl in the Old Soldiers Home at Oklanoma City, Okla. Mrs. Draper is the widow of the first congressman from the Indian Territory and is the granddaughter of the U. S. Senator from Ohio who appointed U. S. Grant to West Point. Mrs. Draper was formerly the wife of D. A. Harvey of the 51st and 52nd congresses. He aided in framing the bill for Oklahoma's entry into statehood. Her present husband is a veteran of the civil war. Her grandfather was Thomas Morris, U.S. Senator from Ohio.

Growth of Hair

Hair grows much faster in the summer than in any other season of the year. This is due partly to the heat of the sun and partly to the opening of the pores of the skin, and the energy in the form of perspiration, which moistens which, unexpired, arrest the growth of the hair. It has been noticed that those women who have indness perspiration nearly always have luxuriant hair.

NATIONAL PROHIBITION GUARDS--ENROLL

The National Prohibition Guards is a -Christian patriotic organization through which the Woman's Christian Temperance Union aims to enroll and train the children and young people to carry on the work for prohibition and law observance.

The Guard slogan is "We'll Help to Safeguard America's Future," and every member of the Guards enrolls under the following pledge:

"Because I believe it to be the patriotic duty of every American to obey the laws of the land; I hereby enroll in the Million Membership Campaign for Law Observance, promising to abstain from the use of intoxicating liquors as a beverage, and to obey the Eighteenth Amendment to the Constitution of the United States."

Rolger Ialison, a specialist in facts and figures recently made the following statement in regard to the prohibition question:

"The solution of the problem lies in again renewing the campaign to educate the children and to warn them against the dangers of touching liquor. Not only is this the way to have law enforcement and to make prohibition effective but it is the only way to develop self control and real manhood and womanhood."

The Red Cross will in the near future offer an opportunity for the Charlevoix boys and girls to enroll as guards

First English Theater

The first real theater in England was built in 1576 (in 1876 the first book was printed in England). The Puritanism of London made it necessary to build this theater on the Surrey side of the Thames. Only one bridge crossed the river—old London bridge, with its houses and shops. Across this bridge streamed the pilgrimages and their hassles, the workmen and non-Puritanic craftsmen. The maidens of the great were built upon the river bank—hence the name of the street: Strand. Steps led to the water and gay barges carried the "quality-folk" across the river, the ladies frequently masked to escape rudeness and jest.

Many Tobacco Varieties

A variety of types and grades of tobacco are grown in the United States. Some are suitable for use in the manufacture of two or more kinds of product. The bright flue-cured type, grown mostly in Virginia, the Carolinas and Georgia, is the principal cigarette tobacco. More of this type of leaf than any other is exported. Burley, grown chiefly in Kentucky, is used mainly in the manufacture of smoking and chewing tobacco. It is largely also in cigarette production. The dark-fired type, produced for the most part in Kentucky and Tennessee, is used in the manufacture of snuff and smoking and chewing tobacco.

THE LAST CARTRIDGE

By WILLIAM G. BEYMER

(© by Short Story Pub. Co.)

THE first man who built a shack beside the Santa Fe siding at that spot of desert where the sun's rays seemed to form, and which was later to become the cowtown of Coro, found, after two weeks' residence, that his claim could never be that of oldest inhabitant. In an idle moment of curiosity he rode up a faintly marked trail, which wandered aimlessly along the side of a small canyon into the low foothills three or four miles from his shack, and there he received the surprise of his life. Rounding a sudden turn, he rode at one step out of the sterility of the sage and sand and blistering rock, into a lush-singed valley not a stone's throw in diameter. A very old, weather-beaten cotton and a shack, whitewashed and, wonder of wonders, covered by morning-glory vines; a bulging spring, fringed by lush grass and carefully girdled by a barbed-wire fence, against which leaned a tall, slender, brown-haired girl who stared at him in silence—all these he saw at one sweeping, comprehensive glance. The door of the shack opened and a shaggy old man stepped, blinking, into the glare of sunlight. He carried a Winchester over his arm. The girl, without speaking, crossed lithely the intervening space and stood beside him. There was such an air of hostility about the two that the nearly six foot inhabitant was rendered speechless.

"Well!" rumbled the old man.

"Afternoon, neighbor," pacifically said the man from the siding. There was a pause. "I got a shanty, yonder, by the sidin'—I jes' rode over—I didn't know there was livin' here," the man from the siding made an uncomfortable job explaining. The girl said never a word.

"Er I've got a shack by the sidin' I reckon y' came be in need o' nothin'," was what spoke slowly, "Methbe y'd better get often my land and ride back where y' come from."

Had he been less taken aback, the man who had "jes' rode over" would have resented the other's attitude but, in a daze, he put on his sombrero, turned his horse, and loped down the trail—and out of this story.

The town of Coro sprung up as cowtowns will. Then it was merely the siding, a saloon cane, and there followed all the adjuncts and appurtenances of a haphazardly, cattle depot. Men there were who lived in the shacks, encouraged and fought; but there were no women there to lend the interest for the "gal up the canyon." Twice a month Cosnaugh rode into town for supplies and, subsequently, rode out again. New arrivals appeared. When two men had been shot and narrowly missed, it was not considered necessary to mention the morning-glory vine.

A notable exception was young Billy Deane, but lately from the Bar Triangle. He said little, but listened; and after the manner of silent men it was his to win. As to the incident of their meeting and the subsequent acquaintance into love, no one ever knew. A Circle-J man had once unexpectedly upon the two, riding blithely along in the early twilight and, unseen himself, had slipped away. His news spread like wild fire. When the unsuspecting lover showed up an hour later he was greeted by a sudden rear of congratulations and queries. For a second he stood aghast, then deftly whipped out a long-barreled Colt, and, lolling back, drawled, "If any gent wants to discuss my pus'nal business—"

There was an instant's silence. Smith, the spokesman, saved the situation. He made a broad, incisive gesture and the resorted, as one man, stepped to the bar. When cigars were passed, each man bowed solemnly to the flushed youngster, then turning, faced the foothills. So delicate a compliment could not be resented by the most fastidious.

The progress of the courtship could only be speculated upon, until one Sunday, about a month later. The afternoon was stifling, oppressive; the dozen men who lunched in the chaks illlegged against the wall, were listless and short. Outside, there was not a breath of air, but in the south gray, wind-ribboned clouds were up over the horizon and seemed linked to earth by a pallid haze which grew in height as it drew swiftly near.

Deane entered and noiselessly crossed the room. When he reached the bar he turned and faced the room against the wall.

"There's a preacher chap in from the Fort," he said. Then all in one breath, "he's goin' tohold a meeting in Carthy's place, an' after the meetin' I'm goin' to be married. She's read about these here church weddin's an' she says she allus wanted one o' them kind, and this is a 'nare 'a we kin come to it. You boys is invited."

Then, as his words were slowly comprehended, the roar of tilted chairs came down with a crash and there was a joyous scramble to reach him. Outside, the sand storm had come, and it beat against the window panes, but no one noticed it. No one noticed the puff of dust that swirled in as the door opened. No one noticed the old man, speechless like in his leprous-white powdering of alkali. Young Deane, above the hubbub, was unnecessarily explaining: "I'm goin' to marry the girl up the canyon—Miss Corrine Cosnaugh."

"Say that again, young feller!" In the hush the answer jerked out: "I'm—goin'—to—marry your daughter." A shot finished the sentence.

A moment after, it would have seemed that what had happened could never have occurred were it not for the huddled figure on the floor and the open door through which came clouds of dust.

Out in the enveloping, obliterating storm, his bridle flying, his arms valiantly shielding his low-bent face, rode an old man, shouting at the stinging sand: "She's all I have—all—all I have." The hoarse voice scarcely rose above a whisper in the gray night or flying sand, but he still cried his justification: "All—all I have!"—again and again till the blinded pony staggered into the sheltering hills.

The cabin, as he entered, struck an unfamiliar note of emptiness.

"Corrine!" he called fearfully. After the unavailing search he stood still in the center of the room, staring dumbly before him. She would come back to her old man, surely, presently. Wasn't he all she had—now? His eyes gleamed malignantly. She would come! If not? Then he would go back to town; but he must wait until the storm was over. He could not—he thought struck him, and he snapped open the breach of his revolver, drew out four discharged shells and tossed them away; then he felt in the pocket of his vest for one side then on the other. His bewildered expression gave place to a look of abject terror. "I went to town for cartridges an' I didn't git 'em. Now I got only two. Two!" he groaned. "If they should comfortable job explaining. The girl said never a word.

"Duty's Call

Every marriage constitutes a pledge of duty: Every man is bound to consecrate his every faculty to its fulfillment. He will derive his rule of action from the profound conviction of that duty.—Mazzini.

Dog's World Distinct From That of Owner

Dogs, especially these that live much with their owners, come to possess so many human qualities that we are apt to judge them from a human standpoint. We credit them with thinking, thought and reasoning powers similar to those we possess ourselves. This is a mistake.

To the dog the world is a very different place from what it appears to us, and in order to gain some idea of the dog's point of view it is well to recognize this fact.

In the first place the dog's senses are entirely different from our own. Those of scent and hearing are far keener. The dog lives in a world of hundreds of different and distinct odors. But none tells him what other dogs have been down the road, and warns him of the presence of all other animals.

The scents of rat, rabbit, fox, weasel and partridge are all as different to him as the colors red, green, yellow and blue are to us. He also hears sounds that are far too high-pitched for human ears. The tone of a whistle may be raised to a pitch that to the human ear, seems silence, yet it can be used to call a dog from a distance. On the other hand, a dog has no appreciation of colors, and many breeds have little power of distant sight.—Exchange.

Tadpole Growth

When hatched the tadpole has no limbs and even the tail is absent or very small. It is, however, provided with discs with which it attaches itself to the egg mass or a water plant. It has no mouth, eyes, nostrils or gills, still being nourished by the yolk within its body. This is particularly true of the spring frog which spends its first winter as a tadpole, becoming a full-sized frog when about a year old. Then it is only half grown and it may require another year for it to become three to four inches long.

Until 1840 New York city had no regular police force.

CHARMING PRINT SILK FROCKS; PARIS EXPLOITS STYLE WHIMS

IT IS silk print here and silk print there and silk print everywhere in the realm of smart fashion. Paris tells us that gay patterned silks, and this includes crepes, taffetas and chiffons, the heavier weaves as well as the very sheer, will continue to shed their radiant loveliness along the path of the mode throughout the spring and summer months.

The silk-print art has become a most fascinating subject, not only from the standpoint of attractive appearance, but the designs themselves

TWO EXAMPLES OF THE SILK-PRINT ART

are interpretative. One night almost say that the silk prints of today have expression. They are as interesting to read as a romance. They may not have a plot, but they interpret ideas gathered from inspirational sources of both art and nature. That oft-used phrase "but it doesn't mean anything" could never be applied to the handsome "made-in-America" silk which is the medium for the development of the French shown to the right in this picture. Fact is, this particular silk is very meaningful, for the American artist who designed it is pleased to entitle it, "My Trip Abroad." Sure enough, give it close scrutiny and the discerning eye will detect a suggestion of the city of Paris, an airplane view which reveals its maze of streets and avenues intercrossed by River Seine.

The bewildering array of print silks seems to respond to the call of every temperament. If a nature lover, satisfy your longing with some one or other of the lovely beflowered silks, done in pastel colorings. These bespeak an exquisite realism in design as well as tone and tint. Perhaps the demure, the very modest patterning, would prove of greater appeal. Very well, for such there are the delightful allover designs done in perfect symmetry even to the point of being prim. The last word from authentic style headquarters declares the simplest patterned silks as very smart for the spring frock.

For the mind of modernistic leanings there are silks in resplendent color. Some repeat the glorious colorings of rich stained glass cathedral windows. Even powdered silks seem to say: "I represent a futuristic art of cubes and squares and triangles and bold colors." Polka dots from little to big are also featured this season. The gown to the left in the picture denotes this tendency. Its panels of solid colored shirred georgette accent the popular idea of combining a plain material with the gay print.

Abounding in intriguing style whims are the new waistcoats and blouses which Paris so modishly creates in colorful complement to the smart two-piece tailored suit. In behalf of the fashionable blouse, French stylists have commandeered both gay print and colorful polka dot.

The use of pongadour print in combination with a monotone fabric is stressed in the O'Rossen model to the left in this picture. Not only is the employment of gay print unique, but the sleeves of plain white shantung are an innovation. The normal waistline is subtly suggested by the clever manipulation of a fitted girdle. That there is a touch of lingerie in the lace flecks foretells the coming vogue for these effects. More and more are lace accessories embellishing the print costume.

Likewise the companion blouse in this illustration boasts a touch of lingerie, for the glint is of plaited organdie. In this model of rouge-red crepe, O'Rossen, with an air supreme expresses itself in allover effects, places a tie-collar of white crepe with huge red polka dots done in outline. The belt of white shantung is piped with red.

Touches of color appear in detail on the white silk blouse or that of wash satin in pretty colors or white. The Parisian blouse glorifies the idea with novel bright pinings and colorful buttons.

Shantung in colors or white is the smart blouse material this spring. The fabric is exploited in exact match colorings to one's cloth suit. Coral peach, periwinkle blue, pretty gray, pale de rose and green, also bright red and navy shantung is styled with contrasting pipings or stitchings done in a tailored way.

Three outstanding items expressed in the latest Parisian blouse types are neckties, jabots and collet or vestee effects, to which a fourth may be added namely, narrow novelty belts which are a part of the design, fashioned to harmonize with the general color scheme. French stylists take delight in using bright colored buttons which emphasize a tailored finish.

JULIA BOTTOMLEY.

Crystals on Rose Frocks

Shades of rose and pink, especially those of soft, delicate tones, form admirable backgrounds for crystal ornamentation. Not only are frocks which feature this combination of materials and trimming shown in every important collection, but they are worn by the smartest women.

Serge for Spring

The serge dress is the bread and butter which inevitably must form a part of the spring fashion banquet. It is being worn extensively upon the Riviera and beginning to appear at Palm Beach. In cream, in navy blue, in gray and in black and white, it both looks and wears well. If desired there may be a coat to match and a touch of color is expressed in the lining of the coat.

Striking Effects

Brilliantly printed crepe de chine, particularly in black, white and red, is used to make most attractive pajama outfits.

NEW BRITISH LAW HITS "ELDEST SON"

Makes Radical Change in Order of Heirship.

The reign of the eldest son as sole heir to the family name and estate in Great Britain is at an end. Since the first day of January a new law has prevailed which will hereafter compel his to share his heritage not only with his brothers but with his sisters. This has the term "son and heir" lost much of its significance with which it has been invested not less in real life than in fiction. It is a most radical change, because for centuries the general custom in England has been that, upon an intestacy, the eldest son shall succeed to his father's "real" property; that is to say, his freehold lands and houses and the heirlooms—to the exclusion of his mother, brothers and sisters.

The law was introduced by the Normans and established as part of the feudal system of land tenure, and the origin of the preference shown for the eldest son would seem to have rested upon thoroughly practical grounds, because in feudal times land was held, for the most part, either direct from the king, or through some intermediate lord, under a form of tenure which carried with it an obligation on the part of the tenant to render some personal service to the landlord. The duty required of the tenant, in the case of either of a military kind, such as to serve his lord in battle, or else of an agricultural nature, for example, to plow the lord's fields. It was obviously desirable that the tenant should be made responsible for the required service, and upon the death of a tenant his eldest son was presumed to be the person best fitted to take over his land and do the service.

That this "eldest son favoritism" has no long prevailed, shows how much the English are to abandon old customs. As in the past, so in the future, the eldest son will be the favorite, but society may exceed that of his brothers and sisters, and the law does not step in under the terms of a will and not because of any natal superiority in the eyes of the law.

Improving on Nature

The production of synthetic camphor from turpentine oil in this country appears to be an accomplished fact. Exact details are not known, but from one to three tons a day have been quoted as estimates of the production.

The camphor industry until recent years has been a monopoly of the Japanese, who have continually increased the output of the natural product and have thus forced European consumers to manufacture camphor synthetically. Such manufacture is indeed satisfactory, especially as it has spread to Europe on a fairly large scale.

Everything points to the fact, says the writer in the Industrial Chemist, that it is the synthetic product and not the natural variety that new governs the trade.

Searchlight for Lifeboats

In the excitement of shipwrecks at night, lifeboats not infrequently capsize or are run down by steamers. To reduce these dangers a London firm has devised a special electric searchlight for use on motor-driven boats, says Popular Mechanics Magazine. It is equipped with reversed reflectors, a powerful gas-filled type of bulb and has a carriage to allow the beam to be directed forward. By a single turn of a switch at the back of the lamp the long-range concentrated beam may be changed into a close-range diffused illumination, and the control over the light thus

(Ill. 1926, Western Newspaper Union.)

"Age is an opportunity no less
Than youth itself, though in another dress;
And as the evening twilight fades away
The sky is filled with stars, invisible by day."

FOOD FOR THE FAMILY

For those who like the old-fashioned buttermilk soup, the following will be enjoyed:

Mulled Buttermilk—

Take five cupfuls of buttermilk, stir a tablespoonful of flour into a little of the buttermilk, add and cook until boiling hot. Season with cinnamon, sugar or nutmeg.

Kidney Beans With Sour Cream.—Cook the beans until tender, then add sour cream to moisten thoroughly. Place over a slow fire and simmer one hour. Add salt and pepper to taste.

Orange and Water Cress Salad.—Arrange a nice bed of water cress on a salad plate, arrange overlapping slices of orange and serve with French dressing.

Baked Onions and Cheese.—Parboil half a dozen medium-sized onions until nearly tender. Drain and put them into a baking dish, then cover with a layer of white sauce and a sprinkling of good cheese, repeat until you finish the top with a layer of buttered crumbs. Bake in a hot oven until the crumbs are brown.

Brown Nut Bread.—Take two cupfuls of graham flour, one cupful of wheat flour, one-half cupful of molasses, one tablespoonful of sugar, one teaspoonful of soda, one-half teaspoonful of salt, one cupful of raisins, and one and one-half cupfuls of sour buttermilk. Mix and bake in a moderate oven.

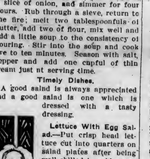
Mock Crab.—Melt four tablespoonfuls of butter, add one-half cupful of flour, one and one-half teaspoonfuls of salt, three-fourths of a teaspoonful of mustard, one-fourth teaspoonful of pepper, then well blended pour in gradually white stirring constantly, one and one-half cupfuls of scalded milk. Bring to the boiling point and add one can of cornlet, one egg lightly beaten, three tablespoonfuls of worcestershire sauce. Turn into a buttered dish, cover with buttered crumbs and bake until brown.

Onion Sandwich.—Chop a small onion, add salt, pepper, a little vinegar and oil and spread on buttered bread.

Split-Pea Soup.—Soak a cupful of split peas in two quarts of water. In the morning put the peas over the fire with a ham bone or piece of salt pork, a slice of onion, and simmer for four hours. Rub through a sieve, return to the fire; melt two tablespoonfuls of butter, add two of flour, mix well and add a little soup to the latter, stirring and pouring. Stir into the soup and cook five to ten minutes. Season with salt and pepper and one cupful of thin cream just at serving time.

Timely Dishes.

A good salad is always appreciated and a good salad dressing is a delight.



Lettuce With Egg Salad.—Put crisp head lettuce cut into quarters on small plates after having well chilled in cold water and drained. Have hard-boiled cooked eggs and put the yolks through a ricer; chop the whites very fine. Your lightly seasoned French dressing over the lettuce and sprinkle with the whites and yolks. This makes a pretty salad to carry out the color scheme of yellow.

Pear Salad.—Set half a canned pear on a few heart leaves of lettuce. Sprinkle with a few cubes of Neufchatel cheese and half as many strips of pimento. Take one cupful of double cream, two tablespoonfuls of lemon juice, four tablespoonfuls of the pear syrup, one-fourth of a teaspoonful of salt and four tablespoonfuls of honey. Beat the dressing until light and pour over the salad.

Caramel Cornstarch Pudding.—Take two tablespoonfuls of cornstarch, mix and cook with one pint of milk. Add three-fourths of a cupful of brown sugar in a smooth frying pan, melt and stir until dissolved and a golden brown, then add the boiling hot cornstarch mixture. Stir until all the sugar is well blended with the pudding, add a pinch of salt and serve in sherbet cups with whipped cream.

Cinnamon Rolls.—Take two cupfuls of light bread dough, add one-half cupful of sugar, four tablespoonfuls of shortening, cut in the mixture until well blended. Roll out, using flour to handle, then spread with butter, sprinkle with sugar and cinnamon, roll up and cut into small rings. Place to rise on a baking sheet; dust with brown sugar just before baking.

Spring Salad.—Slice crisp red radishes very thin, add sliced green onions and a little chopped green pepper. Serve on lettuce with a mayonnaise dressing.

Tomatoes and tomato juice are invaluable aids in the diet of young children.

Dishes made chiefly from milk, fish, meat, vegetables and eggs form meat substitutes form the most important group in a well-balanced ration. Then come cereals, breads, fats, of which butter is the most important.

CHAPTER XV—Continued

—3—

"We have sent for you to look with your own eyes upon this robber of the trap-lines and dellver of the night; this dog whom Lafamme, the trader at Ogoke, sent to fill the hearts of your women and children with fear.

"At his great post on Lake Ogoke he would welcome you at the spring trade, but Black Baptiste, and Antoine and the others, would soon be among your tipis offering the water that burns and fills your heads with fire, to your women and your young men. You would trade the pelts which you toiled for through the moons of the long winter for the stinging water which steals your senses. And when you have had your fun, he would give you a little flour and tea, and some shells for your guns and send you away. But," and the voice of Michel rose in hoarse crescendo, "your women and children would starve through the freezing moons for the trade goods and the flour which Lafamme cheated you out of with his magic water. This is why he sent Pierre, here, to drive you out of the country of your fathers."

"Ataie! tiwe! It is no! He speaks the truth!" exclaimed the inflamed circle of swart-faced hunters.

"You ask why this white man," continued Michel, seeing his coup-d'etat in the freezing moon and brings the dog with the great voice to hand this Windigo," and the Iroquois kicked the frozen shape at his feet, "when he lives far in the Northland and will not suffer from what Lafamme does to the Ojibways. This is his answer:"

"Is the moon of the gathering of the wild rice, he, with David, here, journeying from Watling River to Nepigon House, stopped at the post of Lafamme. There was trouble and because they were friends of Michel St. Onge and knew of the water of fire which the Fathers at Ottawa have forbidden the traders to give the Ojibways, Lafamme sent his men to murder these at the falls of the Jackfish. But these men you see here, who have trapped the Windigo's dog-team, laugh at the white-water. They travel in a magic canoe, and because their sheila were stolen by Lafamme, all except one, and their guns empty, they could not fight. Soon with that sheila and one cupful of thin cream just at serving time.

Timely Dishes.

A good salad is always appreciated and a good salad dressing is a delight.

Lettuce With Egg Salad.—Put crisp head lettuce cut into quarters on small plates after having well chilled in cold water and drained. Have hard-boiled cooked eggs and put the yolks through a ricer; chop the whites very fine. Your lightly seasoned French dressing over the lettuce and sprinkle with the whites and yolks. This makes a pretty salad to carry out the color scheme of yellow.

Pear Salad.—Set half a canned pear on a few heart leaves of lettuce. Sprinkle with a few cubes of Neufchatel cheese and half as many strips of pimento. Take one cupful of double cream, two tablespoonfuls of lemon juice, four tablespoonfuls of the pear syrup, one-fourth of a teaspoonful of salt and four tablespoonfuls of honey. Beat the dressing until light and pour over the salad.

Caramel Cornstarch P

"THE PROHIBITION LAW HAS FAILED"

By WALTER E. EDGE, U.S. Senator, author of the Prohibition Referendum Bill

The Eighteenth Amendment and the Volstead act have, in the judgment of many of the original proponents of the legislation, failed. The time has arrived when the country demands that congress shall acquaint itself with these facts, and on that basis legislate with a sincere effort for improvement. This is not the time for extreme views from either camp. That element which is striving for tolerance is contributing more to real temperance than the stubborn extreme dry who, notwithstanding indisputable evidence to the contrary, still insists this experiment to control personal habits has been a success. It is clearly appreciated and understood that the constitutional limitations governing modification or relief, while debatable, are contracted.

Various plans have been advanced to bring about modification within these constitutional limits. Some of our opponents take the position that any modification would be unconstitutional. However, there is only one tribunal that can decide the point—the Supreme Court of the United States—so that the argument of the average member of congress predicated on this belief should have little weight. If modification will reduce or alleviate the present spirit of protest and challenge—and it is the view of many of us that this would be the result—then the Volstead act should be modified to permit wines and beers up to a point of proved intoxication. Then let the Supreme Court decide the question of constitutionality.

I am not a lawyer, but I am very much impressed with District Attorney Buckner's suggestion that such a law could be made operative by the states. This would still permit Kansas to continue one-half of 1 per cent limitation if Kansas so desired, but would not force it upon others. Again, it would permit New York to take possession of their government, re-establish the private property rights, recognize the right of individual contract, show a disposition to pay their debts; and stop their ever lasting propaganda the world over against other governments, it would be an act of sheer insanity to give them any encouragement."

DENSEST IN POPULATION

A great many people, if asked the question as to which is the most densely populated state in the union would reply that New York rates that distinction. New York indeed has the largest population, but not the greatest density of population. Some of the New England states fat outstrip it in the matter of thickness with which the people live to one another.

Rhode Island has a population of 566 to the square mile and Massachusetts has 500 to the square mile. New York has but 277 people residing in each similar unit.

New York State, of course, gets its reputation for density because of the great number of people residing in and around New York City, although of course, many of these reside in New Jersey and Connecticut, and are not counted in New York City's population. But outside of the metropolitan district there are large sections of New York which are rather sparsely inhabited, and these bring the state's average density below that of some of the New England states.

The average density of population for the entire country is thirty-six to the square mile, which of course makes the United States look almost uninhabited when compared with most of the European countries. Our greatest density of population is in the District of Columbia, if that can be counted as a state, for there it is 7,500 to the mile. Compare this with Wyoming with an average of two to the square mile, New Mexico with three, Colorado with nine, and even with sunny California which has but twenty-two inhabitants to the square mile.

General Leonard A. Wood said in a recent statement: "I am perfectly confident that rubber can be as successfully grown in the Philippines as cocoanuts, and will greatly benefit the people. There is no reason to believe Philippine farmers cannot grow it as profitable and successfully as the natives of Sumatra and Borneo."

It would be a fine thing if Uncle Sam could develop his own rubber plantations in the Philippines and so protect us from the great rubber monopoly. But if rubber can be grown there with profit to the natives themselves and to America, this will furnish another reason to a great many of our professional shouters, why the Filipinos should be given their freedom at once.

For there are a great many people thinking themselves good citizens, who seem to consider it a crime for Americans to succeed anywhere, especially when their doing well will conflict with the interests of some European nation. They of course want to see the Filipinos do well, but not through American effort and at the same time to the enhancement of American profits. From their point of view the natives would be better off starving to death in "Freedom" than waxing prosperous under American rule, especially if American business interests might be sharing in the prosperity.

The bureau of navigation of the Department of Commerce reports that on March 1 American shipyards were constructing 227 steel vessels and 46 wooden vessels. All of these vessels presumably will be employed in the coastwide trade, the only shipping trade in which Americans can engage without severe foreign competition.

From the beginning, the coastwise trade has been protected against foreign invasion. This is the reason why such shipping is prosperous. If American ocean shipping could be protected in some way it would soon be as prosperous as the coastwide trade, and American shipbuilders would be busy constructing vessels for the overseas trade.

Free trade on the high seas, or "reciprocity on the ocean," ruined the American merchant marine years ago. It has cost the American people many billions to have any ocean merchant marine at all; and is costing them millions flow every year, in a hopeless struggle with foreign competitors. The lack of protection of American shipping in competitive ocean commerce is a reproach to the business sense of the United States.—Washington Post.

When we look down one hundred years and see the origin of our Constitution, when we contemplate all its trials and triumphs, when we realize how completely the principles upon which it is based have met every national peril, how devoutly we should say with Franklin, 'God governs in the affairs of men,' and how solemn should be the thought that to us is delivered this ark of the people's covenant, and to us is given the duty to shield it from impious hands. It comes to us sealed with the test of a century. It has been found sufficient in the past, and it will be found sufficient in all the years to come, if all the American people are true to their sacred trust. Another centennial day will come, and millions yet unborn will inquire concerning our stewardship and the safety of their constitution. God grant that they may find it unimpaired; and as we rejoice today in the patriotism and devotion of those who lived one hundred years ago, so may those who follow us rejoice in our fidelity and love for constitutional liberty.—Grover Cleveland in 1887.

Most of the opposition to the Italian settlement in Congress is political. Various groups in America that have been offended at Musolini's behavior are protesting against coming to terms. The trouble is that Mussolini probably doesn't care a whoop whether the terms are accepted or not. If they are not, then Italy will escape making any payments at least for a long time. As a matter of good business and good international relations President Coolidge is amply justified in insisting on congressional approval of the settlement made.—Kansas City Star.

COMMENT.

—A lot of European lecturers come over here and tell us what we ought to do, at two dollars a seat, but we have yet to hear of an American lecturer giving good advice in Europe and getting paid for it at the same time.

—In launching a big ship the other day six bottles of champagne had to be broken over its bow before it would move. Which goes to show that even the champagne isn't what it used to be.

—European governments say Ambassador Houghton was mistaken in his view of the situation, and no doubt they would be willing to send over somebody to tell us the real truth.

—If the League of Nations wants to have other reservations to the World Court clarified why not send the Senate over to Geneva to debate the whole thing over again?

—We suppose that if a man who favors light wine and beers is a "liberal" the fellow who favors the return of "rock and rye" ought to be called a "prodigal."

—Lord Churchill's speech on the European debts should convinced us that we must have started the war ourselves in order to make money out of Europe.

—If any opposing Senator can develop a plan guaranteed to collect more money out of Italy than the present debt agreement, now is the time to submit it.

—March income tax collections are a hundred millions more than the estimate which shows that we are even more prosperous than we thought we were.

—The League of Nations has purchased a site for its new home at Geneva. Doubtless it will be equipped with sound proof walls and shock absorbers.

—Mr. Bok could do his country a real service by formulating a plan to make lasting peace between the wets and drys.

—Chances are there won't be any more quarreling in Europe now until the League meets in September.

—If France is waiting to balance her budget until she can frame a popular tax law, she has a long wait coming.

—The new one dollar bills will wear twice as long as the old ones but they won't buy twice as much.

Power of Vibrations

A Boston violinist says he can put out a flame with the vibration of his fiddle. But that's nothing. A saxophone slightly off key can put out an entire orchestra.—Cleveland Plain Dealer.

WANT COLUMN

FOR SALE—2 choice milch cows. For particulars call G. W. Dennis, phone 7003-F31.

WANTED—To rent by May 1st, house with modern conveniences. A. C. Belding, Charlevoix.

FOR SALE—A team of black geldings, excellent condition, sound; terms cash. Call Argo Milling Co.

FOR SALE—Cottage very desirably located on Petoskey avenue. Parties interested in a Charlevoix cottage should investigate this offer as an attractive price will be made on this property. Address F. A., care Sentinel, Charlevoix.

FOR RENT—Season 1926, cottage located on Petoskey Avenue, near Michigan, will rent at a moderate price to desirable tenant. Address P. E., care Sentinel, Charlevoix.

AN ECONOMIC AND A MORAL BLESSING

By MORRIS SHEPPARD, U. S. Senator, author of the Eighteenth Amendment

No true and loyal citizen advocates the violation of the Constitution of the United States. It is the embodiment of the most admirable system of government the world has yet beheld. It means more to humanity, progress, liberty, than it is possible to describe. Prohibition is part of the Constitution. Every person who takes part in the traffic in intoxicating liquors—the traffic outlawed by the prohibition clause of our Constitution, as maker, seller, purchaser or drinker—violates, or helps to violate, that great instrument. The prohibition clause of the Federal Constitution is as much entitled to observance as any other portion of the supreme law of the land.

The Constitution provides that on a proposal by a two-thirds vote of each House of Congress three-fourths of the states, acting through conventions or legislatures, may amend it. More than three-fourths of the States—to be specific, forty-five out of forty-eight—placed prohibition in the Constitution in the manner authorized by its terms. National prohibition was an exercise by the states of one of the most vital rights they possess—the right through three-fourths of their numbers acting by conventions or Legislatures to amend the Federal Constitution.

Must Obey All Laws

It is entirely proper for those who do not believe in prohibition, or any other part of our national Constitution, to endeavor to bring about repeat through the amending process laid down in the Constitution. But until they succeed they should obey the Constitution and not participate in its violation. The individual who causes one law to be violated today may not be heard to complain if the burglar, the assassin or the kidnaper enters his home tomorrow. We cannot single out certain laws for obedience or disobedience. The true citizen obeys them all as long as they are laws. He may be against prohibition, but he knows that it is the law and that in the supremacy of the law may be found the hope and glory of this Republic. In a fundamental sense, therefore, prohibition is the cause of every true citizen.

The Constitution prohibits the manufacture, sale or transportation of intoxicating liquors within, the importation thereof into or the exportation thereof from the United States and all territory subject to the jurisdiction thereof for beverage purposes. Consequently it is not permissible under the Constitution by an act of congress to legalize light wine and beer because they intoxicate. The wet voters have been led to believe that this may be done, and they want light wine and beer in the generally accepted meaning of these terms—light wine and beer, with a real kick.

They are being deceived. The Supreme Court of the United States would promptly set aside any act of congress conflicting with the constitution. Aside from that fact, it is as dishonest and unpatriotic to violate the constitution by an act of congress as by an individual action. Indeed, it is far more so, because the disregard of the constitution by congress would be vastly more far-reaching and fatal in its effect in all our institutions.

Opponents of prohibition believe that it is an unfair interference with what they call their personal liberty. Advocates of prohibition, having secured its adoption in the polls in an area occupied by a majority of the American people, placed it in the national constitution through the procedure set up by that document for its own amendment by congressional and state action. These advocates believed that the evil consequences of the liquor habit and the liquor traffic to society—to others besides the drinker himself—were such that the manufacture and sale of intoxicating liquors should be constitutionally and permanently forbidden throughout the nation. Will those who believe that this provision should not have been placed in the constitution nevertheless obey it so long as it there remains?

National prohibition is a vital test of constitutional government in the United States. At the very foundation of our system of government is the principle of conformity to its enactments regardless of personal belief—ability to subordinate personal belief to the ordainments of our constitution.

Congress Safely Dry

It is often asserted that the American people are not in sympathy with prohibition. But when prohibition became effective in January 1920, three elections to the national House of Representatives, involving every seat at each election, and three elections to the United States Senate, involving a different third of the seats each time, have been held. An intensive propaganda by the wets has been in constant operation with periodical straw votes, etc. And yet both House and Senate are overwhelmingly for prohibition.

As introducer of the resolution which became the eighteenth, or prohibition amendment to the Federal Constitution, I have followed the cause of prohibition with keenest interest. Everything considered it is my judgement that it is one of the greatest moral and economic blessings that American people have ever known—that the benefits multiply with the years and with the ages—and that practically all our citizens will be numbered among its upholders and promoters.

THE THEATRE

When a young man or girl journeys to Hollywood to get a job in the movies, his or her sole idea is to act. The opinion of all movie aspirants seems to be that acting is the only work to be done in the film industry. "There is plenty of room in the executive and production end of photoplay-making for the right people," said Mr. Hudson, who has just completed "I Want my Man." "Those who have dramatic talent, should not rush headlong into the acting ranks before summing up the advantages offered on the other side of the camera line.

"One who has been experiences to prepare for an executive career in films—or any executive office where you must know how to handle people—is a newspaper man. Bert Hilyer, whom I selected to direct 'I Want my Man,' was once a reporter. A definite experience in other lines of business is valuable. Of course, only one man at a time can be the skipper of a ship, but there is enough glory and remuneration in the subordinate offices for the satisfaction of all who make good."

Milton Sills and Doris Kenyon are co-featured in "I Want my Man." The picture will be shown at the Palace theatre, April 17-18.

New Brooms

"New Brooms" which comes to the Palace theatre for a run of two days on April 21-22 is a comedy concern, principally, a care-worn father and a lively care-free son whose ideas of managing the old gent's broom factory are different.

The son, played by Neil Hamilton, featured with Bessie Love and Phyllis Haver in the production, thinks he could increase the business by using his theory of generosity and smiles, but the father insists sternness and frowns are sometimes necessary to keep things on a paying basis. The argument ends with the father's turning over the factory to the son for one year, also the management and responsibility of the home, the father taking only his freedom and the same allowance his son received at college.

Rest from work and responsibility causes the father to grow genial and younger, while the son becomes more grouchy than the father ever was as business problems begin to heap up before him and people take advantage of his smiles and generosity. At the end of trial year the son ruefully admits that he is not a success and humbly accepts the offered help of the father, who admits that the boy has done one thing he had never been able to do—lowered his income tax.

Interwoven into the above plot are two interesting love stories of the kind that Mr. de Mille does so well. Among the names in the strong supporting cast are Robert McWade, who, as the father, has the same role in the picture as he did in the stage play.

The Ancient Mariner

"At length did cross an Albatross,
And through the fog it came."

These lines of Coleridge which appear in the immortal poem, "The Ancient Mariner," which comes to the Palace theatre next Thursday and Friday, developed into a beautiful allegorical photoplay enhanced with a parallel modern story, loomed as the most important of the entire poem for months during the preparation of the fantasy for the screen.

These lines bring into the story the famed bird of good omen, the Albatross, symbol of love of happiness, around which the poem revolves, and the basis at the spectacular picturization.

This presented a situation that could not be overcome by inference. This bird of the sea could not be explained by titles. Likewise the substitution of some other species of fowl could not be used in the film with consistency, so the only alternative remained—to find a living specimen of that rare bird.

Telegrams were sent north, south, east and west; but without results. Then foreign fields were invaded. All the large cities of the old world were asked for information. Then came news from London that stating that the White Albatross was located in a museum.

The fantasy sequence in "The Ancient Mariner" surpasses in beauty and splendor any of Director Otto's previous contributions of this artistic nature.

Love Attracts Love

Love and you shall be loved. All love is mathematically just, as much as the two sides of an algebraic equation.—Emerson.

NEW "RED" PLAN

During the past two years the Russian Soviet government has been seeking to secure recognition from the United States by holding out tempting bait in the way of profitable trade. But of this propaganda work was cleverly executed, but some of it was overdone. The statements of the prospective business were assured and they did not get anywhere. It now begins to be evident that this plan of securing recognition by trade bait is going to prove unsuccessful. So the report comes from Russia that a new method is to be tried.

The new scheme is to work through American newspapers, through any of our newspapers in fact which can be made to fall for the plan. The plan is to offer contracts financed by the Soviet government, working through third parties, to American newspapers to make surveys of the "great trade possibilities" in Russia. The newspapers will be invited to send special representatives to Russia and to print from time to time stories coming out of Russia of these "great possibilities" and the advisability of our recognizing Soviet Russia.

Of course the first thing to do will be to "catch" the newspapers, and this may not be a "soft" task as it is usually not easy to "take in" the American press.

The recognition of Russia by Great Britain and other European government has not proved an unmixed blessing. Since that recognition came about there has been an increase of communist propaganda in those countries, and the red flag is now flying in several places in England.

As the New York Commercial puts it:

"This new attempt to win recognition for Soviet Russia should get no further than those that have gone before. Until the people of Russia

Attractions for Coming Week

Saturday and Sunday.

Milton Sills and Doris Kenyon in "I Want My Man." To give up your husband because you thought he loved another. To sacrifice the love in your heart because it might make him happier. You have to be pretty brave; you'd have to have a soul as big as this girl's and then maybe in the end, after hardship and suffering and real womanly sacrifice, you'd win back your man like she did. Also an educational comedy "The Fighting Tailor.' Another educational picture "Glow of the Lamp," will give you an idea how your electric lamps are made.

Tuesday and Wednesday

Neil Hamilton and Bessie Love in "New Brooms." 156-782 young men in American think they can run their father's business better than the old man can. Come and see one of the boys try it. Do your spring screaming now. You'll find New Brooms here.

Also a Fox News Reel. Travel the world with the News Reels. The very best form of travel.

Thursday and Friday

Clara Bow and Earl Williams in "The Ancient Mariner." Samuel Taylor Coleridg's poem portrayed in pictures. The most imaginative poem ever brought to life on the screen. A vital pulsating story plus the most picturesque fantasy ever filmed.

Also an educational picture, "Officers of the Day." This picture is for the benefit of the Normal class.

You Can Call Detroit by Long Distance for 80 CENTS from CHARLEVOIX —after 8:30 in the Evening. You can call any other town or city at a proportionately low rate if you place an "Any One" call, which is a call placed to the telephone number, rather than in the name of the called party. The rate is slightly higher during the day. The Long Distance operator will give you rates.

MICHIGAN BELL TELEPHONE CO.

—PERSONALS—

Mr. and Mrs. Jone Durance were visitors in Petoskey last Tuesday.

Attorney E. N. Clink of East Jordan, was a business visitor here yesterday.

Pastor Burns is spending the week on a business trip in the south part of the state.

D. J. Eckinger, after spending the winter in Flint, returned to his home here a few days ago.

Mrs. James Gaskin, a flu victim for some days, is improving rapidly and much better at this time.

Mrs. Ray W. Faulkner has been confined to the house with the flu for some days but is improving at this time.

E. V. Smith, piano tuner, at Charlevoix week of April 19th. Leave orders at Holley Gift Shop or Will Bellinger.

Mrs. Milton H. Gilbert and Miss Jean Burns of Detroit, are visiting at the home of Dr. and Mrs. Herman Burns.

Captain and Mrs. Charles Roe, accompanied by James Roe, all of Harbor Springs, were visitors in this city last Saturday.

Robert W. Paddock returned from an extended trip through the South, late last week and is again at his splendid farm home.

Captain and Mrs. James H. Gallagher of Horne City, accompanied by a party of friends, were business visitors here Wednesday.

Frank E. Wood was visiting his old friends and business associates on Bridge street last Monday for the first time in 1926.

Dr. and Mrs. F. F. McMillan, visitors at Indian River several days recently, returned to their Park Avenue home late last week.

Mr. C. A. Barry, of Central Lake, member of the Barry-Meech-Company, of this city, was a business visitor here Monday and Tuesday.

Mr. and Mrs. Perry Smith and family, who spent the winter season in Chicago, returned to their home, 601 State street, last Saturday.

Bruce Armstrong is spending a short vacation with his parents, Dr. and Mrs. H. B. Armstrong, during his vacation period from college work.

Frank Ackert for some weeks past at the Charlevoix hospital for treatment made his first appearance on the street since his illness last Tuesday.

Mrs. Pearl Leashman, who spent a week here with her parents, Mr. and Mrs. Jone Durance, returned to her home, South Haven, last Tuesday.

Mrs. Frederick W. Mayne, who for the past few months has been with relatives and friends in California and Arizona, returned to Charlevoix Saturday.

A moderately high wind from the north accompanied by a slight snow storm made for weather conditions not wholly agreeable Wednesday morning.

Members of the Congregational Missionary Society will meet with Mrs. John Burns, 203 Grant Street, Wednesday, April 21st at 2 o'clock p. m.—Mrs. Dean leader.

Ladies of the M. E. Society are preparing to serve a supper at the church Wednesday evening, April 28th for which a more extended announcement will be given later.

Mrs. Cornelia A. Bailey, during recent months a visitor in Washington, D. C., returned to Charlevoix late last week and is again occupying her cottage at 211 Clinton Street.

Jess Smith, dangerously ill at the Charlevoix hospital is making steady improvement has so far recovered as to be able to return to his home, the transfer being made early this week.

Miss Phila Armstrong, U. of M. student, arrived here early this week and will spend a few days with her parents, Dr. and Mrs. H. B. Armstrong before returning to the University City.

Mrs. Nellie Wood, who for the winter season was with friends in Mt. Dora, Florida, returned to Charlevoix late last week and for the present is stopping with Mrs. N. A. Shores.

Raymond Faulkner, student at the University of Michigan, arrived here Sunday and is spending the week with his parents, Mr. and Mrs. Ray W. Faulkner, other relatives and friends.

Lester Wilder for some time past a member of the coast guard crew at Manistee, has been transferred to Charlevoix and now becomes a coast guardsman at the local Charlevoix station.

A party of friends spent last Saturday night at the Walter Vosburg home on Antrim street, assisting Mr. Vosburg in celebrating his birthday anniversary. A fine time is the general report.

Roller skating is being indulged in by a large number of little folks at present. Bicycles have once more come into general use as a means of getting around the city by young, middle aged and even older persons.

Dominick Gallagher, first light keeper at the head of Beaver Island, arrived here from Chicago a day or two ago on his way to take charge of his duties for the season and will make the trip to St. James at the earliest opportunity.

Captain and Mrs. Thomas Bonner have been visiting friends in this city several days. They returned from the south recently and now await an opportunity to make the trip to their home on Beaver Island.

Members of Charlevoix Lodge No. 141, A. M., will hold a regular convocation at the Masonic Temple Monday evening, April 19th, at which time work will be conducted in the R. A. M. degree. Lunch will be served—all the members requested to be in attendance.

Mr. and Mrs. O. D. Hammond and daughter, Miss Dorris, and son Stanley, for several months past visitors in California, returned to their home in this city last Sunday. They made the round trip with the exception of a few miles by automobile.

Employees at the Charlevoix State Savings Bank are more or less disturbed in their work this week, due to a force of workmen engaged in refinishing and decorating the interior of the banking house all of which gives this financial place of business a new appearance.

Olaf Nordrum was a business visitor at St. James last Monday, in the interest of the Booth Fisheries Company, making the round trip by air route with Captain Donnelian. On the trip to St. James the airplane also carried ten sacks of mail all for Beaver Island residents.

Dr. R. B. Armstrong was laid up with a case of the flu for some days during the past week, but is now attending to his professional duties, returning to some considerable extent of relieving other flu victims of which there are a goodly number distributed throughout the city.

Glenn See went to Grand Rapids last Friday, where he expected to meet his father, Charles E. See, on his return from the west coast where he spent the winter. Following the arrival of the parent the intention was to accompany him to Charlevoix via the automobile route. This they did arriving here Tuesday evening.

Automobiles are in general use for both pleasure and business and appear in increasing numbers daily. Machines that have been in storage for the winter season can now be taken out and driven with safety and comfort on all main thoroughfares. In a few days country roads will be open after which machines can be driven whenever and wherever desired.

Rev. Wm. Eldridge, pastor of the Church Of God for the past four years or more, is about to move, with his family, to Sturgis, Mich., to take up work there. The good wishes of the members of his church and many other friends in Charlevoix goes with them to their new field of labor. Rev. Eldridge expects to preach here for the last time on April 25th.

Prof. Louis M. Hirsch, who came from Ann Arbor to give the lecture recital "Rip Van Winkle" at the high school auditorium last Monday evening, proved himself an expert in his line and entertained his delighted audience for nearly two hours as he portrayed the characters first introduced by Washington Irving and later made famous by Joseph Jefferson, the actor, who played the part of the hero for about 45 years.

Mr. and Mrs. Robert Bridge entertained a party of friends at their Dixon Avenue home early this week. Music, a buffet lunch and other entertainment was fully enjoyed by the guests who made affair noticeably featureful as a home coming reception for Mr. and Mrs. Albert F. Bridge recently returned from a southern trip after an absence of several months. The meeting was informal, highly interesting and most pleasureable to the assemblage.

W. C. T. U. Meeting

The April Woman's Christian Temperance Union meeting was held last Friday afternoon with Mrs. Benton. The devotional service was in charge of Mrs. Wm. Poole, and a short sketch of the life of Mrs. Mary T. Lathrop, a pioneer temperance worker was read by Miss Annie Metcalf.

The Union voted to join in the National Campaign to enroll and train one million boys and girls pledged to law observance and abstinence from the use of intoxicating liquor as a beverage.

Announcement was made of a County Institute to be held here about May 5th with a state officer as the speaker.

The study topic for the day "Woman's Place in Politics" was led by Mrs. R. B. Armstrong who gave a very interesting talk interspersed with readings from current periodicals. The leader suggested that all women who can should make a study of politics and use their leisure time in helping to solve the public questions of the day—that women should be careful about embracing any cause or action just because some organization has endorsed it—that women should refrain from urging legislation which will further over-tax the Federal Government,—that women should refuse to countenance party auxiliaries and insist on equal membership with the men in political organizations—that women should protect unceasingly against the things that are demoralizing and suggestive of evil.

The May meeting of the Union will be at Mrs. McMillan's with Mrs. Harsha as leader.

She Explains.

"I can hardly believe I am the first girl you ever kissed. You are so—if I may say it—efficient."

—DRESS MAKING. — Fashionable dress making by Miss Nellie Guild, Charlevoix, phone 7012-F21. 49-tf

CHURCHES

Congregational Church

Rev. B. G. Mattson, D.D., Minister.

Morning service at 10:30 with sermon topic as announced for last Sunday: "The Personal Care of a Personal God For Every Person." Owing to severe hoarseness the pastor was unable to preach last Sunday. His place was taken by Mr. A. P. Bridge, one of the church trustees who gave a most enjoyable and instructive talk on observations of his recent extended stay in the Southland.

Usual session of the Sunday School at 12 o'clock.

The Young People's Societies will meet at 6 p. m.

There will be no evening service as the choir and pastor will be in attendance at the East Jordan Presbyterian church.

Methodist Church.

C. E. Pollock, Pastor.

The pastor will preach at both morning and evening worship next Sunday.

All Juniors are urged to be present for the Junior message and gift books at the 10:30 service.

An interesting feature service at 7:00 p. m. The Epworth League meets at 6 p. m. next Sunday for devotional hour.

On Friday afternoon and evening this week there will be a group meeting of Methodist pastors and laymen of this northern section of Grand Traverse District at Boyne City, for a coupel of days regarding World Service undertaking.

Baptist Church

Rev. Herman Burns, D. D., —) Pastor (—

The usual Sunday services at the Baptist church. It is expected that Rev. J. C. Austin, of Lansing, will be the preacher.

The ladies of the Baptist church will entertain the associational program committee at the church, Saturday. The committee will prepare the program for the meeting of the Grand Traverse Association, the 7th and 8th of May.

St. Mary's Catholic Church

Low Mass 8:00 a. m.
High Mass 10:00 a. m.
Saturday and Monday 7:00 a. m.
Rev. Kuntz Lowenski, Pastor.

Boston's Original Name

The English name first given to Boston was Trimountain, which was changed to the present one at a town meeting of the early settlers who gathered at Charles town, across the river, on September 7, 1630.

STATE OF MICHIGAN—The Circuit Court for the County of Charlevoix—In Chancery.

Joseph W. Locke, Plaintiff vs.

Reuben Hetson, or his unknown heirs, devisees, legatees and assigns; John Verly, or his unknown heirs, devisees, legatees and assigns; John R. Struthers, Andrew C. Struthers, Charles W. Struthers, Robert R. Struthers, Amelia Howe, Lucinda Haggerty and Viola Peterson, known sons and daughters of Andrew R. Struthers, deceased; and all the unknown heirs, devisees, legatees and assigns of the said Andrew R. Struthers, deceased; Elizabeth Struthers, widow of Andrew R. Struthers, deceased; Matilda C. Liscomb, or her unknown heirs, devisees, legatees and assigns; Howard Brooks, and Francis I. Griffith, known children and heirs at law of Fanny I. Brooks, deceased, and all the unknown heirs, devisees, legatees and assigns of the said Fanny I. Brooks, deceased; Michigan Mortgage Company, limited; Anthony DeLong; or his unknown heirs, devisees, legatees and assigns; and Richard C. Lewis, Defendants.

Suit pending in the Circuit Court for the County of Charlevoix, in Chancery at the city of Charlevoix on the 14th day of April A.D. 1926.

In this cause it appearing that it is not known whether the said Reuben Hatson, or the said John Verly, or the said Matilda C. Liscomb or the said Howard Brooks, or the said Francis I. Griffith or the said Anthony DeLong, each or any of them is living or dead, or where each or any of them may reside, if living; and it appearing that Viola Peterson and Charles W. Struthers are residents of the state of Oregon and that it is unknown whether Amelia Howe or Lucinda Haggerty reside in the State of Michigan or not; and it appearing that it is unknown whether the Michigan Mortgage Company, Limited is in existence or not and it also appearing that none of its officers or any person upon whom service or process may be made. It is ordered on motion of Lisle Shanahan, attorney for the Plaintiff, Joseph W. Locke, that the defendants, Reuben Hatson, John Verly, Matilda C. Liscomb, Howard Brooks, Frances I. Griffith and Anthony DeLong, or each of their unknown heirs, devisees, legatees or assigns, and all the unknown heirs, devisees, legatees and assigns of Andrew R. Struthers and Fanny I. Brooks, or either of them, Viola Peterson, Charles W. Struthers, Amelia Howe and Lucinda Haggerty and the Michigan Mortgage Company, Limited enter each, his or their appearance in said cause on or before three months from date of this order; and that within twenty days the plaintiff cause this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulated in the said county of Charlevoix once in each week for six weeks in succession, or that said plaintiff cause a copy of this order to be personally served on said defendants at least twenty days before the time above prescribed for their appearance. The above cause is for the purpose of clearing and quieting the title to Government Lots One and Two in Section thirty and the south one half of the northwest quarter of Section twenty-nine in township thirty-four north, range seven west in the said plaintiff.

PAHM C. GILBERT,
LISLE SHANAHAN, Circuit Judge.
Attorney for Plaintiff.

Posthumous Fame All Accorded to Shelley

It seems strange that unpublished poems and letters of Shelley could be found at this late date in the Harvard library, not as loosely inserted in another man's production, but as part of a notebook of the poet's own making, says the Philadelphia Public Ledger. One would suppose that a book held in such scholarly custody for 23 years would have been examined with care long ago to discover any precious traces of "Ariel," especially when the volume was known to have been in the possession of the illstarred genius whose smallest manuscript, like any holograph of Burns or Keats, is a capital prize today. In his whole lifeling Shelley received about $400 from the publishers of his poems. Without income from other sources, he could not have rounded even the short term of 30 years that he allotted him. His career provides one of many instances in which a poet who failed of widespread public recognition in his day has won a posthumous glory which has rendered his manuscripts the object of eager competition among bibliophiles.

Obligation and Right Constitute Legal Tie

An obligation in law is defined as "a legal tie that binds us to another, either to give him something, or to do or abstain from doing some act." For instance, an agreement or contract of sale creates a legal tie between the two parties, the seller being obliged to deliver the thing sold and warrant it, and the buyer being obliged to pay the price. In ordinary use obligation has a different meaning from right. A person is obliged to do that which he can be compelled by law to do, but a right commonly means something that one can compel others to do, for instance, it would not be correct to say that a landowner has a right to build half the line fence. He is obliged—under legal obligation—to build half of such fence, and he has the right to compel the adjoining owner to fulfill his obligation and build the other half. Generally speaking, obligation and right are the opposite ends of the legal tie, the obligation of one party being the right of the other. The noun, obligation, and the verb, obligate, are from the Latin verb, obligo, 1 bind.

T. H. CARAWAY

"T. H. Caraway, Democrat, Jones boro." That laconic sentence in Senator T. H. Caraway's biographical sketch in the new congressional directory, for which senators and representatives write their own stories of their lives. The brevity of the Arkansas scion wins for him the distinction of having the shortest sketch in the

Great Men's Birth Month

Among the distinguished men of history, who had January for a birth month are: Edmund Burke, January 1, 1730, statesman, orator and writer. famous for his speech concerning taxation of American colonies; General Wolfe, January 2, 1727, famous general; Cicero, January 3, 107 B. C., noted Roman orator, suppressed the Catiline conspiracy; Benjamin Franklin, January 6, 1706; Shevlenberg, January 20, 1688 or 1689, noted philosopher; Thomas Paine, January 29, 1737, agnostic, author of the "Age of Reason"; Mozart, January 27, 1756; Robert Burns, January 25, 1759, Scottish poet; Frederick the Great, January 24, 1712, king of Prussia; Francis Bacon, January 22, 1561; Byron, January 22, 1788.

One-Word Sermon

The word "news" is made up of the four letters that indicate the main points of the compass—N., S., E. and W. In a book published more than a century ago, the author comments upon this in a way that is by no means out of date at the present time. He says: "As news implies the intelligence received from all parts of the world, the very word itself points out its meaning—N. the north; E. the east; W. the west, and S. the south. This expressive word also recommends the practice of the following virtues: Nobleness in our thoughts, Equity in our dealings, Wisdom in our counsels, and Sobriety in our enjoyments."

Ether and Light Waves

Ether is the medium through which, according to the wave theory, light waves are transmitted through space; etc. It has been assumed that inasmuch as sound waves are made of air, light waves must be composed of something, and to supply this want in our knowledge a medium called the ether was imagined. Experiments of different kinds have cast a doubt on the existence of ether, but the force of radiation and of other familiar phenomena demand a connecting medium which conveniently is called the "ether."

Over the Hill, Around the Corner —Freedom

Escape from the commonplace. Use your car to put new interest, new thought, new life into your daily experiences.

There are dozens of places within motoring distance of your home which will give you many times the pleasure of close-in driving. For instance — you will find —

1—The largest cherry orchards in the world on the Lower Peninsula of Michigan where the air is water-washed by three great lakes. State Highway No. 22.

2—Spirit of Okoboji Lakes in Iowa, a region of glorious beauty with a background of colorful Indian legends. State Highways No. 4 and No. 9.

3—The largest storage pit for sodium nitrate in the world near Savanna, Illinois. State Highway No. 27.

4—Fish hatchery for rainbow trout in Bennett Spring State Park, Missouri, to supply the trout streams in the Ozarks. Twelve miles west of Lebanon, on State Highway No. 14.

5—The Lake Park Region of Minnesota, center of the Ten Thousand Lakes District. Wonderful shaded motor roads following the shores of beautiful lakes. Excellent fishing. Gateways, St. Cloud on Minnesota Scenic Highway No. 3 and Fergus Falls on State Highway No. 30.

6—Devils Lake, North Dakota, on the Theodore Roosevelt International Highway No. 52.

7—The great golden valley of Kansas. Old Santa Fe Trail along the Arkansas River past Pawnee Rock.

8—The Shades, Monument County, Indiana, near Crawfordsville, Dixie Highway No. 25 and Ben Hur Route No. 31.

9—Wind Cave, South Dakota, over 100 miles long with more than 3,000 chambers. Twelve miles from Hot Springs on Denver, Deadwood, Washington, and Black Hills Loop Highways.

10—The famous Dalles of Wisconsin, wild and weird in their unique beauty. State Highway No. 13 from Kilbourn.

Get a good road-map, see that the tank is full of Red Crown gasoline, put the family in the car, and the world is yours! All the glories of the great outdoors—infinite beauty, joyous sunlight, fragrant wild flowers and a blue sky overhead!

There are many places of enchantment near you. Over the crest of the hill, around the turn, are undreamed of pleasures. In your own car you can travel with the ease and freedom of the wind. There are rustic lodges, smart hotels and free tourist camps to suit every taste and purse.

Wherever you go you will find splendid highways. Wherever you go you will find Standard Oil Company (Indiana) Service Stations and Garages ready to supply you with Red Crown, the dependable gasoline.

Your car with good roads and an assured supply of Red Crown gasoline gives you freedom to go anywhere.

LEGAL NOTICES

STATE OF MICHIGAN—The Circuit Court for the County of Charlevoix—In Chancery.

James Tumath, Plaintiff
vs.
Joseph Graham, or his unknown heirs, devisees, legatees and assigns; Lester Colestra, or his unknown heirs, devisees, legatees and assigns; Julian M. Wheeler, or his unknown heirs, devisees, legatees and assigns; William Green, or his unknown heirs, devisees, legatees and assigns; and the Smalley Manufacturing Company, a Wisconsin corporation, Defendants.

Suit pending in the Circuit Court for the County of Charlevoix, in Chancery at the City of Charlevoix on the 27th February, 1926.

In this cause it appearing that it is not known whether the said Joseph Graham, or the said Lester Colestra, or the said Julian M. Wheeler, or the said William Green, each or any of them is living or dead, or where each or any of them may reside, if living; therefore on motion of Lisle Shanahan, attorney for the said plaintiff, it is ordered, that the said defendants, Joseph Graham, Lester Colestra, Julian M. Wheeler and William Green, or each of their unknown heirs, devisees, legatees and assigns, enter each, his or their appearance in this cause within forty days from the date of this order; and it appearing that the said Smalley Manufacturing Company, a Wisconsin corporation has no office or offices within the State of Michigan; therefore on motion of Lisle Shahan, attorney for the said plaintiff, it is ordered that the said Smalley Manufacturing Company, a Wisconsin Corporation enter its appearance in said cause on or before three months from date of this order; and that within twenty days the plaintiff cause this order to be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in the said county of Charlevoix, said publication to be continued once in each week for six weeks in succession, or that said plaintiff cause a copy of this order to be personally served on said defendants at least twenty days before the time above prescribed for their appearance. The above cause is for the purpose of clearing and quieting the title to the northeast quarter of the northwest quarter of section twenty six in township thirty three north, range seven west in said plaintiff.

Dated March 19th, 1926.

Samuel Routley, Plaintiff
vs.
Mary Routley, Defendant

Suit pending in the Circuit Court for the County of Charlevoix, in Chancery, at Charlevoix, on the 18th day of March A. D. 1926.

In this cause it appearing from affidavit on file, that the Defendant, Mary Routley is not a resident of this state, but is a resident in the State of Illinois, on motion of R. L. Lewis, complainant's solicitor, it is ordered that the said Defendant, Mary Routley, cause an appearance to be entered herein, within three months from the date of this order, and in case of her appearance that she cause her answer to the complainant's Bill of Complaint to be filed, and a copy thereof to be served on said complainant's solicitor, within twenty days after service on her of a copy of said Bill and notice of this order; and that in default thereof, said Bill be taken as confessed by the said non-resident Defendant.

And it is further ordered, that within twenty days the said complainant cause a notice of this order, to be published in the Charlevoix Sentinel, a newspaper printed, published and circulating in said county, and that such publication be continued there at least once in each week, for six weeks in succession, or that she cause a copy of this order to be personally served on said non-resident Defendant, at least twenty days before the time above prescribed for her appearance.

MORTGAGE SALE

Default having been made in the conditions of a certain mortgage executed by Frederick Yahr and Sophia Yahr, his wife of Hayes township, Charlevoix county, Michigan, unto Mary Zipp of the city of Petoskey, Michigan, dated January 26th 1921, and recorded in the office of the Register of Deeds for Charlevoix county, Michigan, on the 26th day of January, 1921, in Liber 48 of mortgages on page 277, on which mortgage there is claimed to be due at date of this notice the sum of One Thousand Three Hundred Seventeen and 06-100 Dollars, including the attorney fee therein provided for, and a further sum of Four Hundred and Eighty Nine and 17-100 Dollars, being taxes and interest thereon paid by the mortgagee on the land and premises herein described, together with an attorney fee of Thirty-Five Dollars as provided for by the said mortgage, and no proceedings at law or equity having been instituted to recover the money secured by said mortgage, or any part thereof, and whereas, the taxes required by the statute to be paid on said mortgage was duly paid prior to the recording thereof;

Now Therefore, notice is given that by virtue of the power of sale contained in said mortgage and of the statutes made and provided, said mortgage will be foreclosed by sale of the premises herein described, or so much thereof as may be necessary to satisfy the amount due thereon together with the costs and expenses of the foreclosure, including the attorney fee provided by said mortgage, and also including the taxes paid by the mortgagee, at Public Auction, to the highest bidder therefor, at the front door of the Court house in the city of Charlevoix, Charlevoix county, Michigan, (that being the place where the circuit court for the county of Charlevoix is held), on Friday, the 25th day of June, 1926, at ten o'clock in the forenoon on that date.

The premises described in said mortgage being the lands and premises situated in the Township of Hayes, county of Charlevoix, state of Michigan, viz: The east one-half of the Southeast quarter of section Eleven in township Thirty-four, North, Range seven west, containing eighty acres of land, more or less, according to the government survey thereof.

Dated March 19th, 1926.

I. O. O. F. SERVICE

Well Attended at Methodist Church

Last Sunday morning was Odd Fellow memorial hour at the Methodist Episcopal church. A fine representation of the local lodges of the Independent Order of Odd Fellows and of the Rebekahs attended the service. They made a fine appearance, and with their significant regalia lent color to the occasion.

The pastor spoke from the subject, "The Princely Soul." He said that all true brotherhood is a challenge to the inner life. No organization is stronger than the characters of the people who compose it. A princely organization must have as its members people with princely souls.

He maintained by argument and illustration that the princely jewels of a fine brotherhood are friendship, love and truth, making these words the divisions of his address. He stated that these are qualities of the inner life, and are princely characteristics. He made the subject of the sermon by saying that David was a prince because god had chosen him as a future king of Israel. Jonathan was a prince because he was the son of King Saul. But more important than any of these accidents of royalty was the fact that these men were each princely in character.

Such qualities are attainable by any person, and are greatly needed in the present condition of society. It was a happy occasion, both for the church and the lodge, and served to bind in closer good fellowship these great institutions, that have so much in common.

SHAKESPEARE CLUB

Informal Supper Served at the Noble House

Thirty eight guests were present at the informal Shakespeare Club supper at the Noble House. Mrs. Swinton, the president, was in a humorous mood when she greeted her club and its guests, marking the spirit of the evening.

She introduced Mr. Ralph Price who presented his original musical sketch in which titles and characters of Shakespeare plays were adroitly interwoven. Dr. Mattson followed with a pleasing manner related his experiences, in company with three college friends on a motor, bicycle trip through Italy, visiting London, the Lake Region, several cathedrals and Stratford.

This happy event was held on April 23rd, the 362nd anniversary of Shakespeare's birth.

Rats, 10,000 or More

As government officials at San Francisco started to unload 10,000 cases of seized Scotch liquor from the schooner Oral Hatheway they saw one or more rats for each case of Scotch swarming the deck of the craft. The hold of the ship also was filled with silly rats while the starving rodents. Their food supply was shut off when the liquor was seized several months ago and anchored off Yerba Buena island in San Francisco bay. The rats would be marooned to starve alive by eating the corks from a number of bottles of scotch, rye and champagne.

1905 1926

SAVING

Earning a great income brings nothing unless it is so spent that we may enjoy more fully the good things of life while we live, and the first of all good things is that we shall have comfort and independence as long as we live. And that means saving, nothing else will do it.

Commencing Monday, May 3rd, this bank will close at 2:30 o'clock every day except Saturday—closing hour three o'clock.

Charlevoix State Savings Bank.
Under State Supervision.

BOAT SERVICE SOON

Steamship Puritan from Chicago Early in May

According to recent information the steamship Puritan of the Northern Transit Co. line, will sail from Chicago May 1st for Charlevoix and other northern Lake Michigan ports.

Captain George Johnson, manager of the line, is the authority furnishing the information. No regular schedule is available at this time giving the movement of steamships of the line for the 1926 season of navigation. This will be out soon notifying the public as to the arrival of ships of the line at this and all other points in the territory served by the Michigan Transit Company.

SCIENTIST TO HUNT PORPOISE WITH GUN

Hopes to Get Specimens Off Florida Coast.

Washington, D. C.—To shoot porpoises as they come into the shallow water of the surface of a school of tide expedition to the Gulf of Mexico, undertaken by Dr. Gerrit S. Miller, jr., mammalogist of the Smithsonian Institution.

Fishermen of Cedar Keys, Fla., report that herds of this seagoing mammal have a habit of coming into shallow water at low tide. Thus, if they can be shot, the shallowness of the water will prevent their being lost to the hunter.

It is believed the species of porpoise which makes its home along the western shores of Florida has certain distinctive characteristics, about which scientists are not clear. To decide this point is the purpose of Doctor Miller's collecting expedition.

Porpoises are, of course, mammals; that is, they are members of the same large group of animals to which man himself belongs, the distinguishing characteristic of which is that the young of every one of its members must be fed on milk. The porpoise is really a small-toothed whale. Its teeth are peculiar in their shape, which very much resembles an inverted flower bulb. It feeds upon fish and squids. Its sociable and gregarious nature is revealed in the habit of traveling in herds, so frequently seen from ocean liners.

In former times, the porpoise formed a common article of food in England and many parts of Europe, but it is now rarely if ever eaten, being valuable only for the oil obtained from its blubber. Its skin is sometimes used for leather and boot thongs.

Doctor Miller will also do much plant collecting for the national herbarium, which is also under the direction of the Smithsonian. The northwestern section of Florida has been rather neglected by botanists.

Doctor Miller, who has been with the Smithsonian for nearly thirty years, occupies a position in the forefront of his science. It was he who, in 1904, introduced the British museum the new technique in the study of mammalogy which had been developed by C. Hart Merriam, at that time head of the United States biological survey. This new technique has since revolutionized the science of mammalogy throughout the world.

Walrus Tusks Prized

Ivory carving is becoming a lost art among the Eskimos of Alaska, and the remotely carved ivory tusks are much prized by collectors. A generation or so back the artisans who did this work were quite numerous, but they have gradually passed away, and the young men have not learned to do it.

A NEW MAGAZINE

April Number, First Issue, to Hand.

Vol. 1 No. 1 of the Northern Michigan Magazine, published by the Northern Michigan Publishing Company, Petoskey, has been placed in circulation.

The April number, first issue, is prim full of good write-ups of Northern Michigan cities and villages as well as a liberal amount of good descriptive matter pertaining to this region, all profusely illustrated and at the same time the magazine carries a liberal amount of advertising matter. In all thirty-four pages.

We take the liberty to reproduce the write-up given to Charlevoix, as follows:

Charlevoix, the "City on Three Lakes," is calling you. Its panorama of play is spread before you. By the magic of a few hours travel you are transmuted to this land of water-washed air where health, pleasure, youth and life find their greatest measure of expression. Absent is the smoke of industry as when the Great Manitou ruled these Inland Waters.

Recognized as the mecca of summer tourists it presents holiday land the most delightful and cool on the North American continent during the summer and its invitation to come outdoors is irresistible.

Situated on an eminence its western limit is swept by Lake Michigan, with a lakeside park and boulevard drive along the beach. Defining its easterly limits is Pine Lake, the most beautiful sheet of water in America, with cottages and hotels overlooking its crystal clearness. Round Lake, a natural land locked harbor through which craft of the largestlake navigate, forms a "counterpiece" about which, on natural terraces, cluster the permanent homes and summer cottages. Venice presents no more beautiful vistascape.

More than just a delightful summer resort is this town of pure serenity, charmful sovereign beauty, with its atmosphere of hospitality and comfortship, its recreations and pleasures.

Charlevoix the Beautiful with a population of 3,000, which swells to 11,000 during the summer, lies fifty miles south of the Straits of Mackinac, in a section of Michigan filled with Indian legend and romance. On clear days Beaver Islands, Fox Islands and sometimes the Manitous, 40 miles away, are plainly visible.

A complete change is the greatest value a vacation can offer. Here is provided a wonderful, delightful, new environment, a tonic to the body and spirit, where many comes in their yachts, some by air and countless thousands by automobile. 11 boasts of being the liveliest resort in Michigan, with something to see, something to do day or night between June 1 and October 31. It is the yachtsman's rendezvous, the fisherman's paradise, the golfer's delight. Here meet folk of all walks of life, merchant, banker, mechanic, artist, student, author, meet upon the common plane of play.

The scenery and surroundings make a universal appeal. They present natural beauty in great abundance and riches of wonderful white, soft sand. Palisans laden pine forests. Everything to bring happiness and peace.

Charlevoix the Beautiful boasts of the largest and best kept golf courses in the Michigan resort section. In fact none other sees so many golfers from so many lands and states. Two 18-hole courses with holes varying from 185 to 560 yards, situated on the broad upland between Pine Lake and Lake Michigan extend over 12,000 yards. It has been variously dubbed "The Ekwanok of the West" and as "The Summer Haven for Golfers."

AIR SERVICE RESUMED

Monday Between Charlevoix and St. James

With the return of Captain J. F. Donnellan from Chicago with an airplane last Monday the mail service between Charlevoix and St. James was reestablished in the afternoon via. the air route, the first air mail service between the two points since the partial wrecking of the plane previously in the service about ten days earlier, at St. James.

According to instructions this service will continue throughout this month and if occasion requires it is possible that another extension will be given for further service until such time as the mail can be carried by boat with the opening of the season of navigation. This will probably be within a very few days, possibly by the time the present contract for air service expires.

Strawberry States

States producing by far the most strawberries grown in the United States are North Carolina and Tennessee.

FIRST RAINSTORM SATURDAY, APRIL 24

A good steady substantial rainstorm visited this region last Saturday, that continued throughout the day. In the early evening there was a decided drop of several degrees in temperature, enough to warrant the appearance on the scene of "Old Man Winter" leaving a trace of snow on the ground that practically disappeared Sunday thus confirming the opinion of local weather prognosticators who predicted snow after the rain. It is to be hoped that winter has made its last stand for 1925-6 season. With snow continuously on the ground since October 5th last, and in liberal quantities, we can get along nicely without a further continuance of the beautiful.

FILLED ITS QUOTA

Citizens Military Training Camps

Michigan will have filled its quota for the Citizens Military Training Camps, the officers in charge of recruiting for this year's training camps at Camp Custer and Fort Brady believe. The quota for Fort Brady camp is already filled, according to official announcement.

After the quota at Camp Custer is filled a waiting list of several hundred will be established as alternates in case any of the students can not attend the camp because of sickness or any other good reason. Michigan as a whole has more than 50 per cent of its quota filled, and in comparison to population this state is 200 per cent ahead of Illinois or Wisconsin, the other two states composing the Sixth Army Corps area.

Colonel Raymond Sheldon who will be the commanding officer at Camp Custer this summer says that every effort is being made to give the students in training the best mess this year they have ever had. The food is always good and extraordinary efforts are being made to get first class cooks to prepare it.

Any young man between the ages of 17 and 24 years of good character, physically sound who desires a 30 days vacation without cost is invited to join. Application can be obtained from any county committee or direct from the 85th Division headquarters, 204 New Telegraph Bldg., Detroit, Mich.

MR. JOHN P. HEMMETER

Well Known Businessman, Died Last Sunday

Mr. John P. Hemmeter of Detroit, well known by business men throughout the state, passed away in that city last Sunday afternoon. Mr. Hemmeter had been a very active man for several months and in ill health for a long time. He held heavy financial interest in the wood using and industrial industries in his home city and in Saginaw and in both places was considered one of the best, most enterprising citizens.

At the time of his death and for several previous years he was a member and president of the Mackinac Island State Park Commission and as such was a most valuable and active member of the board.

His summer seasons for many years were spent at Mackinac Island where he owned and maintained a splendid summer home which was always open to his friends. Mr. Hemmeter has several personal friends in this city who sincerely regret his passing.

Drops Gather Weight

The weather bureau says that the chief reason why frozen raindrops are of so many different shapes is the fact that partially frozen drops often collide and stick together, giving shapes that vary with the number and size of the adhering drops, and the extent to which they were frozen when they collided. Entirely liquid drops on collision form, if they unite, only one larger but still spherical drop.

Thread From Eye; Sees After 11 Years

Haverstraw, N. J.—Mrs. Margaret Kline of Stony Point, who has been blind in her right eye for 11 years, went to a Doctor Hirsch to have a piece of thread removed from that eye. She works in a coat factory, and the thread got into her eye while she was at work. Doctor Hirsch removed the thread and was almost as astonished as Mrs. King at her discovery that her sight had returned with its removal.

NAVIGATION NEAR

Boats in HarborWill Soon be on their Way

Open water appeared in many places on Lake Michigan last Friday, where, heretofore, for months past lay a vast ice field. Saturday the fields of open water were greatly increased in size with a corresponding decrease of ice formation making for conditions more hopeful and pleasing to local ship owners and navigators in this region.

This rapid change was watched with interest by local fishermen and even by those whose only interest was that of seeing only the broad expanse of Lake Michigan free of its winter covering. With the change came an increase in activities of ship owners and those interested in marine service, noticeably so with those making repair and improvement work on their individual ships.

Painters, ship carpenters and mechanists were making their marks, busy with their work preparatory for sailing, at the earliest possible opportunity. As a result of their activities all were ready to proceed with their work with the opening of the season.

The season of navigation opens several days later in 1926 than in 1925. In the latter year the first steamship from Chicago to Charlevoix and other northern points cleared from Chicago, April 25th while the first for this season is scheduled to sail May 1st.

The S.S. James E. Sanford of the Charlevoix-St. James Transit Co., made her first trip between Charlevoix and St. James on April 14 in 1925.

90TH ANNIVERSARY

By Mr. John Johnson Last Tuesday

Mr. John Johnson, a resident of this region since 1867 and Charlevoix's oldest resident celebrated his 90th birthday anniversary last Tuesday, April 27th.

He served with the Confederate forces during the early part of the Civil War, contrary to his convictions as to the righteousness of the war from a southern viewpoint, under duress and against his will. Following the battle of Fort Donaldson, which was won by the federal forces the colonel, major and captain of the Confederate force died, leaving a lieutenant in charge of the Company of which Mr. Johnson was a member. With the leaders in confusion and making desperate efforts to escape the inevitable defeat, many of their forces and possible capture by the federals, Mr. Johnson recognized his opportunity to return to his home in Savannah. Shortly thereafter he made his way north to Ohio with Grant's army and then further north to Michigan, finally locating in Banks township, Antrim county, in 1867, since which time he has resided in this locality, the major part of the time in Charlevoix, where he has a host of friends who rejoice with him over his physical condition, his spirit of good citizenship in this region and extend their hearty congratulations and best wishes for many more anniversaries and years of continued good health.

SHIELDS-LA CROIX

Wedding Ceremony Performed in Petoskey.

Mrs. William H. Shields, 913 State street, and Mr. Isadore La Croix of Cross Village, were married in Petoskey last Tuesday morning, the ceremony being performed by Rev. Fr. Johns of Petoskey.

Following the morning ceremony the couple motored to this city where they will reside and be at home to their friends at 913 State street.

Tuesday evening Mr. and Mrs. La Croix entertained a party of friends, both local and from Harbor Springs, cards, dancing and a delicious luncheon being on the program carried out.

Guests from Harbor Springs were as follows: Mr. and Mrs. Willis Long, Mr. and Mrs. William Norton, Misses Mary Hoover, Sober, Mr. Fred De Paro and Dr. Branch, who with the local friends enjoyed a delightful evening.

Waterproof Sandpaper

Waterproof sandpaper, now on the market, permits use of the abrasive under damp or even wet conditions and prevents raising dust when cleaning painted, varnished or ornamented surfaces. Both sides have been treated and the gritty material does not readily come off, so that the paper is said to last ten times as long as the ordinary product.

TO CELEBRATE JULY 4

Charlevoix to Celebrate Independence Day

July 4th is only about two months away. In view of this fact and in consideration of the further fact that the county as a unit will celebrate Independence Day in Charlevoix, members of the city council and also members of the Association of Commerce are making preliminary arrangements by way of appointing special committees to provide a day of entertainment for guests and local citizens—all in accordance with a program to be announced later.

NEW TORCH MELTS STEEL UNDER WATER

Will Be Used to Open Hull of Wrecked Submarine.

New York.—A torch that can melt and cut steel at any depth under water has been perfected by the United States navy, and will be used in opening the sunken submarine S-51, now on the floor of the ocean off Block Island. Commander Ellsberg of the Brooklyn navy yard has told a recent

Such a torch is hailed as a valuable aid in cutting through the steel plates of submarines and submarine compartments. It was the lack of an adequately powerful torch that prevented the piercing of the submarine S-51 last fall, after it was rammed and sunk by the steamer City of Rome in September. At that time acetylene torches were used, and they were practically useless when forced to pressure of more than 20 pounds under water.

The new torch consists of jets of hydrogen and oxygen which emanate from two separate sleeves in the tip of the torch. From a third sleeve comes compressed air. When the compressed air is applied at any depth under water it forces an air bubble to surround the hydrogen and oxygen. Thus protected from the water, the fire within the bubble of air is injected into the steel. It usually reaches a temperature of 5,000 degrees Fahrenheit, according to Commander Ellsberg.

The steel plate melts. From the time the flame is applied the steel plate, usually an inch thick or less on submarines, can be cut at the rate of a foot a minute.

The navy has been experimenting on the torch for several years. When the submarine S-51 sank, the torch was in the experimental stage.

With the aid of the torch, it will be possible to get into the innermost compartments of the submarine. Holes will be burned in the hull of the submarine, as well as in the walls of the compartments, and the compressed air will be forced into the boat, thus driving out the water and making the craft more buoyant.

The bodies of 24 men are still in the submarine, it is believed, and these will be taken out probably before the submarine is lifted to the surface.

Brief-Case Suspects

We may do on occasional injustice to a perfectly innocent person, but the prudent man endeavors to be on the safe side, and we always avoid any one with a brief-case, if possible, on the theory that he's probably either a lawyer or an efficiency expert.—Ohio State Journal.

Easy to Fix

A young woman who was departing for the hitching relied for parting advice. "I'm sorry, madam," said the clerk, "but there's both a suitable. We've got your hair down as dark instead of fair." "Oh, well," said the traveler, "will you alter it—or shall I?"

SEED CORN SURVEY

Finds Important Factors in Good Seed

Seriousness of the seed corn situation in Michigan this spring, along with the need for careful testing of all planting stocks, is being pointed out again by crop specialists at the Michigan State College, following a survey which has covered 19 counties.

Failure to "field select" early enough and improper care of the seed stocks in storage are given as chief reasons for the poor condition of the seed. The fall of 1925 was, of course, a very bad one for handling seed corn, and called for extra care.

Professor Duncan, as a result of the survey, names three things which are positively necessary to insure seed corn of high germinating ability for planting. These are:

Field select your seed corn in the fall as early as the condition of the corn will permit, preferably as soon as the early maturing ears have reached the hard dough and glazed stage of maturity.

Place on hangers so that one ear does not touch another.

Hang in a well ventilated place where the air circulation is free and unobstructed.

Testing of seed corn stock this spring for germination is being especially urged by the college, in order that the best from the none too good seed stock available may be selected

SATURDAY, MAY FIRST

Is Opening Day for Brook Trout Fishing

Saturday, May 10th, is the opening day for legal brook trout fishing. With this in view local fishermen are polishing up their rods, going over their general line of tackle and getting everything in order to make a visit to some one of the several noted streams in this region.

Statutory provisions permit the taking of fifteen brook trout in any one day with hook and line and twenty-five is the limit for having in possession at any one time. Some fishermen will probably make the limit on their first outing, but at time goes on will make strict compliance with the law. Otherwise a game warden may discover irregularities when he takes a look into the fisherman's creel—naturally this would prove more or less embarrassing to the warden.

In Boston Keep Going

Persons who visit Boston are often perplexed by its maze of streets. A visitor was complaining to a resident that he was constantly getting lost. "Never mind," said the Bostonian. "Just keep on going straight ahead and you will always

Big Additions to National Forests

Purchases of 247,067 Acres Approved by Commission Last Year.

Washington.—During the past fiscal year the National Forest Reservation commission approved for purchase 247,067 acres at an average price of $4.80 an acre as additions to the national forests, according to the annual report of the commission. The lands thus authorized for purchase consisted of 248 tracts located in ten different states.

Of the approved lands, 55,867 acres can be classed as forested or partly forested land on which there now stands of timber containing approximately 123,000,000 board feet of merchantable timber, says the report. The remaining lands consist of 4,055 acres of abandoned farm land, arable land and grass land; 152,633 acres of recently cut-over or not yet restocked to young stands; 24,808 acres restocking to young timber either on cut-over lands or abandoned farm land on which forest conditions are being reestablished, and 9,104 acres of barren or badly burned land, on which, however, forest conditions can be re-established. The report continues:

"During the past year only two tracts were approved for purchase in the White Mountain national forest, but these contained 21,619 acres and are being acquired at an average price of $13.06 per acre. The purchase of those lands will effect much desired consolidation. They contain much valuable timber, which will add to the reserve on this forest. Of the total stand of more than 3,200 feet per acre on this land, more than half of it is soft wood, much of it being material which is suitable for the manufacture of paper stock. The acquisition of this land will bring under government control a large area of forested land located on high slopes of several mountains, most of it so situated as to have great value as protection forests.

"These lands bring the total amount of land under purchase of which has been approved on the White Mountain unit to 462,524 acres. The lands which have been acquired are, as a rule, well consolidated for administration and for protection against fire. The effectiveness of the fire control on this unit during the past year is shown by the fact that the total area of government land burned over did not exceed 326 acres. The results of the policy of the protection of cut-over lands against fire are well shown on this forest, as many badly cut-over areas are now restocking and give assurance of furnishing another stand of merchantable timber. Cutting of the mature timber is being conducted in such a manner as to insure a renewal of a valuable stand. The timber products which are being sold are furnishing an important part of the lumber needs of New England, while the method of cutting which is employed serves to develop the full productivity of the forest.

"During the past year 30,025 acres in 31 different tracts were approved for purchase on the Allegheny forest at an average price of $3.54 per acre. This brings the total area acquired and being acquired on this unit to 180,588 acres out of a total of 730,272 acres within the purchase unit. These tracts, but are well stocked to young timber, and for this reason they offer high investment potentialities. Notwithstanding occasional fires those young stands, as a rule, are of good quality. They consist largely of beech, birch and maple in the northern portion of the forest, and of chestnut and oak in the southern part. The lands so far approved for purchase on this unit are still scattered. The purchase policy should be carried forward with the main objective of effecting consolidation, since government ownership is as yet confined to less than 30 per cent of the total area of the forest.

"For many years prior to their acquisition by the federal government the lands now embraced in the purchased national forests suffered severely from repeated forest fires. Some small areas, of course, escaped unscathed, but in the main the annual fire damage was very high, and in many sections the mountain woods were almost 100 per cent burned over each year. By the mountain people woods fires were quite widely held to be necessary and beneficial and were encouraged, or at least considered as entirely unavoidable and therefore to be expected each season. At the time of purchase, too, these new national forests were largely isolated, inaccessible areas, rugged and difficult in topography, and devoid of anything like adequate systems of communication and transportation to serve as a basis for a plan of protection against fire.

"Nevertheless, the forest service launched agressively into this most essential task of providing the new public forests the protection from fire without which not much else in the way of forestry practice could be hopefully attempted. New protective organizations were built up on each forest, lookouts established, systematic cleared initiated, roads and trails pushed into the interiors of the several blocks, fire tools and food caches for suppression crews located at convenient points, and telephone systems developed so that fires might be quickly reported and steps to suppress them promptly taken.

"With the areas of the forests increased by new purchases almost annually, and in the face of constant uncertainty as to the future and with the result of purchase work within the established areas engendered by the prospect soon to be in place a widespread knowledge of the need for and beneficial results of fire prevention work will translate itself into united public support of the protection idea. This calls for a well-planned, comprehensive, and sustained educational or publicity effort, and the facilities of the forest service for carrying on such a campaign should be extended to meet this need adequately."

Fires of Human Origin.

"The most regrettable feature of the forest fire record in the eastern national forests is that the fires are practically all of human origin. Campfires, railroads, slash burning and steam sawmills annually contribute their quota of fires, but by far the greater number are directly attributable to deliberate woods burning. Indeed sometimes upon malice but usually upon ignorance or mistaken theories as to the effect of fires upon forest and forage conditions.

"The co-operation of all forest users is aggressively sought with a view to a solution of the fire problem by preventing fires from starting and by promptly reporting any fire which is discovered. The degree to which such co-operation in fire protection on the part of the local people can be developed varies with the different forests, but

Paullin Longworth, daughter of Speaker and Mrs. Nicholas Longworth, photographed on the eve of her first birthday.

since in some regions the number of forest dwellers or nearby forest dwellers is greater than in others. Also the willingness to play an aggressive public-spirited part in fire protection varies greatly.

"A notable example of splendid cooperation is found on the Shenandoah forest in Virginia. The thrifty farmers of that region were quick to see the destruction visited upon the timbered lands annually by forest fires, and have responded admirably to the plans of forest officers for aid and protection of forest fires. Many fires occurring near the homes of farmers are promptly detected and suppressed by the farmers and the ranger then advised. An ideal system of citizen cooperation has been built up on the Shenandoah, and this system is followed on all forests where at all possible.

"In some unprogressive regions a very difficult situation is encountered. The people living within or near the forests do not yet recognize or appreciate the beneficial effects of forest-fire prevention, and they not only do not co-operate with the protection forces but are directly responsible for the annual recurrence of numerous fires. The situation thus presented is one of extreme difficulty, but it is vigorously attacked along the line of law improvement and enforcement, coupled with a systematic campaign of public education and publicity.

"The solution of the fire problem in the purchased forests lies largely in this serious task of breaking down a long-public sentiment which for generations has passively accepted or positively encouraged woods burning and of developing in its place a wide-spread knowledge of the need for and beneficial results of fire prevention which will translate itself into united public support of the protection idea. This calls for a well-planned, comprehensive, and sustained educational or publicity effort, and the facilities of the forest service for carrying on such a campaign should be extended to meet this need adequately."

Dedication of Hugest Coast Defense Rifle

The world's largest railway gun, a monster 14-inch rifle weighing 365 tons, was installed at Fort MacArthur, San Pedro, Cal., recently. The dedication was under the auspices of the San Pedro Chamber of Commerce and the Third regiment coast artillery. The gun discharges a projectile capable of destroying an enemy 25 miles distant. This picture shows the big gun and the crowd that attended the dedication.

LIGHTKEEPER'S DAUGHTER SHOWS HERSELF HEROINE

Girl Marooned for Three Days and Nights Manages to Keep Beacons Blazing.

London.—A story of a girl's heroism in a lighthouse during a storm comes from the Isle of Wight.

The light in St. Helen's lighthouse, near Cambridge, was kept flashing for three nights by the fourteen-year-old daughter of the lighthouse-keeper, Langtan. The girl was marooned there one retent afternoon without food, except one loaf of bread and a small piece of cake, but she carried out her father's duties valiantly.

Lantan and his wife in the afternoon rowed ashore in a rough sea to fetch food and oil to the lighthouse, says the Daily Mail. While they were ashore the sea rose in its fury, and, notwithstanding several attempts made in a lifeboat and motor boat, the father and mother were unable to make the return trip to the beacon.

Aside from anxiety for his daughter, left alone on the lighthouse with scarcely nay food, Langtan worried as to whether she would realize the necessity to light the lamp, which is one of the most important along the coast. Great was his relief when punctually the light beamed and remained flashing throughout the night.

The gale raged all the next day, making vain the attempts of the lifeboat men and fishermen to take the keeper back. Again night fell, and again the light shone at the appointed hour. As the storm passed the anxiety of the parents deepened; they pictured the girl as hungry, and perhaps frightened and going without sleep.

They and the girl, however, were doomed to continue the ordeal, for the following day the gale was worse and passage across the three miles of raging seas was impossible.

The third night came, and again the light gleamed forth at the proper hour, as if the lighthouse-keeper himself had been there at his task. Not until five o'clock in the afternoon did the seas abate sufficiently to enable the parents to return. They rowed to the lighthouse, in a motor boat. This was so badly buffeted by the waves that the crew did not venture to return to the mainland.

As the lamp worked regularly while Mr. and Mrs. Langtan were ashore, it was evident that the girl kept awake at night and wound every four hours the clockwork apparatus which turns the light.

Make It Harder

Rochester, N. Y.—As if chess is not hard enough, fellows at the university of Rochester are trying to make it a red-dimensional. They propose to add pieces representing airplanes and navy marines.

Thomas A. Edison was thirty years old when he made the first incandescent lamp.

WHEN HE FOUND A REJUVENATOR

By L. GRACE SITZER

(© by Short Story Feb. Co.)

PERSONAL—a business man of forty-five has recently had a bereavement that depressed his spirits and maked office routine most difficult. His physician insists upon a complete change.

What young man, enthusiastic, a lover of sports and the drama wishes to undertake the "Rejuvenation of Aunt Mary's brother?"

"Jones" fosts the bills; requisites are refinement, personality, and temperament. Please state qualifications and age.

K 238 Tribune.

The Gloom-man sat in his ornate library glaring into space. The softfooted servant brought him a card on a tray hesitantly say. "Hub Davis." It read, "the answer to your Ad."

He turned to view a saucy, boyish, tailored girl.

Bub seated herself. "I'm dad's boy, and you'll never know me from the real thing if you take me on—Baseball enthusiast, happy temperament, willing to rejuvenate, etc," Jones fools the bills, 'is what won me."

Mr. Gloom sat silently eyeing her she glanced about with interest. "Where's Aunt Mary, should I transact the business with her?"

The Gloom-man roused. "That's the trouble, she's inserted the advertisement in a moment of inspiration, then received a telegram from home saying Bobby was down with the mumps, and away she sped, telling me to be sure to select the right applicant. Molly always was the kind of a sister to get a fellow into a mess."

Bub brightened. "Never mind, your decision is what counts, let's proceed. I read the advertisement and went down to the Tribune office bright and early to await developments. I walked until I heard your man inquire for 'K 238,' and followed him here. Personal interview always desirable.

"If you likes me and I likes you, and we both like about the same," she hastened, "the question before the house is, are you respectable? I'm in for a good, decent time, diversion if you please, Bub's name for three months. He said I could do anything respectable. If I'd keep out of debt and not marry.

"Could you make it a hundred a month?" she asked suddenly. "I had it. I never could earn that much. Could you make it a three months' engagement? Would you for the sake of respectability call for me and take me home each day?"

As the man was still silent she beamed persuasively, "Am I the rejuvenator?"

"You interest me," declared the Gloom-man, "and I'm especially in hope. Yes, I'll meet your terms. It is your due to know what sin ple is. I was engaged to be married to the sweetest woman on earth, so I thought, and on the eve before our four. I'm broken, nothing interests me." He added savagely, "You'll hate me for it for it's weak."

"No," she answered softly, "I like you because you care. Don't get cold feet, I couldn't marry you if I would. Let's go see the ball game. I want to see the Cubs win. Oh, I say, we'll just be chums and die! I'll not have to count the cois we can have the time of our lives. I'm going home, call for me soon."

He followed her to the library door and she turned a pale face through it. "I'm sorry about my slang if you care. Dad says no one would guess the money he's spent on my college polish. Say, when I have on an evening gown you can't guess what a polished lady I become. I'm going to call you Cousin Gloom. He's a cousin of mine," she trilled.

The Gloom-man caught her hand, "You are good for the darned."

She quickly discarded his hand. "None of the clasp stuff, just a good time. Only I'm not responsible, I'm bump."

The ball game was over. Bub had proved his automobile she quietly took the wheel.

"Bub," exclaimed the Gloom-man, almost with enthusiasm, "let's dine this evening, clothes and all, at the Biscayne gardens?"

For a moment she seemed embarrassed, then grinned. "Hats, it's a cinch. I'm hired by the day. We'll go."

They were waiting for the ordered dinner in the served, dainty glitter of lights, the bewitching music, and the buzzing voices, enveloped them. Bub was demure, transformed; the Gloom-man could not account for the change.

"Bub, do you believe in dual personality? I believe between the two of you I will rejuvenate." And the man almost smiled.

"No," she replied, "not dual, just different." With a merry laugh of be-

Night Sheds Beauty on Old Eastern City

I must some day write a page and not a paragraph about this city of the night. One Night is not enough, but I may be able to suggest to my readers the feeling of one beautiful night in the one night here. An artist friend was going a short way to change his residence into city, and with him I went, attending us also was a servant with a lantern to light us through the dark. Old Bagdad seemed more real when we were attended by the Slave with the Lantern. Night is kind to Bagdad, it covers up its squalor, and then as my artist friend expressed it, it opens nothing silver on a hundred domes and minarets." To walk through those little narrow bazars, roofed by rafters and matting, through which the stars winked, to see a fine old mosque framed by the lighted latticed windows of an overhanging casement but the nearby black shadows of ancient palms, to see even cobbled alleys change into an entrancing chiaroscuro under an eastern moon, twinkled at by stars that have been worshiped since before Omar Khayyam, to hear the voices of the night linked by motor and train with western civilization, is the winter sport supreme.—Buffalo Express.

Turkish Food Product

Sujuk is a Turkish preparation sometimes called rajik and is made by stringing walnuts on pieces of stout twine about one yard long and immersing them in a mixture of grape molasses and flour. After receiving a coating of about one-fourth inch, they are withdrawn and hung up to dry. It is said to be an excellent article of food and palatable.

Pointers on Reading

Doctor Johnson's advice is sound: "A man ought to read just as inclination leads him, for what he reads as a task will do him little good." Yet one should not dread occasional boredom; they shoot one off to the right channel. Rejection is a great part of reading.—John o' London.

Hawaiian Girl of 7 Saves 2 From Sea

Hilo, T. H.—Violet Kunka, seven years of age, Hawaiian girl, has been hailed here by a community heroine following the rescue of her younger sister and a playmate who had drifted out to sea in a rowboat.

The two children were playing in the boat and did not notice that it started to drift away from shore. The witchment she rippled, "I am sure it sounds crude but I even think differently when in an evening gown."

Two months had passed, every fiber of his being was atune to life. They were returning from the golf links, and Bub at the wheel was space with the speed law.

"Stop Bub, let's enjoy the sunset."

"Ah, chuck it, I'm afraid it's the clasp stuff. But here goes, I'm issued you know."

She halted the car near a spreading elm. He deposited a hamper on the ground. The girl's eyes flashed pickaxes as they lighted upon it, for she had been ignorant of its presence in the car.

"Bully for you Cousin Gloom, take it all back about being leased; the pleasure is all mine." The man smiled.

The healthy appetites, the appetizing food, the balmy, radiant sunset air made the feast a merry one. They lingered on the slope of the hill "to see the sun to bed," Bub said.

The Gloom-man as they turned drew a slip of paper from his pocket. "Bub, there is my check for three hundred dollars. It's two months instead of three, but you have earned it royally. I wish to release you hoping we may remain on a pleasant footing."

Bub looked perplexed and uncomfortable. "If know you are all to the good, but I can't take all of it. I haven't earned it, it's the amount I named, and it makes me feel like a lemon."

"You must keep it, Bub; your services were invaluable. I have better poise than I ever before possessed. I feared social embarrassment, but you angered suit coaxed me back to normal, and I'll never lose it again. If my self-love could save you for life I should be happy. Why couldn't you marry me if you would?"

"Father would object," she roguish, ly replied.

"That if your father released you from your promise to him?" he persisted.

"Cousin Gloom, which of my two do you like best, evening gown or duds?" pointing to her golf costume.

"Bub, I think if I had to choose I would say the basic of the evening gown, but I can't be sure. Why?"

"Say, Cousin Gloom, the shadows are changing way, we'll spin toward home, and on the way I'll tell you why I think I couldn't if I would."

They left the park. Bub brought the car to a standstill under an arc light and hopped off—her cue, that is why." She removed a wig and laughed. "Don't take it too hard, old man."

The Gloom-man choked. "A boy!" "No, a girl," she sang," said Bub, as the wig and cap were replaced.

The car passed at Bub's door. Bub helped him at the right and said, "I never could earn that much. Could you make it a three months' engagement? Would you for the sake of respectability call for me and take me home each day?"

As the man was still silent she beamed persuasively, "Am I the rejuvenator?"

"You interest me," declared the Gloom-man, "and I'm especially in hope. Yes, I'll meet your terms. It is your due to know what sin ple is. I was engaged to be married to the sweetest woman on earth, so I thought, and on the eve before our four. I'm broken, nothing interests me." He added savagely, "You'll hate me for it for it's weak."

"No," she answered softly, "I like you because you care. Don't get cold feet, I couldn't marry you if I would. Let's go see the ball game. I want to see the Cubs win. Oh, I say, we'll just be chums and die! I'll not have to count the cois we can have the time of our lives. I'm going home, call for me soon."

He followed her to the library door and she turned a pale face through it. "I'm sorry about my slang if you care. Dad says no one would guess the money he's spent on my college polish. Say, when I have on an evening gown you can't guess what a polished lady I become. I'm going to call you Cousin Gloom. He's a cousin of mine," she trilled.

The Gloom-man caught her hand, "You are good for the darned."

She quickly discarded his hand. "None of the clasp stuff, just a good time. Only I'm not responsible, I'm bump."

The ball game was over. Bub had proved his automobile she quietly took the wheel.

"Bub," exclaimed the Gloom-man, almost with enthusiasm, "let's dine this evening, clothes and all, at the Biscayne gardens?"

For a moment she seemed embarrassed, then grinned. "Hats, it's a cinch. I'm hired by the day. We'll go."

They were waiting for the ordered dinner in the served, dainty glitter of lights, the bewitching music, and the buzzing voices, enveloped them. Bub was demure, transformed; the Gloom-man could not account for the change.

"Bub, do you believe in dual personality? I believe between the two of you I will rejuvenate." And the man almost smiled.

"No," she replied, "not dual, just different." With a merry laugh of be-

Style Tips

Green is the spring color. Capecoats and caped dresses, even capes of lace, will flap in the spring breezes. Skirts remain knee length and ensemble suits for morning, afternoon and night continue to relax.

Chintz Patterns in Rayon

A new type of chintz has much rayon through its surface and gives the effect of flowered taffeta. It is very decorative and not laundered.

CHIC MILLINERY FOR CHILDREN; CAPES INVADE THE PARIS MODES

EVEN a joy ride in bright spring weather promises mother and little daughter nothing pleasanter or more alluring than a shopping tour does, when its objective is a new hat or two. It is all because the spring styles have so much that is new to offer and hats are so varied, that they afford just one pleasant little surprise after another. After a season of very simple hats, with so much similarity in shapes that they could not keep from becoming commonplace, this winter's offerings are delightfully surprising in their variety and originality.
